Clarification...

I am an offshore sailor who crews for other folks. I like to carry an HT. In the event of an emergency, I would like to be able to depend on my own equipment (and not have to carry multiple radios). I am aware of the type regs regarding radios. We are all also aware of the "any means, any power" reg in the event of an emergency. If I have to evacuate someone onboard, I want to have a simple and reliable means of communicating with the coastguard on marine channel 22. Seems radios are the first thing to break on sail boats.

73,

Pete

Hey LARDASS......Have you been turning Mother over like I have told you to do? Those WELTS are getting pretty bad!!!! Anyway, it does not matter much.......'Ole GOAT will kick by mid-summer,so say the Vegas oddsmakers.

A couple of questions for you:

1. Does the 'ole bag drink her food from a straw?
2. How often do you change her PAMPERS?
3. Does the 'ole GOAT still remember if you are her LOSER SON?
4. What outfit will you dress her in before you chuck her in the hole in the backyard?

Mother wants her food now....."ring-a-ding-ding" hohohoho.

Lloyd,

You are in desperate need of a attitude adjustment. However I know I,
nor any of us here, can give you one. But please accept this in the
manner it was meant.....you can't blame Doc for Herby's problems. You
can blame Herb himself.

If he would have just kept his mouth shut, none of this would have
happened. If you doubt what I say then ask Mr. Shoenbohm himself. He
and I have discussed this "situation" over the years, many times.
You will be surprised to know that I, W4NTI, NEVER SUPPORTED his
removal from amateur radio. This view is totally opposite of those I

hang with. Again, if you doubt me, ask Herb.

You are possibly now asking ... why in the hell didn't he (Dan) support Herb???.....In the heat of the battle, one makes choices. Maybe right and maybe wrong. I'll never know which. You can accept this or not, I don't really care what YOU think of me Lloyd.

Now on to you....may I suggest you keep your ignorant (as in not knowing) opinions to yourself. And please quit making threats on this newsgroup that you KNOW you can't cover.

The WAR IS OVER, the two heads are cut off. The foot soldiers have been wounded or deserted. PAY ATTENTION LLOYD.

Roger,

Take LRod's advice. Maybe you have noticed that W4NTI is not being attacked lately, and W4NTI is not attacking lately. Well actually for the last several months. Why you ask? It's called "Non aggression pact" with the opposition. It works for me.

Not always the case.

>Not that I defend the unusually high
>level of taxes we all must pay these days, rather, it's a question of
>paying one's "fair share".

When one's "fair share is up to others, it's always more than anyone could ever imagine. What If I thought your fair share was 100% of your wages and your next door neighbor was only 10%. Not very fair at all but an example of class warefare used by the elite to keep us occupied. This is a good example of the "graduated" income tax that is pushed by the communist manifesto. The CONSTITUTION forbids direct taxes on wages.

> the IRS came
>down on both of em like something out of the old Dragnet TV show.
>
>

The IRS. Funny. A free country supposedly with a police state enforcement agency who threatens people and steals money and poperty without due process. All within the venue of taxes being voluntary. The IRS has no legal right to take anything from anyone. But people think they do and so they get away with it.
I defy anyone to prove that the taxes you pay go to the US government. They do not. The taxes you pay go to the Treasury which is controlled by the Federal Reserve. The Federal Reserve is a
cartel of banks set up to bleed the US of its assets and has been doing so since 1913.
When the average every day guy or gal is paying over 50% of his/her wages to state, federal and local taxes, it's tea time in Boston all over again.
Paying taxes to an Unconstitutional overbearing government is not only stupid, it's unpatriotic!

Typical Walt, he is probably related to Bill Gates.

To the original poster. Maybe it would be better to design a logging programme in a modular fashion. Single/multi user (for contest and Special event stations) and to run on several OS's (maybe there is still an OS2 user about). IMV it would be best to make it also available in a text screen mode to run on terminals off of a single multi-user system (eg Linux/Solaris)

Unfortunately, you are mistaken. The "no-code" license is one of the 3 classes
that will REMAIN after restructuring takes place. [I'm disregarding the
renewal-only classes.]

The flip side of that is of course that you can spend so much time trying to extract requirements from a prospective user-base that hasn't a clue about what it wants that you are doomed to fail to start.

Better some OpenSource code that does most of what I want, than a documented set of requirements that describe what I want :)

He's the fellow who's been complaining about college-required courses
outside of his programming major. It's obvious from his posts how
important non-major-related courses are, regardless of what one
will eventually specialize in. No matter what one's career will
be, that person still needs to function in society; college grads
are supposed to be our future leaders -- a narrowly defined education
makes one a poor leader.

(And no need to fill my mailbox with your comments -- post to just
the newsgroup.)

29. Three Strikes, KV4FZ is Out--Maybe

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-01 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <13221-38BD9401-23@storefull-245.iap.bryant.webtv.net>
Source record: 118062

KV4FZ , Herb Schoenbohm of St. Croix, U.S. Virgin Islands, lost his appeal on Feburary 29th, 2000 for renewal of his amateur radio license.

In its order upholding the FCC, the U.S. Court of Appeals for the District of Columbia said: " it is well recognized that the Commission may disqualify an applicant who deliberately makes misrepresentations or lacks candor in dealing with the agency." Not only did the Court rule against Schoenbohm on the material issue but on many legal technicalities as well.

He still has a right to petition the U.S. Supreme Court for review, but the high court generally refuses to hear such appeals. The FCC may wait until the time for this right has passed before barring him from ham radio, just as they have allowed him to operate during pendancy of his appeal.

In Herb Schoenbohm, we have the downfall of a tragic figure, a true Shakespearean tragedy. Here's a guy with more brains than God endows any of us, living on the pristine island of St. Croix, with loving Wife and family and ham radio a-plenty. Polarizing the amateur community, he has always insisted upon having the last word, portraying himself as a victim of persecution.

One side of Herb Schoenbohm is politically involved. His keen mind, facile in communications, is capable of sorting out complex issues of history and politics. He takes strong views, which he isn't reluctant to express nor have contested. There is a fun Herb who likes music, conversing in a quiet club and partying. Another side soars in times of disaster.

But he is a troubled man, unable to determine right from wrong, riddled with bad judgement, unempathetic in his dealings and rigidly inflexible. The tragedy of Herb Schoenbohm is not only loss of his ham license but that this human being of such potential is unaware of his own failings.

In 1992 a jury found Schoenbohm guilty of "possession of a counterfeit access device with the intent to defraud." Specifically, he was convicted of possessing Caribbean Long Line Services (Calls) pass codes with intent to defraud, then using the service illegally. In 1994 an administrative hearing was held on renewal of his ham license, where Schoenbohm maintained his innocence, in the face of his judicial conviction, before the FCC.

Trouble was, he had, in fact, used Calls access codes unlawfully. When his tinkering was broadcast more than once over the 20 meter ham radio band, observers say, he sounded like a mischievous kid having fun. He

was apparently oblivious to the storm gathering under enforcement of new statutes designed to thwart credit card fraud. Though he had crusaded against bypassing telephone tolls, especially on ham radio, he led with his chin in his own downfall.

Schoenbohm's testimony in 1992 had been less than candid, but the prosecution had abused process to get him on the stand. It had fabricated a printout which showed the value of his illegal calls to be over $1000, the jurisdictional minimum for two other felonious charges that were later dismissed. Prosecution strategy plus Schoenbohm's inability to tell the truth would prove, his undoing.

He had put his entire faith in his lawyer, who had just returned from a Nevada vacation, at which time Counsel and client met hastily. Learning very little about the real facts, Counsel concluded that Shoenbohm's would be an easy case to defend.

Both lawyer and client were in for the surprise of their lives. At trial, the prosecution managed to foist on the Court the "smoking gun," bogus printout. In turn without opportunity to check it (eventually it would be discredited), the lawyer made the decision to put Herb on the stand.

None of us could have weathered testifying under those circumstances, because the lawyer had taken the liberty of distancing his client from the charges, arguing, Schoenbohm knew nothing about computers. The prosecution had placed printouts strategically, so that when Herb took the stand he appeared the high-tech version of chains and irons, surrounded by incriminating evidence. And the Prosecutor would corroborate this scene with examination about Schoenbohm's computer savvy.

Among the witnesses present were officials from the FCC, who saw the government's misconduct for what it was. They were ready to forget this saga if Herb came clean on his licensing process.
True to form, Herb has continued to insist that he never used Calls unauthorized codes when he clearly did. Here is a ham, Herbert L. Schoenbohm of St. Croix, hamstrung by his own arrogance. And the ultimate price will most probably be loss of his amateur radio license.

Bob Sherin, W4ASX
Miami, Florida

Yes there are Millions of "idiots" out there happily buying and
selling pre-paid via U.S. Mail and UPS etc.

C.O.D. has an inherent risk! The guy swho ends you a couple of BRICKS!

It happens more among CB'ers from what I am told.

You can't tell what's in the box until AFTER the UPS guy leaves!
Then it is too late. You have already paid.

There is ALWAYS some measure of risk on the part of buyers and sellers
both.

The best thing is to KNOW YOUR buyer or seller! (as much as possible!)

Rip-offs are rare (as was detailed by one poster on some of the
newsgroups recently)

I wonder why you copied this to SO many newsgroups?

Have you been a victim of a pre-paid scam? I bet less than 0.0001% of
radio trades fail that way.

What losses? Did you lose your radio in the injury process?

> >>>If an injury does not occur, do you still get workman's comp?

Did I say that no compensation can be received for an injury?

This is very much like the kind of deja vu where you never remember it happening
the first time.

> >>If there is no injury, then I won't suffer any loss that you spoke

Wrong again. I never claimed that the county will or will not in fact compensate
an amateur for losses
suffered. You made the claim.

> >>>Were you wrong?
>
> >>I didn't make the claim that losses couldn't be compensated -- you did.
>
> >No.

Injuries? Fine. For making a transmission on amateur frequencies, not so fine.

> >I did not say that.

I contradict nothing. I don't know what the county does. I only know what -you-
say it does.

> Maybe you should have been more specific in what you meant by "losses."

Maybe.

Do they let you engrave your name and call on the front of that radio?

I draw the line if they let you sit in one of their chairs or let you have a cup of coffee.

;^)

You know Bob, this time your absolutely correct! It's just a pity ole Herb
wasn't
born in Germany or Austria say around 1900 - 1905. He would have made a
great
member addition to the Brown Shirts during the Beer Hall Putch. I don't know
about you, but I have no trouble at all picturing Herb in a cap, leather
cross-belt and
spit-shined knee boots, giving ole Adolf the "Sieg Heil" salute with one
arm and holding a
beer stein in the other......

38. Need working codeplug for Saber "R".....

Hi, would appreciate if anyone could e-mail me a operational codeplug for a Motorola Saber "R" twelve channel secure radio, factory ID # H44QXN7139CN, or an alternate one if you think it will get my radio back on it's feet.

I made the mistake of trying to write to the radio with a Pentium class computer (without MoSlo) and scrambled the poor thing......don't make the same mistake with your Saber!!!

My thanks in advance for any help you may be able to provide......Joe D.

Isaac, thanks so much for your commentary.

I agree with you to the degree that the ham community has been radically polarized by this Odyssey. Personally, I try not to be a party to the loose talk, nor do I approve of it. But once we enter the public arena, especially if we maintain a high profile, we are fair game for rooters and detractors.

Displeased at anyone's downfall, I happen to be one who championed Herb's cause, flew down and helped him. He will tell you that I was instrumental in getting two jury convictions reversed. For me, reporting this story is a sad occasion.

Still, the 1992 trial clearly showed me that, like a mischievous child, not the criminal he was made out to be, Herb toyed with Calls. For license renewal, he needed only to relate the true story to the FCC, as I have reported it here. Yet he has shown himself to be incapable of admitting the truth: What would have been construed by the FCC as a reversible mistake of a rehabilitated ham. That is the real tragedy, not persecution.

>73s, Jim (AA2QA)

I certainly agree. I can see the code issue from both sides now. I was an active HF cw'er from the late '60s through the early '80s when I let my Advanced ticket lapse. Just 3 weeks ago, I went in and retested, passing my 5wpm and my Novice, Tech and General tests. I did have to drill for 10 days on code, review some of the newer RF regs, and read up a bit on packet, which was after my time, but otherwise didn't have to study because I already had a good grounding in the subjects. Now I'm trying to get my code up to 13 in time to take the 1B test before April 15th and get a "code" General - just for old times' sake. If I don't make it in time, I'll be one of these "welfare" Generals everyone is complaining about. I'll still get my code back up to my old speeds before much longer and it won't matter very much to me that I didn't have to pass the 13wpm test to get back on the HF bands. I'll let my fist speak for me <g>.

As long as I can remember, the older hams have been complaining that the newer generation weren't real hams for one reason or other. When I started out, older guys used to complain that you weren't a REAL ham unless you homebrewed everything from rigs to antennas (and I'm not talking Heathkits here). My original Elmer (an older neighbor who helped me build my first rig) thought I was selling out when I bought my TS-520s. Just an appliance operator - no better than a CB'er. Later, when I switched over to an iambic keyer (my Elmer gave me an old navy straight key when I passed my Novice test) I heard the old guys complain that you weren't a REAL ham if you didn't use a straight key. Still later, when they went to multiple-choice questions on the code test, I again heard the old guys complain that it had gotten too easy.

To get a CB "license" (there actually isn't any CB license anymore) you have to buy a CB radio.

To get an Amateur license that includes HF privileges today (at least a Tech Plus), you have pass a test showing that you know FCC rules, standard operating procedures, radio wave propogation theory, electrical principles, radio circuit components, practical circuits, antenna and feedline theory, RF safety, and, Oh Yes, CW. To upgrade to General - the first really usable grade on HF - you have to show more comprehensive knowledge in all of these subjects and more, and, Oh Yes, faster CW.

So now we've removed the higher CW requirement - but we've still kept the requirements for the rest of the body of knowledge. This will NOT turn HF into CB - any CB'ers who want to come over must still pass the same tests the rest of us do, less only the 13 or 20wpm CW tests. To get to the post-restructuring General requires that you at least learn CW (albeit at a slower speed) and also know the same written material that has always been required. Hysteria aside, this isn't really all that much of a change.

Anyway, listening to the all-too-prevalent lids and idiots I hear on HF these days (particularly on 20 meters lately - where you need at least 13wpm to operate), I don't see how a bunch of CB'ers can be all that much worse <grin>.

Try telling that to the thousands of people who run Linux, Sendmail, Squid, Apache and countless other open source programs. Hmm, take away these "useless" programs and you've just killed email, news and much of the web!

Anyway, I digress. As for the original proposal, I am not looking for a general log book, but a contest logging program, where one could (easily) enter the parameters of the contest (for dupe checking, scoring etc), and operate in "live" and "offline" modes.

By "live" and "offline", I mean "live" as in entering the data while one is operating, so the system adds the current time and does dupe checking on the fly. "Offline" means typing in the logs after the fact (something I regularly do when operating portable - use paper logs and then transcribe those to the PC afterwards for the final presentation).

Flexibility and configurability would be the key requirements for my application. Platform could be DOS (runs on anything), Linux or Windows.

Unfortunately, I'm not a programmer, so I'mm tossing this idea to anyone who may be interested (and you'll have at least one beta tester! :)).

First let me preface this by saying that, by no means am I trying to act like any sort of cop, captain, moderator, censor, hall monitor, or anything else. This is just an observation and a request for thought.

There are lots of posts here on r.r.a.m. that aren't on topic, aren't illuminating, are hateful, spiteful, distasteful, etc. I am not addressing them. There is one series of exchanges involving two parties clearly disliking each other that have gone from mildly entertaining to what most would consider "over the line." Frankly, I don't think most people see them as entertaining any more.

Neither party has any actual knowledge of mansion or hovel of the other; neither knows the actual status of live-in relatives, their weights, or their occupations; no one actually knows who works or who doesn't; no one knows of any physical deformities, yet invectives coupled with lurid descriptions continue to fly back and forth. And to no end.

Is it possibly time to consider a truce on those issues? It doesn't even have to be bilateral. One intelligent, right thinking, responsible citizen can bring it to an end. Then we can get back to the off topic, un-illuminating, hateful, spiteful, distasteful, etc., posts we've come to know and love.

Thanks for considering it.

Walking, as a basic form of transportation, is also old, but not obsolete. But if I have to travel from New York to Los Angeles, something a little more convenient would be desirable.

The Porkers 2 were very busy between the hours of ten and
eleven a.m. on Feb 29. This leads one to three (3)
conclusions:
1. They had Bloody Marys for breakfast and were intoxicated
and in a foul mood, or
2. They had bad hangovers and were in a foul mood, or
3. They were up drinking all night and were drunk as skunks
when they made their posts and were in a foul mood.

Any way you cut it, they are not the "Donnie and Marie" of
this news group...they are more like "Dimmie and Misery".

When was the rent due, Dimmy? Bwaaaaaahhhh! Bwaaaaahhhhh!
What happened to your cell phones? Bwaaaahh! Bwaaaahhhh!

<boilerplate response snipped>

Treating it as a hobby attracts more $$$ than treating it as a service. At least where the ARRL is concerned.

Most hams look at 97.1 the same way most drivers look at the 55-MPH speed limit. Everyone knows it's there, but very few care.

I have done a few sales on the net thru this group, two the persons sent the money in advance with a postal money order and I sent out the items the same day or the next day.

The one time I sent a Item C.O.D. Via UPS the UPS people lost the payment and I had to wait for over a month to get my money I was not real happy about this.

This is my $0.02 worth.

There is a lot more evolution involved than in a regular software
project. Releases are more haphazard. QA is not a high priority.
It all works out in the end.

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help curb the growing problem of online stalking, a U.S. Justice Department report recommends. Internet service providers, which link users to e-mail and the World Wide Web, report a growing number of complaints about harassing and threatening behavior online, the report said.

Try Writelog for windows version 10
http://www.contesting.com/writelog/overview.htm

Tired of booting into DOS just to log contest QSOs?!
You won't have to with WriteLog!

WriteLog for Windows combines the convenience and ease of use of Windows with the performance and features required by the top contest operators. No other package matches WriteLog's support for CW, Phone and RTTY contesting.

Whether you are a casual contester who only makes a handful of QSOs, or one of the big gun multi-ops that demands full networking and spotting support, WriteLog has the score improving features you need.

"Finally, a contest logger that let's me use all of the sound and network cards supported by my computer -- without having to remember cryptic DOS commands or confusing memory management!"

WriteLog has helped introduce many operators to the fun of contesting on the digital modes. It's support for RTTY and PSK31 using any Windows compatible sound card (16-bit or better) makes joining the digital game as simple as plugging in a few audio cables. It's easy to tune in RTTY signals using the on-screen scope and WriteLog can "print" almost anything! Head to head tests with other software show WriteLog performs the best under all conditions.

Other logging products struggle when it comes to handling the demands of CW keying from within Windows. Not WriteLog. It can key your radio flawlessly even while communicating to the packet network, talking to the radio, and even connecting to the Internet! Preprogram all of your contest exchanges into the keyboard function keys and you can operate without touching the paddle.

Don't want to buy a special board just for voice contesting? You don't need to with WriteLog. The same sound card and cables you use for RTTY can also be used as a voice keyer.

WriteLog squeezes incredible functionality out of your computer's sound card. For RTTY and PSK31, it can copy audio from two different radios simultaneously! As a voice keyer, you can wire different output channels to two radios and WriteLog's user interface will automatically switch your microphone and recorded messages to the selected radio. WriteLog includes a full CW reader that can copy up to 6 channels of audio simultaneously. It can even copy CW coming from two radios at the same time.

Other helpful operating tools include continuous rate calculation and display, automatic scoring, multiplier check lists, rate graphs, super check partial, check call window, band map, and packet interface. WriteLog includes support for communication with all popular brands of radios. Networking computers for multi-op operations uses reliable, high-speed Ethernet communication capable of updating 500 QSOs/second! Click here to view a sample logging screen.

After the contest WriteLog really shines. Just a few mouse clicks and everything you need to submit your contest entry by post or e-mail is ready. Print beautiful log sheets using any Windows compatible printer. Or simply attach the ASCII files to an e-mail and send them to the contest sponsor. Of course there is full support for the new ARRL Cabrillo format.

Check out the features of WriteLog compared to the competition. We're confident you will agree that it truly is the next generation of high performance contest logging software!

>Treating it as a hobby attracts more $$$ than treating it as a service. At
>least where the ARRL is concerned.

I suppose you're insinuating that the ARRL is a business? Well of course the League is a business. On January 29, 1915, the Connecticut Secretary of State recorded the incorporation of the League under the following three articles:

"Article 1. The name of said corporation shall be The American Radio Relay League Incorporated.
"Article 2. The purposes for which said corporation is formed are the following to wit: The promotion of amateur radio, the organization of amateur radio stations, the promotion and regulation of amateur radio inter-communication, and the relaying of messages from station to station, and the printing and publishing of documents, books and pamphlets necessary to any of the above purposes.
"Article 3. The said corporation is located in the town of Hartford and the State of Connecticut."

Lucky for us that second article includes printing and publishing:
We participate in a self-taught technical hobby/service; not a day should go by without us gaining new knowledge with respect to electronics. The only publications I have always been able to turn to when questions arose which needed immediate answers were the League's pubs.

For some 85 years the ARRL has produced a handbook written so that even a novice can learn and understand from it. The government thought so highly of the Handbook that it was used to train military communicators during WWII. For the longest period, the Handbook was the greatest selling technical book ever published, in and out of ham radio.

During the 50s when SSB was finding its way into ham radio, there was no pub one could turn to to learn about this new mode except the League's SSB Manual. Also during that decade the FCC relaxed the regs regarding mobile operation - no one else published a mobile manual except the League (1955).

To whom could you turn to for the great ideas and techniques that appear in the Hints and Kinks booklets? Propagation and antennas: The Antenna Manual. Who else in the 60s produced a VHF Manual? And when that VHF crowd began exploring FM: The FM and Repeater Manual. The very first book in the 80s devoted to amateur digital comms was the League's Get Connected.

Publishing affordable technical books was one of the original goals in the League's charter; for 85 years they've made information available to the layman that was nearly impossible to find elsewhere. How in the world could you possibly find fault with this business side of the League?

Every ham shack I've ever visited in the last 30 years has had many League pubs on its bookshelves. We are (or at least were) a group with a voracious appetite for reading and learning. Luckily, the League has been able to feed us what we most desired.

Ham radio and reading are inseparable; and it takes a business to do what the League has accomplished.

I don't get it. Why give a fake address for a company you own? By that I mean he claims his address is in Orlando instead of Vero Beach. It's mysterious at best and we folks up here in the northeast are not used to all this intrigue. Is KT4TR really "El Exigente" who must give his approval by sniffing and tasting before any coffee company is allowed to sell in the U.S.A? Or does he sniff and taste for other reasons? Beats me but I must

thank Mr. Soloninkin for his interest.

Yeah, but you did get your money!

With an unscrupulous person the buyer may never get the item. Unfortunate,
but a fact of life these days.

Hi - there is a free source of all the material you will require to
study amateur radio at

http://members.xoom.com/ronber/amateur.html

The material is free for non commercial use and you have the option
of havign a facilitator guide you through the material with assignments
- still all for free - all you need to qualify is a desire to learn

72. Morse exercises No.12

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-01 00:00:00 UTC
From: DTC <dtc@muenster.de>
Message-ID: <89j9da$9ca$1@news.citykom.de>
Source record: 118107
Cross-posted to: alabama.birmingham.radio.amateur,nl.radio.amateur,rec.radio.amateur.misc,uk.radio.amateur

Dear YLs and OM,

DTC's regular Morse exercises transmitted every Monday at 19:00 h
local time in DL on 3575 +/- 3 kHz are available on the Internet as
well, being in downloadable MIDI-file format.

Currently three speeds are offered for download:

Speed "90" (= 18 wpm): http://www.muenster.de/~dtc/nr12_90.mid

Speed "60" (= 12 wpm): http://www.muenster.de/~dtc/nr12_60.mid

Speed "45" (= 9 wpm): http://www.muenster.de/~dtc/nr12_45.mid

Hoping you'll have some fun decoding either on the air or from the
Internet, you may check out your capabilities in decoding Morse. For
ease of reference the content of the Morse code transmission / file
may be accessed at DTC's web site using

http://www.muenster.org/dtc/cwtext.html

Your opinion and suggestions are welcome: dtc@muenster.org

Only an idiot would send equipment to a stranger without payment in advance.
COD is not a bad way to go...but the buyer will pay all COD charges up
front. I believe in both buyer and seller beware.

I'm sure you can, Lloyd..except for one thing..I don't see anything
that links me to this post. I guess your "computer operations"
CERTIFICATE <SNICKER> which was nothing but a data entry operator
course, doesn't cut the mustard, you retard.

>who must give his approval by sniffing and tasting before any coffee
>company is allowed to sell in the U.S.A? Or does he sniff and taste
>for other reasons

This is a rather curious enigma Doc. It has been my experience
that individual(s) who choose to hide behind a "non-standard" corporate
address usually are attempting to avoid payment of income taxes
either State, Federal or both. Not that I defend the unusually high
level of taxes we all must pay these days, rather, it's a question of
paying one's "fair share". Two deadbeet individuals down the street come 2
mind. They used post office boxes and maildrops as "offices". It took some
time for the State and Feds to investigate, but when they were
found out to be falsifying records, making large transactions in
cash, faking recipts and other misc business irregularities, the IRS came
down on both of em like something out of the old Dragnet TV show.

Some "food-for-thought" out of the book of general common sense.

Personally, I'd never do business with anyone who operated out of a post
office box or maildrop address. Red flags go up and the word "boiler room"
immediately comes to mind. (Alot of these "cash only dealers" you see at
computer shows fit into this category. As they say, if it quacks and has
feathers, it's probably a duck.

Then this is your opportunity to qualify as the above citizen.

I know you think you're having fun, but "news group disease" is like any other; the symptoms aren't easily recognized in one's self. It is so very easy to run to the computer several times a day to see what the latest barrage looks like, to see what idiotic statements the foe made, to skillfully craft an erudite and damningly conclusive riposte, to strut with satisfaction back to other business, etc.

At the end of the day however, the bile that rose to help you so thoroughly vanquish the others doesn't recede after the computer is turned off. It stays, bitter and mean, and one's behavior is tainted as you try to transact "normal" activities. It's sort of like game meat from a quarry that was frightened or fighting before it was killed. It's spoiled. It isn't worth it.

There are a half dozen homilies that come to mind to help understand, but I'm sure no one wants to hear any of them.

Okay, I'll just give the openers: when you fight with a pig...; arguing with an idiot...; sticks and stones...; you only hurt your...; it takes two...; be the bigger...; it's better to remain silent...; turn the other...; well you get the idea.

> no where in the regs is "hobby" mentioned -- only "service." What
> service are we supposed to provide? It's outlined quite well in
> our "fundamental purpose" (FCC's words):

That does bring up an interesting issue. While we do have "service" oriented benefits, I feel like that also is living in the past. We have satellites and cell-phones, we don't need ham radio like we did before. Don't get me wrong, I got into the hobby to help with public service of all kinds and hope it continues to help justify our spectrum, but I really believe we are just a hobby with a side benefit, and that the only "service" is to ourselves. Even the "nets" which are supposed to keep us in training for emergencies, and which I know do so to a point, are really just social gatherings where we rag chew. I am playing devil's advocate here because I know this is highly politically incorrect, but listening with my ear to ham radio, I think saying ham radio is a service and not a hobby is semantics and passive off a golf junket to Hawaii as a "business trip" because some business was discussed on the 18th hole. :)

Prove I've been on 14.313, Fatso. I haven't been on that freq since
November.
Hey Dimmy, when are you going to clean up all the junk in your
yard....I've seen a picture of your hovel....boxes strewn about, trash,
old chairs, old tires..what a dump.
And I've figured out why you hide behind mr_cracker, it's what your
classmates call you since everytime you bend over your obese stomach
pushes your pants down and the crack of your lardass is showing.

Prove it, Dimmy. Hell, lardass, I haven't lived in WV for my 45
years, now, you have to remove your head out of your ample ass anfd
figure out where else I 've lived. We all know you've spent time in
prison, Dimmy. and you were a prison bitch for your black cellmate.
Then you were living weren't you, Dimmy?

Matthew,

You've started quite a conversation here and most of it looks very informative. One of the first replies talked about getting your no-code tech license from your local amateur radio club and that's very sound advice. As well is the advice on the 2 meter mobile you were interested in. I own one HTX-242 and also it's earlier version the HTX-212. Both are fine radios.

Also mentioned earlier were repeaters and a great discussion followed. I don't know if anyone took the time to explain what a repeater is but basically, it's one of these building top or mountain top locations that has a radio that recieves your signal and repeats it using a better antenna than your mobile and also a lot more wattage usually. They are mostly run on duplex which means your radio transmits on one frequency and recieves on another.. You don't have to worry about all that once you put the frequencies into memory.. It's all fairly easy and is explained in the manuals from Radio Shack.

I myself have worked a repeater from 65 miles away with my 5 watt handheld plugged into a simple magnetic mount antenna on the roof of my truck. Now let me give a little more info on that repeater I worked. It's part of the repeater network here in interior Alaska that covers over 60,000 square miles. Most of that area is primarily occupied by Moose and Bears but, it's nice to know that if you happen to ride out there on a snowmachine or 4 wheeler, you can always get help if you need it. Here's an address you can look at to see what kind of coverage a really good repeater network has.

http://www.admin.uaf.edu/aarc/AARCrptmap.html

Most of our repeaters are linked together so that I've been able to talk over 300 miles with just my mobile radio and a magnetic mount antenna. It all depends on your local club and the cooperation they might have with other clubs. The network we currently have is sponsored primarily from our club with some help from our parent club in Anchorage.

Another nice feature with a lot of repeaters is the ability to do what is called an autopatch. This allows you to make non-business related calls thru your radio and the repeater. Great for telling your friend to turn on his radio or to call the missus and see if she needs you to get eggs or to call a tow truck when you're stuck.

Well, hopefully I was able to shed a little light on this subject and not totally confuse you. If you have any questions, don't hesitate to ask.

Does there happen to be any known statistic that says "No-code techs are more likely
to break rules"? "More likely to be lazy?" I don't think so.
If you're THAT concerned...since the FCC's doing away with 13 and 20wpm code tests too, that means the ones that aren't lazy can easily upgrade to Extra.

I rest my case.

You can voltage multiply 6 volts up t almost any voltage,
but you didn't mention the coil current at 24 volts.
Most commonly, I've seen Hams tripping 24 volt relays with 12 volts holding
current.

Boy, here we go again. Personal attacks and slander from one of the "sympathizers". Pointing out the flaws in their thinking sure pisses em off doesn't it.
I think I know who you are. Funny how you think you have something. The history of your activity is pointing towards harassment and/or stalking. I notice that you didn't bother to knock and say howdy.
Probably for the same reason that don't use a name here. Chickenshit.
:-)> You aren't saying anything new, hell I said before on the air that I'm renting, so what? I've saved a bunch o $$ over the past six years by doing it.
If you really want to get busy, or busted, check the local FBI-there's someone there with my last name. Have fun - for now. LOL

And your call sign is ???

108. The Concordance of Sex Acts from 14.313 Publishing Inc.

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-01 00:00:00 UTC
From: "\"The\" Dancing Chicken" <novpue@aol.com>
Message-ID: <vp%u4.2663$4c1.121673@newsread1.prod.itd.earthlink.net>
Source record: 118178

YES FOLKS - This is " IT " !! THE complete and exhaustive Concordance of bizzare and unique and "gee they REALLY do that..???" sexual acts ever assembled. This Tome is brought to you as a public service by the 14.313 Snapper Net. Please pass this vital information about to the four breakwinds. The "slang" term of the act itself appears directly above each description. Now you can know EXACTLY what they mean on 3.--- MhZ when they tell the interloper on the frequency to go and "earn your Red Wings....Boy" or refer to the person as being a "Hotdog in a Hallway"

....as that guy has said on 14.313 for almost 15 Years now:

"ENJOY! Ya've earned it!" :) :) :) :) :)

Angry Dragon
Immediately after you blow your load in a girl's mouth, smack the back of her head and make it come out her nose. When she gets up she'll look like an angry dragon.

Arabian Goggles
A "seldom-seen" maneuver when you put your testicles over her eye sockets while getting head.
(Picture it: ass on forehead) It may be anatomically impossible, but what the fuck else is new.

The Bait N' Tackle
The sailors used this one in the old Navy days. Before you go off for a long, lonely voyage, get yourself a tall jar and fill it completely with earthworms. When you get lonely, open the jar and fuck away. The earthworms will provide some slithery stimulation, and your protein load will keep them nicely fed. Gone fishing!

Ballsacking
Takes some luck of the gene pool, but if you're able to do it, always great fun. While you are straddling her, take your nutsack and spread it out over her face like pizza dough.

Bear Claw
A synonym for extremely large pussy lips.

Beef Curtain
The shanked out remains of the labia after being stretched like Play-Doh from an hour or so of jimmy-jam.

Beer Dick
This is what most guys get after a good night of drinking. They tend to fuck anything with a pussy while experiencing beer dick.

Blumpy
You need to find a real tramp to do this right. It involves having her sucking you off while you are on the shitter.

The Bronco
You start by going doggy style and then just when she is really enjoying it, you grab her tits as tight as possible and yell another girls name. This gives you the feeling of riding a wild bronco as she desperately tries to buck you off.

Brown Bagging It
Sometimes you meet a girl with a body like there's no tomorrow but a face like a mangy dog. Don't let that body go to waste and let her hideousness stop you from fucking her though. Just draw the smiley face on a brown paper bag, place it over her head, and fuck away while keeping your composure and piece of mind.

Brown Necktie
You're about halfway through ass-wrecking a chick, and instead of filling up her keister with your demonseed, you pull out and proceed to tittie fuck her, leaving a brown streak between the funbags.

Brunski or Bronski
When a man puts his face between a woman's breasts and quickly moves his head back and forth while saying "Brunski" in a very drawn out and exaggerated manner. (There are many other variant names.)

The Bullwinkle
The sign given to a friend in hiding while doggie styling' some chick. It is performed by placing both hands over the head, with palms facing out and waving wildly. Can be supplemented by shouting "Hey Rocky." (Make sure to use appropriate Bullwinkle voice tone.)

Butter Face
When you see a chick with an awesome body, "but her face", is nasty.

The Canine Special
Liberally apply peanut butter to your dick and call over the family dog. Lick Ubu lick. Good Dog. Arf!

The Carpet Cleaner
While banging a girl doggy style, tie her arms behind her back, lift up her hips, and run around the room pushing her face first across the carpet. Not recommended with fat/large women most often seen at ham fests.

The Chili Dog
When you take a hot dump on a girl's tits and then proceed to titty fuck her.

Chocolate Pizza
Happily discovering hemorrhoids while eating a shitty brown eye.

Cleveland Steamer
The act of leaving a shit stain on the rib cage of a woman while receiving penile pleasure from friction between the mammaries.

Cock-Stuffing
Apparently somewhat on the fringe in gay circles, but involves using thin, cylindrical items (thermometers, wire, rubber worms, etc.), and inserting them into the dick hole. Over many months, continue to gradually ream out the hole-at-the-head with larger items, thus ultimately allowing your "buddy" to obtain the goal of fucking your urethra. Wow!

Cold Lunch
The act of vomiting directly onto some chick's head while she's performing fellatio.

The Concoction
First, ejaculate all over the floor. Next, have your psycho bitch girlfriend menstruate on your semen. Stir it with your finger until you get a nice thick pink mixture. Proceed to paint yourselves up silly, just as if you were in kindergarten again.

The Compton Gangbang
You meet a young lady at the bar. She tells you she has a boyfriend, but she ends up going home with you anyway for a one-night stand. When you take her to your place, tell your friends to wait outside your bedroom door. Just when she's about to get off, your friends barge in the room and plainly beat the shit out of her. That should teach her not to fuck around. (Ladies, feel free to perform a Compton Gangbang on guys too. I know you've got some fat girlfriends to help you out.)

Cop's Delight
The act of taking a girl in the ass, pulling out, and spewing all over her "pastry buns", thus transforming her rump into the allusion of an oversized, quivering glazed donut.

The Corkscrew
Cross your fingers, middle over index. Twist your wrist back and forth and go to work on your desired orifice. With practice, you'll have the effectiveness of a dill press and within weeks you'll be able to bore through wood.

"Corn"
Originating from the fine campus of Cornell University comes this unique, rarely used term. Saying that a girl is "Corn" means, she is so fucking hot, so beautiful, so utterly drop-dead gorgeous, that you would happily eat the corn out of her shit. Can be used as a great pick-up line or friendly compliment, for instance; "Baby, you're more Corn than Green Giant", or "Damn bitch, you are Corn!"

Couch Bombing
When you fill a small ziploc sandwich bag with Crisco (or your favorite lubrication) and place it between the cushions on the couch. You then proceed to fuck the couch as if it were a woman...but no need to buy It dinner first

Coyote
This occurs when you wake up in the room of a nasty wombat and you know you've got to give her the slip. However, you realize that your arm is wrapped around her. Therefore you must gnaw off your own arm to get out of the situation. Can be very painful.

Cum Dumpster
A quadriplegic whore.

Cum Guzzling Sperm Burping Bitch
The once in a lifetime act when blowing a hot steamy load down the back of the girl's throat, proceed to give her a large cold bottle of your most favorite carbonated drink and make her guzzle it down. Then, shake her head vigorously back and forth to create the Cum Guzzling, Sperm Burping effect. A great way to impress your friends.

Daisy Chain
Partner (A) is sucking off or eating out partner (B) who is sucking off or eating out partner (C) and so on until the final person is sucking off or eating out partner (A). Partners can be gay, lesbian or straight.

Davey Crockett
A sexual maneuver in which you slip muscle relaxants into your gal's snizzpod, then slide your head in, thus wearing your partner's now-relaxed snatch-fur as a coonskin cap. Can come in handy on those cold winter nights.

Dirty Sanchez
A time honored event in which while laying the bone doggie style, you insert your finger into her asshole. You then pull it out and wipe it across her upper lip leaving a thin shit mustache. This makes her look like someone whose name is Dirty Sanchez.

Dirty Swirly
While boning a chick doggie style near a toilet (preferably one filled with a healthy load of shit, or some hot piss, or both), stick her head in the toilet and flush...she'll dig it.

Dog In A Bathtub
This is a proper name for when you attempt to insert your nuts into a girl's ass. It is so named because it can be just as hard as keeping a dog in the tub while giving it a bath.

Donkey Punch

Banging a girl doggy style and then moments before you cum, you stick your dick in her ass, and then punch her in the back of the neck. The blow to the neck will stun the muscles in the female's ass, which will constrict the penis and give you a tremendous orgasmic experience when you ejaculate.

Duct Tape Trick
Wrapping a hamster in duct tape so you can safely fuck it without the

danger of a messy split.

Dutch Oven
Entrapping an unsuspecting sleeping partner in a world of ass odor by farting under the covers and pulling them over her head (and yours as well if you're into that sort of thing).

Dutch Treat
The unexpected result of a Dutch Oven gone terribly awry. Can be very messy.

DVDA
The abbreviation for "double-anal, double-vaginal". This is the term used when a girl takes four cocks in two holes. A hard core porn industry norm.

The Electric Chair
Your psychobitch girlfriend decides she wants to try something kinky, so she props your stupid naive ass up in a chair, strips you down, and ties you up. After arousing you, she then takes a car battery and clamps two jumper cables to each nut sack. This causes you to have all sorts of synapses, spasms, and convulsions. She then mounts your Frankenstein and proceeds to get electrofucked. Warning! May cause erectile dysfunction after performed.

Felching
A gay activity which I do not condone at all. It happens when one fag fucks another fag in the ass and then sucks the jizz out with a straw. Only included for those of you who are considering going to jail.

The Fish Eye
From behind, you shove both fists in her ass (or his if in prison). Thereupon she turns around in a one-eyed winking motionsignaling that she has been there and done that.

Fish-Hook
When you pull back towards the pussy after you stick your finger up her anus.

The Fire Island
This consists of telling someone you're going to spunk on their face while they are asleep, only half-jokingly, and then when they don't believe you, doing it just to prove that you're that demented.

Flaming Amazon
This one's for all you pyromaniacs out there. When your screwing some chick, right when your about to cum, you pull out and quickly grab the nearest lighter and set her pubes on fire, then...extinguish the flames with your jizz!

Flooding The Cave
Inserting the penis into a woman's pussy and then urinating inside her. Applies to butt pirates as well.

The Flying Camel
A personal favorite. As she is lying on her back and you are hammering her from your knees. You very carefully move forward and prop yourself (without using your arms) on your dick while it is still inserted in her vagina. You then proceed to flap your arms and let out a long shrieking howl much like a flying camel. Strictly a class move. The Flying Dutchman. This didn't used to be a specific deviant sexual act, it was just a phrase that sounded dirty and would be shouted out during intercourse on occasion simply for the novelty factor. However, its popularity increased and it has now developed into a specific act, namely that of, just as you are about to blow a load, in any sort of sexual situation (even masturbation for those true pioneers who are constantly on the cutting edge of the sexual revolution) you begin to shout, "Here comes the Flying Dutchman!" This should confuse your sexual partner (or whoever is in hearing range) completely, sometimes causing interesting side effects.

The Fountain Of You
While sitting on her face and having her eat your ass, jerk off like a madman. Build up as much pressure as possible before you release and spew like a venerable geyser all over her face, neck and tits. (Better in her bed)

Fur Ball
You're chomping away at some mighty trollop who has a mane between her legs the size of Lionel Richie's afro, a mammoth hair ball gets lodged into your throat.

Gobstopper
With two hands, spread your tramp's anus open, then spit a big-ass loogie down the asshole then close it back up. You can give her a smack on the ass when you're done, if you want.

Golden Shower
Any form of dropping piss all over your partner. Great for those who like watersports.

Greek
The act of using your "glue stick" (if you know what I'm saying) and gluing your gal's eyes closed with your man seed. E.g. "Hey guys, check it out, I just greeked her!" or "Sorry honey, but you asked for the Greek salad

Ham And Cheese Sandwich
Eating a woman's box after you ejaculate all over it. A delightful, tasty combination of her yummy meat curtains with your added cheesy topping is sure to appeal to anyone's appetite.

Hershey Highway
When plugging your girl in the ass, you run into some hot diarrhea. Don't hurt her feelings by getting grossed out though, just pretend it's extra lube.

High Dive
The skill of pulling your Johnson all the way out of your partner's hole and in one motion jamming it home again. Best suited for use in the corn hole, but can be very dangerous.

The Hindenburg
When some slut who is so bad at oral sex, you're forced to cry "Oh! The humanity!" as her teeth scrape your man tool.

Hogging
While intoxicated, high, or just plain desperate, you go searching for the fattest bitch you can find and proceed to ride her like a Harley. Best accomplished with large groups friends.

Hole In One
The act of sticking your dick in your own ass. Just try not to get a huge boner once it's in, or you'll get a nice snapparoo.

Hotdog In A Hallway
When laying the pipe, you realize your dick isn't even touching the walls of her vagina, kind of like tossing a hotdog in a hallway. Most frequently happens when banging the neighborhood trick or if you're slinging a small dick.

Hot Karl
The act in which a woman sucks the cock of the same man who moments earlier was balls deep in her can.

Hot Karl Candy Cane
A variation of the above in which the man who is receiving the oral cock cleaning gives the woman a reach around.

Hot Lunch
The result of defecating a tube of shit directly into a girl's mouth.

Hummer
The well known added variation to a blowjob in which a broad hums her favorite tune while she sucks away. The vibrations felt against your dick will most definitely produce a healthy orgasm.

The Hunter Gatherer
You and your partner defecate while 69ing. Pretty much self-explanatory.

The Indian Cock Burn
While a chick sucks you off, she twists her hand around your shaft as if she was trying to give you an Indian burn.

The Jedi Mind Trick
When banging your partner, you repeatedly shout "I'm NOT fucking you, I'm NOT fucking you".

The Jelly Donut
Give some skank a facial and follow it up with a swift pimp crack in the nose. The resulting blood and jizz that covers her face bears a

resemblance to a jelly donut.

The Juanita Special Bean Dip
While your tramp rides you like a mechanical bull, insert your thumb into her poop chute (be sure to get your thumb nice and gooey), then stick your brown thumb into her mouth, and slip it under her tongue so she can get the full robust taste of the Juanita "special" bean dip.

Kennebunkport Surprise
The act of covertly filling your cheeks with chunky-style New England clam chowder, and screaming in disgust as you hurl it between your partners legs while eating her out.

Kick-Fucking
The act of receiving sexual pleasure from repeatedly getting kicked in the ass.

The Landshark

The woman braces herself facing a wall, naked, hands against the wall, legs spread, bent over so that her ass is lusciously jutting out. (hint: She might want to wear a biking helmet and some rollerblading wrist guards to avoid serious injury.) Next, the guy also naked as well as stiff cocked, walks to the opposite end of the room, places his palms together and raises them above his head, (thus imitating the dorsal fin of a shark) and begins chanting the theme to Jaws. When given some predetermined signal, the guy sprints toward the girl at full speed with his pelvis-out, fin protruding, and rams her dead square in the ass.

The Lorena Bobbit
Obviously, this one is for the ladies. When engaging in some hard core booty sex, squeeze your butt cheeks together as tight as you can, and start violently jumping and thrashing your ass around, in an effort to rip his dick off. (To reach true Lorena status, you must take the severed dick for a drive and then toss it out the window.)

The Menthol
The act of getting head from a woman who just moments earlier ate a numerous amounts of cough drops, thus insuring a pleasurable, tingly feeling on your cock.

The Mellon Dive
Headbutting a woman's big fat titties. Always lots of fun.

Monkey Wrench
When some sadistic bitch takes your dick back between your legs and sucks you off.

Monroe Transfer
When you and your partner connect each other's assholes with a tube. One defecates through the tube, thus transferring the turds to the

rectum of the other.

The Moped
A chick that's a fun ride until your friends see you on it, if you know what I mean.

The Mork
Made famous by Robin Williams on Mork & Mindy, stick your pinky and ring fingers up a girls ass, then jam your middle and index fingers up her cunt. (Please note: Not complete until you finish it off with a Nanoo-Nanoo!)

Moses
A man who enjoys going down on a woman during her period. Derived from the Biblical figure Moses, who parted the Red Sea.

The Motorboat
While performing oral sex on a girl, flap your lips together on her clit, thus imitating the sound of a motorboat. She'll love you forever.

Muff Teaser
Finger, suck, eat, etc. a girl until she is begging for it. Then rub your stiffy round her golden valley until she screams at you to give her a banging. Right when her frustration is at its highest level, stop and finish with a DIY(do it yourself) handjob. Then leave the room without saying a word. Not to be tried if you want to shack up with the selfish bitch again.

The Mung
Obtain a female that has been dead for 2-3 days (the time period since death is important). Then place your mouth just outside her vaginal opening. Have a friend jump on her stomach, and try to catch as much stuff that comes out as you can in your mouth.

Mushy Biscuit
This is actually a very fun game. Just choose a piece of food that you and your male friends like to eat. Then you and your buddies form a tight circle around the food item and proceed to jerk off all over it. Last one to bust a nut gets the prize of eating the food.

New Jersey Meat-Hook
The unusual method of inserting one's finger in the ass of your partner while screwing her, and feeling her cervix. This procedure is most effective from behind.

New York Style Taco
Anytime when you are so drunk that when you go down, you barf on her box. Happy trails.

The Nixon
A variation of the Bullwinkle in which you give two peace signs as your signal of dominance. May enhance the act by shaking jowls and

yelling, "I'm not a crook". This is considered very bold and is frowned upon for those with a modicum of decorum.

Oyster
A derivation of the tea bag which is accomplished by numbing one's testicles with ice and then inserting them in a chicks mouth and letting the tramp munch on them.

Pasadena Mudslide
This happens when you leave a windy shit between the breasts of a woman while you straddle her neck for a blowjob. (A close cousin to the Cleveland Steamer.)

Pattycake
While you're nailing some girl doggie style and your friend is catching some head off the same girl, you get a quick game of pattycake going. This makes you reminisce of your childhood memories and eases the sight of watching your friend blow his load.

Paying The Rent
A position in which the woman is folded in half, knees above shoulders, while the man holds the back of her calves and bangs ferociously.

Peanut Butter And Jelly Sandwich
Shit on a woman's snatch during menstruation. Proceed to munch. Mmmm Mmmm Nasty! (Crunchy or smooth...depending on what you've been eating.)

Pearl Necklace
Well known. Whenever you cum on the neck/cleavage area of a girl - it takes on the look of beautiful jewelry. Fuck that diamonds are forever shit.

The Pig Roast
While you're plugging some girl's hole doggie style, (up the dirt road or the funhole, pick your poison) she's blowing your best friend's cock at the same time, hence simulating a pig on a spit. Very Similar to Chinese Finger Cuffs.

Pink Glove
Hate when this happens. Every so often a girl is not wet enough during sex. When you finally pull out to give her money, the inside of her twat sticks to your hog. Thus, the pink glove.

The Pirate's Treasure
While fucking your girl in the ass, you strike a hefty load of shit. After you've found this buried treasure deep in her booty, you scream, "Argh!", like a pirate.

Plating
Take a clear, glass plate and place it on your partners face, then shit on it. It gives them a nice view without all the messy cleanup.

How come you don't see that on any Dawn commercials.

The Popcorn Trick
First, take your girlfriend to the cinemas, for a nice romantic date. Buy a tub of popcorn, wait until the lights dim, and carefully make a hole in the bottom on the tub. Then, inconspicuously insert your penis through the bottom of the tub into the popcorn and casually offer some to your bitch. When she digs in, she will find nice surprise. Who doesn't love buttered popcorn?

Puerto Rican Fog Bank
While 69ing with your partner, release a cloud of sphincter fog directly into her nostrils.

Purple Mushroom
This occurs when a woman is giving you oral sex and you withdraw your penis in order to poke it back into her cheek. It should leave a lasting impression similar to a purple mushroom.

Queef
A well known, but sometimes embarrassing occurrence. Queefing happens when air gets trapped in a girls vagina, and makes a soft hissing, or farting kind of a sound while that air is released.

The Ram
When attacking from behind, you start ramming her head against the wall in a rhythmic motion. The force of the wall should allow for deeper penetration. Very handy in those lulls in penile sensitivity.

Rear Admiral
An absolute blast. When getting a chick from behind (while both partners standing), make sure you don't let her grab on to anything when she is bent over. Then, drive you hips into her backside so that you end up pushing her forwards. The goal is to push her into a wall or table. It's almost as much fun watch her face hit the floor. You rise to Admiral status when you can bang her around the room without crashing into anything and not using your hands to grab onto her hips

Red Wings
Another name for navigating the moose knuckle with your tongue while discovering the girl is on her rag. Be a real man and earn your red wings soldier!

Resuscitation
When a girl is asleep, carefully open her mouth so that she doesn't awake. Then, squat over her face and carefully place your shit hole on her lips. When the time is right, you let rip the biggest baddest fart ever known to man and see if it wakes her up. Great fun during those long sleepless nights.

The Roddy Piper
When getting your girl from behind, you toss the sleeper hold on her and knock her out ala Rowdy Roddy Piper. While nailing your

unconscious victim, you get to simulate your life long dream of necrophilia. Now you never have to break into the morgue again.

The Rodeo
Similar to the Bronco. You start once again, banging a chick from behind. At a pre-arranged time you grab her hair with one hand just as several buddies bust into the room. See if you can hang on for 8 seconds cowboy. Yee Haw!

The Rose Creeper
Seductively brush a beautiful long stem red rose against your sweetheart's neck, breasts, and inner thigh. Slowly rub the rose along her smooth skin as you tenderly kiss her entire body. After working her into the mood for some deep love making, unzip your fly and pull out your raging boner. Begin to punish-fuck her dumper while whipping her with the rose and screaming nasty obscenities at her. I bet she never saw that coming.

The Rusty Trombone
This is what happens when you've got a less then respectable female (AKA be-yatch) tongue deep in your chute. She wiggles her tongue as she does the reach around to pump you like a Catholic priest doing an Alter Boy, thus mimicking a trombone player.

Sandbag
Under an assumed name in a tropical region, you meet a young hottie and engage in the well known cliche of sex on the beach. Just before insertion, remove the rubber (without getting caught of course), and proceed to bang away until you blow your load, without pulling out. As you dismount and prepare for departure, grab a handful of sand, throw it in her eyes, and run away laughing hysterically while leaving her blinded, butt-necked, and knocked up. Especially lots of fun when accomplished during the spring break season.

The Screwnicorn
When a dyke puts her strap-on dildo on her forehead and proceeds to go at her partner like a crazed unicorn.

The Seatbelt
While one fag straddles his partners cock, he receives a blowjob from the fruitcake on the bottom.

Shirley Temple
Pour a can of 7-Up on a girl's menstruating pussy and eat her out.

The Shocker
When you insert your index and middle fingers in the woman's vagina and pinky in her anus. After giving her a few good minutes of double duty finger banging, pull your fingers out and give your index and middle finger a quick sniff and pinky a good sucking, all in one smooth motion.(a.k.a. Smoking the Pinky.)

Shop Vac
When a dirty, talented tramp stuffs you're entire package (balls and all) into her mouth, and blows you with amazing suction power.

Shrimping
The term for licking or sucking your partner's toes.

Skiing
While facing in the same direction, a girl gets between two guys and jerks them both off, thus imitating some hardcore cross-country action.

Slumpbuster
When a professional athlete finds the dirtiest, nastiest, fattest, most disease-ridden skank and puts the wood to her with the intent that it will break up a slump.

Snerd Nurgling
The act of moving your anal lovers turds about within his/her lower intestine with your dick. Really popular with the lavender boys, hence the expression, "Oh Lance, Nergle me you Snerd"...

Snoodling
When an uncircumcised homo pulls his extra foreskin over the cock of another homo and proceeds to jerk him off. Those gays have way too much free time. Can be used at as a great derogatory term as in, "You Snoodler!"

Snowball
Ah yes, every man's worst nightmare, the dreaded snowball. This happens when a girl blows you and spits the jizz in your mouth. Another definition is when a girl blows some other guy, and then gives you a hot sloppy kiss with some of that guy's fresh jizz still in her mouth. With all those dirty broads out there, odds are it has happened to you. Just ask your friends if it has, cause they probably already know and have been laughing their asses off at you.

The Snuff
Lovingly fuck the shit out of your virgin or ragging girlfriend and wipe your bloody member across her face. Take a couple Polaroids, show them to your friends, and brag that you're a snuff film superstar.

Stranger
Sitting on your hand until it falls asleep and then jerking off, giving you the feeling of a hand job from someone else.

Stranger On The Rocks
Numbing your hand by sticking it in a bucket of ice and then jerking off. Spanken not stirred.

Strangers In The Night
When you and your gay buddy each numb your hand (you should know how by now) and spank each other off. Thus eliciting the feeling of a hand job from someone else, from someone else.

Stingy Nut
When a chick isn't worth fucking; pull down her pants, bend her over, and jerk off all over her ass.

Sud N' Fud
When trying to bang a girl, she gives that same old story, "I not that kind of girl.", "I don't fuck on the first date.", "I'm catholic.", "Stop asshole.", etc. etc... After hearing all this bullshit, you whip out your handy bar of soap. Then lather up her armpit (or any other joint you prefer), and proceed to fuck that instead.

Surfing
This happens when you nail a fat woman. As you watch the rippling effect of her rolls with every thrust, along with the feeling of being drenched, off balance, out of control, and in danger, you are given the sense of riding the ultimate wave.

Swimmer's Ear
When a girl is giving you a good sucking and right before you erupt, you remove yourself from her mouth, place your purple head in her ear, and fill her ear with some sweet love seed. Hopefully, you will give her an infection.

Tea Bag
To perform the tea bag, have the girl lay flat on her back. Then you squat over her with your hands on your knees, and gently dip your nut sac in and out of her mouth in a motion similar to performing some kind of fucked up yoga exercise.

3-Eyed Turtle
Basically plug every orifice of a girl in the following manner: thumb in ass, fingers in pussy, and dick in mouth.

The Tortoise
When you eat out someone who doesn't have pubic hair yet - i.e. you got there before the hair (hare) did.

Tossing Salad
A common prison act where one person basically chows asshole with the help of whatever condiments are available. (I.e. jelly, syrup, olive oil, etc.) I'm never going to prison.

Tropical Wind
When getting your asshole eaten out by a worthless tramp, you break wind.

Tuna Melt
You're down on a chick lapping away and discover that it just happens to be that time of the month. By no means do you stop though. When the whale spews tartar sauce with a hint of raspberry smothers your face.

Twisted Sister
Have your dominatrix girlfriend dress up in some hot black leather gimp wear and proceed to handcuff your hands behind your back and then

force you to your knees. Unsuspecting, diminutive, and cradled over with your ass is in the air, she then gives you the most erotic enema of your life. Now that's some great S&M fun.

Vegetarian Hot Lunch
A variation of the Hot Lunch in which the diner stretches a piece of saran wrap over her mouth such that chewing (for texture) is possible, but no actual contact with waste product occurs.

Wake Up Call
Waking up in the middle of the night with the hard on of your life. You then turn to your fast asleep partner and dry fuck her ass into oblivion. The clincher to performing a wake up call is to act like nothing of the sort happened in the morning. E.g. "Sweetheart, what's that on your back?"

The Walrus
After spunking in a girl's mouth, you pinch the center of her two lips together and hold her nose. This will force the cum to dribble out of the sides of her mouth, thus the teeth of the walrus.

Western Grip
When jerking off, turn your hand around, so that your thumb is facing towards you. It is the same grip that rodeo folks use, hence, western.

Westside Glaze
Same as the eastside glaze, but the majority of your jizz lands on the left side of her face.

The Woody Woodpecker
When a girl is sucking on your balls, tap your cock on her forehead.

The Zombie Mask
While getting head from your favorite, unsuspecting, trash-barrel whore, tell her you want her to look right up at you with those pretty little eyes" when you blow your load. Then, just when you're ready to spew a good week's worth of goo, blast that hefty load in both eyes. This temporary state of blindness will produce the zombie effect as she stumbles around the room with arms outstretched, and moaning like the walking dead.

....that's all folks!! should keep all you 75 meter OP's talkin for a couple weeks
tradin these an storiez like bubble gum cards

Prove it.

> > Sexual Fantasies about another hams wife snipped.

"Ham's," you illiterate.

Sexual fantasies????????????? From somebody YOU picked up from
the "Chicks with Dicks" chat room? <peals of derisive laughter>
Mwhahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahaha!
Dream on, Jimmy. I wouldn't even consider lowering myself down to
your "standards." That's why you picked Donna, because she is a skank,
denture wearing, fatassed, obese, truck stop mama who has more mileage
than the Macks at the truck stop. Of course, you have to take what you
can get, don't you, Jimmy? You're severely lacking in the tool dept.
Ol' SOW Donna has a tattoo on her 400 lb belly and it reads "CUM
AGAIN."
Your projection of your Oedipus complex is very apparent since you
married an old porker, just like mommy. Your real mommy gave you sponge
baths until you were 16, mainly because your drunken and convict father
was never around.
James O' Brainless the II, mental midget, just had to name his "son"
the same name, mainly because that was all he could remember while he
was on that two-week binge. Hey Dimmy, I hear the roaches in your
hovel on Hiram-Sudie Road have petitioned the state of GA to get you to
clean up your trash dump....even the roaches have higher living
standards than you do. I hear that when somebody needs to go to the
bathroom in your dump, you tell them to pick a corner.
Also, Dimmy, is that retard of a kid you and Donna have enjoy you
molesting him? Poor kid, the only pets he has are the roaches and the
maggots from the rotting food that is spilled all over your filthy
house.

Hi Fred,
I think most of us are guilty of thinking of this as a hobby, but
no where in the regs is "hobby" mentioned -- only "service." What
service are we supposed to provide? It's outlined quite well in
our "fundamental purpose" (FCC's words):

97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur
radio service having a fundamental purpose as expressed in the following
principles:
(a) Recognition and enhancement of the value of the amateur service to the
public as a voluntary noncommercial communication service, particularly
with
respect to providing emergency communications.
(b) Continuation and extension of the amateur's proven ability to contribute
to the advancement of the radio art.
(c) Encouragement and improvement of the amateur service through rules which
provide for advancing skills in both the communications and technical
phases of the art.
(d) Expansion of the existing reservoir within the amateur radio service of
trained operators, technicians, and electronics experts.
(e) Continuation and extension of the amateur's unique ability to enhance
international goodwill.

I especially like paragraph (e), encouraging us to work DX!

Is there a mod to open up the transmit
frequencies of the Yaesu FT-10 like
there is for the FT-11?
If so, how far does it open it up and
can someone share it with me? (I would
like to get out on 156 through 157.5 for
marine VHF).

Many thanks!

Jim,
Your LAST sentence says it all even though your entire posting was
excellent. YOUTH is the name of the game and it'll be up to the YOUTH to
save ham radio or let it peter out. By the way do you agree with
restructuring? I think it's a ploy.

122. AF2Y: some words about WA2EXQ

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-02 00:00:00 UTC
From: radiosigs <radiosigs@mindspring.com>
Message-ID: <89mb98old1@nntp5.atl.mindspring.net>
Source record: 117942

Well I'll be a monkey's uncle and probably am. The other day short skip was in and I discovered that WA2EXQ is a trickster. He isn't an anti-Semite at all. He's an atheist who knocks ALL religions and the man has a right to do so despite the attacks on him by Johnny Littleflowers a.k.a John Fiorelli a.k.a. "Happy John" a.k.a WA8PBM plus Ron. K9OEC and one of his kid disciples too.
Lloyd make some good points about 'WHO CREATED GOD" which of course is one of the most basic arguments of any atheist and naturally Ron was stymied by it. Is there a God? Sure and I'll tell you how I know. This tidbit does not come from any Jewish scholar but from a famous Catholic named Thomas Aquinas who has been canonized which means sainted, not shot out of any cannon, you boobs. He postulated 5 reasons for the existence of God and the first was a GEM.
Let's asume that some other force created our earth and the other planets. A big bang or a small bang or Veronica Lake's bangs or chitty chitty bang bang or whatever. Those planets however are NOT stationary-they orbit on their own axes as well about the sun. Who set everything in motion? THE IMMOVABLE MOVER-God. Please no one tell me that they started orbiting on their own; that's stupidity.
However Lloyd did intrigue me and the man is NO dope even though the rest of the BARF were and are. There was something VERY disturbing however about the debate-DOGMATISM. WA8PBM became HOSTILE to Lloyd, telling him to SHUT UP if he didn't believe in God. THAT'S NOT WHAT AMERICA'S ABOUT, FOLKS! We must be granted FREEDOM OF SPEECH even if it hurts. And so even though I don't necessarily agree with Lloyd, I urge him to demand that right which I back 100%.
Then Lloyd discussed the Amadou Diallo shooting just across the river from my QTH. It seemed that EXQ felt that it was murder while some rightwingers disagreed. A journalist recently wrote, "If a white man pulls out a wallet, it's a wallet. If a black man pulls out a wallet, it's a gun." Since I live in the NY Metro area and understand the problems of big city life, here's what's going on. COPS ARE LOSING PATIENCE and are resorting to more force than necessary but then again can they be blamed? A recent NEWSWEEK article pointed out that bullets were found in Diallo's feet indicating he was shot while down. Perhaps a few initial shots did occur as a threat interpreted by the four cops, but forty one rounds with nineteen hits? Who was Amadou, Clyde Barrows or John Dillinger or Pretty Boy Floyd.
But then again why didn't Diallo simply raise his hands in surrender? Why go for that wallet? Why provoke the cops into such rage?
Now just last night, just two blocks away from where Diallo was gunned down, a cop shot to death a drug peddler with a rap sheet a mile long. And once more the backlash is beginning. What's the solution?
MAKE ARRESTS THE FIRST TIME AROUND,STICK! Stop this revolving door system of justice by building more prisons and keeping the rotten elements behind

bars. Put teeth into the law instead of gumming it. Cops become frustrated. Frustrated cops become irritable which leads to overreactiveness in the line of duty, hence Amadou Diallo.And whatever happened to capital punishment in New York? Everyone thought that with Democrat Cuomo out and Republican Pataki in, it'd be in full swing. BULLBLEEP. They'll promise anything to get elected!

Getting back to WA2EXQ and his detractors, in this country the religious fervor that dictates, "My way or no way" MUST STOP. Anyone on ham radio should have the right to free expression. If KC3AU can get on and preach in favor of God, then Lloyd must have the same right to counter it. And anyone who diagrees can get the hell off ham radio, the same way Lloyd was told to. And those who argue if this be the case then why can't the Liberty Net carry on as they used to, the answer is that atheism isn't hate speech. If God is personal then so is anti-God.

Amen.

For those who didn't know, Schoenbohm was referring to ME. Never did I make any call to any judge; it was a ridiculous accusation without any merit whatsoever and furthermore Judge Luton never needed convincing that KV4FZ was worthless on the bands.

Thank you Tim! You have confirmed what alot of HF hams
are: Condecending, cheap-assed, whining, WASP's who
would drive 10 miles to pay one cent less per gallon
of gas, then complain there also. Saw one such atypical
asshole at a hamfest just a week or two ago. The fat
bellied slob actually tried to knock down the price
of a 50 cent item on a table. The dealer did the right
thing however, he took it from his hand, stomped it
flat (a radio tube) then handed him the pieces and told
the fatass he could have it for free. Don't think I laughed
so hard in quite awhile.

But if you look at where the news story originated from, Sacremento,
you'd realize that it was a wire press article. Thus, it was probably
a Reuters or AP story. Going to their sites and searching their archives
from 9/10 through 9/16, you'll probably find the original article. That
should be a no brainer for a stalker.

I believe CNN covered that same DoJ report the day previous to the news-
paper article. (You really should keep up with the national news!)

Hello Isaac.
I am a stockholder of AOL----lately I wish I was not due to
the stocks decline after the merger announcement.
I have contacted AOL and DEJA news in regard to this posting and
have asked them to remove it. I have also asked them to consider monitoring
KC8JBO's postings and should consider banning him from these newsgroups. With
all of his hateful postings I'm sure there is enough evidence for these
companies to act in this matter.
I am still considering a lawsuit in this matter. I have contaced my
lawyer and will
decide in the next week or so if I wish to continue with this .
An apology would end this matter with a retraction on this and any other
newsgroup in which that posting apeared.

Excuse me but to me it's only fair to help pay for being in the greatest freeest country in the world. And if you think it's so bad, then pack up your friggin' bags you lousy s.o.b ingrate and cart your posterior out of here. You're insulting MY America to which my father emigrated from being oppressed in eastern Europe in 1920 and we all learned to kiss the soil on which we walk. America's not perfect but we're closer than any country in history. You and your ilk disgust me, you unpatriotic, despotic and rancid ingrate.

Well aside from buying used equipment for cheap, if you are looking for brand new I would suggest either the kenwood 261-a or icom 2100. the kenwood is probably the most inexpensive at $179 but it does not come with PL decode, as it is an extra $50 option. the icom does have PL decode if you are interested in that and i think it is priced around $190 these days. And as for antennas, i would suggest the Larsen 150 series 5/8 wave whip. I use a 261-a with a larsen antenna and they have always been stellar performers for me.

Didn't mean to hurt your feelings but I'm a stickler for good English since I was a language minor in college and the reason for it was because I was under 21. Please keep in mind that the lingo we take for granted is the most studied in the world therefore it's as precious as I. Students of it would give anything to have a command of our native tongue therefore I demand it be used properly. And come to think of it if you want a piece of good native tongue, go to the Rascal House on Collins Avenue, Miami Beach or maybe you have a New York deli down there? Look at all the geniuses who mastered our language and put it atop the verb chain...Shakespeare, Chaucer, Mark Twain, Choo Choo Twain, Abner Doubleday, Wesley Chupp, Mike Galego and Al Pacino. When KV4FZ had his own talk show and addressed millions in the Caribbean, did he get his message across in Polish? Of course not because had he, the government would not have been so afraid of him leading to persecution and silencing as he claims. English is just too great to abuse and more times than not, that's what I see on this board and hear on the bands. "ABUSEMENT" as Mike Galego called it. Actually to have heard that dunce was more amusement and astonishment at his complete lack of dignity and common sense. But all in all Bob, you do write very well although I don't understand your legalese but what's more important is that YOU do. Must go now. Going to split an infintive and have it with a potato pancake and a glass tea.

Hello,
I would like to have info regarding any dealings that my fellow amateurs may have had regarding Ted Seely, AA4GM as I had some bad dealings with him regarding a deal on Yahoo Auctions for a pair of Heathkit twins. I won them fair and square, but apparently once he found that I am JUST a No-Code Tech class amateur (he being Amateur Extra) decided to not answer my emails in reply to his emails to confirm the winning bid.
My query resides in the above dealings in that I wish to know if this Amateur is renowned for this type of dealing with other subordinate hams. I thought this was a fraternity of learning and mentoring of younger hams by Elmer's who would encourage, but I think that this man overlooks the elmering he once had and the gleam in a budding amateurs eyes at the glowing of vacuum tubes that reminded him of the day when he himself was 13 and an uncle gave him his Heathkit twins to remember him by and possibly become an amateur and subsequently passing this to his children or family members some fine day in his old age. Please if you have ANY such info please contact me that I may warn some of my young amateur friends to STAY AWAY from this man.
I'll step down from my soap box now a bit more educated and CAUTIOUS of my fellow hams as I have been bitten.

Good Ol' Jeffrey the fraud weighs in.

Jeffrey would have you believe that he in an instructor at the
University of Hawaii but if you try to look him up on the
faculty/staff list he's just not there.

Try http://www.hawaii.edu for yourself perhaps you can find Jeffrey or
his email account I sure couldn't. I'm just not sure this boy really
works there, if he does he sure doesn't show up on the list.

But all this aside we should take Jeffrey's word or that of his local
paper as competent legal advice; and of course credibility

He said he was an off shore sailor. Off shore the above situation
would warrant a distress call. If the other radios were not working
because "all power was lost" then a back up would be in order.

> would you use your HT illegally to call for help?

In a case of distress when other means are unavailable, then it
wouldn't be illegal.

> (The USCG would probably refer you to a commercial towing
> company.) How about if the boat went aground on a sandbar in calm

>
> If we define "emergency" as a life/death confrontation, then
> neither of the above cases warrant being called an "emergency."

Distress is not just life and death. Immediate threat to property can
also constitute distress.

> Why not use a cellphone as a legal backup to the onboard marine radio?

How far off shore would rely on a cellular phone? I would use the ham rig on channel 16 before I went to cellphone for a marine emergency. the problem with distress call on cellphones is the only party that can hear you is the party you called.

Mayday calls are not supposed to be directed to any single station. If you are in distress on a vessel, it benefits you to have as many stations hear your call as possible. Having the Coast Guard answer you is fine, but among the people listening, there may be a station close to you that can help. Imagine how you feel if you were on the phone with the CG describing an emergency when there are a dozen other boats on the water within sight of you.

With all that said - there are a lot of people that modify amateur rigs to avoid aquiring more appropriate equipment. That is wrong thinking.

> with respect to providing emergency communications.

<snip>

This speaks to the original rationale for requiring CW skills - CW was critical to our mission of providing emergency communications in degraded conditions where other modes couldn't get through dependably. In today's world of cell phones, satellites, and digital communications, virtually everybody in the commercial and military world has abandoned CW in favor of the superior modern modes. CW is no longer necessary to fulfill our 'service' requirements - hence, whether we approve or not, it is expendable. In the next year or two, I wouldn't be surprised to see it disappear entirely from the treaty requirements for operating below 30MHz.

Nobody is being forced to forgo the pleasures of CW QSO's. I like CW and expect I will continue to use it as long as I am on the air. I don't think, though, that it is the acid test of who would make a 'good' ham and who won't. Like the older doctors who don't want to see the Interns' 24- and 36- hour shifts eased up, too many hams seem to feel that "since I had to go through it, you should have to."

Although a significant minority of hams still keep up their CW skills, I would bet that if we all had to requalify in code every time renewed our licenses, there'd be a hell of a lot fewer voices on the HF bands. I wonder how many of the current "code whiners" would be among them <g>.

No that's not it at all. The first person working on it will come up with the features they want. Other people will see a good foundation and add the features they want. The program will evolve into something useful for a lot of people. Nobody sits down to write a requirement specifications before they start, because when you're doing it for fun that's probably a good way to kill the whole project. Sure it might save some time but so what?

I am curious - what speed Pentium were you using? I regularly program Sabers and other Motorolas with a P133 notebook without a problem. I have observed people having problems with faster machines on certain software, but it resulted in the radio not taking the programming - never seen it wreck a code plug.

Often scientists and engineers developing a new project hack together an idea (prototype, if it sounds more professional) and it is passed to programmers who take the concept and turn into a product.

In these instances, the requirements aren't defined at the start because the project limits haven't been investigated enough to be able to develop a set of concrete requirements. Sure, this means that some work falls by the wayside, but that is what happens with experimentation in any area.

Open source projects aren't that much different, except people tend to be more dedicated because it is a labour of love.

Mark.

184. Question distribution in new HAM Tests

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-02 00:00:00 UTC
From: tim@neudecker.org.nospam
Message-ID: <1e6uxw8.vfc1oefkb588N%tim@neudecker.org.nospam>
Source record: 118023

I have downloaded the new question pool from the ARRL website. I am almost done writing a shareware cross platform practice exam program. The last function I need to write is one to randomly pick questions for the practice tests. I don't know the distribution of the sub-elements in a test to finish this last step.

Does anyone know what the question distribution will be in the new HAM tests after the restructuring? How many questions from each sub element for each of the three tests? I know the total number of questions but not the break up of each test.

Thanks for the help

Source record: 118027

Fascinating stuff chaps, but if you look at the ITU regulations
defining the Amateur service S1.56 and S1.57 you'll see just
"self-training, technical investigations and
intercommnunications",
and as the first two are seldom practised by amateurs that leaves
just intercommnunications - no more than CB, regardless of mode!

Interestingly S1.98 says : "experimental station: A station
utilizing radio waves in experiments with a view to the
development of science or technique.
This definition does not include amateur stations."
..Amateur radio hasn't been advancing the human race after all!
Maybe some Amateurs have, but not directly in conjunction with
Amateur radio! Ah but, would they have if it weren't for ham
radio... ?

The agreed regulations concerning international comms include
S25.5 : "Any person seeking a licence to operate the apparatus
of an amateur station shall prove that he is able to send
correctly by hand and to receive correctly by ear, texts in
Morse code signals. The administrations concerned may, however,
waive this requirement in the case of stations making use
exclusively of frequencies above 30 MHz."
.. but this gives none of the reasoning behind this.
This should be, and will be, re-negotiated in the light of
modern times, given the current state of play including the
internet.

And no mention of any speed, be it 12wpm or 5wpm or less!

see this page (48k) for more details...
http://www.geocities.com/rf-man/howto/become.html

CW should be left to those who WANT to do it AND NOT FORCED ON
ANYONE.

Some might feel that this goes against all the history and
traditions that have made Amateur Radio what it is today. I say
take a good look at what Amateur Radio is today, what it will be
tomorrow if nothing is done, and what it could be tomorrow if
given the chance.

Roger, I have been watching your messages and I have come to the conclusion that you need some proffesional help. Not only are most of your messages bizarre but they are always confrontational. I have heard you on 20 meters when you ramble on as if you are in some drug induced stuper. Also I have noticed that your messages come through out the day which tells me you do not work nor do you go to school. It appears as if you are indeed a very troubled person. This medium appears to be your favorite because you dont have to worry about someone punching your fat face for your comments-indeed you wont talk on ham radio because such a one on one QSO scares you. Roger I dont know what your age is but your life appears as if it is a total waste. Perhaps you would do us all a favor ad commit suicide. No one would miss you but we wouldnot have to read or listen to your babbling.

Sincerely,
Pit bull

Thanks for answering Irv. You're insinutating that Bobby Boy may not be paying his fair share to Uncle Sammy? Not he. Impossible. He's an angelic boychik. Ask him. It simply beats me because I'm just the average Joe who weeps every quarter but still antes up. I don't know this fellow Ishmael Soloninkin who sent me the info but based on what I do receive, Bobby ain't too loved in his immediate neighborhood. Oh well, not all of us can be as adored as we two, right?

Steve:

Before doing the lawsuit, I would contact his ISP and get him thrown off. They DO NOT TOLERATE this type of libel and it's written in his "Terms of Service" agreement. He's using a DEJA account, so see if you can him tossed from there, first. If you like several of us to complain to "Deja abuse" on your behalf, we will be happy to.

His original ISP account should be located in the headers under DEJA. If it's AOL, you'll have some difficulty since they get quite a few of these complaints. You might want to get in touch with KT4TR who has access to the stock holders of AOL and can get this idiot removed from that direction.

That's commendable, Pete, but at what point would you use
that radio illegally on the marine band? Suppose the sails
were torn, and all power was lost. You're really not in
distress; would you use your HT illegally to call for help?
(The USCG would probably refer you to a commercial towing
company.) How about if the boat went aground on a sandbar in calm
weather and there was no power for the marine radio. Again, not a
life/death situation -- would you use the HT illegally in that
scenario? (Another case for a commercial, not CG, tow.)

If we define "emergency" as a life/death confrontation, then
neither of the above cases warrant being called an "emergency."

Why not use a cellphone as a legal backup to the onboard marine radio?

Gentlemen, the flames here are shooting way too high and things are getting out of hand. Nothing's wrong with a bit of tomfoolery but the enmity here is disturbing to say the least. When ill parents are mocked and the term AIDS is tossed about and a lot more I see, it's no longer spoofing but just plain SADISTIC and it's gotta stop. Boys will be boys for sure however just step back 10 paces and peruse the situation. My suggestion is that the pious putzes on 14.313 should pray that someone doesn't get shot because of the stuff on this board rather than for Herbie's ticket and pushing their brand of religion down our throats. Furthermore I read and hear about the increasing amount of litigation due to Internet libel and someone on here is going to get his clocked cleaned if we don't wise up and backpaddle. May I suggest that Bob Sherin come forth to lend even more credibility to my argument since he is much better acquainted with legal issues than I and for that matter, you too. And Lloyd Davies..enough is enough. You are the chief instigator of a lot of the trouble here and it's time to stop. Okay?

>

Actually, Doc, if you were to read a bit about the Big Bang, astro-physics, orbital mechanics, etc., you'd find that there is a quite reasonable and internally consistent explanation of how the planets came to be formed in orbits around the sun. Note that they didn't "START TO ORBIT ON THEIR OWN" as you stated, but were, so the theory explains, formed from primal material by the very actions of gravity and centrifugal force that continue to keep them in orbit today. This mechanism is imperfect, accounting for variations in all the planets' orbits (Pluto for example has a wildly eccentric orbit) and occasional asteroids that break free of the gravity/centrifugal balance and come hurtling earthward. One would expect that, if an infallable and all-powerful God had really arranged all this, He would have done a neater and more symmetrical job of it, hmmmmmm...

Acquinas' argument is essentially "We can't explain something, ergo God must have done it." Of course, many of the things that were inexplicable in his day are clearly understood today. I have no doubt that he would have taken one look at a modern day car or a 2 meter HT (or even a Bic lighter for that matter), and proclaimed it miraculous proof of the existence of God. Well, maybe the 2 meter rig might have convinced him mopre of the existence of Satan <g>.

radio_oger,

Service or hobby, what's does it matter? People use different words to describe most everything, some not in the dictionary. For example, young people say "chill" (take it easy).

According to the logic of your post, we should criticise those using this colloquialism; they didn't say specifically, "Take it easy." I prefer going with the flow: If it is understandable, I don't criticise.

>Doc,AF2Y

Let me get this straight. Diallo was shot to death for the crime of Feloniously Trying To Identify Himself To The Cops. I can understand why the cops were so enraged!

Remember that Diallo wasn't born in this country. He didn't grow up on a steady diet of Kojak and Beretta on the TV. Perhaps he didn't know how to behave when confronted late at night by a bunch of panicky, evidently poorly trained, trigger-happy white cops who were primed to believe that every black male between the ages of 12 and 60 was a potential drug dealer and cop killer. Silly him - he did the reasonable thing and tried to show them some ID to prove that he lived there and had a perfectly good reason to be in his vestibule. You can't really think he deserved what happened to him, can you? That's known as the "she asked for it" defense.

Source record: 117884

Actually, around my area its just the opposite. I hear far more idiotic carrying on down on HF. The hams on the local 2 meter repeaters are quite polite and mannerly and are pretty good about radio discipline. I don't hear anyone jamming, cursing, flaming, or not signing properly. All the nets are orderly and professional. The other day I heard a guy on a local VHF repeater say "73's good buddy" and I thought - "Ha, a no-coder." Next thing I know, he signs off with a 2x1 call! Yesterday I heard him again talking about the logging program that likes when he's contesting on CW. Just shows to go ya...

When you think of it, there are a good dozen areas you must be tested on to earn an amateur ticket or an upgrade. The only one that has nothing to do with your knowledge of the technology, the regulations, and the proper operating procedures is the code requirement. Whatever educates a person and makes him/her a good and knowledgeable ham, it sure isn't the code! In today's digital world, the code requirement is just a hurdle, like the 36-hour shifts that interns must endure to get their MD's. The old hams, like the old doctors, say "I had to do it, so you should, too." Some guys just need something to feel superior about.

Ok, so I have an Eagle Spitfire 454 from Copper- I know the mod that makes the frequency coverage just like the Cherokee AH-100 after mods, 25.165 to 29.700mHz. However, if you've opened the rig you know that there's like 10 different solder points there that could be bridged or open. I'm wondering what these other ones do. Why can't this radio open up from 25-32 mhz like the 2950? Is there a mod to make the clarifier track on transmit as well? How about getting rid of that HORRIBLE keypad beep? Is there a mod to step in 1Khz steps rather than 10? There are enough solder pads there for a whole bunch of different mods. Any way to get a service manual for this rig? Or sources for the other clones? All I can find is the Eagle and I've never personally seen the Titan and Dragon versions....

Also- this may not interest anyone here in CB land but I also have a Cherokee AH-50 SF, its a 6 meter handheld rig. It has four open solder pads inside, and two empty holes with a diode picture silkscreened on the PCB. I bridged all four solder points and put a diode in the holes where indicated. Nothing happened. Does anyone know of any mods for this rig or a way to get a service manual?

Hi all.

I'm actually looking for two(2) full Drake C-lines, but I'm willing to put them together a piece at a time.

In particular, I am looking for the R4-C, T4-XC, AC4, MS-4 plus station mic. All must be in as near-mint and fully operational condition as possible. Need manuals and interconnect cables, too.

The R4-C must have a full complement of xtal filters, NB. Late production version preferred.

Please email with price, condition, and any mods that have been performed to:

NeilR@innermedia.com

or you can phone me at (603) 465-2788.

Thanks in advance.

Subject: Re: Is George Bush Sr. a Ham?
From: n8wgm@aol.com (N8WGM)
Date: 2000/01/27
Newsgroups: rec.radio.amateur.misc
Roger is a 45 year old gay man living with his mother in small shack in
a small
town just outside Wheeling west Virginia.
Roger, who is unemployed, is studying to be an electronics expert.
Funny---45 years old and he hasn't figured out what he wants to do with
his
pathetic life except insult people. Gee Rog---45 and you are back at
school
using government money to re-educate yourself because you chose a path
that
lead no-where. . And you're just a General class operator? Some
electronics
expert. Can't pass the advanced or extra class tests......What a
loser....45--unemployed....gay.living at home with mommy...back at
school....a
wannabee Kung foo fool.....and was caught jamming 14.313 by none other
than
Riley Hollingsworth himself. Can you say LOOOOSER!!!!!!!!!!
Roger drives a pathetically small chevy pickup truck---an S-10 that
is just
big enough to handle this obese freak.
As Roger so aptly points out---his fantasies are to have men think
of him
while masturbating......a very sick wacked out sub human terd this
Roger is.
He wants to get into the Guinness world book of records for the most
postings
by a retarded mongoloid and is well on his way to set that record.
Rogers only
claim to fame is that he thinks he's a bad ass and wants the world to

know it.
Funny thing is, he's a coward---hides behind his curtains and his mommies
dress. Typical of a bully who is nothing more than an unemployed smart ass.....LOOOSER!!!!!!!!
Here's a summary of rogers life---------
He was Born Roger L. Wiseman---in September of 1955 into a family that was not
the best. Rogers Father left them when he was around 6 years old......something
about Roger being a silly little fudgepacking geek who will amount to nothing...his dad was right.
Rogers mom was a kind soul.........always looking out for old Roger......you
see Roger was an odd child. His head was deformed from having stuck into places
it should not have been stuck. Roger always came home smelling like a toilet.
Flies were always in Rogers hair......something was not right with this child
and rogers mom knew it. Rogers nick name as a child was "GERBIL".
As a teen...Roger was always asking people....."Hey--do you think of me
when you masturbate?" Roger was hit repeatedly when asking this question and
Roger vowed to be able to defend himself if ever attacked again.....He continually kept muttering .."Those damn HOMOPHOBES." So he took up Karate. His
Karate teacher nicknamed him Gerbil.
In his high school years, Roger was involved in the school band.....he
was into the wind instruments...........and this helped him later in life.
Roger made many freinds with his abilities to play certain wind instruments........all the while thinking----"hey will this guy remember me
when he mastrubates? "
Roger thought allot about masturbating and he loves the idea to this day.

So there you have it...HO HO! Roger Wiseman---the man who thinks men are
after him.

I can flame with the best------and Roger---you loser------can't.

N8WGM

(end of original message)
What about it, TunDuhhhhhhhhh????? You either retract all the postings YOU posted about me, like the one above, or do something else. I have

copies of ALL of your posts like the above, so be ready to address
those if you take legal action. It should be interesting to see your
chipmunk face then.

> I wish you would produce that document here in this newsgroup.

220. Re: roger_oger: ham radio is not a 'hobby'

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-03 00:00:00 UTC
From: Meg A Hertz <meghertzNOmeSPAM@hotmail.com.invalid>
Message-ID: <0481e4e0.c5372dec@usw-ex0103-024.remarq.com>
Source record: 117900

ITU international agreement definition:

S1.56 amateur service: A radiocommunication service for the
purpose of self-training, intercommunication and technical
investigations carried out by amateurs, that is, by duly
authorized persons interested in radio technique solely with a
personal aim and without pecuniary interest.

These things are known as services only from the administration
point of view. Like the Low Power Service for remote controls
and radio mics etc, you're not exactly getting a "service" but
running your own gear.

Those control freaks who wish to stop me enjoying my interest
should pay close attention to this part of the S1.56 definition
of Amateur Radio : "solely with a personal aim" - now leave my
personal aims alone!

It's a HOBBY. One that should be fully available to anyone able
to prove their ability by passing the exam.
The useful and delightful art of CW is NOT fundamental to
running an amateur station on all bands below 30MHz.
CW should be left to those who WANT to do it AND NOT FORCED ON
ANYONE.

Some might feel that this goes against all the history and
traditions that have made Amateur Radio what it is today. I say
take a good look at what Amateur Radio is today, what it will be
tomorrow if nothing is done, and what it could be tomorrow if
given the chance.

Progress. I rest my case.

Source record: 117901

Who says we need a "common mode"? There's nothing in the ITU
regulations about that. It MIGHT be the thinking behind S25.5
BUT we don't know because it hasn't been recorded.

CW is just a mode like SSB. You can have foreign Morse that
you won't understand. Just because common abbreviations are
used doesn't mean the same can't be true on voice! Q-codes?!!
NATO phonetics? If Morse really is the be-all and end-all of it,
why does it have to be achieved by hand and ear? Why not let
a digital DSP do it for you? Same result - life gets easier,
otherwise known as PROGRESS!

Can't you come up with ANY reasonable reason for continuing
with the code requirement?

Read ALL of this :
http://www.geocities.com/rf-man/howto/become.html
.. and if you still don't agree, I can't see how you're
being anything other than a spiteful killjoy fascist
ignorant bloody-minded **** - no offence ;-)

MegHz

Read my lips, it is not defined as a 'HOBBY'. Only in your mind is
it a 'Hobby'. (And a very narrow one at that.)

If you have had either good or bad experiences out here, please make
the appropriate GoodGuy
or FraudAlert postings on the newsgroup.

Use the word "FraudAlert" in the subject box.

GoodGuy if that is appropriate.

What happens is that all the messages here are posted on www.deja.com.

These postings will be there forever for others to read.

All you have to do is go to "www.deja.com" and do a search using a
number of ways
such as name, callsign, email address or whatever else works.

Anything that has ever been posted about that person on ANY newsgroup
will be there for all to see.

Your postings on the newsgroup will alert others as to whether they
should deal with the seller or not as all postings go the www.deja.com

229. KC8JBO mom on DEATHBED!!!

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-03 00:00:00 UTC
From: kc8jbo_mom_dying@my-deja.com
Message-ID: <89oq63$m72$1@nnrp1.deja.com>
Source record: 117909

I hope the 'ole goat is ready for her new "HOME" in the backyard,
LARDASS!!!! Did you get those corn seeds yet? She will help them
GROW, hohohoho.

Maybe she will "trip" down the stairs this weekend so I can collect on
my bet for when the 'ole GOAT KICKS!!!!

Give her a kiss from the,

PITBULL

230. Poem about KC8JBO

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-03 00:00:00 UTC
From: ft56e@yahoo.com
Message-ID: <89org1$n61$1@nnrp1.deja.com>
Source record: 117910

Here is a little poem I wrote about KC8JBO:

Come one and all
To see the mother of LARDASS fall
I her she is bed ridden
Her false teeth are well hidden

There is a hole in the backyard
For the mother of this retard
'Ole goat will fill it soon
Las Vegas says by JUNE

What will KC8JBO do?
When he can't pour himself a brew
No more 'ole goat for him
Collect her insurance & buy a tin

Or maybe you can buy a new computer with the insurance money,
FATASS!!!! On second thought....I don't think the GOAT has any
insurance, hohohoho.

I hear Mother ringing the food bell...."ring-a-ling-a-ling" Go get her
food so she can "eat" it thru a straw!!!!!!

Da 'Bull

234. AH506m & Eagle Spitfire 454 Titan Dragon 10m handhelds

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-03 00:00:00 UTC
From: mp <mplanck@my-deja.com>
Message-ID: <89p365$tc1$1@nnrp1.deja.com>
Source record: 117914
Cross-posted to: rec.radio.cb,rec.radio.amateur,rec.radio.amateur.misc,rec.radio.amateur.equipment

Hi!

I understand the whole point of (most) mods; the manufacturer has designed in certian features and then blocked them out in certian versions of the radio, to accomidate different bandplans, etc in different countries.
I'm not specifically questioning "why cant I TX from 25-32 mhz like my 2950", I'm merely stating that there are a LOT of jumpers in the radio and there are probably a lot of different options that could be enabled/disabled. I am wondering if anyone has a list of the jumpers and what they do, OR knows where to get a service manual for this radio. Copper sells a video tape covering the mod. Im wondering if anyone has seen it and if it just covers the 25.165 to 29.700mHz mod (like the Cherokee AH100) or if it covers each of those little 'jumpers' and what they each do.

Also I am very interested in the AH-50 and AH-50SF 6 meter HTs from Cherokee. I performed mods as indicated below and nothing happened!

I've found it difficult to deal with Cherokee, (Wireless Marketing in Schaumburg IL) and impossible to find Maycom, the original overseas manufactuer of these units. Has anyone ever seen a service manual for any of these units? (AH-27, AH-50, AH-100....?)

Thanks.

235. FT-847 vs. IC-746

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-03 00:00:00 UTC
From: radiotek@pacbell.net
Message-ID: <38c00bcd.14401812@news.swbell.net>
Source record: 117915

Hello NG,

I will be purchasing a "All around" base radio soon, and I would
like to get some opinions on these radios.

The comparison is: Yaesu FT-847 & Icom IC-746

Has anyone had the chance to use both rigs??? If so, what are
your thoughts on these? Which is better and why?

I had the FT-847, but I had to sell it. Now, I want something similar.
Any help would be GREAT!

Thanks & 73,

Mike KQ6MU

"Sol Greenburg" mailto:solgreenburg@hotmail.com babbled:

Hmm, I know of a certain hotmail account that recently got
yanked...hahahahaha!

>Mr. Wiseman:

Ahh, well at least this time you found some manners.....

>after a week of surveillance at the hennepin county public library

Translation : "Sol has no life." Which library, there are several
branches in Hennepin county.

>i have just observed the pitbull post about you on deja.

Really, What did he have, a sign on his fat chest or back? Did you
look over his shoulder, or was it YOU who did those postings?

>I proceeded to follow this individual out of the library and wrote
down his >license plate number. my next door neighbor is a police
officer and i will ask him >to run the plate number.///there is two
reasons why i didn't confront this man
>while at the library.

Yeah, like I'm gonna believe YOU. I think it is YOU doing the postings.

>he stands 6"6' to 6"7'

Oh, so he's a six inch man? He/You? sound like a real weasel. I'd say
you're only 5'6" - 5" 7" and weigh over 300 lbs., pissbowl.

>with large biceps

So? His corpulent, obese body makes his "biceps" seem large. Pissbowl's
testicles, are extremely minute or non-existent.

>i also noticed a bulge on his belt line in the rear of his trousers
possibly a hand >gun.///

Bwhahahahhaha! More likely, Pissabowl left his ramshackle hovel and
forgot to take a dump. And while his fatass was sitting there drooling
over the public library's terminals, he took a dump in his pants..oh
well, that's the only way pissbowl pitbull can have kids.
And btw, to insert a question mark, you hit shift then the / key to
get a ?, stupid.

>In my opinion this individual should be considered extremely dangerous.

Yeah, he might actually come up with an original idea...those extreme right wingers don't like to see anybody having independant thought.

>I also saw him plotting a driving course on mapquest.

HAHAHAHAHAHAHA!!!! He probably forgot where home is.

>I will sign any legal affidavit your attorney may want to draw up regarding this >matter.
>
>Sol Greenberg

So, tell me Sol, do you think I was born yesterday????

>P.S. i have never been nor am i interested in becoming a ham radio operator.

Then why the fuck are you reading our newsgroups?

>im just a deja reader who has seen the things posted about you by this individual.

So? You think I really give a rat's ass what the coward Pissbowl thinks?

>_____
>Get your Private, Free Email at: http://www.hotmail.com

My point exactly.
Oh, btw, "Sol" your spamming e-mails won't get through anymore.....

Hello! Please see my other post in reply to this. I just pulled my Eagle 454 out of the box and checked- you are wrong, when I hit the 'step' button I can choose 1,10,100 khz steps. Right out of the box- I did no mods to this rig (yet!)

I checked your website- it's pretty good. I have a question- on your 10m page, what's the difference between the "Titan I- the Titan 201" and the "Titan Road Pro". I noticed your picture of the Road Pro is Copper's picture of the 454-from their website- with the name blacked out!! Next time I'm down NJ way I'll stop by with my digital camera and take some good pics for you! :D

Seriously though- as a dealer, do you have any access to a service manual for these radios? Obviously they are all made in the same factory so a Titan manual should be the same or similar as the Eagle. If you have any contacts with the factory I'd like to try to contact them directly (although I dont know how useful a Phillipino manual would be!)

P.S. My freq counter doesnt go below 30 mhz so I cant verify this- does the clarifier on the eagle/titan track (change frequency) on transmit also? (I guess I could use another CB to see...)
I actually found a mod for the AH-100 to: Unlock clarifier and add FM compatibility but it refers to parts I can't find inside the rig. I think it may be a mistake.

From: radio_oger@my-deja.com
Message-ID: <89pf5j$6jv$1@nnrp1.deja.com>
Source record: 117929

Agreed.

Legally it is a service as any other radio service.

Functionally it is a hobby, and nothing more.
(I don't owe the public jack crabs.)

No matter what you say, it's not a religion... like this jerk in the
following audio files believes it to be. (It's funny as #@%$.)

http://www.pittnet.com/claude/hamradio/ABufu.zip

You will get hours of listening pleasure from this.

Radio Oger

(Rojer Oger sounds like Roger Rabbit. It's cool as long as I get
Jessica.)

254. RadioMaster2000 - TS570 Control Software

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-03 00:00:00 UTC
From: Danny Butler <dannybutler@one.net.au>
Message-ID: <38befac8@pink.one.net.au>
Source record: 117965

If you own a Kenwood TS570 or a similar Kenwood radio, and you would like to control it using a PC, have a look at RadioMaster2000, and see why many people are saying it is better than the Kenwood RCP software.

Here are the features;

- Frequency operation covering from 0 KHz to 999,999.999 KHz
- All Modes including the Reverse functions for CW and FSK
- All Tones as per the TS570 operation
- Main fine tuning with 10 Hz steps
- Selectable coarse tuning with steps of 100 Hz, 1 KHz, 5 KHz, 10 Khz, 0.5 MHz and 1 MHz. (Additional steps can be provided, depending upon the demand)
- Tuning knob with Fine and Coarse Tuning. The Fine tuning provides approx. 1.2 Khz per revolution and the Coarse tuning at approx. 8.5 Khz per revolution.
- Standard Memory switching, as appearing in the Radio
- Band switching is provided by way of an additional screen. User definable with 50 selectable frequencies and Mode
- Manual entry of a frequency is provided
- Quick Memo operation using 5 Memories
- Flock operation
- Frequency Scanning operation. 50 user definable ranges are available, that include the Mode, Frequency Step and Pause time. Includes a description of each range
- NR1/2 Noise reduction operation
- BC Beat Cancel
- 300 memories are available where the first 100 are used for downloading and uploading the Radio's memories. All memories have Split operation as well as Mode, Tone and Description. Memory scanning is available based on a code against each memory, and/or by limiting the memory locations to be scanned. Additional functions include; current VFO to current memory location, and current memory location to VFO A/B. The Radio memory locations can be transferred to the program and vice versa, modified, and then re-loaded back to the Radio - Standard VFO A/B/Memory selection, with A=B, B=A and current memory displayed transferred to VFO A
- Split Frequency Operation with TF-Set
- RIT/XIT operation with the appropriate frequency display
- Volume, RF, DSP High and Low, and IF Shift front panel controls. IF - shift displays the frequency
- CW Auto tune function
- Filter display, showing the setting, depending upon the mode in operation
- Power, Microphone Gain, Keyer Speed And Delay, VOX Gain, and Squelch

Level are adjustable using a slider control on a separate function screen
- Antenna selection, AGC, Tone and the Channel selections are also available from the same separate function screen
- Power Switch, Attenuator, Pre-Amplifier, VOX, Speech Processor, Send Function and Antenna Tuner are all operational
- S Meter function
- Local as well as GMT, Date and Time is displayed on the front panel
- Not necessary to have the Radio connected, in order to have the basic set-up functions available, e.g. Scanning, Band and Memories
- Logging Function that allows Local and GMT Date and Time recording. The Frequency and Mode can also be transferred from the current VFO. The Call Sign and Description can also be recorded. This is an unlimited database with sorting available on each column
- Communication speeds from 110 Baud to 256 Kbaud (57,600 Baud is the max for the TS570)
- Up to 16 Com Port Selections

Program has been fully tested, and runs under Windows 95, 98 and NT

This program was written based on the Kenwood TS 570, but it will work on other Kenwood models...

If you would like to download it, you can find it at my home page address below;

http://web.one.net.au/~kjbutler/page2.html

Howdy everyone!
I'm going ot visit Roger Wiseman this weekend-----I'm bringing a
digital
camera---so everyone can see the infamous KC8JBO. Cut the grass Roger---
clean
up the house-------I'm coming to visit and report to the world who in
the hell

is Roger Wiseman..... It should be fun.....to actually see the
man
behind the postings-------isn't the Internet great!!!!
You've wondered who in the hell is Roger Wiseman---KC8JBO---well
now
you'll know!!!!!! Info on the Website to see Roger Wiseman will be
upcomming
in a post real soon. See you all then!!!!!!!!!!
N8WGM

If your continued friendship is based on my going into "war mode" again
then I reckon I'll put you in the enemy camp. Of course if this is
just your way of venting some aggression, then I can let that go. It
is now up to you to continue this or not. I choose not to fight with
you.

I value my amateur radio license. I value what is left of my health.
I value a true friend that accepts me for what I am, and at my word.
If you can't then you can deal with it anyway you choose. I go to war
on my terms, not yours.

THE WAR IS OVER !!!!!

That's because ham radio is supposed to be a hobby, and not a religion. Something that these pompus bungholes have forgotten, and the CB'ers are still well aware of. Isn't this all supposed to be fun.

I'm a ham, and I still have CB's and talk on CB.

I know not of the "guilt" and rarely read the postings.
The glaring "stalking" comments caught my attention.
Even before the posting from Hawaii, I read the message commenting on
abode and concluded info was gathered during a stalking effort.
Obviously, this issue has not received many hits. Obviously, I can not
believe what is said regards Mr Volz guilt as it is not the issue!

>just intercommnunications - no more than CB, regardless of mode!

"Seldom practiced by amateurs"? How do you know? Did you take a poll? Open any amateur radio magazine; every construction article and every technical article was written by an amateur. And those articles wouldn't be published if other amateurs weren't building those projects.

>Interestingly S1.98 says : "experimental station: A station
>utilizing radio waves in experiments with a view to the
>development of science or technique.
>This definition does not include amateur stations."

The U.S., too, has an experimental license outside of the Amateur Radio Service. It's utilized for experiments conducted outside of the amateur radio allocations. For example, there is a proposal to grant U.S. hams a sliver of frequencies near 5 MHz; a group of amateurs was awarded an experimental license to operate in that non-ham band to conduct propagation experiments. They couldn't use their amateur licenses for such out-of-band experiments.

No separate experimental license is necessary for amateurs wishing to conduct experiments within the amateur bands, thus the language, "This definition does not include amateur stations."

>CW should be left to those who WANT to do it AND NOT FORCED ON
>ANYONE.

As communicators first and foremost, all the world's HF amateurs should have a common mode. Right now, Morse is the common mode among HF hams. What would you propose to replace it? How else could you ensure all HF hams had such a capability without "forcing" it upon them?

Jeff

It's interesting how you do that which you criticize.

Tom - N8ECW

273. Sam and Hargrove

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-04 00:00:00 UTC
From: radiosigs <radiosigs@mindspring.com>
Message-ID: <89snp1$30c$1@nntp3.atl.mindspring.net>
Source record: 117734

Today, Mar.4th I had the pleasure of QSOing both KE4RUN, Hargrove and K3SAM, Sam. The former said we had talked once but I simply didn't remember. The man's a gentleman. K3SAM was definitely a new contact and Sam seemed genuinely contrite over snubbing Donald Anderson just because he was TOLD to do so by KE9RY. Who appointed Tom sheriff of 14.313? I live there and I'LL GIVE THE ORDERS, NOT HE, and don't forget it. On Dec.1st Riley sent me a letter telling me to cool it on 20 meters; it seems he was ticked by my ability to cut to ribbons the bigoted goons who had run amuck. And it's obvious that I have become a saint. Question: why is he not doing anything to KE9RY who constantly attacks W4JYZ? Why the double standard? And I'm hearing Polly, KB4MXL, K3QAM and WA4KBX pounce as well. And let's not forget washerwoman Seymour, WA9KJB. the LURKER AND BUSYBODY, listening on different frequencies and then reporting back to his masters. Jeez, what a sickening old fool he's turned out to be! Oh by the way his claim to fame after 100 years on the air is having received an SWL report from a kid. Whoa, that's big stuff boys and girls. I say the worst any ham could do would be to encourage a kid to monitor 14.313 and a few notorious 75 meter frequencies. My suggestion to Seymour or See Less or whomever is to make his day by responding with your own card and a letter explaining that it would benefit him to EXPAND his listening horizons by listening to hams on all the bands to learn about the nuances and characteristics of each and to concentrate a bit on cw so that he could go from schlemiele to Extra on April 15th. Getting back to basics, everyone is supposed to respect Riley's wishes but aren't and too many are getting away with it. When's it going to stop? In the meanwho, K3SAM realizes that he MUST be his own man and form his OWN opinions rather than remaining a sheep at the beck and call of the shepherd from Eagle Wisconsin. Baaaaaaaaaaa! Furthermore has it ever occured to Polly and a few others that they're out of grammar school and silly clubs no longer are necessary? If these "clubsters" would stop to realize what fools they sould like, maybe they'd all grow up? Who knows? Then again any aged man who could sit on a frequency and imitate a parrot for years is not allright upstairs. But good news, I think, prevails. KT4TR's son Harrison is going to the Dominican Republic this summer to play baseball. I hope he doesn't ask for political asylum and of course the question remains: does the kid WANT to go? And all along I was led to believe that Bob Youngblood was doing a great job cleaning up all the sandlots in Vero Beach. However so as not to continue to digress and undress, my feeling is that more hams should be like Sam, K3SAM, no relation to Son of Sam, Summer of Sam or David Berkowitz's dog that told him to gun down inncocent people. STOP LISTENING TO THE UNFOUNDED COMMENTS by troublemakers! Form your own opinion. Don Anderson is a fine chap and doesn't deserve all this ugly conspiratorial garbage thrown at him. He never said 14.313 was occupied by the braindead. Apparently it was said by Riley himself during a hamvention speech, so says Donald. And IT'S TRUE. I and just a few others are the only intelligentsia

on that freq. And Don never said he hated old hams. Today Paul from Moline told me that Don said he hated old bald hams. No, he has no use for the balding set who refuse to use Rogaine out of stubbornness and cheapness. For heaven's sake people-give W4JYZ a break.

276. New Exam Rules: A few questions....

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-04 00:00:00 UTC
From: symbiot@my-deja.com
Message-ID: <89rl0p$k3a$1@nnrp1.deja.com>
Source record: 117785

Greetings folks,

I've got a few questions concerning the new exam rules to come into effect after 15 Apr 2000.

I currently hold a tech plus lic which I recieved back in 1980. As I understand, all I ned do is fill out an application and I get auto-upgrade to general.

Here are the questions:

If I take and pass the written Advanced exam prior to 15 Apr, will I get aut-upgrade to advanced? (Even though the advanced class will be eleiminated...)

If I take and pass the Extra written test prior to 15 Apr, will I get auto upgrade?

Are there any good study guides available for the post-15 Apr Extra exam available now?

Thanks for the assistance!!

> Amen.
> Doc,AF2Y
> >>>>>>>>>>>>>> The very large problem, that I have, with the Amadou
Diallo shooting is as follows. The excuse was given in court
testimony, that a police officer fell to the ground, upon falling his
service weapon (9 mm)accidentally discharged, because he was running
with his finger on the trigger of the weapon. Upon others seeing him
fall down, and the weapon discharged a round, the others thought he was
shot and returning fire. The huge flaw that comes in to play here, is
a rookie, going through the police academy, is taught never to have
your finger on the trigger, unless you intend to discharge the weapon!
Try this Doc, the next time an FBI agent appears at your door, it's
quite appropriate to ask for identification, when he goes for his
wallet, shoot him 19 times, forget the 41, and see if you'll be
acquitted by a jury of your peers! Rich<<<<<<<<<<<<<<<<<<<<<<<<<<<<

How does a writer promote his own story in the face of only a few responses in this NG? And this is a story that has heated the airwaves for over a decade. More than 10 years ago, I interviewed KV4FZ at Miami International Airport about telephone toll bypass.

Credible then to some of the most intelligent hams, Herb faced off with Bob Sternberg of South Florida, who decried Herb as insincere. Herb's position then: hams had to cut down on phone patching, especially on the Interncon and Maratime Mobile Nets. He cited the Jim Jones suicide episode as something that had been expedited by ham radio phone patches.

If you see a touch of hypocrisy in the main story of this thread (the head thread), you've become in touch with reality!

Bob Sherin, W4ASX
Miami, Florida

> LOL You trying to harrass me?

No just annoy you

> Slander? Libel?

That would require me saying something untrue you freely admit my
observations are true. Sorry idiot no slander of libel there. Your
postings on the other hand accusing people of being neo nazis and the
like they might be slanderous and libelous.

>Invasion of Privacy?

I don't think so, your address is public record the street in front of
your dump is public property. Sorry no invasion of privacy here. If
you don't want to live in a glass house don't throw so many stones.

Just as a matter of interest I did not take the pictures of your dump
they were sent to me by person or persons unknown. Since I know
where you live I drove by and confirmed that the shots were truly of
place. Sorry I couldn't drop by but one can't be too careful when
dealing with sociopaths

>You
>have no idea what i have, or who or what is at my disposal.

I can make an educated guess based on how you live.

>Taking a picture of

Here's the information on Ho Chi Mihn's geisha boy James V. Lysen:

James V Lysen, KD0LA
RFD 3 Box 120
Glenwood, MN 56334-9357
USA

Class: Advanced

Previous Call: WA0DXV
Previous Class:
Issue Date: 12-06-1988 Expires: 12-06-1998
Process date: 12-06-1988 Birth date: 02-05-1946

QSL Manager:
E-Mail address:
WWW URL:

Latitude: 45.650951° Longitude: -95.42055°
Distance: 839.4 miles, 1350.9 kilometers
Bearing: 302.8°

Grid Square: EN25GP County: Pope
Time Zone: -6 Area Code: 320

While in 'Nam, Mr. Pissbowl here, frequently avoided fire by hiding under Ho Chi Mihn's desk giving him head. Lysen has an obsession with corn, I've noticed in your posts, since childhood apparently, when his drunken father rammed corncobs up his rectal orifice while giving him the reach-around. His father's squeezing of his testicles might explain why Lysol has such a high pitched voice. He can't keep a wife, drinks too much, and reads a lot of far right wing propaganda. Isn't that right, Pissbowl? Your "Sol Greenberg" e-mail was hilarious, you really think you can intimidate me? You're so goddamn clueless, I saw right through your e-mail right away. You'd better stock up on your supplies. You're gonna need 'em, dickhead. I'll have some time off coming up, maybe I'll do a "recon" in your area. Yeah, I spent some time in the service, too...there goes your 45 years with mom lie, huh? And since you "think" you know what I look like, you won't be expecting what I really look like ho hoho ho ho.

Well i said I was going to "ignore" you but just this one last time. I'll set you straight.
Apparently my observations on the goings on of the "So Called" net and it's croanies upset you. Everything that I have said is true and can be proven. Besides I do not think you have seen or heard me call anyone a neo-nazi, but if the shoe fits wear it.
As for someone sending you pics, so what? You have a sympathizer in Vegas LOL. Who cares. If you would have bothered to stop and knock you would have seen "how I live" new furnishings, home theater, new truck and everything paid for. You can continue if you like, at your own risk of course, your posts of "stalking" have been turned over to the authorities and have received special attention. Your bud at the store should watch his step also.
I can and will express my views about whatever I wish just as you claim the "So Called" net has a right to, I and others do also. NOTHING i have said has been "disproven" by you or anyone else. Instead of trying to disPROVE what I have said you take the democratic approach and try to defame or discredit the person instead of the facts.
I have up'd my intentions, now, UP YOURS

I'm very glad to hear that you're reading everything that I write. And the
only way to retain information is through repetition. So here it is again;
try to find fault with it, if you can, rather than condemning its repeated
posting. It's only posted when someone spews "The League is a business."
Since you had read it before, you knew in advance that it takes a business
to do what the League does:

Well of course the League is a business. On January 29, 1915, the
Connecticut Secretary of State recorded the incorporation of the League
under the following three articles:

"Article 1. The name of said corporation shall be The American Radio
Relay League Incorporated.
"Article 2. The purposes for which said corporation is formed are the
following to wit: The promotion of amateur radio, the organization of
amateur radio stations, the promotion and regulation of amateur radio
inter-communication, and the relaying of messages from station to station,
and the printing and publishing of documents, books and pamphlets
necessary to any of the above purposes.
"Article 3. The said corporation is located in the town of Hartford
and the State of Connecticut."

Lucky for us that second article includes printing and publishing:
We participate in a self-taught technical hobby/service; not a day should
go by without us gaining new knowledge WRT to electronics. The only
publications I have always been able to turn to when questions arose which
needed immediate answers were the League's pubs.

For some 85 years the ARRL has produced a handbook written so that even a novice can learn and understand from it. The government thought so highly of the Handbook that it was used to train military communicators during WWII. For the longest period, the Handbook was the greatest selling technical book ever published, in and out of ham radio.

During the 50s when SSB was finding its way into ham radio, there was no pub one could turn to to learn about this new mode except the League's SSB Manual. Also during that decade the FCC relaxed the regs regarding mobile operation - no one else published a mobile manual except the League (1955).

To whom could you turn to for the great ideas and techniques that appear in the Hints and Kinks booklets? Propagation and antennas: The Antenna Manual. Who else in the 60s produced a VHF Manual? And when that VHF crowd began exploring FM: The FM and Repeater Manual. The very first book in the 80s devoted to amateur digital comms was the League's Get Connected.

Publishing affordable technical books was one of the original goals in the League's charter; for 85 years they've made information available to the layman that was nearly impossible to find elsewhere. How in the world could you possibly find fault with this business side of the League?

Every ham shack I've ever visited in the last 30 years has had many League pubs on its bookshelves. We are (or at least were) a group with a voracious appetite for reading and learning. Luckily, the League has been able to feed us what we most desired.

Ham radio and reading are inseparable; and it takes a business to do what the League has accomplished.

73, Jeff KH6O

But Usenet is not amateur radio. Many of the rude folks here aren't
even licensed. Please don't confuse the newsgroups with amateur radio.

A very important consideration one should ponder prior to modifying their 2m HT for extended transmit and then relying on that radio to summon help during an emergency is this: It might be the case that the output stage of the transmitter has a sharp band-pass filter designed to pass *only* frequencies between 144-148 MHz with all others outside this range being greatly attenuated. FCC regs state that any spurious VHF emission must be reduced by 60 dB of the power at the fundamental frequency (or a maximum of 25 *micro* watts). Hence, our off-shore sailor using an 2m HT with an output of 10w on 2m modified for 156 MHz transmit, could possibly have only 10 uW (or 0.000010 watt) of output power, into a stubby antenna designed for 144-148 (thus reducing his output power even more).

I suggest he invests in an ELT/EPIRB, instead.

Jeff

The Armenian judges gave it a 9.8 on the Olympic Troll-O-Meter,
but they were over-ruled by the umpires in instant replay, who
award it a 2.6

The Armenian judges lodged a formal protest!

It was sufficiently trollish, of course, but way too obvious.
It was poorly written, poorly executed, and was so incredibly
lame as to lack the true drawing power of a really masterful
troll. Maybe as high as a 3.3 for the sheer stupidity of the
premise, but a 9.8? Never! The Armenian judges tear their
hair out, throw their balalaikas down in dismay, and perform
the traditional Armenian Dismay Chant! They demand a recount!

Regards,

Hans, Lord High Keeper of the Troll-O-Meter

Are you sure about the General written test ?? Look at his license
date.. It is 1980, before the cutoff date. All he should need is the
proof he had a Tech license before that cutoff date, I think it is
1987, but would have to look to be sure.

ICOM IC-2100H

NEW IN THE BOX

-IC-2100H
-2 Meter Rugged Transceiver
-55 Watts of Power
-ICOM's Newest and Best Performer Against IMD
-Dimensions: 5.5 (W), 1.6 (H), 7.1 (D), 2 lb, 10 oz
-TX-RX (136 - 174 MHz)
-Tested 75 dB In-Band and 93 dB Out-Of-Band
-Adjustable Attenuator (up to 10 dB)
-55 Watts Transmit (10, 5 watts selectable)
-Straightforward, Easy to Use Operation
-Clean, Crisp Audio
-One Touch Button Operation (no function key used)
-113 Memory Channels
-Cool Dual Display
-Selectable Green or Amber Backlit Display
-LARGE, Easy-to-See, User-Programmable Alphanumeric Display
-4 Backlighting Levels
-Backlit DTMF Microphone with 2 User-Programmable Keys
-Heavy Duty, One Piece, Die Cast Aluminum Chassis
-Built to Military Specifications (MIL STD) 810 C/D/E
-for Shock and Vibration
-CTCSS Tone Encode/Decode Built-In (program up to 50 tones)
-Tone Scan Built-In
-Auto Repeater with Busy Lockout
-Priority Watch (3 types)
-Mounting Bracket Included

Anyone with a Tech Plus before April 21, 1987 can automatically upgrade to General after April 15th. You WILL have to show up at an exam and pay your $6.65 fee and a VE will have to submit a form, but you won't have to take the General written test.

If you want to upgrade to Extra, my advice is to not take the Advanced or Extra tests before April 15, but to take the new Extra test when you show up after April 15 to get your General upgrade. Why take two tests when you can take one 50 question test? The new Extra pool is much smaller than the current Advanced and Extra pools - much less to study.

I don't believe that a tuner works in that manner! All of the wire
is being used to radiate the RF. The tuner is acting more like
an impendence transformer; it compensates for too much / too little
L or C in the antenna.

Agreed, but one could always treat their community service as a hobby: "Participating in the Amateur Radio Service is a hobby of mine." Nothing wrong with that statement.

According to Oxford: Hobby: 4. A favourite occupation or topic, pursued for amusement...; an individual pursuit to which a person is unduly devoted.

Note that private pilots refer to their pastime as "sport flying" but no where in the FAA regs will you find any mention of "sport."

In China, amateur radio is officially titled "Radio Sport."

let them Get 6 meters, think about, right in the middle of the the tv band, or should i say at the bottem of the tv band. Of course digital will be taking over in the next 10 years anyway. And what about the 2 meter band, you have to deal with channel 18 on cable, can't win for loosing.

>would warrant a distress call. If the other radios were not working
>because "all power was lost" then a back up would be in order.

Offshore, one would use HF SSB. If he's within VHF range, then
the above is job for a commercial $alvage tow.

>> would you use your HT illegally to call for help?

>In a case of distress when other means are unavailable, then it
>wouldn't be illegal.

It's not a distress situation. Neither life nor property is in
danger of being lost.

>> (The USCG would probably refer you to a commercial towing
>> company.) How about if the boat went aground on a sandbar in calm
>> weather and there was no power for the marine radio. Again, not a
>> life/death situation -- would you use the HT illegally in that
>> scenario? (Another case for a commercial, not CG, tow.)
>>
>> If we define "emergency" as a life/death confrontation, then
>> neither of the above cases warrant being called an "emergency."

>Distress is not just life and death. Immediate threat to property can
>also constitute distress.

"On a sandbar in calm weather" -- no immediate threat to property
exists.

>> Why not use a cellphone as a legal backup to the onboard marine
>> radio?

>How far off shore would rely on a cellular phone?

Cell: Line of sight to the nearest cell site.
VHF: Line of sight to the nearest CG remote base station.

>I would use the ham
>rig on channel 16 before I went to cellphone for a marine emergency.
>the problem with distress call on cellphones is the only party that can
>hear you is the party you called.

Neither of the two scenarios above are distress situations.

>Mayday calls are not supposed to be directed to any single station. If
>you are in distress on a vessel, it benefits you to have as many
>stations hear your call as possible. Having the Coast Guard answer you
>is fine, but among the people listening, there may be a station close
>to you that can help. Imagine how you feel if you were on the phone
>with the CG describing an emergency when there are a dozen other boats
>on the water within sight of you.

But for the two scenarios above, he's not in distress. My question
to him was at what point would he use the modified radio illegally.

To answer your question, the CG can rebroadcast his request for
assistance to all those other dozen boats.

Using a modified 2m radio is fine for an actual distress, but the
above examples were not distress situations.

: radio_oger, ham radio is not a 'hobby' but a service. Show me in
: part 97 where it defines ham radio as a 'hobby'?

Of course ham radio is a hobby. It is silly to argue otherwise. Even the ARRL says on its web page (http://www.arrl.org/hamradio.html):

"Here's your invitation to a friendly, high-tech hobby that's got something fun for everyone! ..."

You see, the ARRL presumes that Part 97 (and Title 47) uses U.S. English as its language. For a recognized authority on that language you can look in the Random House Dictionary to find:

amateur: n. 1. a person who engages in an activity for pleasure rather than for financial benefit.

hobby: n. 1. an activity or interest pursued for pleasure or relaxation and not as a main occupation.

Well, duhhh! Look at that: The words "amateur" and "hobbyist" are synonymous. If it is written in accepted U.S. English, then Part 97 is using a word generally recognized to also mean "hobbyist".

The argument that amateur radio isn't a hobby is like arguing that a chicken isn't a bird. It's just plain silly.

ok ROGER.....
lets think about this .....
1. your smart ,NO one else is...
2.you know alot about fags,,ARE YOU one?
3.you know alot about truckstops,Your hanging out at them too much.
4.you know alot about drugs, But you dont do drugs?whats the white stuff on your nose ???
5.you live with mommy dearest, but yet you call others worthless?
6.you call other women fat? your so fat you had to tear ot the walls to et from room to room.
7.you talk about others having no penis?well its just penis envy isnt it roger??wishing you had one..
8.you talk about others wives , well you dont even have a wife.cant find ONE that will live in that trash dump and help take care of mommy...
9 you talk abot chick with dicks , well you cant get even a chick with dick , cause you dont have a dick....
10.lastly , you talk about chat rooms, wow you sure spend a lot of time in them too dont you roger?you know so much about chat rooms ....
DOES ANY ONE REALLY CARE ABOUT ROGER??????? POOOOR POOR NO LIFE , NO JOB , LOSER , THAT LVES WITH MOMMY ..

I just found this used meter at a garage sale. I don't have operating instructionsm but would like to get a copy. I have some sets of slugs, but some are not labeled. How can I tell what frequencies the slugs are good for, and which aluminum slugs go with the brass ones? One brass slug has no frequency label on it.

Please reply to Email.

Thanks in advance

Fred

>This is interesting. I was alone listening to the LibertyNet on the evening of 2/26/00 and heard N2SAG make the initial accusation against W9ART - that he was tuning up and 'I would know that signal anywhere'. I wanted to check in to the LibertyNet and correct this, as W9ART was asleep from around 8pm til' the next morning. Being I am who I am, I knew my call would not be honored by W1WCR. I just kept still and continued listening to the rhetoric of the evening. The LibertyNet is such light entertainment. Just thought the record should be set straight on this particular issue.

You want a shocking revelation, Jeff? Here it is: I AGREE WITH YOU!

The league is not only a business, but they project the image of a large corporate entity that cares more about money than customer satisfaction (Kind of like Microsoft.) I'm glad to see that they got their balloons deflated when the FCC didn't take the league's recomendation for licensing restructure.

Now, Jeff, given your sickenly strict "lawful good alignment", I'm sure you'll try to twist my words around to mean something else, or selectively edit parts of my response to try to show how superior you are. As much as you would like, however, this newsgroup is not one of your classrooms and we are not your students. I'm afraid your tenure doesn't impress very many people here. You see, people, in general, with the exception of lawyers, judges, and other legal types are of "chaotic good alignment". (I'll leave it to you to figure out those two terms) If you can figure this out, you'll realize quickly why your attitude causes many here to dislike you.

377. Seymour's SWL report. Oh oh!

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-05 00:00:00 UTC
From: radiosigs <radiosigs@mindspring.com>
Message-ID: <89u6scbbk1@nntp8.atl.mindspring.net>
Source record: 117693

How many of youse guys ever watched a baseball game on TV when one or more loonies ran onto the field to either slide into second or shake a fielder's hand? What happens on your screen? Is the scofflaw shown? Of course not because televising him would encourage others to commit misdeeds? Misconduct breeds more misconduct thanks to a phenomena called "copycats." Now before I go into details about the famous SWL card received by Seymour, WA9KJB, I want to mention an incident involving me personally vis a vis a famous baseball game scofflaw. In 1987 a certain Yankee named Don Mattingly, from Evansville Indiana, was at the top of his game as a superstar hitter and first baseman for the N.Y.Yankees. In fact, in my area which is no more than 30 minutes from Yankee Stadium, we used to say that the Yanks were playing "Donnie Ball." Not only was he an excellent player but a handsome dude besides and therefore met with extreme adulation from the distaff side of baseball enthusiasts. Incidentally I met him and his lovely wife Kim at the active players' motel downtown Cincinnati before the 1988 All Star Game and a nicer couple couldn't be found anywhere. Well anyway, there I was one Sunday afternoon at Yankee Stadium in the summer of 1987. Now did you ever hear of Morgana? If not, she was the gal who was constantly escorted out of every baseball stadium for running onto the field to kiss her favorite player and guess who she announced that Sunday to be her favorite? You guessed it-number 23 for the Yankees-Donnie. How did I know? I was sitting right behind her, one row back and had an unhampered view of the field and more. Morgana was known for two major assets that were located between her neck and navel. My God, you wouldn't believe the enormity and that day was very warm and Morgana had on a rather low cut T-shirt minus a foundation garment, with Donnie's face emblazoned across it.During the game she told everyone that in the 7th inning she was going to go to the railing on the first base side and run out bouncingly to give Marttingly a kiss but she didn't for a very good reason. The broadcaster Phil Rizzuto recognized both of them through his binoculars and announced her presence right over WABC 770 which alerted security. And those guards stood erect all around that section-believe you me. However I didn't allow Morgana's physiognamy to distract me one bit because of Mattingly's extra breast...sorry..base hits. Why wasn't Morgana allowed to take her anatomy to players all over the league? Because of that copycat idea. Mayhem breeding mayhem and so on and so forth. Now getting back to Seymour and that QSL from a kid, here's where KJB made a BIG MISTAKE. By announcing the kid's name and address, Seymour gave the kid even more incentive to monitor SHABBY frequencies such as .313 and the 75 meter cesspools. The SWL had met with instant and unexpected notoriety, correct? KJB is proud of the fact that the kid now may be tuned to the braindead 20 meter one in addition to 75? God almighty; where's Seymour's common sense? The kid from Ohio is being accidentally led down the path of ruination because of the lack of insight and foresight by a venerable senior citizen ham or is it vulnerable or maybe insufferable?

Seymour should have simply said how pleased he was to have received a card and THAT'S ALL! Listen up hambos--straighten up and fly right. Act accordingly so when you receive SWL reports, the notoriety will entice the listeners to monitor PLEASANT instead of tormented frequencies. You simply never know what can happen thanks to one's RF. This has not been a paid solicitation on behalf of Morgana's morganas. Damn, you had to be there to appreciate the magnificence of it all!

> auto-upgrade to advanced? (Even though the advanced class will be
> eleiminated...)
>

What I meant was if I take the written exam but not the 13wpm code exam, will I get an auto-upgrade to Advanced Class? Will I get "grandfathered" into having an advanced class lic?

> If I take and pass the Extra written test prior to 15 Apr, will I get
> auto upgrade?
>

Again, what I meant was if I take the Extra exam prior to 15 Apr but not the 20wpm code exam.....will I get Extra class priv after 15 Apr?

And the final question that didn't get ananswer...

> Are there any good study guides available for the post-15 Apr Extra exam
> available now?

Thanks again!!

This weekend, Mar 4th 5th, 10 meters is open. A contest is going on. I don't compete, but contests give good opportunities to make short contacts, some DX. I worked Equador, Argentina, and Japan. And USA too. From California.

If you get a chance, get on 10 today. It's very open.

You better worry about that letter from the FCC coming to Clifton N.J.to a qrming amateur (guess who?) that was reported on the rain report today. You should operate your station correctly instead of posting a long rambling, boring letter to the forum. When will you learn that you can't qrm and get by with it!!

I have a question about interference, I have an new Yaesu FT-100 I have installed it in my 4x4, upon tuning & testing the SWR of the antennas (I have 2 on the truck)I came across a major problem. My stereo speakers give off ENORMOUS feedback making the radio un-useable !!!!!

I 2 Antennas @ 1.5:1 (HF) & 1.1:1 (VHF), the problem is my stereo speakers in the offroader almost explode when I key the microphone. Is there any explanations for this???? I have checked the radio and the antennas with various
different equipment in case mine was faulty, but the radio seems to be the most
perfect installation I have ever seen...

T.L. Bryant <tlbryant@my-deja.com> wrote:
>The league is not only a business, but they project the image of a large
>corporate entity that cares more about money than customer satisfaction

Maybe you can explain your "customer satisfaction" remark. Did you buy
a League book that you weren't happy with and they wouldn't refund your
money?

In regards to decisions and proposals made by the League, it's not
a single entity but rather, an organization made up of hams just
like you and I. They value your input (written from an educated,
not emotional, point of view) just as much as they value anyone
else's. You're free to make nominations or run for office just like
anyone else. And when the FCC invites comments during NPRM periods,
you're free to provide written recommendations just like the League
does.

>If you can figure this out, you'll realize quickly why your
>attitude causes many here to dislike you.

I'm not here to be liked, only to provide some facts (which I try
to always back up with references) and opinions. My feelings towards
the writers are neutral, no matter what opinions they might have. You
should practice that, too. Post counter-opinions, -views, and facts
without condemning the authors. Try to emulate those of us who reframe
from name-calling and personal attacks. It's okay to dislike a writer's
opinion without disliking the author.

73, Jeff

I don't believe that was the point of Cecil's remark. My take on his
comment was: Machine copy came before aural copy (which isn't true by
my above reference). The encoding scheme (Steinheil's bell code, Morse's
dit/dah MACHINE code) didn't seem to play any role in his remark.

Machine copy of Morse Code came before aural copy of Morse Code. My comment
stands.

Since the original specification for Morse was machine copy, imagine a telegraph operator of the time who was unable to aural copy greater than 5wpm. Would it still be faster for him to "head copy" or to translate the tape per specification?

The cutoff was March 21, 1987. A Technician license issued before that date
already has element 3B credit and therefore has a NO-TEST upgrade to general
class on April 15, 2000 (or after).

Loser James Vincent O'Brien is still canceling posts put up
by others who get his goat. He can dish it out, but the big
crybaby cannot take it.
He baits others, abuses others, calls names and gives out
personal information about others BUT when others do same
to him, he blubbers that he is a victim...he whines and
goes psycho.
He could be the poster child of the month for the Mental
Health Association. He could also win awards for the
Flophouse Of The Month....

I have to agree, Log-eqf is one of the better logging programs. I think
there might be one that uses a direct interface from your pc to your
rig, and it records your freq., etc.

437. Re: Morse

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-05 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <89t255$1ht$1@news.hawaii.edu>
Source record: 117756
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Cecil wrote something similar to: "Why copy Morse by ear when it was originally meant to be copied by machine?"

Cec, I found something interesting in Archer's "History of Radio to 1926": Prior to Morse's telegraph, Gauss and Weber, in 1833, had invented a telegraph system in which the deflection of a compass needle conveyed transmitted data. Gauss turned the device over to Steinheil in Germany who then set up a telegraph line with bells on the receiving end; which bell was struck indicated the letters of the alphabet.

So we see that aural reception (with bells) did indeed precede Morse's mechanical receiving device.

From: Paul
Message-ID: <38c218df.126306793@news.mindspring.com>
Source record: 117757

Does anyone know if there are any websites with info on mounting a HT (2 meter/440) on a bike, with whip antenna and external battery? I remember an article in QST about this a long time ago, but I would rather not bother with ordering a back issue if I can gain information another way.

Do any of you have experience doing this? What type of antenna/ground plane did you use? Your first hand knowledge would be especially appreciated. Thanks in advance for any responses.

Paul

Easy, I did it all the time, Just be sure to use a deep cycle
battery.
Radio on handlebars (in center) battery. and whip behind seat.
At 440 the bike frame ground is good enough, not a good 360
but sufficient.

For an overview of the Morse mechanical receiving device, see:

Harlow's "Old Wires and New Waves"
Coe's "The Telegraph: A history of Morse's Invention and Its Predecessors
in the United States"
Archer's "History of Radio to 1926"
et al

The Morse receiver consisted of a pencil attached to a solenoid
armature. The dots and dashes were printed on a continuous paper
tape, pulled along by a clockwork mechanism. The operator would
have to remove the paper tape, then translate the dots and dashes
into alphabetic form by typewriter. Very time consuming. In contrast,
copying by ear meant the type-written customer copy was produced
as the sounds were being made -- much faster service. If the
message was internal (no type-written copy necessary), the operator
just copied in his head ("head-copy").

Copying by ear *greatly* simplified the system which translated into
dependability of service, especially in the field during the Civil War
years. It was the telegraph operators, sitting the office watches day and
night, who realized the tremendous benefits of switching to aural copy.
Management was at first skeptical, but eventually went along with the

operators' wishes.

Well...since no one has figured this out yet, I'll be so bold as to offer a summary.

There is almost no completely safe way to do business over the internet with private parties. You ARE TAKING A CHANCE both buying and selling. That's it. eBay is probably one of the safer ways due to the recording of feedback left by buyers and sellers about each other. I have had no bad deals on eBay, but had a very close call with a newsgroup listed piece of equipment. I almost lost $500. Bottom line is...if you don't feel comfortable buying or selling on a newsgroup, then don't. But don't get burned either way and post the fact you were suckered into a deal and it's someone else's fault. Own it and get over it.

If you're upgrading to extra, you already have an amateur radio license and
therefore should already be familiar with what a diode looks like and you
should already know the answer to your question. Now, go away. We already
have a bash-fest over legitimate amateur radio topics and don't need you to
stir "the already volatile pot."

I agree with that. There are always those out there who will cheat someone.

You're lucky. I've heard of situations where the money was never returned but
in fact cashed by the seller even though the goods went to someone else.
Sounds as if you're upset with his honesty and preferred to be shafted in the
deal instead.

[It also sounds as if the deal wasn't as well confirmed as you had believed.]

> > Now my bank doesn't even want to take the unsigned money order back because

That's an issue between you and the bank. If I were you, I'd change banks -
there's one in Disneyland (at Fantasyland) just right for you - but then again,
I would have retained the receipt portion of the money order, so I'd be able to
prove that I was the original purchaser of it.

Why don't you simply rely on dealing locally, so you can settle up at a local
club or swap meet and therefore SEE and TOUCH the equipment you're after.
You'll know it's not going to accidentally go to someone else.

Interesting!

I would say that removing the diode *would* add the SF function
(variable offset function) except that I think that the SF radio was
released significantly after the original AH-50. In fact, the manual
states "The most frequently asked for improvement was variable
offsets..." Anyway- give it a shot, I added a diode and nothing
happened. I'd presume removing it wouldnt do anything either.

Do you also have the line of four 2-conductor solder pads? They are
just to the right of the contacts for the F (function) and light keys.
In fact they share some of the same PCB traces. I've bridged all of
them and nothing seems to have happened...

Let me know
Thanks!

I have had plenty of bad deals on Ebay! I bought a watch from a guy with a feedback rating of over 300 (that is alot). The watch didn't work properly and looked used when it was supposed to be new. The seller was very uncooperative and actually told me he couldn't do anything about it even though he stated a 1 year guarantee! Ebay was also less than helpful when I contacted them regarding the seller and replied with a form letter suggesting various courses of action. I have purchased tubes on Ebay as well which were represented to be in much better condition then they actually were. How is Ebay safe if they take no action on the buyers behalf? If you get ripped of on the NG there is always the Postmaster and Mail Fraud which they persue quite agressively.

Dear Charlie Troll, cut all the diodes -- they only block the current most of the time. If you're not sure if it's a diode, cut it anyway -- it's probably either a resistor (slows current down) or a capacitor (doesn't really allow any current flow), so who cares?

Now, after removing all those blockages to power, you'll have to replace them. I suggest getting an oxy-butane torch or something really hot and melting a whole lot of solder into the rig. Use acid core to make sure there's no cold solder joints. Play the torch over the rig for a minute afterwards to make sure the solder is properly spread, then cool it down with heavily salted water. You now have a rig that will handle a lot of power.

And please don't include rec.radio.scanner in future.

Ron of that ilk.

>Machine copy of Morse Code came before aural copy of Morse Code. My comment
>stands.

Actually, to be picky, the machine copy initially consisted of just zig-
zags, not dots and dashes; the pencil was in continuous contact with the
paper tape drawing a straight line, and when the solenoid engaged then
released, the straight line was broken by a zig-zag. No "Morse/Vail Code"
dot/dash scheme had yet been put into practice. (See Archer, pages 20-21.)

Anyway, I stand by my initial comment above:

>>>>So we see that aural reception (with bells) did indeed precede Morse's
>>>>mechanical receiving device.

You really can't argue with that fact.

>Since the original specification for Morse was machine copy, imagine a
>telegraph operator of the time who was unable to aural copy greater than 5wpm.

Nothing on the wire was sent that slow. Traffic on a wire consisted of
press, train location reports, future train schedules, personal telegrams,
official government telegrams -- someone who could only send at 5 wpm
would have never been hired in the first place; traffic would have backed
up, angering the other operators up and down the line. Remember, we're
talking about a *single* shared wire having to pass all that traffic.

On Page 107 of Coe's book makes reference to 10 wpm still being a student
speed.

Here's an example of how good these guys were:
On Page 70: "...given a casual 'go ahead,' Pittsburgh began to send
at the rate of 30 words a minute..." as Operator Weir casually searched
for a pencil at his desk, rose from his chair to look for a pencil else-
where, asked Chief Stevens for a pencil, Stevens unlocked his desk, gave
Weir a pencil, Weir walked back to his desk and sat down, Weir looked
for his pocket knife to sharpen the pencil, couldn't find it so walked
across the room to borrow a knife, walked back to his desk, sat down and
very deliberately, sharpened the pencil to a fine point, got out a pad of
paper, and began writing down all that had been sent since his 'go ahead'
had been sent! "Pittsburgh, meanwhile, had been sending steadily at the
rate of 30 words a minute and was more than three messages ahead" when
Weir finally began writing, yet his hand-written copy was without flaw.
That's quite a memory cache!

Actually, the Morse/Vail dot-dash code was created in 1837 (Coe, Page 69),
while Morse's mechanical receiving device, drawing zig-zags on paper tape
was built in 1835 (Archer, Page 20-21). The "Morse code" was not in
existence at the time when Morse was first demonstrating his machine.

A point, I think, everyone has failed to note here is the purpose of the communications. If Matthew is looking for any type of business communications, he needs to use business band or CB (class A on 450 MHz thru a repeater would work great). If he only want to keep in touch with his friend, ham radio is great, providing they both have licenses.

I consider myself a subscriber to QST magazine, not a league member. However that's not the way the league looks at it. Subscription and membership cannot be separated. I should be able to get a further discount since I'd like to continue to receive QST below the newsstand price, and do not wish to be a member of the league. So how do I get a refund for something addtional that I do not want?

Certainly one is not surprised by the stupidity of AF2Y. He is notorious for his ham radio antics and Riley has the goods via tape recording of this YAHWEE doing his usual jamming on the 20 meter band. Lets hope that Hollingsworth pulls his ticket and we will not be bothered by this fool again. Also the Druggie in Tampa will be following AF2Y into the history of amateur radio idiots. Hollingsworth warned KE4TEW and he is back at his antics again. Hollingsworth got a great tape of dummy Dale doing his trick on 20 meters again.

Sounds like grounding to me.

Make sure you have a short thick braid strap bonding the body of the
FT-100 (mounting screws) to the body of the vehicle.

Do the same ting with the base of your antennas and I reckon all will
be sweet.

Any HF radio in a mobile shack needs to be well grounded.

I have an FT-100 in my Jeep and the factory stereo works fine when I transmit. I'd say it's the installation. Maybe improperly shielded equipment or a poor ground.
Home stereo's are subject to this from nearby transmitters (house next door) all the time and it's almost always the stereo that's the problem. I'd try ferrite chokes on all leads and short solid ground connections to start.
Sounds like a tough problem, good luck.
Steve AI7W
(BTW you know that its illegal to transmit music over the ham bands, even in the background).

Someday Polly will grow up and stop creating clubs for the purpose of exclusion. He acts like a child on a playground because to him, the arena of ham radio is nothing more than a PLAYGROUND. I see him as a doddering old fool who's changed venue from playing harmonicas and music on the air to gathering a flock of gullibles for his own intentions. I've never encountered a worse example of amateur radio operator than that man and how he's escaped punishment is absolutely bewildering. Maybe those vestments he wears at church and his position of elder meets with sublime favortism?

The home of KC8JBO must be a REAL RIOT!!!!!

1st of all you have the SENILE 'ole GOAT who has been BED RIDDEN for the last 2 years.....How are those bed sores doing ELEPHANT BOY? When will the 'old kodger KICK? I want my money!!!!

2nd of all you have KC8JBO who is to now be known as, DOG FACED BOY, CIRCUS BOY, MR. FREAK & a host of other names about the shape of his DISFORMED HEAD, hohohoho.

Go see if she dropped a LOAD in her Pampers,

PITBULL

If the Stereo is an after-market installation, I'd try putting some ferrite toroid chokes on the speaker leads... as close to the stereo as possible, If you're using an audio amp, the problem may be a lot tuffer to solve.. you could try putting toroids at the amp speaker leads as well.

If you use an audio amp, try turning it off... Problem still there? Try putting chokes on the Stereo's output leads and possibly a choke/filter on the DC line feeding it.. If the problem is only with Audio amp on... put chokes on amp audio input leads and possibly the DC line (close to amp) Try again, problem still there? Try adding chokes to amp output leads as well. Try again.. Problem still there?.... I give up :-)

507. E.H.Scott SW Radio schmatic/manual?

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-06 00:00:00 UTC
From: WB3KUM/9 <d.breeden@NOSPAMwcom.com>
Message-ID: <38C3D876.6F6BFEA@NOSPAMwcom.com>
Source record: 117626
Cross-posted to: rec.antiques.radio+phono,rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.misc

I have an old E.H.Scott LW/SW radio. It covers both long wave and short wave, but no medium wave. I don't know the model, the plate is missing but it is definitely a E.H.Scott by the patent plate. It stopped working and I isolated to the IF section. It covers 455KHz so the IF can't be 455KHz.

Questions,

1 What model is this?
2 What is the IF? It seems to be about 540KHz.
3 Is there any schematics or manuals and where?
4 Are there any bulletin boards to obtain unique parts?

Many thanks in advance

Dennis

Complex issue it is and we were stupid to get involved. It's in
Europe's back yard and it's time for them to start paying for their
own defense. They've been dependent upon us since WWII. They've
fully recovered now, so it's time for them to start paying their own
way both in money and lives. Excellent article at:

Cindy:
Why should we believe you anyway? You and your husband lied to the FCC and said you were of the Negro race, in order to influence some punishment being handed down by their office against one of your so-called radio friends. Yet, all your other government documents say "White" or "Caucasian". Even your neighbors were surprised to hear that you were "black"!

So what IS truth to you and Mr. Visser???

Dennis -

Hello....my name is Kent King, and I am one of the co-founders of the E. H. Scott Historical Society. I'm sure we can identify and help you with this set. If you could email me with the following information, I will identify the set, and can tell you what data I have available.

1. Tube lineup
2. The IF varies, depends on the model (we'll find out)
3. What are the exact ranges of the set (standard AM, FM, etc?) Exact numbers here really help.
4. Depending on the model, I may be able to help you obtain odd parts too. Let me know, my email address follows:

Thanks!

KC8JBO, if your Mom is, in fact, ill, couldn't you employ your time productively? Squabbling over nonsense here isn't going to help her one bit.

I suggest you do what I did when my Mom had her final illness. I spent full time on her medical needs, combing the Web, chatting with folks familiar with Mom's maladies, keeping a medication log on the computer, seeking experts on her particular problems, nursing her, and managing a staff of therapists trying to resurrect her. I didn't have time for ham radio, let alone this silliness.

In the end, actions speak much louder than irrelevant words. My heart is with you and your Mom.

As someone just about to come back on ham radio, these posts scare me. I plan to do everything possible while operating, as I have in my posts here, to spark harmony. Yet I'm fearful of summary justice, imposters and fabricated evidence.

Since Doc got his first warning, none of us has proof positive of further alleged infirmities. A letter from Riley should not be deemed automatically as wrong-doing by the recipient. Knowing that Riley has poured his heart into his job, his success has come at the price of certain fundamental precepts of Due Process.

It has been reported that 10% of those condemned to the death penalty may be innocent. Likewise, there are a minority of hams who do not deserve the treatment meted out and are without resources for remedy.

Our Founding Fathers put much stock in the accused's right to be confronted with the witnesses and evidence against him. Such should apply to ham radio licensing, where evidence and witnesses are accepted without authentication nor the opportunity for refutation.

We should establish a higher bar for the probative value of evidence, so that no one can arbitrarily affect the discharge of another unless evidence within the rules of evidence corroborates culpability.

Bob Sherin, W4ASX

One more point. If you get a COD package, you won't know what's in it until you open it and you can't open it until you pay for it. It could be filled with bricks.

That's why there is such a thing as escrow for major purchases. Perhaps it would be a good idea to start an escrow company for online deals. It would be more expensive but at least there would be a better chance of neither party getting cheated.

I am not pleased nor do I think you moving header is
funny.....your
disclaimer says you don't mean to offend.....I think you
do.....I tried to help do something positive for that I
am greeted mockery.....I have tried to be a
positive person on ham radio.....I find it
curious.....that you think it is acceptable to mock
someone with the ferosity you have come after
me.....you will probably
suceeed with your group to ruin what was the beginning of
a good thing.....please keep me and my name off your
site.....and that includes any veiled
references.....sorry but your type of humor
has deteriorated into cruelty.....W3QAM

You seem to be taking sides sir. For your information the
Old
Whippersnappers was and is created for older amateurs and
younger ones
too, if they care to participate. Donald Anderson might
have caused the
idea to be born, but his input was minor. I think it is a
good idea to
respect and honor your Elders. I have all my life
You are making fun of that. Just be fair to both sides
and I can tell
you the group you are making sport of is for real. People
from both sides
of the confrontation belong to the WS group.
For your info

If you believe lies and slander, you are not much of a person or a lawyer.

> I suggest you do what I did when my Mom had her final illness. I spent
> full time on her medical needs, combing the Web, chatting with folks
> familiar with Mom's maladies, keeping a medication log on the computer,
> seeking experts on her particular problems, nursing her, and managing a
> staff of therapists trying to resurrect her. I didn't have time for ham
> radio, let alone this silliness.

I suggest you know what the hell you are talking about before you offer opinion on it. Maybe she isn't as sick as my detractors make her out to be. Maybe my detractors have absolutely no clue as to what is going on. This is most likely, mainly because they have a terminal case of cranial-rectal inversion. Or in plain language, they have their heads firmly implanted up their asses.

> In the end, actions speak much louder than irrelevant words. My heart

Best I've heard ten in YEARS!!!. I did participate in the contest and
got 255 stations (all DX) on TEN ONLY. Yes sir its nice to have a ten
meter band again.

Mike,

Quit being such a grump....sheesh!!!. I'm not defending her choice of frequencies or her operating. But, she may not have heard you or the other stations. Did you, or anyone swing their beam and mention this to her? I was not there, because I don't use that frequency any longer. I checked my logs and I didn't work that station anywhere. Oh well..hi.

I am a contester on both cw and phone. I always ask if the freq is busy, if it is I MOVE. I can't say the same for others. Now back to working Clipperton on CW.

My former coworkers in the "company" have informed me that this "person," a feces-eating dung beetle, has been molesting little boys in the Minneapolis area for years. He uses ham radio as a ruse to get little boys over to his sharecropping farm, then molests them. Bloody wanker, he needs his ball cut off and left to bleed slowly.

Bob,

Well put, as usual. However the answer is as obvious as the nose on
your face. Just stay off of 14.313. Avoid discussions that detract
from amateur radio. And just enjoy your hobby/service. See??

It only takes a couple of days, but that is after the VEs send in the data. Not sure how long it takes now, but last year tests were given on Saturday and by Monday night lots of calls were in the data base. Took several more days for all of them to appear. I took this as the time it took the VEs to send in the data.

> will I get an auto-upgrade to Advanced Class? Will I get "grandfathered"
> into having an advanced class lic?

Sorry, but NO, you won't get upgraded to Advanced. Advanced requires a 13 wpm test (actually General does, and Advanced requires that you have a General first). Since you can't get a General without 13wpm until April 15 and Advanced goes away on April 15, its a Catch-22. A pre-April 15 CSCE for Advanced won't get you a cup of coffee, let alone an upgrade. Now if you had the Advanced AND the Extra CSCE's you would be able to upgrade to Extra, BUT - see below.

> > If I take and pass the Extra written test prior to 15 Apr, will I get
> > auto upgrade?
> Again, what I meant was if I take the Extra exam prior to 15 Apr but not
> the 20wpm code exam.....will I get Extra class priv after 15 Apr?

Yes, provided that you also have a CSCE for the General and Advanced written tests. Since you would have to take both the 50-question Advanced and the 40-question Extra tests before April 15th, but only the new 50-question Extra test (really both tests rolled together) after April 15th, why would you want to submit yourself to the added ordeal of two tests and many more questions to study for and answer? Take the General now, if you want, but wait until after the 15th for the new Extra.

>
> And the final question that didn't get ananswer...
>
>
> > Are there any good study guides available for the post-15 Apr Extra
> exam

Several sites have the new question pools - though I haven't seen any books out yet. Gordon West's books should be out any time now - try Radio Shack periodically.

For now, you can get the new Extra pool questions with their answers from http://www.arrl.net/arrlvec/pools.html

You're right, Michael, I should have said, not legally except
for emergencies. I actually have never used my ham transceiver
on the CB bands. I "confessed" because I knew it would drive
Dick right up the wall. I had my emergency blinkers on and was
considering using my IC-706 on CB when a kind motorist pulled
over to see if he could help. If someone had not stopped to help
me, I probably would have tried using my IC-706 on a CB frequency
since I didn't have a CB radio with me at the time and I was
out of range of any 2m repeater.

I have this secret about the wife of one of those ham radio
guys. See, I'm a lesbian and I've been having an affair
with Eileen Youngblood. We met while I was having a tooth
filled, and her nicely trimmed bush really excites me. She
wasn't wearign any underwear at the time, and when she bent
over, i could see her molly. It was luv at first sight.
We usually meet in out of the way places to have a hot 69.
I just couldn't bear to keep this secret any more.

I'm in search of a reliable but low price two-meter handheld. I'd like
something for use in country drives; a rig that will contact repeaters.
Please recommend a brand and model number.

Thanks, Sam

That is like asking if it is better to buy Coke, Pepsi, RC, Shasta, or Store-brand cola. All of 'em work pretty good. However, DO NOT buy the Radio Shack HTX-200 - it only has 200mW of POWER. I like my Kenwood TH-22AT, I've had it 5 years, and they still make it. I real bitchin' radio is the Kenwood TH-D7A, it is VHF/UHF, and comes with builtin 1200/9k6 TNC and APRS s/w - it will cost some coin, but if you've got the dough, I would buy it.

550. Question about telescoping TV mast

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-07 00:00:00 UTC
From: horseshoestew@my-deja.com
Message-ID: <8a449pfqh1@nnrp1.deja.com>
Source record: 117491
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.digital.misc

My Dad has a telescoping TV mast at his home(I'd guess it was 40-50' high). The rotor has gone bad, and I'd like to replace it. Furthermore, I wouldn't mind putting a 2m/440 dual-band antenna on top of it while I have it down.

The thing is - how the heck do you collapse these things? There are bolts that extend from each outer sleeve into the next inner sleeve. I can see if I loosen the bolts the next successive inner sleeve will fall down into the outer sleeve - but what stops it from falling really fast! Should I just loosen them slowly and hope I reach a good friction point so the thing falls slowly? Is there a better technique?

Thanks,
Stewart - N0MHS

I have an ADI 201- its reliable and its low price (about $140 when i last checked) however it doesnt have all of the features such as lots of memories, alphanumerics, pc programming, autodialer, etc. that some of the more expensive ones have. Also depending on how far in the "country" you'll be taking it you may also want to get a magnetic external antenna to use with it, as its range will become somewhat limited when using it inside the car with the oem rubber antenna.

Erik

What else is there of interest in Ham radio nowadays, except digital communications and antenna construction? APRS and Hi-speed packet/Internet gateways are "where it is at".

Other than emergency communications, HF is for the birds. Now that I can easily get on HF, I'm not really interested anymore. With the Internet, it has made HF communications a painful and expensive joke. CW and skywave communication is quaint, and slightly interesting, but that is about it. If I can pick up a good rig really cheap on Ebay from the estate of a SK, great - otherwise furgit it.

As for VHF/UHF voice repeater communications: its heydey is finished. There is almost nobody using the voice repeaters here in Southern California - they all have cell phones!

Hi,

I need some advice on mounting an antenna on my house. I think the best place might be off the chimney. Can anyone recommend any books or web sites that offer tips on mounting base statation antennas?

Also, the antenna I have in mind is the Diamond X-50 because it was the shortest dual-band antenna I could find with decent gain. Can anyone recommend a better antenna? It can't be any taller than the X-50 (I think just under 6 ft.).

Thanks
David

Basically brute force ... you use a heavy set of work gloves and go with
care.

> Should I just loosen them slowly and hope I reach a good
> friction point so the thing falls slowly?

If you do that, the bolts will scrape off the galvanizing in a strip the
whole
length of the mast sections, resulting in rust and eventual structural
weakening.

> Is there a better technique?

Not that I know of ... you can always have two sets of heavily-gloved
hands to provide the friction brake. Unless the thing is overloaded at the
top,
it should be manageable.

It would also be helpful if you had enough hands to manage the guy wires
so that the thing stays more or less straight as you bring it down a section
at a time from the top of the bottom section. That will help to prevent
collapse
of the upper sections by keeping them from flexing to the sides as you lower
the sections ... without some *gentle* guy force to keep things vertical as
it
comes down, the top sections could flex to the side and buckle and collapse.

Good luck, and most of all have enough help to do it safely and be careful.
(ALSO ... make DAMNED sure that there is NO way the thing could come
into contact with any power lines if it should decide to buckle and collapse

in ANY direction!!!!)

Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.digital.misc

What Carl said. Lower each section slowly. Use good, thick gloves and keep your fingers out of trouble's way. Don't Drop It!

I've had some luck using pipe clamps big enough to go around the mast as stops, preventing a runaway fall. However, you'll want these to apply an even force around the mast as otherwise they can deform it, prevent it from telescoping and make it more vulnerable to buckling.

Too much weight on top of the mast makes it dangerous to collapse and very hard to raise. But if you have that kind of weight up there, you need a tower, not a telescoping mast.

I beg to differ- I would have to agree with Doc, if Bush gets the
nomination he will LOSE in November. I'm sick of Gore and Clinton, but
it would make me even more sick to vote for GW so if mccain doesnt get
it, my vote is going to GORE. just my $0.02.

Erik

possumbelly,

First, I wanted to concur with the poster who complimented you. Your genre of writing is indeed a riot.

Take stock for a moment: Do you think if I were on unprescribed drugs that I'd post anything like that calling attention to myself? I found writing it funny in response to the German hardcore post, and my Wife found it so too.

As to your other questions, mental illness and wellness is something with which we all cope. Many of us do it with pharmacologists and psycho-therapists. The biggest job of my life has been reaching for mental integration, no easy matter when you have Bipolar 2 Mood Disorder.

Today, though, science exists to render lives such as mine exceedingly normal--in fact, in most case far beyond most "normal" people. First publicised by Patty Duke, bipolar illness affects many of our best and most successful peers, such as Ted Turner.

A new medication, Deprekote, can treat mood swings so that we no longer live lives on a seasaw. Supplanting Lithium, Deprekote, called a mood regulator, has fewer side effects (I feel none). Of course, for the lows of depressions, there is an array of medications from which to choose, the most popular being Prosac.

The practice behind this is still embryonic, a matter of old fashioned trial and error. Trouble for the sufferer is the time the trial and error takes as well as the time to metabolize anti-depressants. Plus some anti-depressants must be washed out before trying others. Thus, when proper medication is in the trial stage, a sufferer can remain in limbo for weeks or months, a relatively dangerous period for the patient.

Given the right treatment--and we're talking about chemistry of the brain-- mental disorders need not bring people down. Please believe me when I say that there is a world of difference between following the prescription plan and having no plan at all. Optimism can plummet quickly to helplessness, emptiness and hopelessness.

As a ham, I went public with this over the airwaves more than a decade ago. In the meantime, many hams so afflicted have sought treatment to their benefit and the ham radio community's.

What broad in her right mind would want to date
that commensurate looser? He defendes lying felons
who can't tell the truth, bares his soul like a
"radio-flasher" on the air, has an self admitted a past
history of mental illness and supports pickle-faced
religious bigots like kc3au. Best thing Bob can do now
is come "out of the closet", call up David for a
date and take a trip to Key West where the two of em can
kiss and rub each others nipples in the setting
sunlight of the Gulf. (...now you just KNOW I'm right
on that last observation eh?)

Robert Morris wrote in message

Oh Boy! Are you going David? and are U bringing
Trojans for all those transvestite NYC hookers
"she-males" for the trip back?

> An old Drake and a burned up cloud warmer.

You should sell your gear off David. Then you can
pay for bus fare to the Rutland VA Clinic and get that
fist-sized Parker's cyst surgically removed from off the
side of your neck. You still don't have that thing
on your neck, do you..? Sh-t mon, when I saw that thing on U
it looked like a cross between a defective parasitic Siamese Twin
and a tomatoe growing from off of the side of your head!
This was at Dayton some Years back, I nearly THREW UP!
Get that partial birth abortion from off of the side
of your freakin head David - Oy! People see you comming
twoard's them with that "cat-head" growing out the side
of your neck and must think your escaped from Saddam's
Research lab or a mental institute or something!

> What about the tread mill!!

Why don't you buy one someplace and sell it to the lesbian couple
living next door to you? If you lucky they may even take a liking to
you and let you sit in and watch one of their bizzare No-69
"rug-munchin" sessions David! Your not thinking like
an enterpranur David!- here's an opportunity to see your
neighbors using both "strap-on" and "double-ended" variety
play-toys on each other and your letting it all go out the window!!

SHEESH...vhat a Schmuck you be!

Hambos, hamlets and hamstrings, today, March 7,2000, Super Tuesday, will prove to be a decisive day in the history of the Republican Party. If John McCain presents a strong showing, he can be nominated this summer in Philly and CAN beat Al Gore. If on the other hand George W. sews it up today, you G.O.Peeers will LOSE in November. Why. Because we must realize that the NON-WHITE vote is gaining strength in this nation and based on the alienation over the years of the Repub. Party from mainstream America added to Bush's address at Bob Jones College or University, such voters will become even more entrenched within the Democrats. Now add to this the Catholic vote which will go against George W. thanks to Bob Jones plus the traditional Democrat Jewish vote and we have a Gore victory. t's McCain or disaster for the G.O.P. on Nov.2000. I have political savvy and have spoken. AF2Y

We know you're on drugs, Fatass...You've been arrested and have served
prison time for it, haven't you Dimmy?
Poor Dimmy, he didn't have much of a home life growing up, with his
often-absent father either out drunk laying in a gutter somewhere, his
mom turning tricks, and they were both alcoholics. Dimmy O' Brainless
has an i.q. in parity with his shoe size.

Hey, O'Bese, when are you and Donna gonna clean up that filthy trash dump you RENT, the dilapidated, condemned hovel 4 feet from the road in Hiram? I heard that the roaches have filed a complaint with the Department of Sanitation, you two make the roaches sick. The CDC has declared your trash dump a disease "hot zone."
How does Donna filter the food through those false choppers? I bet you she hasn't efferdented them in 2 years. Her false teeth are a nice fir green color, that's why she never smiles, of course, having false teeth is a blessing to the truckers down at the truckstop at the interstae, huh? O' Bese, how do you keep furniture in hour hovel? You two fatasses

with the retarded grandson must defy the reccommended weight allowed on the furniture. I hear that every time you made a trip in the redneck rv bread truck, you had to pay off the weights and scales checking station to pass your fatasses on through.

Drop by and find out, you drunken "i've killed once, and by god, i
might kill again." Bwhahahahahahah..the only thing you've killed is a
fifth.

you aint got the gonuzzis to mak the
> trip. an ones you got down hear. you wood shit yerselve 18 times cum
in
> up my dryve way. i herd that.

You think so, huh? What driveway, dickhead, you live so close to the
road you can feel the vibration from the 18-wheelers.

you bet her sent granny down hear. if in
> you wants sum body shot. i herd that. she probly got the guts. i no
you
> dont.

How much you want to bet, of course, we all know you'd hide behind that
obese sow you married, like you did at the hamfest with Oris.

you did a lil bet her hide in yor identalty this time. it took me
> all most 20 minnits to pop you outta neuropa.

Suure I did. Post the proof. It'll be non-existent, like your page with
my crdit history.

hey - you stil got a
> count on MSN. I bet it coz you stil owes them money. i herd that.

No I don't, you fucking idiot.

like
> the money you dint never paid to SEATTLE U. now that a storie wat mak
a

> storie. i herd that. i got too verse ons frum the bursters offise.
okay
> i ansered all yor silly quest onions. so hear is one fer you - do you
> reely owe SEATTLE U the money?????? or is you in tensions to disputate
> thair clam a ginst you?????? hell you probly never gone back to WASH.

Hell, asshole, I've never been to Washington state.
Your "investigative" skills are like all your others, severely
lackluster, not even mediocre, but fitting for a convict like you,
O'brainless.

so
> who cares????? i side in wid you on this hear matter. coz the skool
down
> hear try in get money frum me two

Yeah, so does a half-a-dozen other people YOU owe, huh, Dimmy? Your
credit history is not stellar, and from what I understand, you opted to
move out of places BEFORE paying the back rent due. You have several
old landlords looking for your cellulite-encrusted ass.

. i herd that. any one who want a peace
> a this storie. call the bursters offise at SEATTLE U. tell them you is
> woger. an tell them you wants to no how mush money you bee owen them.

Suuure you did. Like they will talk to anybody

do

604. KC8JBO Special Event

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-07 00:00:00 UTC
From: kc8jbo_lardboy@my-deja.com
Message-ID: <8a3iim$21o$1@nnrp1.deja.com>
Source record: 117566

I have a SPECIAL EVENT planned for this weekend.....We will be touring the CRAP SHACK of KC8JBO!!! If you would like to come along to see ELEPHANT BOY & the 'ole GOAT here is what you need to do:

We will be meeting at 1:00pm on Saturday the 11th near the intersection of Lindy Lane & County Hwy 10 in Glendale, WV. Here is the ITINERARY for the day........

1:00pm.....Gather at location

1:05.....Start walking to home of Mr. DEFORMO

1:07.....Arive at the CRAP SHACK

1:08.....Meet the DOG FACED BOY at the front door

1:10.....Step over BEER CANS & other junk to get to the bedroon of the 'ole GOAT

1:10......See the GOATS bed sores

1:12.....Look at the Yaesu radio of KC8JBO

1:13.....LARDASS will demonstrate how he QRM's

1:15.....See the hole in the backyard for the 'ole GOAT

1:20.....Lunch, bring your own.....FATSO is too BROKE to provide any food

1:30.....POINT & LAUGH at the DEFORMED HEAD of CIRCUS BOY

2:00.....Discuss our adventure & depart the CRAP SHACK

This event will be a FUN TIME for all who attend.......Just wait 'till you see what shape the 'ole GOAT is in, hohohoho!!!!! Have those CORN SEEDS yet, FATASS?

I have a SPECIAL EVENT planned for this weekend.....We will be touring the CRAP SHACK of KC8JBO!!! If you would like to come along to see ELEPHANT BOY & the 'ole GOAT here is what you need to do:

We will be meeting at 1:00pm on Saturday the 11th near the intersection of Lindy Lane & County Hwy 10 in Glendale, WV. Here is the ITINERARY for the day.....

1:00pm.....Gather at location

1:05.....Start walking to home of Mr. DEFORMO

1:07.....Arive at the CRAP SHACK

1:08.....Meet the DOG FACED BOY at the front door

1:10.....Step over BEER CANS & other junk to get to the bedroon of the 'ole GOAT

1:10......See the GOATS bed sores

1:12.....Look at the Yaesu radio of KC8JBO

1:13.....LARDASS will demonstrate how he QRM's

1:15.....See the hole in the backyard for the 'ole GOAT

1:20.....Lunch, bring your own.....FATSO is too BROKE to provide any food

1:30.....POINT & LAUGH at the DEFORMED HEAD of CIRCUS BOY

2:00.....Discuss our adventure & depart the CRAP SHACK

This event will be a FUN TIME for all who attend.......Just wait 'till you see what shape the 'ole GOAT is in, hohohoho!!!!! Have those CORN SEEDS yet, FATASS?

I would like to invite you to join the TM-V7 community.

The description of this community is:

The TM-V7 ONElist community is a place for ham radio operators to discuss
operating tips and tricks, and other experiences they've had operating the
Kenwood TM-V7 (A or E) dual-band amateur radio, and/or the software used to
program the radio.
Additionally, it may become a place to post frequency load files for the
TM-V7.

You can join this community by going to the following web page:

http://www.onelist.com/subscribe/TM-V7

Or you can join by sending email to the following address:

mailto:TM-V7-subscribe@onelist.com

Let me know what you think.

Thanks & 73,

KBULA

609. FAMOUS HAM'S PHONE TAPPED!

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-07 00:00:00 UTC
From: remailer@exonet.org
Message-ID: <VRBK3XQV36592.8431134259@anonymous.poster>
Source record: 117571

We recently obtained, through the Freedom of Information Act,
proof that renegade OOs, working with the FCC, are tapping
the telephones of certain "high profile" hams in the northeast!

An example of what we found, recorded from the telephone
of a frequenter of 14.313 Mhz (who is more often seen here
these days "doctoring" his image), is an example of
this terrible invasion of privacy. The ham in question
does not give his real name.

Here is the URL:

http://chooser.mp3.com/cgi-bin/play/play.cgi/AAICQj.RAADABG5vcm3CBGV4dHJDbCbFOEZfLmVQNFSRTsm
PoWqXd54-/george.m3u

(Cut and paste if you can't click the link)

Warning: Adult Content!
You will need an MP-3 player like REALPLAYER (tm) and at least a
28.8 modem connection to hear the recording of this famous ham.

In the interest of Freedom,
Big Brother Watch, Inc.

Go to www.nocode.org, then get your technician license, then fight like the dickens to get the 5wpm Morse requirement removed. Then have fun with digital modes on HF, because, as you said, there is little activity in your local area - so VHF would be a drag. Glad to have you aboard! :)

Why the heck would he want to get involved with an old fuddy-duddy organization like arrl.org? They don't know spit about the modern world, and how to apply digital technology to ham radio. Best bet is to go to www.tapr.org and see if any of the modern digital stuff is of interest. If not, then forget it. If so, then go to qrz.com, study for your technician license, THEN go to http://www.arrl.org/arrlvec/examsearch.phtml to figure out where to go to take your exam.

619. POCSAG (PD2.05) Update

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-07 00:00:00 UTC
From: PhilPerkins <phil@pervisell.com>
Message-ID: <38C56656.58E92977@pervisell.com>
Source record: 117581

The latest version of the popular Pocsag (pagers) monitoring program,
written by Peter Baston , has just been released.

VERSION 2.05 February 2000

* Added support for parallel printer output.
* TEXTSCAN.INI can now have up to 100 strings.
* Logging of TEXTSCAN pages to separate log files.
* TEXTSCAN strings now work with space at beginning or end.
* Select logging of numeric, alpha or both via "logging" variable.
* Time stamping of received pages on screen.
* Fixed "Year 2000" bug in "expire" feature.
* Switching between two mapping tables, using control codes
(see CHINESE.LNG).

Existing registered user's key files will work OK with it - just copy
your key file into the working directory OR just overwrite your
existing version with the very latest.

Feel free to download it and try it - the main limitations in the
shareware
program are a 15 minute timeout (just run the program again) and no
logging to disk.

Free download from http://www.pervisell.com

Looks like you are in luck. I found a copy in my stacks. The article I see is for a wide range transmatch written by Lew McCoy. They quote the power handling as 500 watts cw or ssb, and half that for am. Does this sound like the correct tuner? I can scan the article later on and send you a copy. I'll need to run over to a friends house that has a scanner. I don't have one here. Also Lew McCoy hangs out on the antenna group quite a bit. You could probably get some info from him also if he remembers the article. MK

I saw a similar act. I was aboard the USS America on a 10-day
predepolyment shakedown Med cruise and landed in the radio room late
one nite maybe in 1965 or so. There was an CPO radio operator copying
cw coming out of a speaker buried in a console full of radios, he was
pecking away on a manual typewriter. The code wasn't particularly
fast, maybe 22-25wpm or so plain English. I pulled up a chair and
listened, no problem copying it by ear and I'm no speed demon.
>
The Chief sed Hi and got up off his chair and trundled down the
passageway to the local Geedunk and dropped some coins into some
vending machine or another and came back munching on a candy bar and
offered me one. He then sat down and went back to his Remington and
very casually caught up with all of it. Dunno if it wuz cache or one
helluva "multiprocessing chip". Probably both. Gates ain't got Clue
One.

Meg A Hertz <meghertzNOmeSPAM@hotmail.com.invalid> wrote:

>Who says we need a "common mode"?

RF respects no boundaries -- it's international in nature, and all services which are international (shipping, air travel, mail, et cetera) need to have the ability to communicate in a manner which extends across these boundaries. Amateur radio is no different. As communicators first and foremost, we desire to have a mode which *will* permit us to communicate across language barriers.

>CW is just a mode like SSB. You can have foreign Morse that
>you won't understand. Just because common abbreviations are
>used doesn't mean the same can't be true on voice! Q-codes?!!

Get on CW and you'll understand. I can have a QSO with a Vietnamese operator on CW that couldn't occur on SSB, for I can read and write in the language but have a VERY difficult time in speaking and listening in that language, with its six tones.

Morse code served the international maritime community for more than 90 years. It *did* extend across language barriers. (Did you know about the existence of a manual which contains 89,000 numerically-based phrases with translations into all the major languages?) I can transmit "24748" in Morse and it will be understood by every other Morse operator in the world, but try to speak that same number on SSB to a foreign operator. Unless he also speaks English, no communication is possible.

>If Morse really is the be-all and end-all of it,
>why does it have to be achieved by hand and ear? Why not let
>a digital DSP do it for you? Same result - life gets easier,
>otherwise known as PROGRESS!

Okay, let's have a challenge: You build a transmitter and receiver from scratch for your favorite mode, and I'll do the same for my favorite mode. Let's see who can get on the air faster, and make more contacts. Put your technical amateur skills to use. I'll even send you a soldering iron!

And the 8086 came before the Pentium. But that doesn't play any role in
what I originally wrote:

"So we see that aural reception (with bells) did indeed precede Morse's
mechanical receiving device."

>> >telegraph operator of the time who was unable to aural copy greater than 5wpm.

>> Nothing on the wire was sent that slow.

>We were talking about aural copy, not sending.

Again, nothing on the wire was sent that slow. If traffic was clipping
along at 30 wpm, then either an op was able to receive at that speed,
or he wasn't hired.

> Besides, "everyone" knows that you can send faster than you copy.

True, but if an op has the ability to send at 30 wpm, his receiving
speed would be around 15 wpm. (50% rule of thumb -- one can usually
send at about twice the speed their able to copy.)

>> Traffic on a wire consisted of
>> press, train location reports, future train schedules, personal telegrams,
>> official government telegrams -- someone who could only send at 5 wpm
>> would have never been hired in the first place;

>Before there were pools of trained Morse operators, I think they would
>have hired just about anyone. ^^^^^^^

That's your trouble -- you're guessing again. And, as usual, you're
wrong; See Chapter 9 of Coe's book: "Learning the Trade." Here are
some excerpts:

"...telegraphy was considered an attractive profession, particularly
for the young person who was not bent on college. It was a job that
had a certain glamour to it... There were a large number of telegraph
schools... The demand for commercial telegraph operators exceeded the
supply... There were a variety of home-study courses..."

>> traffic would have backed
>> up, angering the other operators up and down the line.

>They would have been ecstatic that they didn't have to wait 10 days for
>the pony
>express to deliver a message.

Now you're being silly again.

>> Remember, we're
>> talking about a *single* shared wire having to pass all that traffic.
>> On Page 107 of Coe's book makes reference to 10 wpm still being a student
>> speed.
>> Here's an example of how good these guys were:

As far as I know, character speed won't change from the current scheme.
Currently, I believe, the ARRL-VEC is using an 18wpm "fast" Farnsworth (each
character sent at 18wpm speed with enough space between characters and words
to bring the overall speed down to 5wpm). W5YI-VEC is using, IIRC, a
slightly slower 17wpm Farnsworth.

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!

.....

Please Welcome:

Jerry Green KC4GGU <kc4ggu@innet.com>
Brooksville, FL
I am the laison between emergency management and the RACES
group, as per the FEMA guidelines. The roster has about 25
members, with again that many, who do not check into the weekly
net. I have been doing this for about 3 yrs. I have been with
this RACES gtoup since 1988. I am always looking for things
that the group can do. My latest activity for the group is
SKYWARN spotter training. I am also trying to organize this
group under the ICS management system. Here in Florida we have
hurricanes, fires, HAZMAT and lightning.

.....

>From the Mailbag:

From: Ben_Green@oes.ca.gov

To assist the State ACS Officer in operational & some
administrative duties, the Deputy State ACS Officer will begin
to assume some of the heavy burdens which have also been shared
by the Program Coordinator. In order to make State OES ACS what
it is; the nation's premier EmComm Unit; the following duties
will be assigned to Dave Larton. This action will become
effective immediately upon receipt.

The Deputy State ACS Officer will be responsible for the
day-to-day operational needs of State OES ACS. All Region ACS
Officers will report to Dave directly for any operational needs.
The Deputy State ACS Officer has been directed to establish some
goals and projects for State ACS to accomplish within a certain
time-frame. The first project is to assist in the development
of the ACS Policy & Procedures Manual and Standard Operating

Procedures; specifically, the ACS position descriptions. The ultimate goal of this project is to provide uniformity throughout all three regions of the ACS program. To help accomplish this mission, Dave will journey to Sacramento every other Monday to meet with ACS Staff and the Coordinator. Please extend all cooperation to Dave as he undertakes this responsibility.

Ben J. Green
Assistant Chief, Telecommunications

.....

Current Events:

From: Ben_Green@oes.ca.gov

The OES Auxiliary Communications Service (ACS) will host an Amateur Radio No-Code Technician License training class all-day on Friday, March 24th starting at 0800hrs followed by an FCC exam. On Saturday, March 25th, testing for all license class's will be given starting at 0800hrs. {Those wishing to re-take the No-Code given on Friday will have a second change on Saturday too!} The location is the Inland REOC at OES Headquarters, 2800 Meadowview Rd, Sacramento. Those wishing to partake in the training and/or testing please submit your interest to me directly via email.

Thank-you

This week's EMCOMM Bulletin:

EMC226 Bulletin Focus
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC226 Bulletin Focus For release 2/28/00

Query: Why are the Emcomm Bulletins sometimes on topics
which don't seem relevant to Emergency Communications?

Response: Emergency communications do not occur in a vacuum
unrelated to people and management. The purpose of a bulletin
may be to stimulate unit leaders to think - about an idea or
application of interpersonal relations or management - for
themselves. Such bulletins may not appear to be relevant since
it isn't readily evident to Emergency Communications as such.

Unit management help and ideas are the most consistent need as
indicated by the responses from bulletins on administration,
management, organization and plans. Therefore the bulletins
address ideas, aids, suggestions and offer encouragement in
management as well as creating, establishing and operating a
unit. They also cover aspects of the human mind since the way
that a person thinks affects everything they do, like the EOC
manager who thinks he/she doesn't need an Emcomm unit. There
are ways to reach that person, albeit it takes time.

Few management and people aspects are Emergency Communications
specific. For instance a portion of bulletin 219 read:
"when you unconditionally accept someone just the way they
are, that acceptance gives them the space to change......
..... and ..... change they will."
That's something some people don't want to hear. Others will
resist that idea until their death; while for others it will
not make any sense. Yet, it is true and when a person has the
time to think it through and actually test and apply it, the
evidence is there and convincing. That is a basic principal
that applies to Emcomm unit managers and participants as well
as to people in general. It isn't emergency communications
relevant on the surface, yet it directly affects every unit
and every person. But it takes willingness and an effort to
discover how it affects a unit and its paraticipants.

This is how we recommend the Emcomm bulletins be used.
Consider then to be primarily for COORDINATORS or MANAGERS;
meaning the paid staff of the agency and the unit volunteer
leaders. Then
(a) make sure the bulletins physically get into the hands of
those coordinators and officers.
(b) develop a process where by the coordinator and senior

officer(s) discuss bulletin content or ideas.
(c) ascertain that within unit leadership there is a real effort to test, apply or discard them, or use them to create something better in your own unit.
(d) come up with your own ideas and suggestions and send those appropriate to us for inclusion in the bulletins so many others can share in what you've learned.

It helps when you let us know of your results with any of the bulletins. Thanks for your feedback, suggestions and ideas: cary.mangum@macnexus.org or cary_mangum@oes.ca.gov
---
To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

Bulletins are on the ACS Web page: http://acs.oes.ca.gov -and a Landline BBS: 916-262-0856 (graphical & standard interface); and an FTP archive at: ftp.ucsd.edu/emcomm

.....

Please let others in the emergency services field know of the newsletter, and encourage them to join... If you have opinions, suggestions or written material that you'd like to share with the group, let us know. We're always looking for new ideas and suggestions that will benefit everyone.

See you next week!

: Before you buy.

One hint...you may to reset the CPU whan you rejumper the radio...if it is like the AH100..you have to put a jumper across the battery contacts overnight.
Take the battery OFF first, of course!

It's quite possible, that unless you do the above, the jumpers will be ignored..the CPU probably only looks at them upon a CPU reset.

So if an Op could copy at 5WPM, he could send at 10WPM.

> >> Traffic on a wire consisted of

Neuron, you are as poor at trolling as you are at flaming. Your
Average Bob flames thus far have been far too contrived for any
sentient person not too notice your in-built hatred of certain people
who have posted here.over the past few years.

It's plainly obvious that you had some kind of thing against Roger
Wiseman. I've been on alt.flame for nearly a year now and I never saw
a single post from him. Why on earth would some newbie hate someone he
has never met? I guess you'll say you read it on some web page, but
that poor excuse won't wash with me. "I" know you better than that,
"I" know you hate Roger because he kicked your sorry behind up and
down the flame pits for quite some time.

Too bad you wont wake up. Guess you'll get caught up in the "Strong Delusion" that Prophet Stair talks about. Anyway, this is 2000 and The Great Falling Away has begun! And you have become part of it. Why are you sucking up to a mason for? Dont have enough gall to pray for him and show what that wicked institution it is? Guess not. As far as jobs go, God opens doors and closes them. Doesnt matter if your a mason or not. God has a plan for me and soon i'll let you know! I'm excited about the vision i had a few weeks ago.

Subject: gas consumption

GAS OUT APRIL 7 - 9, 2000 ...

Last year on April 30, 1999, a gas out was staged across Canada and the U.S. to bring the price of gas down, and it worked. It's time to do something about it again. Only this time lets make it for three days instead of just one.

The oil cartels decided to slow production to drive up gasoline prices. Lets see how many Canadian\American people we can get to band together for a three day period in April, NOT TO BUY ANY GASOLINE, during those three days.

LET'S HAVE A GAS OUT.

Do not buy any gasoline from APRIL 7, 2000, THROUGH APRIL 9, 2000. Buy what you need before the dates listed above, or after, but try not to buy any during the GAS OUT. If you want to help, just send this to everyone you know and ask them to do the same. We brought the prices down once before, and we can do it again. Come on North America lets stand together.

WE CAN MAKE A DIFFERENCE!!

Even if you receive this 100 times keep passing it around, this way you know everyone is being informed and no one will forget!

What a jerk! You said you're sick of Gore and Clinton but if Bush gets the Republican nomination you will vote for Gore. What is your reasoning? What did Bush do to you to make you feel this way? Seems pretty stupid since you really gave no reason. And from what I can see there is no reason. If you are sick of someone then you always vote for the opposite. That makes sense.

660. Ranger RCI-2950 replacement parts

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-08 00:00:00 UTC
From: "Jacek M. Holeczek" <holeczek@us.edu.pl>
Message-ID: <Pine.GSO.3.96.1000308153613.580B-100000@uranos.cto.us.edu.pl>
Source record: 117436

Hi,
I think I need to buy some replacement parts, but I cannot find any place where. Could someone, please, direct me to the correct place ? I tried to write to rci@rangerusa.com, but I've got no reply.
I am thinking about the whole CPU board (so that I don't have to resolder the IC601), but if it costs much more then the IC601 itself, I will buy only the chip itself.
A brief description of my problem follows.
I've got my hands on a used Ranger
RCI-2950. There are three problems with it :
1. sometimes when I press a button like "SHF" (or "LOCK"), instead of the required function to be performed a frequency change happens like I had pushed the up-down arrow. Is there a known fix for it ?
(I saw a "fix" to lower the R611 from 47k to 10k, but in my ranger it is already 6.8k, then another fix to increase the C621 - directly connected to R611 and the CPU-pin-16 - to 100nF, which I did, I increased it to some 500nF, but it doesn't help)
2. the frequency knob above the mic plug does not work AT ALL (both the up-down arrows and the buttons on the mic DO work)
3. The battery was dead, so I replaced the internal 3V battery, but I noticed something drains it. After two/three days off it was again dead.
I took some tests and ...
The whole CPU related logic is divided across two boards. One with the CPU itself (marked as IC601) and the battery, the other one with another big chip (marked as IC701) and the LCD display. If I remove the "display"-board, the battery immediately behaves fine. The problem that something drains the battery is then related to IC701 - and this in turn is related to pin 2 of this chip which gets the battery voltage all the time.
I think now that the IC601 is slightly broken.
As I have already written the problem lies in pin 2 of the IC701, which is called "READY", which gets almost the whole voltage that the battery is giving. I guess this input is "protected" against input voltages higher then the VCC via some kind of an internal diode, and this (internal to IC701) diode "delivers" the incoming voltage to VCC (which should be 0V when the receiver is off), and that means to all other parts, for example to R611/C621/CPU-pin-16 where the voltage is about 1.4V (I don't remember now) - this drains the battery then. IC701's pin 2 gets the voltage from the IC601 pin 48 ("D0"). I guess there should be NO voltage at all

when the radio is off. To be sure I would need to get my hands on a working RCI2950 and measure voltages when it's off.
Additionally, if you look at the schematics you can find that the frequency knob, which is not functioning at all, is connected to pins 50 ("D2") and 51 ("D3") of IC601. They also have voltages (slightly less then the one on the pin 48) measured when the radio is off (btw. these two lines should be inputs ?, but when the radio is on they have almost the same voltages as the VCC). I guess then that the IC601 has some lines broken in range D0-D3.
Again, to be sure I would need to get my hands on a working RCI2950 and measure voltages on these lines when it's off (and on :-). I would be very happy if someone from you could measure these voltages for me ...
Thanks in advance,
Jacek.

Yes it was STUPID TUESDAY for the G.O.P. They handed the Nov.2000 election to Al Gore. Al will "eat his lunch" in debates, easily take the Jewish, Catholic and non white vote and when coupled to what Pat Buchanan will siphon off from the Texan, it's over before it starts. The Republicans needed a MODERATE, someone in touch with mainstream America, someone like McCain, and BLEW IT.

P.B.A.- I do have reasoning, but I am not going to get into any more of
a political debate here because...well this really isnt the appropriate
place. But if you really want to know I will email you directly.

Erik

I heard they spend all their money and can't pay their bills. Somebody said they lost their cell phone service because of it. And I'd hate to see the two hogs going at it in bed, in fact I'm surprised there's a bed that can hold the over 400 lb weight.

>SWM, 52 wishes to enter Ham radio arena. Little activity locally,
>what's best reading/web alternative to start the process? THANKS!!

The first think you need to know is that Jap made ham
radio rigs are extravagantly overpriced. Opening the
covers of any of them will reveal construction not much
different in visual evidence and techniques to that of a
$89.00 el-cheapo VCR. Shop around for closeouts and
specials. Ham dealers are much like automobile dealerships.

Finally, there is one well known ham dealership who has a
curious habit of raising their price quotes based on the
ratio of the Yen to the Dollar. (on a weekly basis) I once
visited one of their regional "business establishments"
during Icom or Yaesu Day or some other such marketing
campaign. I was told that if I didn't buy today, the price
would be going up tomorrow. Was told the "price ratio"
BS-story, as if this schmuck expected me to believe that buying
ham radio gear was the same as buying coffee, copper or
cattle futures.

So there U go OM. I've found the best deals at private sales
of equipment. Hamfests are dominated by rogue dealers who
buy and sell radios like baseball cards. Stay away from these
gypsies also.

I think Regency is now RELM Communications.

Try www.grove.net for a link. Grove Enterprises
sells Relm scanners. Also Grove is one of the
better radio dealerships out there.

Possom Belly is herby awarded the "Golden Bucket of
Church's Fried Schiken" Award. (clap! clap! clap! clap!)

This Achivement award is given out to that member of
the Ham Radio fraternity who excells in the practical
application of Conversational Ebonics as a primary
language.

Your Award will be presented to you at the Churches
Fried Chicken outlet located on Highway 129 in Macon
Ga. The Award will be presented by Donnie W4JYZ at
7:30 PM on 3/11 - at the take-out window while he
is on duty.

The recipient of this award is also entitled to:

1. Two free tickets to a WWF Smackdown or Monster Truck
Show of YOUR choice
2. Three cases of Colt-45 Malt liquor
3. One carton of "Joe Camel" commemorative cigarettes
4. A $20 gift certificate from the Piggly Ribs Shack
5. A $25 gift certificate from South of the Border.
Voted #1 as America's most tackiest tourist trap
6. One year membership from BoBo Video - America's largest
collection of adult and (english dubbed) kung-fu theater
videos
7. A chance to win a Browning Golden Eagle with gold 1976
commemorative D-104 Microphone from Capt. Breaker-19's CB
Shack in Rome Ga.
8. 10 Buckets of Churches Fried Shicken. Voted #1 by former
Surgeon General and Condom Queen J Elders

CONGRATULATIONS POSSUM BELLY!!

>
>-Matt

It shouldn't take more than a couple of weeks for your call to show up in the databases. In fact, it was two weeks from the day I took my exams when my call showed up in QRZ and the University of Arkansas (Little Rock) servers. One suggestion: look in QRZ or the University of Arkansas callsign servers first. Buckmaster's only updates their database once a week, whereas QRZ, the FCC database, and the UALR database are updated daily.

73,
David

Hoover is wrong because people vote their pocketbooks. And we are now smack dab in the middle of the Clinton-Gore Fuel Crisis which has already sparked the Clinton-Gore recession in which this nation will begin to feel the severe hardships by about election time.

Clinton-Gore can't sweep this one under the rug!

Isaac

Aint it strange....if CW is so dead where did all those excellent CW op's come from that were working Clipperton Isl.?? Those boys on that rock are world class CW ops. I worked them on 30,17,15,12 and 10 meters with 100 watts to a homebrew multi-band dipole and my homebrew tuner. And BTW they were running at 30wpm at least.

Well, I hear what you're saying, but it turns out that I probably have much more HF experience than the average Tech-plus. I wasn't about to go out and pour my hard-earned "caish" into an expensive HF rig, if I wasn't damn sure I'd be able to use it(or wanted to use it). Luckily, there was a Ham Radio Club at my work, and I could go out and work CW at lunch. I worked pretty hard, made a number of contacts, and got to a solid 10wpm. The thing was - I was really interested in Digital modes, and digital on HF generally sucks. So, even though I might have been able to stumble my way thru a 13wpm test - as far as I was concerned the 13wpm requirement was an anachronism, and needed to be lowered if we were going to infuse new blood into ham radio. So I wasn't about to try to meet it.

I just find it so amusing(and somewhat frustrating) that there WASN'T more privileges on HF for Tech-Pluses. The very people that HAD learned Morse were denied any privileges to speak of. No wonder so few people bothered. I would have been happy with a 10wpm standard(much easier to reach than 13wpm). But the "die-hards" held out for "tough" standards - and it snapped back into their faces. That is why I really find the 5wpm standard so amusing - and I'm beginning to become more and more comfortable with it.

The fact is, the HF privilege doesn't really mean beans anymore. Now that the standard is 5wpm, I will easily be able to get my General license - but I'm afraid it is too late. I could really give a poop about HF now. The only thing it is good for is some old geezer on a boat(or island) in the middle of the ocean, or in times of emergency communications. If they don't allow higher bandwidth transmissions for higher throughput digital comms, they ought to just sell off most of the HF spectrum.

Nice QSO today and I was surprised you answered my CQ and you must have been equally surprised I replied.
Now that we understand each other better there's no reason to carry on this animosity therefore if you still want to label me a nasty liberal elitist from the liberal eastern establishment, go right ahead. And I'm saying publicly that you have never uttered anything anti-Semitic out of your own mind but rather borrowed some of the claptrap phraseology from rightwing nuts to whom you listen. Yet, just maybe you never realized those words crossed the line? Who knows?
Tom, basically you're a nice guy whom I enjoyed meeting even though some of my silverware is still missing. Now see-that's an example of AF2Y, so don't get insulted. I never meant to say you stole anything from the house but rather borrowed to shine up and return which you never did. And that's AF2Y again. I can't help it Tom-I've loved Groucho Marx's sense of humor since childhood and it simply rubbed off. He was IRREVERENT, INSULTING, SATIRICAL, FACETIOUS but damn funny. So sue me. When I posted about Seymour or See Less or whatever the hell his name is and why would anyone choose that name when it's not even his first name anyway....it was facetious but in a way meaningful because no kid should be encouraged to listen to screwy 75 and 20 meter frequencies. In fact the kid should be hunting down girls or else he might grow up to be like some of the weirdos who frequent this board. At any rate,ask yourself this: did I really go overboard with you? Did I come out with any "anyways?" Not once and I avoided other touchy topics too. I size it up this way: your political views antagonize me and vice versa so let's be fair. You shut up and I'll keep talking. How could I be any more fair? Only kidding. We need Conservatives, Liberals, Dems, G.O.Peeers and every religious group plus atheists to make America,America. And if you think George W. will beat Al Gore, oh what a surprise you have coming. Regards to Barbara and remind her that millions of people in this country who lie under headstones kicked the smoking habit but unfortunately a bit late.
73,
Doc,AF2Y

10 Meters is a good band for DX if the sunspots are right. I worked
Europe, the South Pacific, and Australia just to name a few when I was
a Tech Plus. And just using 100 watts!

Regency is alive and well in Florida as RELM. What they did a few years ago was to sell all the scanner and CB product lines to Uniden. When Uniden bought the lines, they told Regency that they wanted to buy thier name also. Regency sold thier name to Uniden for a cool 10 million, and became RELM, standing for Regency Electronics Land Mobile. They stayed in the commercial business, and all have lived happily ever after.

Here is thier web sites.

http://www.relm.com/

http://www.relm.com/pages/about_us/contact.htm

Best of luck to you.

I also have a Diamond X-50 that I mounted at the top of the inverted-V
at the top of the roof of my two-story house. It has been there for 7
years, and is solid as a rock. I just drilled four holes through the
2x10 and used a RadioShack antenna mounting kit.

Don't replace the Diamond X-50 - it is a KICK-ASS antenna.

Oh, gee whiz, a boon from on high... don't do me any favours.
You started this thread, so I guess you had to bring it back up, although it's been dead for a while. To add to your quitter's post of a month ago, you now state that you WON'T wimp out as early as you first said, and then say that any amateur who gets licensed after the April changeover cannot be a "real ham".
I shudder to think of what kind of help you'd be giving to a prospective amateur... "Listen, sonny, when YOU get your license, you'll be better than anyone who gets it after April... YOU'LL be the next generation of highbrow elite who baselessly feel they are better than the other guy and never let a chance go by to say so, whether it's appropriate or not, either on the air or on the 'Net."
I'd have hoped you decided not to quit because you rethought the absurdity of your whining, but I guess you're sticking around to make it worse.
Oh well, que sera, sera...
Mike

Hello!

Yeah- when I did the AH-100 mod, I tried to get it to work right away
and it didn't. I was dissapointed but I left a alligator clip jumper on
the terminals overnight and the next day it worked...

In the manual for the AH50 they actually state that a microprocessor
reset (in case of a lock-up) can be achieved my momentarily shorting
the batt terminals ('with a coin' they say:)

I tried this after doing the 'mods' and still nothing happened...

Still looking for AH50 mod info if anyone has it :(

716. Letter from Congressman Moore

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-08 00:00:00 UTC
From: Chris Ross <pragmatist@kc.rr.com>
Message-ID: <38C5D3D3.200D1C8A@kc.rr.com>
Source record: 117521

This evening I recieved a surprise letter from my local Congressional representative, Dennis Moore. Here is the text.

Dear Chris:

Knowing your interest in preserving the viability of amateur radio, I thought I would take this opportunity to update you on legislation pending in Congress that affects amateur radio providers.

There are more than 650,000 radio amateurs in the United States licensed by the Federal Communications Comission(FCC). These radio operators provide voluntary, noncommercial radio service in the times of emergency. The Fcc, however, has taken actions that have resulted in the loss of at least 107MHZ of spectrum to radio amateurs, effectivly preventing amateur radio operators from conducting their important emergency services.

On September 21, 1999, I joined as a cosponsor of H.R. 783, the Amateur Radio Spectrum Protection Act of 1999. This legislation woud amend the Communications Act of 1934 to prohibit the Federal Communications Commission(FCC) from making any reallocations of amateur radio service (ARS) and amateur satelite service (ASS) frequency bands, diminishing the secondary allocations of such bands to ARS or ASS, unless the FCC provides equivalent replacement spectrum to ARS and ASS. Given the important public service that amateur radio operators provide, particularly in times of emergency, I will work hard in the second session of the 106th Congress to ensure that this legislation recieves a fair hearing in the House Commerce Committee and a favorable vote on the floor of the House of Representatives.

Thank you for the opportunity to share this information with you. I hope you will keep in touch and please feel free to let me know whenever I may be of assistance.

Very Truly Yours,
Dennis Moore
Member of Congress

end text.

I apologize in advance if there are any typos. It sure sounds like there is someone in Congress that cares. This is pretty much a letter out of the blue for me as I don't take to writing to Reps, particularly on Ham matters.

For me, it took 12 weeks from test to license, and 14 weeks from test to
upgraded license.

Amen & Good God Gesundheit Brother Possum!

I never knew Roger W. had such a sordid history on usenet. One could write a college-level textbook on the subject of "abnormal psychology", based entirely on the collected writings of this one man.

In reviewing his wretched litany of hate and venom, something else is very obvious: the man has an absolute obsession with homosexual themes. My good breeding prevents me from quoting his gutter language verbatim, but in the majority of his posts there are constant and repetitive references to fellatio and sodomy, semen swallowing, male masturbation, beastiality and God knows what else. He'll go to the gonads for his material almost every time.

It seems to me that Mr. Wise(?)man has been working out quite a few repressed "issues" buried in his (obviously) disturbed mind.

The man is an embarrasment to the human race in general, and the amateur radio community in particular.

You should be commended Dr. Belly, for injecting a note of sanity and reason into this thoroughly dysfunctional news group.

Dr. Morgan T. Jones

Anybody know how to suppress noise generated from my KENWOOD MC-65 mic compressor in my car KENWOOD TM-241SQ.
I am very sure the noise is not from my RIG, It was no noise before I use MC-65.
My car is TOYOTA with diesel engine.
Appreciate your help
Thanks
Hartono Sudja, YD0KOR

Hi - well Best and Fastest are at a bit hard to meet
If you really want to learn amateur radio and understand the
theory and get more from the hobby after passing the exam
the Good and Not so fast might be better

There is an online complete radio theory course at

http://members.xoom.com/ronber/amateur.html

It cost is only a desire from you to learn - nothing else
You can have the free assistance of a facilitator to guide you
or do it on your own - It covers theory from beginner and up

The site does not contain US regulations though

Regards

Wait a minute, Lloyd. You'd better rethink this. Most of the oil producers are arabs; you know, the enemies of Israel. Therefore, if we boycott gas, it hurts the enemies of Israel. That's not what you want, is it? You want to help the enemies of Israel. Right?

You can draw this out on a piece of paper if it helps.

Use more gas.

LRod

damn those "illlumintis"!

Say, whatever happened to that character who predicted all sorts of things would happen on 1/1/2000, but if they didn't, he would commit suicide, and they didn't, so where is he? RG8, or RG Escalator, or RG Stair, or something.

It's a good idea but boycotting just a few days will do nothing. You need to abstain for a week but who will it hurt most-our stateside companies or the ones overseas ripping them off and in turn ripping us off? Bill Clinton has FAILED miserably in resolving this crisis and for him to have left the elderly and poor in the lurch is unconscionable. Didn't we go to war in the Persian Gulf in '90 to stop an Iraqi dictator from taking over Kuwait's 10% of the world's oil market and Saudi Arabia's too? Had Saddam taken control of both countries, he would have done exactly what's happening today. Therefore let the government drive down the price of gas by sticking it to the three major offenders, Mexico, Venezuela and Saudi Arabia. Cut off foreign aid! NOW! And additiionally open up our oil reserves while pumping more down from Alaska. If Clinton wanted to, he could drive down the price of gas by 50% in two weeks.

743. Morse exercises No.13

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-09 00:00:00 UTC
From: DTC <dtc@muenster.de>
Message-ID: <8a9a3d$64f$1@news.citykom.de>
Source record: 117248
Cross-posted to: alabama.birmingham.radio.amateur,nl.radio.amateur,rec.radio.amateur.misc,uk.radio.amateur

Dear YLs and OM,

DTC's regular Morse exercises transmitted every Monday at 19:00 h
local time in DL on 3575 +/- 3 kHz are available on the Internet as
well, being in downloadable MIDI-file format.

Currently three speeds are offered for download:

Speed "90" (= 18 wpm): http://www.muenster.de/~dtc/nr13_90.mid

Speed "60" (= 12 wpm): http://www.muenster.de/~dtc/nr13_60.mid

Speed "45" (= 9 wpm): http://www.muenster.de/~dtc/nr13_45.mid

Hoping you'll have some fun decoding either on the air or from the
Internet, you may check out your capabilities in decoding Morse. For
ease of reference the content of the Morse code transmission / file
may be accessed at DTC's web site using

http://www.muenster.org/dtc/cwtext.html

Your opinion and suggestions are welcome: dtc@muenster.org

745. HF? Who really cares.

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-09 00:00:00 UTC
From: horseshoestew@my-deja.com
Message-ID: <8a9boj$ac8$1@nnrp1.deja.com>
Source record: 117250
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

My guess is, when April 15th rolls around, there is going to be little difference on the HF bands. Nobody really cares about HF anymore.

I myself will be taking the General test after April 15th, at the same time my 10 & 11 year old daughters take their Technician tests(my 11-year-old is a wiz at algebra). However, I don't have any plans to purchase an HF rig any time soon. Only when I can pick up a REALLY good deal on an a newer HF rig from some SK's estate on an Ebay auction(how about an ICOM 706 for $500?), will I be getting on HF. I'll just bide my time; I still have plenty of it. With the ability to reliably, efficiently, effortlessly, and cheaply communicate instantly around the world via the Internet - HF is a very small and withered carrot indeed.

So, all you paranoid die-hard code jerks, your fight is now over a small mound of stale old beans that nobody really cares about. And I suspect the next generation is going to care even less about it. I actually considered the Novice license as an entry point for my kids(especially my 10 year old, who would have trouble with the algebra questions), but they wouldn't get 2m/70cm privileges - the only things they would really want to use. And they give me the feeling that Morse code is a real turn-off to them, so I'm not about to ram it down their throats. I checked out the new Technician test - it is even EASIER than the older one. There is some rudimentary algebra, but not the multi-step algebra that was on the old Tech test. My 11-year-old WILL pass it, and my 10-year-old has a fighting chance. So, I'm not about to scare them off with that spooky old Morse code. BTW, I actually can do 10-11wpm, and would have been a good guardian of the Morse flame, but the die-hard jerks, who wouldn't even bend for 10/15wpm General/Extra reqs in the 90's, turned me into an indifferent bystander that won't care when it goes out. And why don't you keep up your nonsense? Maybe you can turn me into someone that will help douse the flame.

Here's a link to some breaking news regarding wireless Internet.

http://live.altavista.com/scripts/editorial.dll?efi=1175&ei=1578826&ern=y

Now, THAT is what radio is all about these days, and NONE of this applies to HF.

747. Question about re-building battery pack for HTX-202

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-09 00:00:00 UTC
From: Michael1998@webtv.net
Message-ID: <6387-38C84D69-65@storefull-132.iap.bryant.webtv.net>
Source record: 117252

I have a Radio Shack HTX-202 2 meter transceiver that I want to re-build the battery pack on. I bought the radio used about two years ago, and the Ni-CD rechargeable battery pack quit holding a charge a few months after I bought it. I have opened up the battery case, and it has a battery pack inside with four wires coming off of it, red, black, orange, and blue, that are soldered to four posts. The pack says, 600 mAh 7.2 Volts on it. Does anyone know where I can find a replacement battey pack to go with the radio. I don't need the whole assembly itself, I just want to buy the Ni-Cd pack, and solder a new one inside the case, because I would assume that the pack itself has just gone bad. I have looked at Radio Shack's web page, and replacement batteries are $40.00 for the whole thing. Has anyone re-built just the pack itself, and do you know where I can order just the replacement pack instead of having to buy the whole assembly? Would it be cheaper to just go ahead and spend the $40.00 and buy a whole new battery pack. Does anyone know the catalog number for just the battery pack that is stored inside the battery assembly? Please e-mail me directly and let me know if you have any information. Thanks a bunch!

Do Rudy Giuliani and George W. really need the Senate and possibly but probabaly not the Presidency? I live in North Jersey, just a stone's throw away from N.Y.C. and am quite aware of the good Rudy has done for that city. The man's CLEANED IT UP. Before he became the Mayor, as one drove through the Lincoln Tunnel and exited for example just short of 42nd Street, all one would see for blocks upon blocks, inundating the entire west side from 10th Avenue down to almost the Avenue of the Americas, were massage parlors, strip joints, topless bars, bottomless bars, nude bars, hookers and very happy looking businessmen on their "lunch" break. Naturally I never patronized any of those places but instead went over either to Temple Emmanuel or St. Patrick's Cathedral. They let me into the latter sometimes but I wasn't allowed to pray. You know; I was just curious. Rudy cleansed everything and now the area is as exhuberant as Disneyland and as exciting as a roller derby starring 80 year olds. But all kidding aside, Rudy will go down as one of the best of all N.Y.C. mayors, even ranking with Fiorello LaGuardia. In fact they named one of the great airports after him. You never heard of Fiorello Airport? Now take Bush for example. Please. The man will not commute death sentences and if in Texas one is sentenced to die for a heinous crime, he or she dies and George W, doesn't give a spit. WE NEED MORE GOVERNORS LIKE HE but not more Presidents,,ho..ho..ho. Whether or not Texans like the way he's been running things generally is still a mystery because Butch isn't on the air anymore and Douglas also flew the coop. Is there a Lone Star out there who can fill me in? Why then must two law and order guys seek higher office and be replaced by softies? Maybe they're reading this post and will wise up. You think I'm joking about perusing this site? Ask Jack, W9XV. He says high ranking Israeli government and military men do but then again Jack sometimes is just a pain in the kibbutz.

It all comes down to sour grapes Dan. They see something they want but it's "too hard" to get so they poo-poo it. They make it SEEM like they don't want to bother. BUT when the grapes get a bit easier to get they get sweeter! How sweet HF will be when you can take that little 5WPM test, memorize that theory "test" and get on HF. HOW SWEET IT WILL BE! (and crowded too!)

BTW, my son has become interested in getting his ticket. I went to Radio Shack to buy one of the "study manuals." IT'S NOTHING BUT A BOOK WITH THE QUESTIONS AND ANSWERS IN IT!!!!! It's no more a study manual for ham radio theory, rules and regulations than the yellow pages is a study manual for becoming a telephone operator.

Kevin, WB5RUE
I am Voltohm of Borg, resistance is E/I, power is EI, you will be attenuated!
("What is this E, I, R thing anyway?" asks the newly licensed ham operator)

As for CW, I think that it gives one a new appreciation for the amateur service, in the amount of work required for one to learn code, not to mention learning it at 13 and 20 wpm. It was a challenge, and I actually enjoyed learning the code, and passing the tests. However interest and use of CW will eventually decline leading to the phase out of the CW requirement for an amateur license.

Erik

751. Re: Maybe ham radio should be renamed

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-09 00:00:00 UTC
From: Erik Hoover <NOSPAMhoover@uk2.net>
Message-ID: <38C87411.C188A208@uk2.net>
Source record: 117256

There IS a specific committment involved in amateur radio. If there
were no commitments involved, it would be a free for all just like CB,
which is what people with no specific commitments should use. Amateur
requires a bit more professionalism so to speak than that. And
rightfully so because what would the amateur service be if just anyone
could walk up and get immediately licensed. The commitment is this (or
at least it should be): for one to be knowledgeable about basic concepts
of amateur radio in order to get licensed, and conduct themselves in an
appropriate and legal manner while using their radio equipment.

Make Easy Money! Earn Over $10000 in weeks!

Just follow these simple instructions!

LOTS OF CASH, FAST - THIS IS A MAILING LIST PROGRAM -AND COMPLETELY =
LEGAL, THIS REALLY WORKS!! THIS REALLY CAN MAKE YOU EASY MONEY!!IT =
WORKS!!BUT YOU HAVE TO FOLLOW THIS LETTER FOR IT TO WORK!!!! A little =
while back, I was browsing through news groups, just like you are =
now,and came across an article similar to this that said you could make =
thousands of dollars within weeks with only an initial investment of =
6.00!So I thought,"Yeah ,right,this must be a scam", but like most of =
us, I was curious, so I kept reading. Anyway,it said that you send =
$1.00to each of the 6 names and address stated in the article. You then =
place your own name and address in the bottom of the list at #6, and =
post the article in at least 200 news groups.(There are thousands) No =
catch,that was it.So after thinking it over, and talking to a few people =
first,I thought about trying it. I figured what have I got to loose =
except 6 stamps and $6.00, right?Like most of us I was a little =
skeptical and worried about the legal aspects of it all.So I checked it =
out with the U.S. Post Office (1-800-725-2161) and they confirmed it was =
indeed legal! Then I invested the measly $6.00. Well GUESS =
WHAT!!...within 7 days,I started getting money in the mail ! I was =
shocked! I figured it would end soon,but the money just kept coming in. =
In my first, week I made about $25.00. By the end of the second week I =
had made a total of over $1,000.00! In the third week I had over =
$10,000.00 and it's still growing.This is now my fourth week and I have =
made a total of just over $42,000.00 and it is still coming in =
rapidly.It's certainly worth $6.00 and 6 stamps.Let me tell you how this =
works and most importantly, why it works...also make sure you print a =
copy of this article NOW,so you can get information off of it as you =
need it. Believe me, it does work!!
STEP 1:=20
Get 6 separate pieces of paper and write the following on each piece of =
paper"PLEASE PUT ME ON YOUR MAILING LIST".Now get 6 US $1.00 bills and =
place ONE inside each pieces of paper so the bill will not be seen =
through the envelope to prevent thievery. Next, place one paper in each =
of the 6 envelopes and seal them.Now,you should have 6 sealed =
envelopes,each with a piece of paper stating the above phrase,your name =
and address,and a $1.00 bill. What you are doing is creating a service =
```

by this. THIS IS ABSOLUTELY LEGAL! Mail the 6 envelopes to the following =
addresses:=20

#1) S.Bassett RR#1 Cannington,
Ontario,
Canada LOE 1EO=20

#2) Sharon=20
32 Sleepy Hollow LN,
Sicklerville,
NJ 08081=20

#3) Justin=20
3707 Crenna Ave.Concord,
CA 94519=20

#4) Chicollla=20
2 Oxford Mews,=20
Poquoson=20
VA 23662

#5)E. S.K. Law=20
30 Morewood Crescent,=20
Toronto, Ontario,=20
Canada M2K 1L7.

#6) Johny=20

2465 Middle RD

Columbia Falls MT, 59912

(Be sure to use the correct postage when mailing to the the states or =
out of the states)

STEP 2 :=20
Now take the #1 name off the list that you see above, move the other =
names up (6 becomes 5, 5 becomes 4, 4 becomes 3, etc.) add YOUR name as =
number 6 on the list.

STEP 3 :=20
Change anything you need to, but try to keep this article as close to =
original as possible.Now, post your amended article to at least 200 news =
groups. (I think there are close to 24,000 groups.) All you need is 200, =
but remember , the more you post the more money you =
make!---DIRECTIONS---HOW TO POST TO NEWS
GROUPS---=20
STEP 1) You don't need to re-type this entire letter to do your own =
posting. Simply put your cursor at the beginning of this letter and drag =
your cursor to the bottom of this document,and select 'copy' from the =
edit menu. This will copy the entire letter into the computers memory.=20
STEP 2) Open a blank "notepad" file under accessories in windows and =
place your cursor at the top of the blank page.From the 'edit' menu =
select 'paste'.This will paste a copy of the letter into notepad so that =

you can add your name to the list.
STEP 3) Save your new notepad file as a .txt file.If you want to do your =
in different sittings, you will always have this file to go back to.=20
STEP 4)Use Netscape or Internet explorer and try searching for various =
newsgroups (on-line forums, message boards, chat sites, discussions.)
STEP 5) Visit message boards and post this article as a new message by =
highlighting the text of this letter and selecting paste from the edit =
menu. Fill in the Subject,this will be the header everyone sees as then =
scroll through the list of postings in a particular group!**REMEMBER,THE =
MORE NEWSGROUPS YOU POST IN,THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE =
TO POST A MINIMUM OF 200**=20

That's it ! You will begin receiving money from around the world within =
days. You may eventually want to rent a P.O. Box due to the large amount =
of mail you will receive.If you wish to stay anonymous,you can invent a =
name to use, as long as the postman will deliver it. **JUST MAKE SURE =
ALL THE ADDRESSES ARE CORRECT.** Now the WHY part: Out of the 200 =
postings say I only receive 5 replies (a very low example). So then I =
made $5.00 with my name at #6 Now,each of the 5 persons who just sent me =
$1.00 make the MINIMUM 200 postings,each with my name at #5 and only 5 =
persons to each of the original 5, that is another $25.00 for me,now =
those 25 each make 200 MINIMUM posts with my name at #4 and only 5 =
replies each,I will bring in an additional $125.00! Now, those125 =
persons turn around and post the MINIMUM 200 with my name as #3 and I =
only receive 5 replies each,I will make an additional $625.00! OK,now =
here is the fun part,each one of those 625 persons post a MINIMUM of 200 =
letters with my name at #2 and they only receive 5 replies,that just =
made me $3,125.00!!! Those 3,125 persons will deliver this message to =
200 news groups with my name at #1 and if still 5 persons per 200 news =
groups react I will receive $15,625.00! With the original investment of =
only $6.00! AMAZING! When your name is no longer on the list, you just =
take the latest posting in the news groups and send out another $6.00 to =
names on the list, putting your name at number 6 again. And start =
posting again.The thing to remember is, do you realize that thousands of =
people all over the world are joining the internet and reading these =
articles, everday,JUST LIKE YOU ARE NOW!! So can you afford $6.00 and =
see if it really works?? I think so ... People have said,"What if the =
plan is played out and no one sends you the money? So what! What are the =
chances of that happening when there are tons of new honest users and =
new honest users who are joining the internet and newsgroups every day =
and are willing to give it a try? Estimates are at 20,000 to 50,000 new =
users,every day ,with thousands of those joining the actual internet. =
Remember,play FAIRLY and HONESTLY and this will work.=20

Make Easy Money! Earn Over $10000 in weeks!

Just follow these simple instructions!

LOTS OF CASH, FAST - THIS IS A MAILING LIST PROGRAM -AND COMPLETELY =
LEGAL,=20
THIS REALLY WORKS!! THIS REALLY CAN MAKE YOU EASY MONEY!!IT WORKS!!BUT =
YOU HAVE=20
TO FOLLOW THIS LETTER FOR IT TO WORK!!!! A little while back, I was =
browsing=20
through news groups, just like you are now,and came across an article =
similar to=20
this that said you could make thousands of dollars within weeks with =
only an=20
initial investment of 6.00!So I thought,"Yeah ,right,this must be a =
scam", but=20
like most of us, I was curious, so I kept reading. Anyway,it said that =
you send=20
$1.00to each of the 6 names and address stated in the article. You then =
place=20
your own name and address in the bottom of the list at #6, and post the =
article=20
in at least 200 news groups.(There are thousands) No catch,that was =
it.So after=20
thinking it over, and talking to a few people first,I thought about =
trying it. I=20
figured what have I got to loose except 6 stamps and $6.00, right?Like =
most of=20
us I was a little skeptical and worried about the legal aspects of it =
all.So I=20
checked it out with the U.S. Post Office (1-800-725-2161) and they =
confirmed it=20
was indeed legal! Then I invested the measly $6.00. Well GUESS =
WHAT!!...within 7=20
days,I started getting money in the mail ! I was shocked! I figured it =
would end=20
soon,but the money just kept coming in. In my first, week I made about =
$25.00.=20
By the end of the second week I had made a total of over $1,000.00! In =
the third=20
week I had over $10,000.00 and it's still growing.This is now my fourth =
week and=20
I have made a total of just over $42,000.00 and it is still coming in=20
rapidly.It's certainly worth $6.00 and 6 stamps.Let me tell you how this =
works=20
and most importantly, why it works...also make sure you print a copy of =
this=20
article NOW,so you can get information off of it as you need it. Believe =
me, it=20
does work!!
STEP 1:
Get 6 separate pieces of paper and write the=20
following on each piece of paper"PLEASE PUT ME ON YOUR MAILING LIST".Now =
get 6=20
US $1.00 bills and place ONE inside each pieces of paper so the bill =

will not be=20
seen through the envelope to prevent thievery. Next, place one paper in =
each of=20
the 6 envelopes and seal them.Now,you should have 6 sealed =
envelopes,each with a=20
piece of paper stating the above phrase,your name and address,and a =
$1.00 bill.=20
What you are doing is creating a service by this. THIS IS ABSOLUTELY =
LEGAL! Mail=20
the 6 envelopes to the following addresses:

#1) S.Bassett =
RR#1=20
Cannington,
Ontario,
Canada LOE 1EO

#2) Sharon
32 =
Sleepy=20
Hollow LN,
Sicklerville,
NJ 08081

#3) Justin
3707 =
Crenna=20
Ave.Concord,
CA 94519

#4) Chicollla
2 Oxford Mews, =

Poquoson=20

VA 23662

#5)E. S.K. Law
30 Morewood Crescent, =

Toronto,=20
Ontario,
Canada M2K 1L7.

#6) Johny

2465 Middle RD

Columbia Falls MT, 59912

(Be sure to use the correct postage when mailing to the the states or =
out of=20
the states)

STEP 2 :
Now take the #1 name off the list that you see above, =
move the=20
other names up (6 becomes 5, 5 becomes 4, 4 becomes 3, etc.) add YOUR =
name as=20
number 6 on the list.

STEP 3 :
Change anything you need to, =
but try=20
to keep this article as close to original as possible.Now, post your =
amended=20
article to at least 200 news groups. (I think there are close to 24,000 =
groups.)=20
All you need is 200, but remember , the more you post the more money you =

make!---DIRECTIONS---HOW TO POST TO NEWS
GROUPS---
STEP 1) You =
don't need=20
to re-type this entire letter to do your own posting. Simply put your =
cursor at=20
the beginning of this letter and drag your cursor to the bottom of this=20
document,and select 'copy' from the edit menu. This will copy the entire =
letter=20
into the computers memory.
STEP 2) Open a blank "notepad" file under =

accessories in windows and place your cursor at the top of the blank =
page.From=20
the 'edit' menu select 'paste'.This will paste a copy of the letter into =
notepad=20
so that you can add your name to the list.
STEP 3) Save your new =
notepad file=20
as a .txt file.If you want to do your in different sittings, you will =
always=20
have this file to go back to.
STEP 4)Use Netscape or Internet =
explorer and=20
try searching for various newsgroups (on-line forums, message boards, =
chat=20
sites, discussions.)
STEP 5) Visit message boards and post this =
article as a=20
new message by highlighting the text of this letter and selecting paste =
from the=20
edit menu. Fill in the Subject,this will be the header everyone sees as =
then=20
scroll through the list of postings in a particular group!**REMEMBER,THE =
MORE=20
NEWSGROUPS YOU POST IN,THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO =

POST A=20
MINIMUM OF 200**

That's it ! You will begin receiving money from =
around=20
the world within days. You may eventually want to rent a P.O. Box due to =
the=20
large amount of mail you will receive.If you wish to stay anonymous,you =
can=20
invent a name to use, as long as the postman will deliver it. **JUST =
MAKE SURE=20
ALL THE ADDRESSES ARE CORRECT.** Now the WHY part: Out of the 200 =
postings say I=20
only receive 5 replies (a very low example). So then I made $5.00 with =
my name=20
at #6 Now,each of the 5 persons who just sent me $1.00 make the MINIMUM =
200=20
postings,each with my name at #5 and only 5 persons to each of the =
original 5,=20
that is another $25.00 for me,now those 25 each make 200 MINIMUM posts =
with my=20
name at #4 and only 5 replies each,I will bring in an additional =
$125.00! Now,=20
those125 persons turn around and post the MINIMUM 200 with my name as #3 =
and I=20
only receive 5 replies each,I will make an additional $625.00! OK,now =
here is=20
the fun part,each one of those 625 persons post a MINIMUM of 200 letters =
with my=20
name at #2 and they only receive 5 replies,that just made me =
$3,125.00!!! Those=20
3,125 persons will deliver this message to 200 news groups with my name =
at #1=20
and if still 5 persons per 200 news groups react I will receive =
$15,625.00! With=20
the original investment of only $6.00! AMAZING! When your name is no =
longer on=20
the list, you just take the latest posting in the news groups and send =
out=20
another $6.00 to names on the list, putting your name at number 6 again. =
And=20
start posting again.The thing to remember is, do you realize that =
thousands of=20
people all over the world are joining the internet and reading these =
articles,=20

Make Easy Money! Earn Over $10000 in weeks!

Just follow these simple instructions!

LOTS OF CASH, FAST - THIS IS A MAILING LIST PROGRAM -AND COMPLETELY =
LEGAL,=20
THIS REALLY WORKS!! THIS REALLY CAN MAKE YOU EASY MONEY!!IT WORKS!!BUT =
YOU HAVE=20
TO FOLLOW THIS LETTER FOR IT TO WORK!!!! A little while back, I was =
browsing=20
through news groups, just like you are now,and came across an article =
similar to=20
this that said you could make thousands of dollars within weeks with =
only an=20
initial investment of 6.00!So I thought,"Yeah ,right,this must be a =
scam", but=20
like most of us, I was curious, so I kept reading. Anyway,it said that =
you send=20
$1.00to each of the 6 names and address stated in the article. You then =
place=20
your own name and address in the bottom of the list at #6, and post the =
article=20
in at least 200 news groups.(There are thousands) No catch,that was =
it.So after=20
thinking it over, and talking to a few people first,I thought about =
trying it. I=20
figured what have I got to loose except 6 stamps and $6.00, right?Like =
most of=20
us I was a little skeptical and worried about the legal aspects of it =
all.So I=20
checked it out with the U.S. Post Office (1-800-725-2161) and they =
confirmed it=20
was indeed legal! Then I invested the measly $6.00. Well GUESS =
WHAT!!...within 7=20
days,I started getting money in the mail ! I was shocked! I figured it =
would end=20
soon,but the money just kept coming in. In my first, week I made about =
$25.00.=20
By the end of the second week I had made a total of over $1,000.00! In =
the third=20
week I had over $10,000.00 and it's still growing.This is now my fourth =
week and=20
I have made a total of just over $42,000.00 and it is still coming in=20
rapidly.It's certainly worth $6.00 and 6 stamps.Let me tell you how this =
works=20
and most importantly, why it works...also make sure you print a copy of =
this=20
article NOW,so you can get information off of it as you need it. Believe =
me, it=20
does work!!
STEP 1:
Get 6 separate pieces of paper and write the=20
following on each piece of paper"PLEASE PUT ME ON YOUR MAILING LIST".Now =
get 6=20
US $1.00 bills and place ONE inside each pieces of paper so the bill =

will not be=20
seen through the envelope to prevent thievery. Next, place one paper in =
each of=20
the 6 envelopes and seal them.Now,you should have 6 sealed =
envelopes,each with a=20
piece of paper stating the above phrase,your name and address,and a =
$1.00 bill.=20
What you are doing is creating a service by this. THIS IS ABSOLUTELY =
LEGAL! Mail=20
the 6 envelopes to the following addresses:

#1) S.Bassett =
RR#1=20
Cannington,
Ontario,
Canada LOE 1EO

#2) Sharon
32 =
Sleepy=20
Hollow LN,
Sicklerville,
NJ 08081

#3) Justin
3707 =
Crenna=20
Ave.Concord,
CA 94519

#4) Chicollla
2 Oxford Mews, =

Poquoson=20

VA 23662

#5)E. S.K. Law
30 Morewood Crescent, =

Toronto,=20
Ontario,
Canada M2K 1L7.

#6) Johny

2465 Middle RD

Columbia Falls MT, 59912

(Be sure to use the correct postage when mailing to the the states or =
out of=20
the states)

STEP 2 :
Now take the #1 name off the list that you see above, =
move the=20
other names up (6 becomes 5, 5 becomes 4, 4 becomes 3, etc.) add YOUR =
name as=20
number 6 on the list.

STEP 3 :
Change anything you need to, =
but try=20
to keep this article as close to original as possible.Now, post your =
amended=20
article to at least 200 news groups. (I think there are close to 24,000 =
groups.)=20
All you need is 200, but remember , the more you post the more money you =

make!---DIRECTIONS---HOW TO POST TO NEWS
GROUPS---
STEP 1) You =
don't need=20
to re-type this entire letter to do your own posting. Simply put your =
cursor at=20
the beginning of this letter and drag your cursor to the bottom of this=20
document,and select 'copy' from the edit menu. This will copy the entire =
letter=20
into the computers memory.
STEP 2) Open a blank "notepad" file under =

accessories in windows and place your cursor at the top of the blank =
page.From=20
the 'edit' menu select 'paste'.This will paste a copy of the letter into =
notepad=20
so that you can add your name to the list.
STEP 3) Save your new =
notepad file=20
as a .txt file.If you want to do your in different sittings, you will =
always=20
have this file to go back to.
STEP 4)Use Netscape or Internet =
explorer and=20
try searching for various newsgroups (on-line forums, message boards, =
chat=20
sites, discussions.)
STEP 5) Visit message boards and post this =
article as a=20
new message by highlighting the text of this letter and selecting paste =
from the=20
edit menu. Fill in the Subject,this will be the header everyone sees as =
then=20
scroll through the list of postings in a particular group!**REMEMBER,THE =
MORE=20
NEWSGROUPS YOU POST IN,THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO =

POST A=20
MINIMUM OF 200**

That's it ! You will begin receiving money from =
around=20
the world within days. You may eventually want to rent a P.O. Box due to =
the=20
large amount of mail you will receive.If you wish to stay anonymous,you =
can=20
invent a name to use, as long as the postman will deliver it. **JUST =
MAKE SURE=20
ALL THE ADDRESSES ARE CORRECT.** Now the WHY part: Out of the 200 =
postings say I=20
only receive 5 replies (a very low example). So then I made $5.00 with =
my name=20
at #6 Now,each of the 5 persons who just sent me $1.00 make the MINIMUM =
200=20
postings,each with my name at #5 and only 5 persons to each of the =
original 5,=20
that is another $25.00 for me,now those 25 each make 200 MINIMUM posts =
with my=20
name at #4 and only 5 replies each,I will bring in an additional =
$125.00! Now,=20
those125 persons turn around and post the MINIMUM 200 with my name as #3 =
and I=20
only receive 5 replies each,I will make an additional $625.00! OK,now =
here is=20
the fun part,each one of those 625 persons post a MINIMUM of 200 letters =
with my=20
name at #2 and they only receive 5 replies,that just made me =
$3,125.00!!! Those=20
3,125 persons will deliver this message to 200 news groups with my name =
at #1=20
and if still 5 persons per 200 news groups react I will receive =
$15,625.00! With=20
the original investment of only $6.00! AMAZING! When your name is no =
longer on=20
the list, you just take the latest posting in the news groups and send =
out=20
another $6.00 to names on the list, putting your name at number 6 again. =
And=20
start posting again.The thing to remember is, do you realize that =
thousands of=20
people all over the world are joining the internet and reading these =
articles,=20
everday,JUST LIKE YOU ARE NOW!! So can you afford $6.00 and see if it =
really=20
works?? I think so ... People have said,"What if the plan is played out =
and no=20
one sends you the money? So what! What are the chances of that happening =

```
when=20
there are tons of new honest users and new honest users who are joining =
the=20
internet and newsgroups every day and are willing to give it a try? =
Estimates=20
are at 20,000 to 50,000 new users,every day ,with thousands of those =
joining the=20
actual internet. Remember,play FAIRLY and HONESTLY and this will work. =

Lloyd you idiot, I'm not seeing the jew in Doc, or anyone, but I am seeing some liberalism that I disagree with. Will you keep your anti-semitic BS out of my posts? I will say what I see when I see it and have no need for your BS. I see your starting it in here again. Your best bet is not to reference me to anything that you have to say.
For your information I enjoy some of the reparte with Doc, I think he's on the mark with some things and your one of them, you just proved it. Don't piss me off _ keep my name OUT OF your anti-semitic racist posts. I'll be glad to respond to you Lloyd just keep a LID on he racist bigotted propaganda while doing so.

i wanna trade a tm kenwood 261 a two meter mobile
new only 2 months old still have bill and in miint condition reason
for selling i want a digital camera i wanna trade for a digital
camera. any one interested. in trading. i have pictures of the radio
if your interested it got 5 25 50 watts both newmeric and alpha
newmeric readout dial pad mike. and many features auto dial
stores up to sixty channels stores up to 20 phone numbers i thinks.
has many options i can list them all. but realy nice radio. i use it
as a base so never bounced around in car. never hooked up in car.
if interested eamil me i need a digital camera for my comepuer. please
respond with offers.

Funny how every brochure, magazine and even FCC materials call it a hobby. You keying in on one word in a legal definition is the only thing that is "narrow". Besides, I think you can use logic that a thing is what people say it is, and a clear majority knows it is a hobby. If we provide a service, that's great. That is one reason I got into the hobby.

Fred

The Illuminati are the least of your worries. Do you know who pulls
the strings of the Illuminati? It's not who you think. I've seen them.
Not a pretty sight. In fact, I can't even describe them without
involuntarily curling up into a fetal position and moaning
pathetically. Take my word.

If they were only like us...

If they were only human...

Good Lord, if they were EVEN BIPEDS!!!!!!! AAAAAIIIEEEEEE!

On the other hand, I hear the local Bilderburgers has a new
drive-thru.

Hope this helps.

Sorry you see it that way Fred. Just because the majority don't
drive the speed limit doesn't negate you getting a ticket for going
above that limit.

Nowhere in Part 97 does it describe it as a hobby. It does call it
a service. If you want a hobby take up CB......

Fred wrote:
>

Source record: 117259

Someone has sent around an email concerning a gasout.
This was my reply to the gasout. Enjoy!

Radio Oger

Hey Guys,

Almost $.50 per gallon is eaten by state and federal taxes. If you want to lower the price of gas, get on the politicians ass about STEALING from the American public at the gas pump. You pay 6% sales tax on other stuff, but you pay around 23 cents at the gas pump just to your state and about 20 cents to the feds on each gallon depending on your state, and the fuel type that you buy.

Tell them all to go to hell. The politicians love it that you are going after the oil companies because it takes the heat off the thieves in your state capital and Washington. They make 10 TIMES the profit the oil company does by taking their cut right off the top for doing nothing. This kind of taxation is tyranny. We fought England for independence over much less.

What we really need to do is to get Congress to suspend Federal and State taxes on all petroleum products for 90 days. This will give relief to fuel oil buyers who rely on fuel oil to keep their families warm, and the working class that needs their vehicles for their work in some capacity or another. Lets start an organized effort to also call our Congressmen and Senators to demand relief from this growing problem.

I thank you for your time, and hope that you will take action to get this tax temporarily repealed.

Message-ID: <38c84702.256483524@news.mindspring.com>
Source record: 117262

CERTIFIED MAILï¿½RETURN RECEIPT REQUESTED

Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

Subject: Warning Notice: Amateur Radio License: KC8JBO

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately and maliciously interfering with the radio operations of other licensed Amateurs on the 14 MHz Amateur band. This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be self-policing. Operation of the type described above is contrary to the basis and purpose of Amateur Radio and degrades the service for legitimate users. This serves as a Warning Notice that such operation will not be tolerated. Additional incidents of operation of the type described above will result in a monetary fine being levied against you and in revocation proceedings before an Administrative Law Judge.

You are requested to contact me at 717-338-2502 to discuss this matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio Service

Enforcement Bureau

You know something folks? I'm beginning to understand why some of the
older ham crowd are having a problem with the new guys. If this Lloyd
Dipshit is an example of the new crowd then I feel sorry for ham radio.

But I really don't believe he is a typical example. All the others I
met, with the exception of Donny Anderson and a couple others that I
wont mention due to my word of honor, he is more like a hemoroid on the
butt of this great service.

800. The Sheltered Existence

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-10 00:00:00 UTC
From: Samuel Goldstein <sjgold@optonline.net>
Message-ID: <PVXx4.349$na4.7419@news.optonline.net>
Source record: 117268

It's not that I haven't been paying attention but I guess i haven't had as much spare time as some others...based on some of the postings its obvious that I haven't been keeping up with the hobby...

(a) 14.313 used to be the international maritime net...then I heard there was some trouble with interference. So who took over the frequency and what precisely is going on?

(b) After dinner I tune around 75 phone. I haven't heard anyone call CQ in over two years. Everyone seems to be enjoying one net or another...are there any frequencies around where the general unaffiliated ham goes to talk to just anyone who will listen. If you are going to talk to the same guys every night why not two meter FM...it kind of lends itself to this type of "hamming".

(c) Every weekend there seems to be yet another contest. Yes gentlemen, when conditions are right...your 100 watts into an inverted Vee at 40 feet will put a 5/9 signal everywhere on this planet. How many times and on how many bands do you need to "contact" Slovenia. Perhaps I just miss the point, but every week?

(d) I have accumulated thousands of QSL cards...and some of the contacts they represent were really great. The majority however, were merely signal reports with contact duration of less than 30 seconds. That's not exactly what I thought ham radio was going to be when I tuned in 20 meters back in 1949...where is the excitement of actually talking with someone as opposed to talking at someone. Ah, the glory days are gone. Days of excitement replaced by the phrase.."when last heard you were 3/2...73's please QSL Via the bureau".

(e) I am not an attorney but I always interpreted Part 97 to mean that one could not broadcast on the amateur frequencies. So what exactly is K1MAN doing at 3.900 or so? I am not complaining...actually his crap is alot better than most of the other stuff I hear...perhaps a tad self serving but none the less, entertaining.

There are too many questions and not enough time or interest in pursuing them. I have to simonize my car and now seems most opportune.

de Sam, K2LDK

Remember, there ARE limitations on Free speech. Crying fire in a
crowded theater. Defamation of character. etc.

> This doesn't mean I am supporting what KC8JBO says, but I surely
support
> his right to say it. If anyone feels wronged, the civil cause of
> defamation is still alive and well as a remedy.

I would say that this guy is pushing the envelope on Free speech, and
probably goes too far. Just like certain TV stations don't always carry
all of their Network's programs - Internet carriers shouldn't have to
carry users like this KC8JBO.

It is possible to remove users like this, who are perceived to be
excessive abusers. I've seen guys like this chased off from other
newgroups before. A user like this gives an ISP a bad name - they are
happy to get rid of them.

HOWEVER, there is always one VERY effective way to deal with a
persistant problem poster like this. SILENCE. DO NOT reply directly to
ANY of his posts. If he can't get a rise out of anyone, he will go away
and look for other groups to harass.

> "Just tellin the truth, and they cain't stand it."

Sounds like a Rush Limbaugh slogan. The problem is, Rush is generally right, and you appear to be generally wrong(at least about ham radio policy).

If you care anything about the Amateur service, I would try to be a little more receptive of new hams, and of the new FCC regulations, otherwise we are just gonna set a bad example for the kids, and probably scare off many of them, and hasten the demise of the Service.

Dan, I'd like to understand what your point is in being so argumentative and negative about changing ham policy and priorities. Is it just that you are upset because the younger generation won't have to pass the same tests you did? Remember, that the rewards aren't as great as the used to be - so the old requirements were out of line.

Dan, have you tried packet? hi-speed packet? APRS? have you visited the TAPR site? HF and CW are rapidly dwindling in importance in today's world. However, I will agree with you that there is a use for them in emergency and remote communications. But, if you keep spouting all this nonsense, the kids are just gonna shut you out, and won't even hear you on this either.

Here is some input:

First of all, I don't know why there are 4 connectors - you should only need + and -, I've got an HTX-202 with a charged battery pack at home, I'll try to take it apart tonight and check the voltages going in and out of the battery.

I checked out the NiCad battery section in my latest Digikey catalog. There are a couple of options here...

You could string together 6 "rapid charge" 600MaH 1.2V NiCad AA batteries @ $1.91 each, total $11.46(or 10 for $17.15) using a Radio Shack battery mounting assembly(a couple of bucks), and then jury rig the thing to your HT.

Another option could be to get a 7.2V NiCad Panasonic battery pack(I recommend Digikey part number F023). You probably could make this contraption fit in the Radio Shack pack container. They didn't list prices, buy I would get it would be about $20.00.

Source record: 117282

Maybe there's something so obvious that's setting off others from becoming hams. Maybe something as obvious as the actual name: "Amateur Radio Service"

When people see the word service in this context it usually means there's a specific commitment involved. In the person's mind the person considers either having to make a speficic commitment in order to become a ham, or to just get an Internet account (or AOL, depending on how badly you need chat and instant messaging.)

This might not be the only reason (and I don't want to get into CW right now because this message isn't related to it) but maybe if this word is taken out of the offical name for amateur radio then people would consider ham radio a viable means of communication.

Well, those are just my thoughts about this whole issue. Please comment.

During Field Day, more visitors gather around the Morse position than
any other. No other mode holds their fascination as CW.

In a previous article, <jeffreyh@Hawaii.Edu> writes:

>This lists our commitments pretty well:
>
>97.1 Basis and purpose.
>The rules and regulations in this Part are designed to provide an amateur
>radio service having a fundamental purpose as expressed in the following
>principles:
>(a) Recognition and enhancement of the value of the amateur service to the
>public as a voluntary noncommercial communication service, particularly with

>respect to providing emergency communications.
>(b) Continuation and extension of the amateur's proven ability to contribute

>to the advancement of the radio art.
>(c) Encouragement and improvement of the amateur service through rules which

>provide for advancing skills in both the communications and technical phases

>of the art.
>(d) Expansion of the existing reservoir within the amateur radio service of
>trained operators, technicians, and electronics experts.
>(e) Continuation and extension of the amateur's unique ability to enhance
>international goodwill.

Two problems with your example, Jeff.

1. It only applies to hams subject to FCC rules, with is a minority of the
amateurs in the world.

2. It is incomplete in that it excludes an important principle:

(f) Provides a playground where exhuberant radiomen can gambol
in the meadows and glades of the ether.

Sub-paragraph (f) is optional for Over-serious Curmudgeons.

Source record: 117286

Anyone have a lead on a spare Azden HT-21 (handi-talkie) battery pack? I bought the unit at Dayton a few years ago from the factory booth but they've pulled out of the US market, from what I understand. None of the usual outlets has ever had a generic replacement battery pack for this unit (Mr. Battery, Yost, etc.). Does someone have a dead HT-11/61/21 with a good pack they'd care to salvage a little cash out of? Or a lead on a supplier for a new pack? Thanks in advance, as they say...

If ever there was a better example of someone trying to spin a "I've-gotten-my-butt-whipped-and-I've-gotta-get-outta-here" into a "I'm-tired-of-playing-so-I-quit" I've never seen it. And it utterly failed. All anyone has to do is compare the claimed to the acheived. Let's look:

No AF2Y arrest report
No AF2Y credit papers
No AF2Y anything except "hey, hey, ho, ho..."

No KC8JBO credit report
No KC8JBO website

Well, nothing. Just what he "won."

What a loser.

>Besides I do not think you have seen or heard me call anyone a neo-nazi, but if
>the shoe fits wear it.

I did a little searching on Deja and I stand corrected you don't call
people neo-nazi you just call them nazis. Just do a search on KK7HO
and nazi you'll find plenty on instances of Tim the prevaricator
calling his adversaries Nazis. Like you say Tim if the Jackboot
fits.....

> As for someone sending you pics, so what? You have a sympathizer in Vegas LOL.
>Who cares.

Apparently you care.

>If you would have bothered to stop and knock you would have seen
>"how I live" new furnishings, home theater, new truck and everything paid for.

Sorry I just don't believe you. If you could afford all that you
wouldn't live in a dump in a bad neighborhood. The truck I saw was not
new. I think the DMV records in Nevada are public record perhaps they
know if it's paid for or not.

> You can continue if you like, at your own risk of course, your posts of
>"stalking" have been turned over to the authorities and have received special
>attention.

Please stop I'm laughing so hard it hurts. I can see it all now. The
FBI dropping all that boring anti terrorist stuff giving up their
efforts directed at organized crime because now there is something
serious, Timmie the bully is upset. The only special attention you get
is on the internet

Based on your track record of threats and attempts at intimidation you
would be well advised to say away from authorities you might just find
yourself in the crossbar hotel.

> Your bud at the store should watch his step also.

This appears to be a threat, I'm not sure directed at whom since it is so non specific. You would be well advised to be very careful who you accuse and who you attack I'm not who you think I am and you haven't a clue who my "buds" are. Let's just say a number of hams in Las Vegas find you to be an embarrassment.

Better ease up Tim people are starting to point and laugh.

> I can and will express my views about whatever I wish just as you claim the
>"So Called" net has a right to,

I have never claimed any such thing. I suppose they do have rights of free speech just as you and I do but I have not championed their rights. As you say we all have a right to speak up and when you are out of line I reserve my right to speak up about you.

>I and others do also. NOTHING i have said has
>been "disproven" by you or anyone else. Instead of trying to disPROVE what I
>have said you take the democratic approach and try to defame or discredit the
>person instead of the facts.

You make a lot of claims about lawyers and such that indicate you have a large disposable income to fund them. Based on where and how you live indications are that you don't in fact have such resources. Thus when you make such claims they are just as much hot air as your "stalking" claims.

>I have up'd my intentions, now, UP YOURS

No that's mature. Have a nice life and make sure they guy you assault is really me.

Bye Bye Idiot

I'm sure that neither the Ameco or ARRL books had every possible question along with every answer. I remember the ARRL License Manuals, I used them for my first tests as well. They didn't have the EXACT questions, those were secret. I remember when I took my Novice back in 1975 there was a warning not to discuss the test questions or answers, same when I took my General in 1976. The license manuals had similar questions but not the exact ones. BTW, my General was before the FCC test guys and not any VEC. As was yours.

Well HOORAH FOR YOU! You are an rarity! At least your daughters will understand what goes into ham radio and not just be memorizing the questions only to forget them in two months. I would also suggest that you get a copy of the FCC Rule Book from the ARRL. It goes into detail the rules and reasons behind the rules. It's more of a "plain English" version of Part 97 with explainations.

832. Free FCC Test preparation on the web

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-10 00:00:00 UTC
From: Dave Campbell <dcmpbell@flash.net>
Message-ID: <10032000185051646O%dcmpbell@flash.net>
Source record: 117300

Right now we are providing the FCC Extra, Technician and General Exams that are to be administered after April 15, 2000 (many thanks to the guys at ARRL).

We also have the FAA Recreational, Private, Instrument, Commercial, Certified Flight Instructor, and Designated Examiner questions and answers for Glider, Airplane and Helicopters. Additional exams, including the ATP, ATC and knowledge tests are coming soon.

http://www.webexams.com

It is free. We are not charging or requiring e-mail addresses.

You can take predefined or randomly generated tests, design your own tests, browse through questions and answers, have exams and questions emailed to you, and more. Exams can be timed or open-ended, and you can pause or suspend exams as interruptions occur. You can track your progress, and focus on your own weak areas, all free of charge.

Visitors to the site have told us it is very helpful in preparing for the FAA written exams, and a fantastic confidence builder.

We are very excited about providing this free, the way we think it should be, and would love to have feedback on how to improve the work we have done. In addition, if there are other, non-FAA exams you would like to see up, please let us know!

Thanks,
Dave

That sure sounds like a hateful statement to me. My advice to you
is walk a mile in the shoes of a handicapped person and then get
back to us.

> Please cite evidence that I can not dunk a basketball.

I inferred such when you changed the subject to airplanes. So can you
dunk a basketball?

> > I am for freedom of choice of modes
> >in a hobby in a free society.
>

That's exactly what I thought. "Let them eat cake." Remember the
reward that Marie Antoinette got for that hateful statement.

> You were the one that made the comments about the Amish, Cecil, not
> me.

Comments about the Amish indicates bigotry? I saw a TV special
the other night that was full of comments about the Amish. And
my comment was not about the Amish. It was about your Amish-like
religious attachment to Morse code testing. Why do you want to
block progress in just one area and not others?

But remember, because of the S/N advantage that CW has, you can
hear a greater percentage of total CW signals than you can total
SSB signals. To normalize the comparison, count all the SSB signals
and count only CW signals above S3.

Wait a minute, why are you going to spend $500 on an HF radio if no one
cares
about it and it's days are numbered?

> >I'll just bide my time; I still have plenty of it.

Can you cite any evidence to support this statement?

>> With the ability to reliably,
>> efficiently, effortlessly, and cheaply communicate instantly around
>the
>> world via the Internet - HF is a very small and withered carrot
>indeed.
>>

Three observations.
1) Effortlessly is the operative word there. Putting effort into
anything in 21st Century America is not in vogue.
2) You didn't mention that HF just might be FUN!!! That IS a part
of Ham radio!! I'm a software engineer. Coming home and
getting on the internet, or playing with one of the digital modes
is NOT FUN for me. Your mileage may vary.
3) This wonderful technological infrastructure we're building in
this country is VERY vulnerable. And, the United States is not
exactly a popular country these days. I've been in big US cities

where there have been car accidents tying up major highways
and the cell phones are jammed. The last snow storm down this
way jammed all the "efficient, effortllessly, cheap, and instant"
internet for hours!! The ability for hams to provide world wide
HF communications for the US in times of need is not a
trival capability, regardlss of whether it's CW, SSB, digital etc.

>> So, all you paranoid die-hard code jerks, your fight is now over a
>>small
>> mound of stale old beans that nobody really cares about.

Beans, Beans, a wonderful fruit....
The more you eat, the more you toot...
The more you toot, the better you feel...
So let's eat beans at every meal!!

I love that song!! I always thought it'd go grand with Mitch Miller's
bouncing ball....ah...that assumes you know who Mitch Miller was...

> > And I suspect
>> the next generation is going to care even less about it. I actually

So, would it have killed her if she had to wait until she was (gasp!!) 14?

> And they give me the feeling that Morse code is a real
>> turn-off to them, so I'm not about to ram it down their throats.

Ahm...could it be that they're picking up ideas from their dad? Kids
DO tend to mirror their parents (I've got three....)

>> I checked out the new Technician test - it is even EASIER than the older
>> one. There is some rudimentary algebra, but not the multi-step
>algebra
>> that was on the old Tech test. My 11-year-old WILL pass it, and my
>> 10-year-old has a fighting chance.

Yep. Lower them standards!! Instead of waiting for a person to achieve
a standard through hard work, lower the standard so they don't have to
work so hard!! And no, that wasn't meant to be a shot at your kids.
If you feel it was, well, just deal with it....take a deep breath...kick the
cat....

> >So, I'm not about to scare them
>>off with that spooky old Morse code.

Ohhhh...spooky old Morse Code....

>> BTW, I actually can do 10-11wpm,

Most people actually can. I've never seen any evidence to support the
fact that people have trouble mastering code at the 20 WPM or lower
level. I'd be very interested in seeing some qualified medical evidence.

Personally, I think it's just laziness about the code. And if it turns out
that
there is a small percentage of the population that really can't learn
code due to some real medical problem, well that's just too bad.
Life is NOT fair. You're entitled to Life, Liberty, and the pursuit of
Happiness...you're NOT entitled to be happy.

Every citizen is entitled to a level playing field. Tilting the field
so Morsely gifted hams have an advantage is just as unfair as requiring
hams to dunk a basketball. Can you dunk a basketball, Mark?

> Finally Stewart, rest assured, you ARE going to get the reliable, efficient,

Nobody likes a smart ass...

I only do it because the speaker quality of the FT-100 isnt
the best when driving through city traffic. It is not a good
idea to use all your concentration in the radio when you are
driving., So I guess hooking it to the stereo system allows
you to use it station for entertainment while driving.

As to your remark

"quote" And you call yourself a HAM, HA! "unquote"

Dont start a fight, this is not the place, if you have nothing
constructive to say keep your damn mouth shut.....

I've been studying with my 10 & 11 year old daughters with the old ARRL
book "Tune in the World with Ham Radio". I read it with them and
discuss questions that come up. I don't recommend just studying the
answers(although my 10 year old might have to do a little of this to
pass).

Why would you assume I want an effortless world? You are drawing conclusions(and are totally wrong I might add), and you are changing the subject. All I was saying is that HF isn't really important anymore. Try to keep on subject.

You guys just can't seem to accept the fact that the old requirements were totally out of date. Even with the new, easy to pass requirements, not very many people will be interested in HF.

Source record: 117342

Hi,
Many thanks to all who responded to my last mail.
One of my biggest problems is that "something"
drains the battery. On principle I am thinking
that the CPU (IC601) is slighly broken, but ...
A lot of people claim that if one leaves the radio
turned ON while the power supply if OFF ... the
battery will go dead. I wonder why. I cannot find
the way it should happen. From what I can see
looking at the schematics there should be NO
difference whether the radio is turned OFF or
whether the power supply if turned OFF.
Could someone, please, explain me why should the
battery be drained when the radio is left ON while
the power supply is OFF ?
Well, if this is really true, then ... maybe the
CPU is o.k., but ... it does NOT see that the
power is gone and it still tries to "work" ?
Understanding the way the CPU is expected to go
"sleep" would help me a lot.
Thanks in advance,
Jacek.

849. Ham Radio FAQ

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-10 00:00:00 UTC
From: wd1v@amsat.org
Message-ID: <wd1v-1003000637270001@wdonev.ne.mediaone.net>
Source record: 117347

The Amateur Radio Frequently Asked Questions (FAQ) List, formerly maintained by Diana Carlson, KC1SP and Ian Kluft, KO6YQ, has recently been resurrected by John Seney, WD1V. The majority of the original content of the FAQ remains the same, but now it's a hypertext document with thousands of links to radio-related sites and is a significant resource to all students of amateur radio - regardless of their license status. It may be accessed as a WWW Page:

http://people.ne.mediaone.net/wd1v

Please direct any submissions, feedback, or administrivia regarding the FAQ to wd1v@amsat.org

73,

John D. Seney, WD1V

Hello,

Has anyone built the universal exciter for SSB & CW, originally built by KL7IAK (Terry White)---article published in Solid State Design for the Radio Amateur (ARRL 3rd Printing, 1995)?

Appreciate comments.

Best Regards
VU2YAP

He's managed to captivate the interest
and head of the table seating position
of this *entire* NG. Even hemmorhoid herb
in the USVI couldn't do that! Keep the
postings commin kc8jbo. We like your
style and wit of the written woid!
Hey, when do you operate HF? I am a SWL
and have enjoyed the proceedings on 14313
for some years now. Me thinks you could clean
up that freq just like the old Nerd Net
did in one day abt 14 yrs ago - a record that
has never been broken to this day! Go for it dude!

Damien,

Have you met the famous Fractenna of rec.radio.amateur.antenna?

I think he uses mono headphones, but has perfected a way to get the surround effects of entire crowd of people listening to voices using minimal external electronics. The only thing you'd need to watch out for is an occasional shock if you use his method, unless isolation works.

Some famous author, I think it was Steven King or Dean Koontz, was taken by him and actually wrote him into one of his books.

I am curious about the people that condemn CW on here. Have you people ever (seriously) tried to learn it, or did you simply pronounce judgement against it without even trying? And also, not that it matters anymore after April 15, but for those that couldn't get their speed high enough to pass the 13 word per minute test, what methods were you using to learn it?

Erik

Just trying to ascertain exactly to what level your hatred of handicapped
people goes. Are you saying you only hate the mentally handicapped?

> Can you fly an aircraft on instruments, in the clouds, and land it safely
> Cecil?

Aha, so you can't dunk a basketball. What if some of your rights as a citizen
were taken away because you can't dunk a basketball? Would you just accept it
without objection? If some of my rights as a citizen were taken away because
I can't fly an aircraft, I would object.

> If you wish to advertise your religious bigotry, that's fine with me.

Uhhhhhh Mark, You are the Morse code testing religious zealot. I am the
Morse code testing atheist/unbeliever. I am for freedom of choice of modes
in a hobby in a free society. I believe in live and let live. Exactly how
is that bigotry? Why do you feel the need to control other people's lives?

This lists our commitments pretty well:

97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:
(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.
(b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.
(c) Encouragement and improvement of the amateur service through rules which provide for advancing skills in both the communications and technical phases of the art.
(d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts.
(e) Continuation and extension of the amateur's unique ability to enhance international goodwill.

Hello I am after some help - very very basic help with the ARRL Radio Designer.

A friend who has an amateur bookshop gave me one of these packages today and boy does it look good. I have the full manual. I have had not experience with any package like this. Nor do I really have a use for advanced circuit analysis. I worked through some of the early examples trying to get the hang of things. I teach Amateur Radio Theory (free at the URL below). I thought I could use this package just to plot some very basic circuits - (non active) and use them in my courses. Could someone lend a hand with a very basic walk through. Say a simple series or parallel LC circuit - I suppose we have to specify some 'Q'. I like to get a plot of Frequency versus impedance that I can use with my students.

If I can get a handle on this I figure I have a use for the package - it would be great to demonstrate simple RC circuits for pre-empahasis and de-emphasis - and move on to PI networks and the like - But do you think I can manage an impedance (or voltage) versus frequency plot of a simple LC cct! No way can't do it!

I can follow the examples on the more complicated circuits given but when I get down to just two components say LC in parallel I am losing the plot somewhere.

I tried 100uH (with and without Q) and 250pF - knowing that the fr is about 1.007 MHz - to get a frequency versus impedance plot. I thought this would be a 1 port two terminal cct. I am a bit confused about

ESTP declaration - STEP seems quiet clear. Look I could waffle on about my failures here but my self esteem is sinking fast. No really I just get a grasp on something or I am missing something -

I loaded example one and modified it yet when I run an analysis I get different results to example 1 but the 'header' on the report is still "double tuned circuit filter" you will know what I mean if you know the package (V1.5 BTW)

Went to the ARRL web site download lots of QST PDF files - but again all of this is on circuits with lots of nodes containing active devices etc Surely I can do what I need?
Your help gratefully appreciated. I have no one to ask for help the package is pretty well unknown here (AU) - well in my circles anyway.

Regards
Ron VK2DQ/4 (humbled and feeling thick)

Cross-posted to: rec.radio.amateur.misc,alt.ham-radio.ssb,alt.ham-radio.hf

We are seeking HF contacts in Tacoma,
Washington area and Fort
Collins/Loveland, Colorado area that
might be willing to help us keep in
touch with our families
during the month of May while we are at
sea.

We will be sailing from the British
Virgin Islands, through the Bahamas, to
Baltimore and will be able to transmit
on 20M (and other bands) at upto 250W.
I will have my General ticket at that
time.

We will be setting up email on the boat,
but would also like to try to arrange
some live conversations with our
children and spouses either by having
them visit your shacks or via phone
patch (local call).

This is also an opportunity to introduce
our children to HAM radio through seeing
a use of it that they can really relate
to.

If you can help us out, or have useful
advice, please drop me a line.

Many thanks,

Pete Dubler KC0FGU

I'm curious. Using this Mensa-style logic, did you ever engage in a
debate? I'll bet you got clobbered. It is interesting that you
introduced the word "hate".

If you look upon an amateur radio license as a "right" that might work.
If you couldn't fly a plane I guess you're "right" to fly would be taken
away.

It was just month or so ago that you invited someone who disagreed with
you to leave the country. Good old "Live and Let Live" Cecil Moore.

Check out 14.300 the Marintime mobile net and Intercon would be more
than willing to help. Intercon has a webpage up, but I don't have the
URL handy.

I rest my case, registered Republican with Libertarian leanings. What
a contradiction.

And you say I'm off base....I supported NOCODE way back when it was
ORIGINALLY proposed. And I still support NOCODE VHF. I think CW as
a "screening tool" is not necessary. I think a basic knowledge of CW,
as in 5wpm, is just fine. However I dont think total ellimination is a
good idea...AT THIS TIME.

I have NO PROBLEM with new blood in this service/hobby. As long as
they are AWARE of what their responsibilities are. This is spelled out
in 97.1....basis and purpose.

Go back and read my posts on this exact subject. You will see that I
do not feel as you think I do. Just because I can send and receive CW
at a
very fast rate does not make me a better ham. Just a more diversified
one.

>
> Dan, have you tried packet? hi-speed packet? APRS? have you visited

you
> on this either.

The kids already shut out their elders. If you dont know that, then
you need to get out more.

And yes I have been on HF packet since the early 80s. I was one of the
FIRST VHF/HF packet stations on in the state of Alabama. I operated
1200 baud ten meter packet before we could even use the other bands for
300 baud packet. And Im still on it.

No I have not tried APRS yet, but I will. And for present day digital
activity. I operate RTTY, PSK31, Hellschriber, HF Packet and Amtor.

I am also gearing up for Phase3D Satellite and the ISS operations soon
to happen. BTW my first satellite contact was made in 1973 from Germany
as DA2LJ. I used a modified gonset 4, a homebrew 4 element 2m beam and
received with my FT-101B on ten meters.

I am a contester and have many certificates that show my proficiency.
I have been a active National Traffic System (NTS) station for over 30
years. I am in Navy MARS and have been in AF and ARMY before.

I am a registered Volunteer Examiner for the ARRL, of which I am a life
member since the mid 70s. I was first licensed in 1961 and NEVER had a
TECHNICIAN class license at any time.

I presently hold three appointments to the ARRL field organization,
including Technical Advisor.

If this qualifies as a out of touch old fart, then so be it. But I think you will find I dont feel "special" just because I managed to get my extra 25 years ago. I hope ham radio continues, it has been very good to me.

In all fairness when I passed my General in 1961 I memorized the Ameco study guide and the ARRL license manual. Then I had to learn electronics because I either fixed the rig, or I was off the air.. hi.

I have had A LOT of fun the past few months TORMENTING KC8JBO.....We all know that I have BURYIED him thru my GREAT FLAMMING ABILITY on this form (he will soon be burying his SICK MOTHER in his backyard).

I have better things to do with my time than to kick KC8JBO around anymore. I WON!!!!!!!!!!

Watch LARDASS reply to this FINAL post of mine even though he says doing so is a "COLOSSEL WASTE OF TIME" hohohoho.....Once 2 faced, ALWAYS 2 faced.

First the HORSE FACED BOY thought "THE PITBULL" was KC1ZQ.....WRONG!!! Then KC8JBO thought I was W4AMP.....WRONG AGAIN, CIRCUS BOY!!!!

NOBOBY will ever know who the "NOW LEGENDARY" PITBULL was!!!!!!! With my passing, so goes the whole PITBULL MYSTIQUE. All of my postings were generated from the Bloomington branch of the Hennepin County Library, in Minnesota.

I'm NOT going QUIESCENT because of:

1. I have been "found out"
2. Deja has kicked me off
3. Any other CONSPIRACY thoughts you may have

The reason is:

1. I'm BORED with KC8JBO
2. The 'ole GOAT will be chucked in the hole soon
3. I WON
4. I have better things to do with my time

KC8JBO must go check if the 'ole GOAT CRAPPED in her bed again.....Have fun changing her Pampers, Mr. DEFORMO FACE.

I hear LARDASS "received" a new Yaesu 920 & power supply.....hohohoho.

You seem to be getting wrapped around the axle with your logic. Do you by chance get frustrated when you try to program a computer?

Let's keep this simple...

HF offers very little incentive in today's world. Along with the other VHF/UHF privileges, it amounts to a small incentive. Therefore, lowered requirements are justified to get ANY new hams interested in joining. It is really that simple. Don't try to confuse things.

"It's just too bad if someone is handicapped and he/she should not expect
any consideration", sounds like subconscious hate to me.

> If you look upon an amateur radio license as a "right" that might work.
> If you couldn't fly a plane I guess you're "right" to fly would be taken
> away.

An amateur radio license grants citizens access to *public property*. It
should not be used as a discrimination ritual to preserve a Morse code
tradition. Looks like the FCC agrees.

> It was just month or so ago that you invited someone who disagreed with
> you to leave the country. Good old "Live and Let Live" Cecil Moore.

It wasn't because he disagreed with me, Dave. It was because he
disagreed with the freedoms granted to every citizen by the US
Constitution. In other words, he was incompatible with the
principles upon which this country was founded.

Come on over to rec.radio.amateur.homebrew and ask/talk about it.

I haven't built it, but there may be people over there who have.

At the very least, you will find people who can give general tips.

> - Brian

Hey, Brian - are you still the amateur radio IP address coordinator?

You have a point when you say Ham radio is essentially irrelevent to modern emergency and disaster communications - but yet it does have SOME relevance that shouldn't be totally ruled out. And the fact that we COULD hook into the Internet, could bring amateur emergency communications into the 21st century - as YOU very well know.

Last time I remember(back in '95, I think it was) you were being very stingy with handing out IP addresses to amateurs. I had to really fight to get a set of 8-bit subnet addresses. It sounded like you were working to refarm the addresses for commercial purposes. That kind of sounds like a conflict of interest to me. This isn't why you are so against the expansion of amateur use of the Internet - is it?

Maybe I'm being too critical of you. You may have been the one to get us IP addresses in the first place? Let the genie out the bottle, eh? Anyway, I think you 'ought to be a little bit more open to expanding amateur use of the Internet. It really is the future, you know. If we can't expand in the area of digial

Claudia--

Ham radio can be an exciting, rewarding, and challenging hobby.
There are many modes to discover and master that can keep your
interest for a lifetime. What you see here is the result of an
unmoderated newsgroup, and it is only 3 or 4 posters that are
feuding on a very base level. 99.9% of the Ham radio community is
productive and busy elsewhere.

I have been a Ham since 1991, and have _never_ heard anything
close to this type of thing on the air. HF does have its
"ghettos" (certain freq's to shun), but I avoid HF and I have
TONS of frequencies elsewhere to experiment and enjoy. Have fun
and learn with the portions of the hobby that make sense for
you. The rest is just static.

Find someone nearby you that can introduce you to the _real_
hobby taking place in your community. This ng is _not_ to be
taken seriously.

Hope you join in!

Hockey Pucks! Stock up before, buy after! Same Consumption!
Wont mean squat!!
Everyone consciously reduce, by 10%, the amount of fuel used for one
month!
Share rides, plan shopping, reduce spur-of-the-moment runs.
Simultaneously, for one month-target one major provider-no purchase.
You want action-then everyone show some guts!
Three days in April is nit noy idea, and sucks!

The illuminutees are lamp lighters from 18th19th century London.
Most are dead now!

In your previous post you said:
W6RCA has been reported to Hollingsworth for assisting in the illegal
modification of type accepted radio equipment.

I had a tech. work on a highly modified TS-520 once, and he told me
that to clear his responsibility for working on it, was to clearly tell
me that operating the equipment on 11 meters was illigal. Now how in the
hell do you get in trouble for simply pointing the way to the mod. sheet
posted on the web? Yeah, we need more people like yourself on the air
and on the web! Crawl your dumb ass back under the rock from which you
came troll and think with your OTHER head.

Unfortunately, this is what happens in an unmoderated group. The whole group isn't nuts, just like all of amateur radio isn't nutso. If you can separate the wheat from the chaff, you'll be in good shape. It'd be like judging on-air ham radio by what you'd hear on 14.313 and 14.275 MHz. Go to VHF and above, and you'll find some real nice, helpful people, especially those in the weak-signal community.

902. Proper Microphone Settings HELP

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-11 00:00:00 UTC
From: Jim Teague <jteague@erols.com>
Message-ID: <38CA9EEE.291BCDD8@erols.com>
Source record: 117200

I recently purchased a Adonis 508-E (RF LIMITED) desk microphone.

It is being used with a Ranger RCI-2950 10 meter Radio.

While I love the microphones styling and its ability to change channels,

I'm very unhappy with the audio reports that I've received while using it. A day doesn't go by that I don't get a comment about the audio being distorted or "over-driven".

I've tried a varied of settings from setting the radio's mike-gain control down low and running the mike at higher levels, to setting the mike down and varying the radio's mike gain control. I've tried the Lower of the 2 compression settings and also varying between the FM and SSB settings. No setting appears to offer acceptable audio.

Any suggestions on improving the audio would be appreciated
KA0WJT

"Eau de Feces", by Anon

Roger, Roger, Roger Wiseman
all the ladies say, "That's a small size, man!"
His feeble brain is taxed beyond compare
to merely sit, sh*t, or stare.
He has a stupid or rude comeback for everything,
when all the while he's actually just masturbating.
"Clever!", he rates himself to be,
"Moronic...,", others say, "he's not worth his own pee."
He pollutes the newsgroups with language vile,
In reality, he's just sitting in his own "pile".
He lives in a small town where the police cruise,
No one is willing to stay...afraid their anus he will bruise.
So this is the end; I bid you adieu,
Oh look, here comes Roger, I thought I smelled poo!

Dan, you were listening to the standard "party line" that can be expected of a typical "LandLine Lid". These people require such negativity, true or not, at any expense. There's no telling why they are sick this way, but a fact's a fact.

These people feel they must pre-suppose that all Hams are as clueless and worthless as they are. Self-sacrifice and the innate nobility to be found in most Hams who participate in emergency communications such as you speak of, are totally foreign to these "LandLine Lids". They cannot find that decency in themselves and so assume that nobody else can, either.

This newsgroup is infested by a number of persons who have obtained a Ham license but have little or no knowledge, feeling, or pride concerning Amateur Radio and their fellow Hams. Notice how the very worst of them profess an interest in Amateur tcpip? Tells you a lot about Amateur tcpip, doesn't it, Dan?

This represents libel across state lines as well as Internet harassment. I demand a retraction. The letter received had nothing to do with transmitting atop anyone. It was an ONV requesting an explanation for my excessive testing which I did send. Once again I demand a retraction on this board. I believe Hammer007 is Robert Youngblood which if necessary can be easily proved. For all to know, Youngblood harassed me and my wife by phone; a death threat was issued; I filed a complaint with the Clifton Police Department and in County Court, Mr. Youngblood's attorney handed me a letter of apology written by the defendant. Once again I consider this posting to be libelous and harassing and will do something about it unless a retraction is publicly posted.

For God's sake, clean up your act. Your posting is utter filth and belongs in a sewer along with you. Furthermore Stanky was Ed Stanky, an infielder with the Chicago Cubs, Brooklyn Dodgers, Boston Braves, NY Giants and the St.Louis Cards. A scrappy pepperpot who was a key ingredient in a team winning the pennant as attested to by having played in 19 World Series games. His career spanned 11 years and I remember him well as a Dodger and Giant and don't appreciate seeing his name used disparagingly.

915. Youngblood

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-11 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8aefah$gb1$1@slb2.atl.mindspring.net>
Source record: 117213

I have received 3 e-mails telling me that KT4TR, Robert Youngblood from Vero Beach, posts under the pseudonym Hammer007. Under that name a person, on this board, libeled me across state lines as well as possible harassment as well. If no retraction is forthcoming from Hammer007, I shall sign a complaint with the Clifton Police Department as soon as I have indisputable proof of his ID. I'm a very sensitive guy and this latest bit of malicious libel is the last straw. Once again I am, at this stage, not 100% sure of Hammer007's ID but based on what I've been told plus his other posts, I do believe it's Youngblood. Input would be appreciated. Thank you.

What specificaly do you have a problem with on 3.901? No person that
frequents this group at present has been "run off of ham radio". Do you
have a problem with a group trying to enjoy each others company? Do
you have a problem with us because of what you know, or what you have
been told? Please specify, thank you.

You dislike George W. because he's a Mason? Huh? You must be kidding. And the last bilderberger I ate was delicious. Try it with some sauerkraut and salsa. Gesundheit and OLAY! The only thing the Illuminati pick are their noses. And what do such people have to do with communism that died in 1990? Hello Lloyd! The Soviet Union collapsed-have you heard about it? And I still don't know what your heroes mean when they talk about a one world government. Is that like a one government world whatever that means? And yes there are black helicopters in North Jersey. They take off and land at Caldwell and Teterboro airports to take high stakes rollers back and forth to Atlantic City. The only ones who see a threat in that are the goofballs who start out the evening in tuxes and fly back in their underwear. And upon deplaning, all are yelling, "It was a conspiracy..it was a conspiracy."

926. AF2Y & Internet postings

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-11 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8aeksi$s2k$1@slb0.atl.mindspring.net>
Source record: 117224

Hams-for a moment just stop to realize how great is this board specifically and the Internet generally. Stop to think of the power of the written word-no army in the history of the world has ever conquered it. No army ever will. Proof? How old are our Testaments, the cornerstones of Western Civilization? How many have died for having never forsaken them? Words my fellow hams-words-sort of like ancient postings.
However everything has limits and so it is with this usenet. Keep it that way instead of allowing it to become and stay an "abusenet." KEEP POSTING be it serious, jocular or even silly but refrain from LIBEL AND HARASSMENT plus outrageously disgusting rhetoric. There's no need to use gutter language here even if you're aggravated enough to do it. No one likes everyone except for Will Rogers who said, "I never met a man I didn't like" which I haven't been able to figure in my entire adult life. Keep in mind that your words here are being read throughout the entire world; in fact just the other day I logged on to a group in Australia and wham-instant communications. It's amazing, no? Yes?
Please use DISGRESSION to keep yourselves OUT OF TROUBLE because Internet harassment and libel cases are growing by leaps and bounds like a kangaroo. I guess I have Australia on my mind. I consider this board PRECIOUS even though some of my posts dig and I get dug in return. I take nothing for granted and neither should you because if you do, you are going to get in trouble. I want all of you to head off trouble because I predict that the libel and harassment here will stop as a result of someone winning a lot of money in court. I've been on the Internet for exactly one year and here for about 9 months I guess. It's a BOY, mazel tov! I don't like what's happening;things are getting uglier and much more upsetting and it must be curtailed. Please guys; listen to me-even my enemies- and with my Groucho Marx type of humor, I made them. Once again I predict that one or more persons here will be sued for a bundle and that bit of litigation will change the entire atmosphere. Criticism can be doled out minus the ingredients that lead to a courtroom.
73,
Doc
P.S. If you want to see the best program on TV, watch "Judging Amy", Mondays on CBS. I'm talking stellar stuff guys. It stars Amy Brenneman, Tyne Daly, Dan Futterman and an AfroAmerican gentleman whose name slips my mind but someone who is an actor's actor. This show is as good or better than "The Practice" on ABC and much better than "Family Law" on CBS.

Isacc, Good point. Here we are not talking Terms of Service since that contract is between Obligor and JBO.
As third parties, we have no privity and therefore no causes of action thereon.

However, we surely can have expectations. So, if someone wanted to do a legitimate petition drive, for whatever reason, he should cite, in the minimum, specific examples and give specific reasons justifying his proposal.

First season. This episode also contained TV's first interacial
kiss(Kirk-Uhura).

Sure it has something to do with HF. He is warning older guys that
young lads in their "velvet prime" will come and drink all the best
from their "finest kegs" and leave them with "bitter dregs"(HF).

Your correct Roger, however we must remember that the average
ham is so far disconnected from normal mainstream society, that
something as inane as linking this diddy from S.T. to HF is humorous
to him. Case in point, now that it's getting warm outside start looking
around you at some of the people at the next hamfest you attend.
You'll never see such an oddball bunch at any other place, even train
and railroad shows. I'll never forget one guy I saw last year at Dayton.
Guy was wearin striped short pants, argyle socks and penny loafer
shoes. This was topped off with a golf shirt that looked as if it lhad last
saw the inside of a washing machine in 1992. Did I mention his Pith-hat
with the rubber duckie antenna *glued* on the side? What a bunch of
freaks, geeks and commensurate goofballs!

So you've been a ham for about six years, have climbed the ladder all
the way to tech plus and you're an expert on HF. You've already
demonstrated in an earlier post that you wouldn't know a good HF rig if
you stumbled over it on your way to the can (IC-706). Do they use
headphones on your planet? I think you may have some static between
yours.

Amateur Radio Spectrum Protection Bill Introduced in the Senate

ARRL - The Amateur Radio Spectrum Protection Act bill now has supporting legislation in the US Senate. Idaho Sen Michael Crapo has introduced a bill that mirrors the house bill, HR 783. The Senate measure has been designated S 2183.

"In introducing this bill, we want to do something for Amateur Radio in return for all the good it has done the people of Idaho and elsewhere in the US by providing a reliable means of backup communication in times of emergency," said Crapo, who pledged to work hard to push this bill in the Senate.

Like the House version, the Senate bill, if enacted, would require the FCC to provide equivalent replacement spectrum should it ever be necessary to reallocate Amateur Radio frequencies for some other purpose. The new Senate legislation was introduced with bipartisan co-sponsorship.

So far, the House version of the spectrum bill has drawn bipartisan support, with 140 cosponsors to date, and has met with no opposition. However, Congress, and the all-important House and Senate Commerce committees, have been preoccupied with non-telecommunications matters and the Amateur Spectrum Protection Act has not yet moved out of committee. The new Senate bill provides additional motivation for the Congress to consider the legislation.

From the ARRL Letter, March 10, 2000

Anaheim, California Ham Radio Outlet Store Re-opens After Fire

W8MMQ - The Anaheim, California Ham Radio Outlet store re-opened on March 1, after being destroyed by a fire on January 23. The store and its inventory were considered a complete loss. Officials were calling the fire "suspicious."

The new store is near the old one, which is scheduled to be rebuilt. The mailing address and telephone numbers for the old store will remain the same.

For more information on the Ham Radio Outlet chain of stores, visit their web site at http://www.hamradio.com/.

Club to Offer First April 15 Test Sessions

W8MMQ - The Utica Shelby Emergency Communications Association (USECA), of Mt. Clemens, Michigan, is planning to be one of the first clubs to offer amateur exams on April 15, when new changes come to the amateur radio service.

The club will begin administering the exams at midnight, local time.

Visit http://members.home.net/dougk/useca.htm for more information on the club, and their upcoming test sessions.

The Weekly DX Report

9M6BAA will be active from the 17th to the 27th of March from Sabah. The operators will be G4MJS, G6YIN, G4SHF and G4XUM, using all bands from 160 to 6 metres. This counts as OC-088 towards the RSGB Islands on the Air awards programme, and is a triple-point island for IOTA 2000 in March.

The new communications manager of the Akademik Vernadsky Base, is currently on his way to the Antarctic aboard the vessel Gorizont. During his voyage he is operating as EM1KY/MM, usually around 14.133MHz, at 2130 UTC every day.

More on the Wasini Island expedition. From 1600 UTC today, the 12th of March, until tomorrow at 0600 UTC, the team members will be operating 160m CW. They will transmit on 1,830kHz and listen for Europe on 1,835kHz or for Japan on 1,910kHz until 2100 UTC. They will indicate clearly where they will be listening. In the event of a lack of activity, they will QSY to another band.

A reminder that the special prefixes C34, C35 and C36 are being used from Andorra until the end of March, to celebrate the 20th anniversary of the Radio Union of Andorra. Look out also for the special club callsigns C37URA and C37RC.

The Thailand DX Group recently carried out a survey of Mouse Island in the Malay Peninsula South East Group. An operation looks feasible from the island, and a tentative date has been set for a first-time activation from the 7th to the 15th of April. More information should be forthcoming.

Part-time activation of the Danjo Archipelago from the 17th to the 28th of March will occur, thanks to JA6GXK. Look for him around 14.260 and 21.260MHz. A contact will count as AS-056 for IOTA. QSL direct or via the bureau.

PW5W and PR5L will be active from Arvoredo Island from the 10th to the 13th of March. This counts as SA-027 for IOTA. QSL via PP5LL.

From RSGB News and 425 DX News

Upcoming Contests and Events

Visit the ARRL Contest Calendar at http://www.arrl.org/contests/ for more contest information.

The QCWA QSO Party, sponsored by Quarter Century Wireless Association, will run from 1900-Z March 11 until 1900-Z March 12. Operate CW, phone, or mixed-mode. Operate 160, 80, 40, 20, 15, 10 meters CW and phone; 6 meters; 2 meters; 1.35 meters; 70 cm & up. Work stations in your own QCWA chapter only once.

The CQ World Wide WPX Contest, phone portion, sponsored by CQ Magazine, is coming up March 25 and 26. Visit http://ourworld.compuserve.com/homepages/n8bjq/ for more information on the contest.

If you know of an upcoming amateur radio contest or event, send it to email@w8mmq.net, and we will include it in this section. Be sure to send it at least a week in advance. Thanks!

And ... In Closing

> relevance that shouldn't be totally ruled out. And the fact that we
> COULD hook into the Internet, could bring amateur emergency
> communications into the 21st century - as YOU very well know.

(cut)

I cannot believe I'm reading this. Virtually every time there is a major
hurricane in
North Carolina (once/twice per year), every other mode of communcations is
down.
During Fran, we even had Gov. Hunt checking the damage from the EOC in
Raleigh,
and, the National Guard and police used the 2 meter band (on repeaters
linked from
Raleigh to the coast in Wilmington) as well as 3107 and 3121 on 75 meters.
In addition, the National weather service gets real time reports by
communicating
with hams on 2m repeaters using the Skywarn system, which even the TV
forecasters
listen to, and people with scanners listen to, to find out what is really
happening outside.
This is the best WX information available. Most active local hams
participate. Where do you guys get this stuff about irrelevance? Ham radio
turns out
to be about the only RELIABLE form of communications available here during
disasters,
long after cellular phones and the internet are down. From experience, I am
absolutely
convinced, as are our non-ham community leaders and the Red Cross, that ham

radio
is an essential component of modern emergency and disaster communications in
North
Carolina. We have emergency power (generators and deep discharge batteries)
and can get
very creative to keep communications going when needed. I must characterize
your
statements above as being very naive with respect to actual real world
emergency situations.

<snip>

97.1 is viewed by many hams the same way many motorists view the 55 MPH speed limit. In addition, you're more likely to get a speeding ticket than an NAL for violating 97.1

I am dealing a lot with newsgroups, but what I see here is really
unbelievable.
I was really interested in starting the exciting radio amateur hobby, but
now
it is the time to think this over. If this represents a thing named
'rec.radio.amateur.misc'
I am deeply disappointed.

Source record: 117327

We all have heard about the recent events of AF2Y, the Clifton, N.J. amateur who has come under scrutiny from the FCC for his behavior on amateur. The problem is the the amateur in Clifton has a long running history of bumping heads with the FCC dating back to Nov. 4, 1992, when the individual named Charles Schwartzbard was cited for making transmissions on top of existing communicatons on the same frequency as his current warning.

I have given this subject much thought and I have concluded that the behavior of the individual being asked to explain his actions is very similar to the case of KC5WHN, a Texas ham who repeatedley bumped heads with the FCC. In both cases there is a pattern of continued violation and the fact that the individual in Clifton is now being asked to explain his actions is an indication that there is more to come out of this case. The individual in Texas was just this week slapped with a 17 thousand dollar fine and could face other charges in the investigation.

The case of the Clifton ham has many common elements to the Texas case, both are repeat offenders and both had been warned by the FCC to comply or else. The situation in Clifton needs to be handled in the same manner as the KC5WHN case, both violation were repeated and willful and did result in harm to communication being conducted at the time. The FCC should consider the same approach in the AF2Y case, and a fine should be levied that would deter such further actions. I would strongly suggest the individual in Clifton seek a good communications attorney and be ready to pay at least a twenty thousand dollar fine. This would deter the individual from a pattern of continued violations. HAMMER007

Ham radio irrelevant (spelling corrected) to modern emergnecy and disaster
communications? Tell that to the sheriff's office in Carter County,
Tennessee. The emergency services of this rural county in NE TN were
overwhelmed by the impact of flooding in January 1998 in which 11 people
died and over 400 homes were swept away.

Had it not been for amateur radio operators who essentailly ran the county's
emergency communications for TWO WEEKS, there would have been no emergency
communications and the loss of life would have been greater.

And before you tell me about how everyone now has cell phones, let me invite
you to southern West Virgina where I defy you to get a cell phone signal in
the areas that are most subject to natural and man-made disasters. Then I
will remind you of the experience after the crash of TWA 800 where the local
cell networks were overloaded into near uselessness by emergency traffic.

> a service. If you want a hobby take up CB......
>

You are just trying to justify your argument. Service is just a term and it was used because it fell in with all the other services they already had. Service can mean duty, it can mean a benefit, it can mean an organization. The Armed forces are called "the service". Give me a break. Here we will settle it, how much service do YOU provide? I would imagine, like 99.9% of the HAM radio community, you play. You ragchew endlessly about nothing, just like most hams do here, at the expense of real relationships and success in other areas of life. I see no service being provided, just a hobby where people can play with their expensive equipment, try and one-up each other with a bigger, badder antenna or amplifier, and who use Ham radio as their social outlet.

I'm not saying we don't provide a service, like we do in weather emergencies or disasters, which are few and far between, but then so does my neighborhood watch. I am playing devil's advocate, because I value HAM radio, I just think that trying to really justify we are a service is like saying that "I did not have sexual relations with that women" was the absolute truth. You can read things the way you want.

Dear Possibly Informed Person:

I installed a Cubex 4 el, 5 band quad (nice). My problem is that windy days break it free from the jaws of the (big Yesau) rotator. It snaps the bolt like a pencil. I'm afraid to try more bolts, welds, etc. because I think the rotator itself might break. I'm beginning to think that antenna is just too big.

Has anyone else solved this problem?

73 (International Morse Code abbreviation for "Best Regards")

>it be affected?

There will be some effect on pattern at that spacing. But the more
serious problem will be the fundamental overload the TV sets will
suffer with this close a coupling of the amateur transmitting antenna
to the TV receiving antennas. You're going to have a *lot* of overload
induced TVI. I'd suggest a minimum vertical separation of 10-12
feet would be needed to reduce this interference to a tolerable level.

> Mr. Sherin:
>
> Since when does "freedom of speech" apply to a privately owned company??
> That's how Major League Baseball was able to get away with John Rocker's
> "re-programming".

No. Major League Baseball got away with Rocker's reprogramming,
because Rocker submitted to it. Public pressure against individually
held opinion contrary to majority whim is as old as humanity. Only
in the last 225 years has the notion that this kind of speech is
protected existed in civilization. Public pressure against Baseball
may have moved Baseball to take Rocker to task for his words, but
they cannot force him to retract them. Nor can they force him into
treatment to get his 'mind right'. They can take away his position,
according to the contract, and ONLY according to contract, but they
cannot force him to submit.

He has to do that voluntarily.

Had he not backed down, he may have not played Baseball for a
while, or ever again, but he would not have been forced to retract,
or submit.

His statement was tactless, and it was a boneheaded move.
However, it was his right to speak his mind. It was also reasonable
to expect the consequences of his action to be unpleasant, but to
submit to 'counselling' has far reaching consequences. Not only for
himself and for baseball, but for all of us.

There have been similar actions taken at the major campuses of
higher learning, where, ironically, the notion of free speech, and
freedom of opinion have been championed for centuries. However,
lately, administrations have been moved by special interests and
activism to take actions against those whose speech has been deemed,
'unsuitable', 'inappropriate', or 'insensitive'. Examples of such
speech have been as simple as an off color joke in the Quadrangle,
or whistling at a pretty girl in the Union. Students so accused have
been pushed into sensitivity training, and community service
activities or threatened to have their academic activities cancelled
and expelled from school.

Few have the resources to stand up to this kind of harrassment,
however,

IN ALL CASES WHERE THE STUDENT HAS RESISTED SANCTIONS THROUGH
LEGAL MEANS, THE COURTS HAVE UPHELD THE RIGHT OF THE STUDENT

PURSUANT TO AMENDMENT ONE OF THE CONSTITUTION TO SPEAK HIS MIND WITHOUT REPRISAL ON THE PART OF THE CAMPUS, THE STUDENT BODY, OR INDIVIDUAL STUDENTS OR TEACHERS.

Too bad Rocker didn't know this.

Too bad that he set the precedent he has set.

He submitted. They got away with it because he agreed to it. They got away with it because he lacked the backbone to stand behind his big mouth.

977. FREE SPEECH vs. RIGHT TO BROADCAST

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-12 00:00:00 UTC
From: mr3950@aol.com
Message-ID: <20000311234357.02525.00001940@ng-cf1.aol.com>
Source record: 117142

FREE SPEECH vs. RIGHT TO BROADCAST

A number of inquiries received at the Commission are from persons or groups who believe that there is a First Amendment, constitutionally protected right to broadcast. However, the Supreme Court of the United States has repeatedly ruled on this subject and concluded that NO RIGHT to broadcast exists.

In National Broadcasting Co. v. United States, 319 U.S. 190 (1943), the Supreme Court stated, in pertinent part, as follows (footnotes omitted):

We come, finally, to an appeal to the First Amendment. The Regulations, even if valid in all other respects, must fall because they abridge, say the appellants, their right of free speech. If that be so, it would follow that every person whose application for a license to operate a station is denied by the Commission is thereby denied his constitutional right of free speech. Freedom of utterance is abridged to many who wish to use the limited facilities of radio. Unlike other modes of expression, radio inherently is not available to all. That is its unique characteristic, and that is why, unlike other modes of expression, it is subject to government regulation. Because it cannot be used by all, some who wish to use it must be denied. . . . The right of free speech does not include, however, the right to use the facilities of radio without license. The licensing system established by Congress in the Communications Act was a proper exercise of its power over commerce. The standard it provided for licensing of stations was the 'public interest, convenience, and necessity.' Denial of a station license on that ground, if valid under the Act, is not a denial of free speech.

In addition, in Red Lion Broadcasting Co., Inc. v. United States, 395 U.S. 367, 89 S.CT. 1794 (1969), the Supreme Court of the United States stated, in pertinent part, as follows (footnotes omitted):
When two people converse face to face, both should not speak at once if either is to be clearly understood. But the range of the human voice is so limited that there could be meaningful communications if half the people in the United States were talking and the other half listening. Just as clearly, half the people might publish and the other half read. But the reach of radio signals is incomparably greater than the range of the human voice and the problem of interference is a massive reality. The lack of know-how and equipment may keep many from the air, but only a tiny fraction of those with resources and intelligence can hope to communicate by radio at the same time if intelligible communication is to be had, even if the entire radio spectrum is used in the present state of commercially acceptable technology.
It was this fact, and the chaos which resulted from permitting anyone to use any frequency at whatever power level he wished, which made necessary the enactment of the Radio Act of 1927 and the Communications Act of 1934. National Broadcasting Co. v. United States, 319 U.S. 190, 210 - 214 (1943). It was this

reality which at the very least necessitated first the division of the radio spectrum into portions reserved respectively for public broadcasting and for other important radio uses such as amateur operation, aircraft, police, defense, and navigation; and then the subdivision of each portion, and assignment of specific frequencies to individual users or groups of users. Beyond this, however, because the frequencies reserved for public broadcasting were limited in number, it was essential for the Government to tell some applicants that they could not broadcast at all because there was room for only a few.

Where there are substantially more individuals who want to broadcast than there are frequencies to allocate, it is idle to posit an unabridgeable First Amendment right to broadcast comparable to the right of every individual to speak, write, or publish. If 100 persons want to broadcast but there are only 10 frequencies to allocate, all of them may have the same 'right' to be a licensee; but if there is to be any effective communication by radio, only a few can be licensed and the rest must be barred from the airwaves. It would be strange if the First Amendment, aimed at protecting and furthering communications, prevented the Government from making radio communication possible by requiring licensees to broadcast and by limiting the number of licensees so as not to overcrowd the spectrum.

This has been the consistent view of the Court. Congress unquestionably has the power to grant and deny licenses and to eliminate existing stations. [citation omitted here]. No one has a first amendment right to a license or to monopolize a radio frequency; to deny a station license because 'the public interest' requires it 'is not a denial of free speech.' National Broadcasting Co. v. United States, 319 U.S. 190, 227 (1943).

Your getting another one soon! Heh heh!

November 22, 1999

CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Mr. Charles Schwartzbard

P. O. Box 1347

Clifton, NJ 07015

RE: Amateur Radio License AF2Y

Dear Mr. Schwartzbard:

Commission monitoring information indicates that you have apparently been operating your station on the 20-Meter Amateur Band emitting an unusually wide signal or one that is over-power, or both. Specifically, information indicates that this occurred on November 17 and 18, 1999 in the frequency range of 14.315 to 14.318 MHz. Information further indicates that you ignored requests from other licensees operating on adjacent frequencies to correct your transmitter emissions in accordance with good Amateur practice.

Section 97.303 of the Commission's rules, 47 C.F.R. 97.307, prohibits Amateur stations from occupying more bandwidth than necessary for the information rate and emission type being transmitted, in accordance with "good Amateur practice.". Section 97.313 of the Commission's rules, 47 C.F.R. 97.313, requires Amateur stations to use "the minimum power necessary to carry out the desired communications".

Section 308(b) of the Communications Act of 1934, as amended, gives the Commission the authority to require information from a radio licensee during the term of the license that will enable it to determine whether that licensee is qualified to retain a license. Pursuant to Section 308(b), you are requested to provide the following information within 20 days of the above date. Answer for BOTH mobile and base operation.

1. Do you utilize a linear amplifier for your transmissions on the 20-meter Amateur band ?

(a). If so, did you use a linear amplifier for the transmissions on the dates listed above ?

(b). If the answer to (a) is yes, give the name of the manufacturer and the model number, or provide the technical specifications if the amplifier is homemade and state the PEP at which it is operated. Provide this information for each linear amplifier you have.

(c). If you operate a manufactured amplifier that has been modified, give the name of the manufacturer and the model number, furnish the technical specifications of the amplifier as modified and state the PEP at which it is operated.

2. Do you utilize a transmitter Automatic Level Control for your transmissions on the 20-meter Amateur band ? If so, describe how you employ that transmitter function.

3. Describe how you employ the microphone gain settings of your transmitter when you operate on the 20-meter Amateur band.

4. Please certify that you have read and understand Sections 97.307 and 97.313 of the Commission's rules, a copy of which is enclosed.

Please sign and date your response. You may provide any additional information you believe is relevant to this matter. Your failure to timely respond fully and completely will result in administrative sanctions. You are advised that Congress has provided penalties for a misrepresentation or willful omission of material facts in response to Commission inquiries. See 18 U.S.C. Section 1001 and 47 C.F.R. Section 1.17.

We further caution you that airing personal conflicts with other licensees on the Amateur bands, or slander or deliberate interference of other licensees will result in the loss of your Amateur license.

Sincerely,

W. Riley Hollingsworth

Special Counsel for Amateur Radio

Enforcement Bureau

Enclosure

982. More about AF2Y's ONV

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-12 00:00:00 UTC
From: Brother Lloyd Davies <n0SPAMvfp@bell_no_SPAM_south.net>
Message-ID: <HuHy4.16858$aw3.266747@news2.mia>
Source record: 117147

"My ONV from Kingsville Texas was due to my excessive testing for TVI and RFI. They claimed it was about 40 minutes but I can't be sure of it. I must therefore accept their statement as fact. I was running a tape and identifying every ten minutes. My TV and phone in question were upstairs and during the testing,which would have accomplished NOTHING on a dummy load, I was busy putting toroids on the TV's AC cord as well as a K-Com filter on the phone. And that was the whole ball of wax. I replied to Tom Shirley at Kingsville and since I heard nothing more about the incident. common sense told me my resply was acceptable."

1. Why was a busy frequency on 20 meters (14.313) chosen as site for this alleged testing?

2. Why was a frequency chosen that was already occupied by members of The Better Amateur Radio Federation?

3. What was the purpose of playing a pre-recorded tape of Adolf Hitler?

4. Why wasn't the frequency checked for activity and possible interference when the station identification was given?

5. Why were the pleas of stations trying to use the frequency ignored?

6. Why wasn't the testing done at night after the band was dead?

7. Why would an Extra Class operator ignore all these factors and choose to cause deliberate and intentional QRM on a busy 20 meter frequency?

8. What documentation is available to prove that the response to the Notice of Violation was acceptable?

9. Was the Notice of Violation ever recinded or withdrawn?

10. Is not true that the Notice of Violation is now a permanent FCC record, verifying that AF2Y engages in intentional and malicious interference?

983. AF2Y's ONV Continued

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-12 00:00:00 UTC
From: Brother Lloyd Davies <n0SPAMvfp@bell_no_SPAM_south.net>
Message-ID: <JwHy4.16863$aw3.270344@news2.mia>
Source record: 117148

>
> 1. Why was a busy frequency on 20 meters (14.313) chosen as site for this
> alleged testing?
> ***IT WASN'T BUSY. IT WAS AS EMPTY AS YOUR HEAD AND FURTHERMORE I LIVE ON
> THAT FREQUENCY WHICH IS A DAMN SITE BETTER THAN LIVING IN ATHENS
ALABAMA*******

Dr. Hate's Lie de-bunked:

If the frequency had been clear, and the station had been properly identified as testing, then the NOV would never have been issued. The fact that the NOV was issued proves that the frequency was occupied and that the true purpose of the tape playing was to interfere with on-going communications.

> 2. Why was a frequency chosen that was already occupied by members of
The
> Better Amateur Radio Federation?
> ****THE BARF STANDS FOR "BIGOTED AMATEUR RADIO FACISTS" not the Better
Amateur
> Radio Federation. I GUARANTEE NO ONE WAS ON FROM THAT GROUP BECAUSE THE
> FREQUENCY SMELLED CLEAN.*******

Dr. Hate's Lie de-bunked:

The frequency was occupied by a number of B.A.R.F. members. That is the real reason why Dr. Hate continuously played the pre-recorded tape for a period of approximately an hour. Dr. Hate's feeble attempt to turn his very serious violation into a joke is further proof that he is afraid to admit the truth. He was caught in the act of causing intentional and malicious intereference. The FCC cited him for his actions.

> 3. What was the purpose of playing a pre-recorded tape of Adolf
> Hitler?*****IT
> WAS A TAPE OF HERBERT SCHOENBOHM DOING A ROUTINE ABOUT HOLOCAUST
> TRIVIALIZATION
> WHICH COME TO THINK OF IT WAS THE SAME AS ADOLF HITLER*********

Dr. Hate's Lie de-bunked:

Of course it was a tape of KV4FZ. What other tape would AF2Y choose to deliberately QRM the B.A.R.F.? A legitimate tester would never have used a tape of his supposed "enemy" to test their rig for BCI/TVI/Telephone interference. The FCC must have agreed since they considered these transmissions to be deliberate and malicious intereference.

> 4. Why wasn't the frequency checked for activity and possible
interference
> when the station identification was given?****THE JAR WAS EMPTY! ZILCH.
> NADA.WHAT MAKES YOU BELIEVE THE FREQUENCY WASN'T CHECKED? I ALWAYS CHECK
> FREQUENCIES. SOMETIMES I GET UP AT THREE 'O CLOCK IN THE MORNING TO CHECK
> FREQUENCIES. THE OTHER NIGHT MY WIFE AND I WENT OUT TO DINE IN A POSH NEW
YORK
> RESTUARANT ON 38th STREET AND I LEFT AT NINE O'CLOCK TO CHECK A FREQUENCY
AND
> THEN DROVE BACK TO FINISH MY MEAL.*******
>

Dr. Hate's Lie de-bunked:

This is another very sad attempt to trivialize a serious violation of the rules. Dr. Hate isn't capable of humor. He is simply trying to avoid admitting that the frequency was in use and that his transmissions caused intentional, malicious interference.

> 5. Why were the pleas of stations trying to use the frequency
> ignored?****YOUR
> SPELLING IS WRONG AND SO IS YOUR INTERPRETATION. THEY WERE YELLING,"PLEASE
USE
> THIS FREQUENCY>*********
>

Dr. Hate's Lie de-bunked:

Dr. Hate isn't slick enough to slide out of this indictment of his operating practices. He was caught in the act of causing deliberate QRM. He was cited. The FCC never modified, withdrew or recinded their citation.

> 6. Why wasn't the testing done at night after the band was dead?****WHO
SAID
> 20 METERS WAS "DEAD" AT NIGHT?BESIDES,I AM MORE ENERGETIC IN THE MORNINGS
AND
> RUNNING UP AND DOWN A LOT OF STAIRS FROM THE FAMILY ROOM TO THE BEDROOM
TOOK A
> LOT OF ENERGY. BUT THEN AGAIN IF I LIVED IN A LOFT AS YOU DO WITH SAWDUST
ON
> THE FLOOR TO ABSORB THE STINK, I COULD HAVE TESTED AT NIGHT>*******
>

Dr. Hate's Lie de-bunked:

It does not matter when it is convenient for Dr. Hate to do his alleged "testing". One would think that an Extra Class amateur would know when the 20 meter is usually "dead" or very quiet. It was up to AF2Y to schedule his "testing" at times when he would be least likely to interfere, choosing frequencies that were unoccupied. Dr. Hate's insult routine is just a smoke screen he uses to try and cover up the basic facts. He was caught QRMing a busy frequency with a pre-recorded tape.

> 7. Why would an Extra Class operator ignore all these factors and choose
to
> cause deliberate and intentional QRM on a busy 20 meter frequency?***TO
FIND
> THAT OUT I SUGGEST YOU ASK AN EXTRA CLASS OPERATOR WHY HE WOULD IGNORE
FACTORS
> AND CAUSE DELIBERATE AND INTENTIONAL INTERFERENCE ON 20 Meters****
>

Dr. Hate's Lie de-bunked:

According to the FCC, Dr. Hate is just such an Extra Class operator. He is an operator who ignored the rights of others and deliberately interfered with legitimate QSO's on 20 meters. The FCC cited AF2Y because it was obvious to them that his alleged "testing" was a lie he dreamed up as an excuse for his psychotic need to interfere with amateurs that he hates.

> 8. What documentation is available to prove that the response to the
Notice
> of Violation was acceptable?
> ****IF IT HADN'T BEEN, THE FCC WOULD HAVE COME DOWN ON ME AS THEY DID ON
> KV4FZ.
> I WOULD HAVE HAD TO PAY A FINE AND THEN TRIED TO LIE MY WAY OUT OF IT
BEFORE
> JUDGE LUTON.*******
>

Dr. Hate's Lie de-bunked:

The FCC does not always issue NAL's in every case where a NOV is issued. The fact that the FCC showed leniency does not change any of the facts. The NOV was never modified or withdrawn. It is a permanent record of AF2Y's illegal activities on the amateur bands. A copy is available to anyone through a Freedom of Information Act request.

> 9. Was the Notice of Violation ever recinded or withdrawn?
> ****NO,IN FACT IT'S NOW BEING MADE INTO A MAJOR MOTION PICTURE STARRING
TOM
> HANKS*****

Miracle of Miracles. Dr. Hate actually admits that the NOV stands to this day. It is a black mark against him and a black mark against all Jewish radio amateurs. Shame on Dr. Hate for bringing disgrace upon his people.

> 10. Is not true that the Notice of Violation is now a permane
> Just rememeber, I will post these "In your face" until you answer
> truthfully!
> ****YOU GOT ME. IS NOT TRUE A PERMANE AND IN YOUR FACE TOO******Doc,AF2Y
>

Dr. Hate's NOV is a permanent part of the FCC record and could very well be used as evidence against him in any future proceedings. All of his insults, sick jokes and other "avoidance techniques" will not change the facts cocerning AF2Y's very serious violation of the amateur radio regulations.

Case closed.

Hello all the people that I admire so much, I'm still working to get my HAM, but I have plenty of friends with ham, and that is making me jellous. =) (I'm still studying) anyway besides the point.

I was wondering has anyone come up with a mod to the PRO-2066 that you get at RS? Wow what an awsome scanner. Too bad it can't do some things. Anyway, If you have come up with a mod, or need the scematic (I think I can get one) for it to make one, that would be AWESOME! I mean how old is the PRO-2066? Like two years old, and there arn't any mods I can find on the net? Outragous! Please help me out! I'm looking foward to becoming a amateur operator soon!!! (Before the 15th of next month) I'm working on Code right now. (I want to take most of my tests at once) Talk to you all later!

No modification of type accepted radio equipment has occurred or was suggested. The problem is that for it to be used on CB it needs that acceptance, not the other way around.

mumbled incoherently in message news:FoHy4.16846$aw3.270485@news2.mia...
> The Never-Ending Roger Wiseman Denial Cycle

<childish spam snipped>

Prove it, fatassed virgin Lloyd.
Here's fatso's bio courtesy of qrz.com:

>Born 1973, St Joesph, MO Confederate States of America (CSA)
Born? Lloyd you're the afterbirth.
What a dumbass. The CSA ceased to exist in 1865, you illiterate.

>Been Licensed since 1993

7 years...and he still can't pass the 5 wpm code test! ROFLMFAO!

>Have a college education in Computer Operations

Translation: A "data entry" certificate.

>Other interests include
>Model Railroading,
>Rock Island Railroad history

You forgot spamming the newsgroups.

>Bible related information
>Been a born again Christain since 1984

Typical Christian hypocrite....just like Him.
What's a "christain?" is that a stain from chris, your male lover?

988. The Liberty Net: Amateur Radio or Broadcasting?

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-12 00:00:00 UTC
From: toomanyradios@aol.com
Message-ID: <20000312083548.01484.00001430@nso-fi.aol.com>
Source record: 117153

Let me first say that I have no problem with the content of the Liberty Net. I agree with many of the viewpoints which are expressed there. However, after listening to much of last night's net, I have to question whether this is within the charter and purpose of amateur radio.

On several occasions, I heard e-mail addresses being given out. The implicit purpose was to solicit participation by shortwave listeners (non-hams.) On one occasion, I heard a Liberty Net participant speaking about a recent e-mail he had received from a shortwave listener. He them proceeded to read the e-mail over the air.

Broadcasting on amateur radio is strictly prohibited by Part 97. What I heard last night comes very close to, if not meeting, the definition of "broadcasting", in my opinion.

You ever hear of the games Unreal Tournament, or DOOM, or HALF-LIFE? Well a good percentage of the people in the ham radio newsgroups carry on the verbal versions of these games...it's called NO-LIFE.

Jim Martin, WK1V said that.

Listen to rain report at www.rainreport.com

You will hear Mr Riley Hollingsworth tell about the FCC sending ANOTHER
letter to Dr Hate, AF2Y, Chuckie Swartzbard in Clifton N. J. telling him not
to interfere with qsos on the twenty meter band, Next action cheap Charlie is a fine, plus revocation and forfeiting that obsolete equipment. How does that grab you qrmer!! Keep up the good work Mr Hollingsworth, lets get these diliberate interferers off the ham bands.

Oh, by the way Charlies moronic buddy ,Freddy Roll, NU5M got a letter advising him he was caught interfering by the FCC, and has received a letter from
the powers that be. You better knock it off motor mouth Fred or you will have to work at another job to pay off that fine you will surely get if you keep it up.

Plaintruth and it hurts the qrmers

This from this week's Newsline script at http://www.arnewsline.com:

Enforcement: FCC Threatens New Jersey Ham With License Revocation

And the FCC has issued an second warning notice and a license
revocation threat to a New Jersey ham who it alleges is interfering
with the legitimate communications of other radio amateurs.

The target of the March 1st letter is Charles Schwartzbard, AF2Y, of
Clifton. In it, FCC Special Counsel for Amateur Radio Enforcement
Riley Hollingsworth says that the Commission has monitoring
information indicating that on January 13th that AF2Y engaged in
deliberate interference. This to the ongoing communications of W4FQF
and KB4MXL on the 20-Meter Amateur band.

Hollingsworth notes that this is Schwartzbard's second warning
regarding deliberate interference. He tells AF2Y that if further
legitimate complaints or FCC monitoring reveal additional instances
of this behavior, that the Commission will designate Schwartzbard's
Amateur Station license AF2Y for a revocation hearing. Also that the
bureau designate his Extra Class operator license for suspension for
the remainder of its license term.

But that's not all. Hollingsworth has also cautioned Schwartzbard that airing personal conflicts with other licensees on the Amateur bands will also be considered as justification for the FCC to pull Schwartzbard's Amateur service license. (FCC)

Curious how there was'n't any particulars.
Wonder why not????
All it stated was a "warning" letter. Now I'm wondering if some of these warning letters are issued merely on the basis of a "complaint" whether legit or not. I'm not defending Doc, I would just like to see a little more "evidence" presented with a "warning" letter.

1003. Re: BIG BROTHER?

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-12 00:00:00 UTC
From: Peter Maus <PeterMaus@worldnet.att.net>
Message-ID: <38CBD558.AA17025E@worldnet.att.net>
Source record: 117168

This subject came to light a few years ago, when Roseanne took her ex to court for violating the terms of their divorce decree by discussing with a third party the settlement. The conversations in question were short notes in e-mail between the ex and his girlfriend. The girlfriend said something to another party and it became a headline, resulting in court action.

During the court proceedings Roseanne's attorneys subpoenaed and GOT all of the e-mails in question from the on line service used by the ex; either AOL or Prodigy.

This news created a firestorm of questions for all ISP's and on line services, and AOL at the time released a statement that NO e-mails were retained, nor copied beyond their transmission, and that such requests would be denied as the requested material would simply not exist.
However, the number of court actions involving AOL e-mail in recent years would suggest otherwise.

From my own experience, last year, I was sat down in a room and presented with e-mails I had written as long ago as 10 years. They variously referred to friends of mine; from Prodigy, AOL, and various ISP's. I was stunned to think that this stuff still existed. Especially considering the bland nature of the content. But when you consider the number of servers a single piece of e-mail must run through especially when crossing ISP boundaries, there is bound to be someone not only intercepting, but retaining it.

Business servers have been keeping e-mail records for years as a protection from liability resulting from the actions of employees.

Don't think for a minute that businesses are the only ones.

If the server makes backups, yes....but usually they rotate the backup
media and it gets trashed. Even on your pc, after you selete a file it
frees up the space, but can be immediately restored. This won't happen
if you run scandisk and defrag, though on a ibm compat pc.

1006. About Hammer007

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-12 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8aglvn$to2$1@slb1.atl.mindspring.net>
Source record: 117171

By the way I received over 20 replies to my inquiry regarding the true ID of Hammer007. Youngblood's e mail uses an ISP called Sunet. There are many out there who find KT4TR as reprehensible as I and were willing to help. KT4TR lives in Vero Beach. The address of his ISP is Sunet Direct, 1443 20th Street, Suite A, Vero Beach, FL 32960. That libelous, defamatory and harassing hate message in question was posted via Sunet. How dare this man lie about a letter I got from the FCC Kingsville Texas office in 1992 which had nothing to do with interference? And he knew it. And now he compares me to a gigantic scofflaw from Texas who indeed is a radio criminal getting hit with a 17K fine and wishes the same on me? You know that plane you keep talking about, Bobby Boy? The one you rebuilt? Keep Harrison at home and you take it for a kamikaze run! It seems that Mr. Youngblood is riding a crest of a wave due to the warning letter I received from Riley Hollingsworth and which is posted all over the place. He is taking advantage of my problem which, I've been told could have come into being thanks to tapes he himself and Len Schaier sent to the Commission. It's speculative at best. But let's face it; neither can approach me intellectually therefore it stands to reason that they simply had to find other means to retaliate. He is happy I am humiliated and embarrassed by it and no one's to blame for my angst but me. And for all concerned, I guarantee I do take the matter most seriously and regret ever getting embroiled in that .313 controversy. Furthermore I am sure that Mr.Youngblood would be elated to hear and see any derogatory statements I'd make about Riley but you can wish again Bobby. I find you extremely cunning, dangerous and ruthless and I myself will keep my distance from you and hope that others will follow suit. Then again there stands the possibility that we will meet eye to eye in court. And so for now Bob, you have WON-congratulations for NOW. And here's a message for Lenny Schaier. In April of '98, because I thought you were NOT a snake, you talked me out of continuing the case against Mr. Youngblood. Remember how you pleaded with me? Remember how you said how much pressue Bobby was feeling and all the rest of your malarkey? I bought it by accepting a letter of apology scribbled by Bobby and sent to his lawyer. It was a half baked apology but I accepted it nonetheless. This time around Lenny, BUTT OUT. I am telling you publicly that any intercession on your part will be viewed as meddling and harassment. Don't call-I warn you. It is true that I am forced to bow to Mr. Hollingsworth's warning; I shall and hopefully I can right the situation but to take flack from the likes of you is unacceptable. You I absolutely despise for several reasons and who knows-perhaps you too may have to answer in court for unscrupulous actions? Once again I want to thank the GENTLEMEN who did research for me on KT4TR. I assure you we shall research the situation scrutinizingly.
Doc,AF2Y

Source record: 117172

others dun ben notisin to whot bee goin on

HUDSON, NH:
The FCC has asked a net control station of the Liberty Net on 3950 kHz to justify the net's use of Amateur Radio frequencies. Via Certified Mail May 7 to Extra class licensee Victor A. Misek, W1WCR, FCC Legal Adviser for Enforcement Riley Hollingsworth said monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." Hollingsworth said that such operation "is considered deliberate interference and cannot be tolerated on the Amateur frequencies." Hollingsworth pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," Hollingsworth wrote. He suggested The Liberty Net explore operation on the Internet or seek a low-power FM broadcast grant if that service is authorized. Hollingsworth reminded Misek that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services.'" He also pointed out that Part 97 prohibits broadcasting .

Only if you are a 20 WPM Extra. Of the several HF rigs I've owned since the Novice Enhancements, every one of those which came from an Extra had been modified to run CB or other unlawful freqs. In one case, an estate sale, I had to buy replacement crystals to modify the radio BACK to ham (the 10m band had been changed to 11m), and his widow said that that was the only radio he ever used.

It looks like the habitual QRMER , AF2Y, resident amateur radio loud mouth of Clifton N. J. has been caught qrming again. A letter was sent!! How many more warning letters will this sick man get before the FCC pulls the final plug on his unbalanced act.

Good work Mr Hollingsworth, for keeping a your ear tuned on 14313 for the stupid antics of AF2Y. He has a sick compulsion to intefere and can not stop qrming.

The "good" people in this newsgroup blame the "bad" people. If you look at the messages posted to this newsgroup, you will see somewhere in the body of the message, an inflammatory remark made about someone. If it's not directed at one person, it's directed to a group. i.e.: HF is better than VHF, 80 meter is better than 10. As far as I'm concerned, my license used to represent an honorable "hobby" (read "service" if that's what it means to you).

Amateur radio is NOT like this newsgroup.

1019. Signal From Where?

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-12 00:00:00 UTC
From: "Roger W. Hermanson" <rogerw.hermanson@berlin.de>
Message-ID: <38CADD46.40A887CE@berlin.de>
Source record: 117230

I'm totally ignorant of things relating to your interest of ham radio,
but thought I could find some help here.

Recently I've heard a signal at random times coming out of my computer
speakers, of all things. It doesn't matter if the computer is on or
not. If the active speakers are on the signal can be heard maybe once
every evening when I work at the machine. The signal is a beeping,
medium loud, low in tone, almost alwas identical. A series of seven
beeps in quick succession with short pauses after the first and fourth.

'BEEP. Beep-beep-BEEP. Beep-beep-BEEP.'

I really began to wonder what it was when today I was out in the country

some 60 miles from home. I was using a hand-held cassette recorder and
played back what I'd recorded and there were the self-same beeps! A
second time today was when I had entered the city limits and was maybe
ten miles from home. Again I captured this identical beeping on tape,
in the background of my speaking on the tape.

Does anyone have an idea what this could be?

My location is the Berlin, Germany area.

APPLICATION FOR AMATEUR RADIO LICENSE (FCC FORM 605"dd")

NOTE: FCC Form 605 will not be accepted after April 15, 2000. Please use forms with the "dd" ("dumbed down") suffix after that date.

Your name (or mark):
Your street (if unable to write, attach pictogram or map with red "X"):
Your city:
Your state (choose from drop down menu if testing on-line):

Are you in Florida or California ?

If you answer "yes" to the above, would you consider getting licensed in Canada or Mexico to reduce the FCC's callsign allocation burden for these two states ?

I am applying for (circle) :

No-code, quasi-Marine VHF ticket
General Radiotelephone Permit
Formerly "Extra Class", now "No Class"
Political Asylum at ARRL as a holder of a former UA or RA license
(please attach license or contester testimonials or your "character")

I have (circle all that apply):

Memorized all queries and answers
Paid for ARRL Life Membership in cash
Bought a new Voice only CB from YaKenComSu and found this form inside
Donated to WB6NOA's Publishing House
Bought off my W5YI Examiner
Amassed over 1500 Hours on the SETI screensaver

In case of electrocution from the 1500 watt amp you have will no knowledge of the workings of, give name of next of kin (not related by inbreeding):

Do you participate in any of the following ?

Web server hacking (attach references from N6NHG or FBI)
Bass fishin' Skeet shootin'
Yugo parts Swappin' Gremlin Refurbishin' Gas Passin'
Smokin' (Reefer, Cigarettes, Crack pipe ?) Microphonium Solderin'
Scanner listenin' Wire phreakin' Antron 99 Modifyin'
Monster Truck Rallies Weather Watchin'

Do you live in a :

Cadaverlac School bus Parents' Cellar Apartment VW
Beetle Van Mobile home "Big Rig" Duplex
Dunkin' Donuts (while open ?) Burger King (while open ?)

If you live in an apartment, why do you want a welfare incentive based
ham license ?

Can't afford college or technical school
Think generating TVI is cool harassment tool
Radios don't bitch like girls do
Want to play State Trooper when mobile

Does the value of your tower exceed the value of automobiles registered
in your name ?

Does the value of your CBs and scanner equipment exceed the value of
your present dormicile ?

Are you :
Married
Divorced (Once Twice Thrice)
Gay (please apply for "Satellite only" license)
Lesbian (please apply for "CW-contest-only" license)

NOTE: If you circled Thrice, please attach statement indicating you have
not participated in a SSB contest in the past 10 years)

Does your wife's hair present an electrical fire hazard ?
Does yours ?

Does your wife's hair present a hazard to Al Gore's campaign platform ?

Thank you P.B. :)

It is always reassuring knowing that
one may always have a stimulating and
intellectually challenging discourse
with you any your friends on 14.313!

If your ever around Sanibel, do stop
by. I'll buy you a genuine Brooklyn bagle
with cream cheese and a coffee
over on the "Mainland". I know a great
little place in Ft. Myers that makes
em like they do in good old Crown Heights.

Irb.

You posted to rec.radio.amateur.misc

Have you tried going to rec.radio.amateur.digital.misc?

There is hardly any traffic there - if you ask questions there - you
should get replies, and may even start a trend.

I agree with you about mail-servers. They are horrible.

MEMORANDUM

FROM: HEADQUARTERS, LIBERTY NET

TO: ALL LIBERTY NET MEMBERS

SUBJ.: SPECIAL HIGH INTENSITY TRAINING

In order to assure that we continue to produce the most absurd level of rumor mongering possible, it is our policy to keep all net members well trained through our program of SPECIAL HIGH INTENSITY TRAINING (S.H.I.T.). We will be giving the frequency more S.H.I.T than any other net on the band.

If any member feels he is not receiving his share of S.H.I.T. on the net, please contact the net control. You will be placed on the top of the S.H.I.T. list for special consideration.

All our senior conspiracy theorists are qualified to see that you get all the S.H.I.T. you can handle.

If you consider yourself well enough trained, you may be interested in helping train others. We can add you to our
BASIC UNDERSTANDING LECTURE LIST - SPECIAL HIGH INTENSITY TRAINING (B.U.L.L. S.H.I.T.) program.

Remember, this is a HIGH INTENSITY PROGRAM. You are expected to work, think, sleep and eat S.H.I.T. !!

Reviewed and forwarded: DIRECTOR/INTENSITY PROGRAMMING - SPECIAL HIGH INTENSITY TRAINING.
(D.I.P. S.H.I.T.)

Approved: BOSS IN GENERAL
SPECIAL HIGH INTENSITY TRAINING
(B.I.G. S.H.I.T.) (and net control)

I think you will find on 2M and 440 that when the machine controllers
started talking more then the people, people started turning off the noise.
I think that VHF UHF freqs suffer from noise pollution

I too listened and often do, it's outragious, and to think it's called amateur radio. They often solicit e-mail from listeners, sometimes in a subtle manner, doing so to recruit listeners and involve them in the BROADCAST. Where does the fcc stand on this?

From: hammer007 <hammer007@my-deja.com>
Message-ID: <8ahja4tuh1@nnrp1.deja.com>
Source record: 117098

In the article titled, " STRANGE /INTERESTING CASE OF FILED VIOLATION ON AF2Y". Dated 1992, OST magazine. The text reads, " The FCC said the BARF Net was entitled to use the frequency since they were there first and any transmission made on top of them could be construed as willful and malicious interference".

The recent Rain Report stated theat the FCC had issued a second warning letter to a New Jersey ham who it alleges is interfereing with legitimate communicatons. The letter and statement issued by Riley Hollingsworth, FCC Special Counsel for Amateur Radio Enforcement, stated, "the Commission has monitoring information indicating that on January 13th that AF2Y engaged in deliberate interference." Also Hollingsworth noted," that this was Schwartzbards second warning regarding deliberate interference."

My suggestion would be for the FCC not to tolerate such behavior and pull the license of those individuals who continue to violate the rules and regulations of the FCC.

Seriously, it doesn't take many geezer assholes to make a hobby not
worth pursuing. I stay away from those frequencies with this sort of
reputation for exactly that reason. Unfortunately, just as with
traffic accidents, some people simply can't keep themselves from
rubbernecking. As for me, I keep my eyes on the road ahead and I
steer around the problems as they emerge.

What else can one do?

And It'll be like all your checks..it'll bounce.

After serving in the U.S. Navy(*), Dimmy decided to use the trade
he learned there and apply it in a civilian situation. Dimmy is a
highly valued
employee of Foodland, where his skills guarantee the cleanliness of
shopping aisles
and a well-stocked canned vegetables section. Even his anal-
retentiveness comes
in handy, as he personally sees to it that each and every can has an
exact
```

quarter inch space between the next one.

(*) A story in itself, but his contribution to the armed forces was a small, albeit
highly important one. Due to Dimmy's endless toils, the officers never had a
shortage of toilet paper, clean underwear and canned peaches on juice.
Seaman "Preparation H" O'Brien, I salute you.

Chris, don't despair. I'll let you in a little secret: We ham radio
operators have learned to park the idiots, jerks, and other miscreants
on the Internet news groups. With the exception of a few frequencies
on HF and the occasional 2 Meter VHF fights, most of ham radio is a
very helpful and tight community.

Unfortunately, more people read these news groups than actually listen
to HF or VHF these days. So the first impression you're likely to get
of this hobby is not going to be all that good. Cheer up, things are
really a lot better than what you read here.

Good Luck!

1055. Hello R&O Upgraders: New NCVEC 605 Form available.

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-13 00:00:00 UTC
From: "D. Stussy" <kd6lvw@bde-arc.ampr.org>
Message-ID: <Pine.LNX.4.10.10003130749390.9161-100000@dns.bde-arc.ampr.org>
Source record: 117105

For those who haven't already noticed, the new NCVEC 605 Form is available. I checked the one at the ARRL web site and noticed that it is NOT a "fill-in" PDF (the URL is: http://www.arrl.org/arrlvec/ncvec605-2.pdf).

If having a fill-in form is of interest to you (so that one may fill it out and print it neatly from a computer before the upgrade [test] session), I made one and put it at http://k6bde.home.att.net/605.pdf. I also suggested to the ARRL VEC that maybe they might want a copy too....

Remember that this form is ONLY for the APRIL 15 and after sessions. The older form is still available from the usual sources.

1056. Re: Question about telescoping TV mast

Thanks to everyone who responded with helpful suggestions about our telescoping TV mast. With your help, I was able to begin tackling the job with confidence.

This afternoon, I got my brother to come over and help(it really is a two-man job). My mom was a great help too, as she kept my dad occupied with the dinner he was cooking - otherwise it could have been a real disaster.

A lot of folks suggested heavy work gloves - and they did come in handy! We collapsed the lower two 8' sections, and I decided to stop there, as evening was approaching and I really needed to go to the hardware store and pick up some replacement hardware. It is a 40 year old mast, and handn't been serviced in at least 20 years; so a few rusty old bolts stripped, and most of the feedline-holding hardware disintegrated upon removal as well. Thank god I don't live in an area with more harsh weather conditions.

So for now the TV antenna is at 24', instead of 40'; so my parents still have decent TV reception - and my dad won't go ape. I removed my VHF/UHF dual-band omni antenna from my rural home in Riverside County - and will install it here in urban San Diego on the mast, when I replace my old man's broken rotor. I'm looking forward to seeing what kind of coverage I get. I have a place in Rosarito, Mexico also, and I'm hoping to be able to network my two places thru the omni here by putting beam antennas in Mexico and Riverside County.

1057. Question about mounting VHF/UHF omni next to TV antenna

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-13 00:00:00 UTC
From: horseshoestew@my-deja.com
Message-ID: <8aiau3$e34$1@nnrp1.deja.com>
Source record: 117107
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.digital.misc

I'm getting ready to mount my Diamond X-300 dual-band VHF/UHF(144/440) hi-gain omni antenna on the top of a 40' telescoping TV mast. There are existing VHF & UHF TV antennas on the top of the mast that I'm going to lower about 3 feet from the top of the mast. The thing is - because these TV antennas will be in close proximity to the ham antenna, and because the TV antennas work in bandwidths that overlap those of the omni - will these antennas have a large effect on the antenna radiation/reception pattern of the omni? If so, how badly will it be affected?

The Sydney Olympics special event callsign, AX2000 [NB: that's
A-X-TWO-THOUSAND, not A-X-2-Triple-Oh], gets its first workout this month.

The New South Wales Division of the Wireless Institute of Australia
(www.wia.org.au/vk2) has authorised a number of NSW Amateur Radio clubs to
use the callsign during 2000. The Manly-Warringah Radio Society
(www.mwrs.org.au) gets first bite of the cherry, activating the call in the
CQ WW WPX contest on the weekend of 25-26 March. The club will continue to
use the callsign through 31st March.

Next month, the Wahroonga Amateur Historical Radio Association will be
active as AX2000 / IMD on International Marconi Day, 29th April .

Other New South Wales radio clubs will activate the call at various times
throughout the year, and AX2000 will be running from the WIA (VK2)
Divisional headquarters during the Olympic and Paralympic Games.
Visitors may apply to operate the station by contacting the VK2 Divisional
office by one of the following means:

Postal: Wireless Institute of Australia (NSW Division)
PO Box 1066
Parramatta NSW 2124

Welcome to the Auxiliary Communications Service Newsletter,
developed by the ACS Training Unit of the State of California
Governor's Office of Emergency Services. Please visit our ACS
Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in
emergency communications closer together by sharing common
ideas, and by introducing new technology into the emergency
services community. All individuals with an interest in
emergency communications, disaster preparedness or helping the
community at large are encouraged to participate here in an open
forum.

You will find a virtual community here, with representatives
from many different organizations with the same common goal:
emergency response. We encourage everyone, from whatever
organization you represent (or just yourself!) to bring us your
ideas, suggestions, concerns, manuals, handbooks, or opinions so
that we may share them with the group. To those of you who have
just joined us, welcome aboard!
.....

From the Mailbag:

From: Bjosuweit@aol.com

Dave,

Just a note of support for mentioning topics that don't always seem to
fit emergency communications. In CQ VHF I reported on Integrated Process
Management as it related to a plane crash and how hams can use it to work
together. In April CQ I'll touch on Project Management for a communications
van, and in an upcoming issue we'll talk about Risk Communications.

73s
Bob Josuweit, WA3PZO
Public Service Columnist
CQ /CQ VHF

.....

This week's EMCOMM Bulletin:

EMC227 Internet RIMS
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio

By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC227 Internet RIMS For release 3/6/2000

Bulletins 210-214 in December l999 covered aspects of RIMS (Response Information Management System) and some details of access by counties and cities. Since then there has been a major change in the way the system is accessed. Instead of direct telephone connect it now uses the Internet.

At the time the prior bulletins were written the system was based on dialup RIMS connections. OES has developed and implemented an Internet version of RIMS. Users of the internet version have the same functionality as the regular users had with the dialup system. However, the internet application does NOT require Lotus Notes and can be accessed from any terminal that has internet access. Accessed that is, by those authorized for access by State OES with a system recognized name and ID. Currently this is called "NetRIMS", although that will change soon to just "RIMS".

RIMS is a tool that State OES uses for managing and archiving the data that is generated in connection with an incident, such as a diaster. It is also used to communicate with other agencies and governments, such as the Counties (Operational Areas), Special Districts, California Department of Forestry, Law Enforcement and Fire Response Agencies, FEMA, California Utility Agencies and others.

Utility responders that have participated in the California Utilities Emergency Association (CUEA, Inc.) EOC training have been trained in the use of RIMS. Data (information) received from the utilities during emergencies is summarized by CUEA responders and then put into RIMS.

Each Operational Area in CA - a County and all jurisdictions - other agencies and some utilities have a RIMS terminal that is a dedicated Lotus Notes server, or they connect via telephone to State OES's servers in several locations in the State.

Technical requirements for this new system are these:
A Pentium II, III or Celeron computer 166MHz or better
32 MB memory
28.8 kbps modem or better
Internet Explorer 4.0 or Netscape 4.5 or newer and an ISP capable of supporting 28.8 kbps or better

To access the system go to www.oes.ca.gov and select the NetRims area. For governments and agencies that have access their ACS Officers should discuss with their Coordinator how they can also obtain access. At State OES Communications Centers at Sacramento and the three OES Administrative Regions, the ACS unit has one or

more terminals dedicated to NETRIMS 24 hours a day.

To subscribe to bulletins, use the Subscription Services
web page at <http://acs.oes.ca.gov/subscribe.html>. If
you don't have web access, just send an e-mail message to
<mailto:emcomm-bulletin-sub@harthaven.com>.

- Ideas, suggestions and submissions for these bulletins are
actively solicited and welcomed. Please contact
cary.mangum@macnexus.org or cary_mangum@oes.ca.gov

Bulletins are on the ACS Web page: http://acs.oes.ca.gov -and a
Landline BBS: 916-262-0856 (graphical & standard interface); and
a FTP Archive: ftp.ucsd.edu/emcomm
.....

Please let others in the emergency services field know of the
newsletter, and encourage them to join... If you have opinions,
suggestions or written material that you'd like to share with
the group, let us know. We're always looking for new ideas and
suggestions that will benefit everyone.

See you next week!

Use of foul language? The guy was an AH and I said so, that was the extent
of my "foul language."
What you are mad at is that I refused to talk to you on AOL IM because you
consistantly had nothing to say that would interest anyone and you
constantly TALKED about getting a license but never did a thing to get one
even though you are one of the most intelligent teens I have met. In other
words you talk the talk but do not walk the walk. I was also kicked off
being "anti-ham." Yes I should remember if you do not walk the company line
there is censorship. However I do recall a certain amount of agreement from
you and you even requested I be readmitted to that group. You will make the
perfect ham, talking out of both sides of your mouth.

Welcome to ham radio-set your watch back 40 years

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. How to pass the A+ Certification
2. Realtp://people.ne.mediaone.net/k1oik
ly interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. How you know you are a ham.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

Being new to this forum, I read the long letter from AF2Y posted here. The only thing I know is I was having a qso qith my friend Bob, KB4MXL and there was a unidentified station interfering with our qso, It turns out the FCC said it was AF2Y. I sure hope after his getting two letters from the FCC, he will stop this kind of nonsense and let me operate my amateur radio station without interference.

From: Radioguy <nospam@nospam.com>
Message-ID: <38CCE044.4E6C@nospam.com>
Source record: 117114

Just a couple of comments:

I was looking through old issues of QST Field Day results (1970's and back) and was reminded again how the ARRL once covered the event with a great collection of photos and the 'soapbox' (remember that?). It kinda got me upset again thinking about the current practice of the ARRL to not provide the coverage they once did---and to think of the efforts that folks put into the most special of all ham contest activity---Field Day. Such a special event that united us so well and provided us with so many memories and the ARRL gives such little regard!

On another thought, I've been wondering how folks would like a winter Field Day event? If the idea is toward preparedness why not have a Field Day scheduled for the colder time of year---to maybe offset the heat of the summer perhaps. Hey... maybe CQ could offer a winter Field Day!

1065. The new 3.850 Late Show!

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-13 00:00:00 UTC
From: A cool blast of fresh aire <cusco@hotmail.com>
Message-ID: <nH6z4.13084$qa.580642@newsread1.prod.itd.earthlink.net>

Got insomnia? Tossin and turning
from all those Big Macs you ate before
Bed? Wife don't want to "play"?
Bored with all those boring stand-in's
guest hosts on the Art Bell Show...?

There is an alternative!!

Tune that radio down to 3.850 LSB for the hottest
political topics with K1VDQ, AA8DP, WB2CLN, N1RAJ
N4SKD, KN4CF...and a whole host of others! The show starts
at around midnite (sometimes nightly) and runs
often till 2 or 3 AM.

Last night's show ran the following HOT topics:

* Comments by a "budding" Social-Worker in 3-Land
that leaned somewhat left-of-center... (and the FUR FLEW!)

* Discussion of did the Nazi's sanction the Roman Catholic
Church as the "official and acceptable religion" of WW-II
Germany...

* Why race-mixing is a threat to the "Historical European
Heritage of America and the ideals Founding Fathers"...

* Why the Bible does not sanction interracial marrage by AA8DP..

Folks, I kid you not - this freq. is >BETTER< than CNN's Crossfire
program, The McLaughlin Group, Face the Nation and Firing Line
if they were all rolled into one!!!

Join you hosts on the Right: AA8DP and KN4CF
Join your hosts on the Left: K1VDQ and WB2CLN
And in the Center we have: N1RAJ

3.850 IS MUCH MORE ENTERTAINING AND POLITICALLY SUBSTANTIVE
IN IT'S DISCUSSIONARY DISCOURSE THAT 3.950 WILL EVER BE.

Be sure to TUNE IN and watch Art Bell's ratings DROP even further
than they are now....

Porkbutt:

I am sure Mr Hollingsworth will notice you do not feel sorry for the
deliberate interference, the awful lamguage you used, the disruptions
you caused on amateur radio, and your general misconduct. Pointing your
finger at others is no excuse for you. You are just where you need to
be, out of amateur radio. Hopefully forever. Talk to your bootlickers
and suck ups on Freemail on the internet, that is a good place for a
monster the likes of you and your desciples.

MONDAY MARCH 13TH 2000

Posted 03/10/2000 4:19pm by Thomas C. Greene in Washington

US preacher finds demon-possessed PCs

Forget about viruses and malicious hackers; the real threat these days is far more insidious. Your home computer may be host to a demon, and you and your family may well come under its malevolent control, the Weekly World News reports.

"While the Computer Age has ushered in many advances, it has also opened yet another door through which Lucifer and his minions can enter and corrupt men's souls," the paper quotes the Reverend Jim Peasboro, author of an upcoming book, The Devil in the Machine, as saying.

Demons are able to possess anything with a brain, from a chicken to a human being. And today's thinking machines have enough space on their hard drives to accommodate Satan or his pals, the paper reports.

Disk capacity is an issue, however. Only a PC built after 1985 has the storage capacity to house an evil spirit, the minister explained.

The Georgia clergyman says he became aware of the problem from counseling churchgoers. "I learned that many members of my congregation became in touch with a dark force whenever they used their computers," he said. "Decent, happily married family men were drawn irresistibly to pornographic Web sites and forced to witness unspeakable abominations.

"Housewives who had never expressed an impure thought were entering Internet chat rooms and found themselves spewing foul, debasing language they would never use normally," he declared.

"One woman wept as she confessed to me, 'I feel when I'm on the computer as if someone else or something else just takes over.'"

The minister said he probed one such case, actually logging onto the parishioner's computer himself. To his horror, an artificial-intelligence program started spontaneously.

"The program began talking directly to me, openly mocked me," he recalls. "It typed out, 'Preacher, you are a weakling and your God is a damn liar.'"

Then the device went haywire and started printing out what looked like gobbledygook.

"I later had an expert in dead languages examine the text," the minister said. "It turned out to be a stream of obscenities written in a 2,800-year-old Mesopotamian dialect!"

The minister estimates that one in ten computers in America now hosts some type of evil spirit.

The Reverend advises anyone suspecting that their computer is possessed to consult a clergyman, or, if the computer is still under warranty, to take it in for servicing.

"Technicians can replace the hard drive and reinstall the software, getting rid of the wicked spirit permanently," he says. ◆

Once again, KT4TR, the QST report was wrong since it came from the TSRAC bulletin which, thanks to my lawyer, publicly rescinded the error. The whole lying story was started by two hams, friends of Schoenbohm's. W4IIA and W4OMC from Florida. The editor of TSRAC wrote to both and told them straight out to keep their claptrap out of his mailbox. I contend you knew it was a lie but still embellished it as a way of rubbing in the letter now seen on RAIN & WEB EXTRA. Based on your past history and reputation in the hobby/service as a troublemaker, instigator and an invasive parasite who's reading of personal info on your enemies' lives, and there are a multitude of them, stopped abruptly as a result of action by Riley Hoillingsworth. Also I believe you had to pay a forfeiture of $2,500 which at this stage I cannot prove since it might have been covered up expertly. The letter from Kingsville Texas in no way whatsoever mentioned BARF, a frequency in use or any reference to interference, intentional or otherwise. Once again I contend that you knew about the TSRAC retraction and yet ignored it since personal harm, libel, defamation and harassment are your forte. The consequences, after more research on my part, will be forthcoming.
AF2Y,Doc

"Language," you grade school dropout. What about YOUR running over
legal limit to talk to your sycophant W4LLI on 3.901 night after night?
What about your nastiness on the air? The trouble with you Polly, is
you think your age and so forth can excuse your behavior on the air.
You hide behind the mike and then talk big with your baseball bats,
etc. Well, I'm here to tell you, I CAN take away that bat and stick it
where the sun don't shine on you. You turn around and whine quite
shrilly when somebody (like ME!) calls your ass on it. You let your big
mouth get you into trouble, but you are too damn stupid to do any
better. You need to pull the trigger, because you're wasting good air
for the rest of us.

General question: What exactly is in W4FQF's large skull?

a) vacuum
b) brick
c) beer
d) dwarves

can't be c) because that'd mean the smelly bastard would be
good for something. I'd like to think a), since that would
explain W4FQF's innate ability to suck at everything.

> renewal-only classes.]

Mistaken... ? Someone obviously doesn't consider that without us "Lazy"
no-coders there would be no hobbie. This is true for coders as well - we
need both! Dah... Why do you think they dropped the requirements?

Nevertheless, I am a no-code tech and I'm also the station manager for our
club shack, I assist and provide support for the University's annual
parade, I, with fellow no-coders, put on displays at local schools to
promote and inform our future Ham's and we provide severe weather spotting
for our community. We give presentations to new club members and local
authorities that cherish our ability to establish communications anywhere,
anytime.

Now I wouldn't say we know nothing nor would I claim we are lazy. I claim
however that you sir are so wrong. Just because you are a General Class
Amateur does not make you knowledgeable... Maybe if you look at this
positively you would see there are good and bad in all hobbies. Mostly I
would claim we _all_ have something to offer.

Source record: 117131

The 14.313 website is reporting that OTK was back on 3901 last night. If he wasn't speaking from another ham operators QTH, could someone please explain how is it that he is back on? First, he would need to re-test since he voluntarily gave up his license. Second, he would then have to serve out his "sentence" that Riley imposed.

Anybody have any details??

Isaac

[some dubious content snipped]

Maybe there OUGHT to be free low power broadcasting by people who have
reasonable technical proficiency. A lot of high power domestic U.S.
broadcasting now all seems to be owned by conglomerate central and is
broadcasting the Demographically Correct Satellite Network and other
competition for Sominex.

Of course, you can always run a Shoutcast server or RA server on the
'net. I don't think the @home cable modem ISP will allow it but it
shouldn't be too hard to get a reasonably priced account with similar
bandwidth which will.

But rumor has it that, right now, broadcasting is NOT a legally
acceptable use of the ham bands.

1088. O'Brainless apologizes for stupidity and lies.....

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-14 00:00:00 UTC
From: Eating Crow <anonymous@cotse.com>
Message-ID: <200003150303.WAA16763@cotse.com>
Source record: 116938

O'Brainless made a public apology to Graham for the WRONG
information (spell that LIES)he spread to everybody about
Graham. Problem is he never shoulda done it in the first
darn place...
1) It was none of his business.
2) He ran his mouth first and brain second.
3) He put it in writing for all to record.
4) It proves he lies about everybody else, too.
If Jim wants to apologize to everybody else he lied about
he is going to have to take a week off just to catch up.
Maybe he saw a possible lawsuit in the making....

WARNING: James may apologize today, but in a few days he
will be right back attacking people like he always does. He
will not worry about stabbing anybody in the back since
that is what he is best at. No one can trust him.

May be in USA, but here in France the VHF/UHF bands are so desert, that
one can think that most french hams are dead.
The major pollution is on some repeaters invaded by CB-like QSOs, but
repeaters can't be considered as ham-radio, it's like cellular phone.

Yes I think too it's a great asshole filter, but not in the same way
that you :-))

I don't hear whining / crying / caterwauling child
> like individuals in the CW portions of the bands :-)

On the 30m band, CW hams make QRM on SSB QSOs, this is not acceptable.
CW is a mode among others, so no more privileges for CW.

1096. AF2Y: KD0LA's assessment

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-14 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8alhrj$db8$1@slb0.atl.mindspring.net>
Source record: 116990

Now I've heard it all. I always knew that KD0LA was playing gin minus one deuce, one ace and two queens but this one proves all four tens are gone too. It refers to the latest news about the FCC's willingness to sell some of our rather obscure frequencies to the highest bidders. After Seymour read the newspaper article, this Jim Weirdo from Minneysoda, KD0LA, comes out with "The FCC is going to sell frequencies to the Red Chinese to enable them to BRAINWASH OUR CHILDREN." Can you imagine turning on the tube for one of your kids and seeing emblazoned across the screen, "CHAIRMAN PUSSYCAT MEOW PRODUCTIONS presents Mr. Lodgers Neighborhood?"

1102. Re: I hope they stop the qrm

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-14 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8alomnmvs1@slb2.atl.mindspring.net>
Source record: 116996

Does anyone actually believe that I would have to resort to intentional interference to annoy Polly? And interestingly enough yesterday afternoon while KB4MXL was talking to WA9KJB, Bob said, "I never heard AF2Y on frequency." My crime is having allowed myself to become embroiled in a conflict with a monster the likes of W4FQF but it's over airwise or is it airjordan? Of all the hypocritical windbags ever encountered on ham radio, W4FQF takes top prize and if Mike, ND8V, hadn't discovered Polly's real identity and threatened to turn him in, he would still be in top jamming form today. Furthermore I'll tell you someone else who found out that the unID Polly was W4FQF. Sam, WA4TPY. One afternoon Sam went on a recon mission to discover who this thug was creating so much hell on 14.313-someone close to him. . I called TPY that night and was told, "Doc, I found out he's a FRIEND for years. I'm shocked by it all but I can't turn him in. I'll call him to ask that he knock it off but if he doesn't I won't have the heart to turn him in." No one remembers Polly the unID with all that power and his 4BTV ten feet off ground creating hell night and day? Anyone recall the morning a mobile in Memphis on 14.313 came out with, "Wow, that music must be close." And then he mentioned a street and guess who lived there? And make it your final answer-you won't have to call a friend. I left 14.313 for good because of a person like W4FQF who GETS AWAY WITH HIS SUBTERFUGE, LIES, FAKED INNOCENCE AND PIOUSNESS, If the Commission and wants to accept the obnoxious as being angels, so be it but I can't. And to have W4FQF, after heaven knows how many pseudonyms come on here now with his call plus deja and announce himself a "newcomer" is more proof of the insidiousness of the man. I loathe hyprocisy and I'll tell it like it is every time and I'm telling it now. Lastly as I've said before, this CRAP will finally stop when someone gets sued for slander or libel or harassment and I have a feeling it's in the works and if a plaintiff wants participation from me because I also might have an axe to grind, he can count on it. Once again, I am off 14.313 because I'm ashamed and embarrassed to think that I could be linked in the mind of the Commission with ham radio white TRASH. The MAJORITY of those on 14.313 I would never have anything to do with in my private life while the minority I've found to be the best people possible. I invite all those with whom I've had excellent rapport for the past decade and more to say hello on other frequencies close to 14.313 but NOT ON IT. The reason I won't move FAR AWAY from .313 is twofold. Primarily some of the great folks are not Extra or Advanced; most are Generals and I refuse to forsake them in favor of my own license and secondly my Cloudwarmer is cut for .300 and I want to keep the SWR as low as possible to maximize the transference of power to it.

IF YOU hadn't run your big mouth telling your lies, it wouldn't have
happened, you senile old bastard. I already let Riley know about it, so
you efforts are in vain. It wasn't a threat, Polly, it was a promise.

>On the 30m band, CW hams make QRM on SSB QSOs, this is not acceptable.

Ahhh I suppose from *your* vantage point you can *determine* that
those CW stations can *hear* the SSB stations (and vice versa). Unless
you're referring to fixed station SSB I'm also not sure which (if any)
countries allocate SSB operation in the 30 M band , in the US here
it's CW/RTTY/Data only.

>CW is a mode among others, so no more privileges for CW.

Sorry to enlighten you pal but you're _NOT_ the one making that
determination ;-) much as you'd dearly love to have the power to do so
:)

1116. New certificates for Canadian Hams

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-14 00:00:00 UTC
From: blackm00@cam.org
Message-ID: <blackm00-1403001322140001@dialup-29.hip.cam.org>
Source record: 117010

Last Thursday, as I was going to sleep, it occurred to me that I hadn't received a renewal notice for my station licence (which in Canada is renewed annually, and for a fee), which expires on March 31st. Then I remembered that there had been talk of getting rid of the annual renewal, though the last I'd
heard, it had still been at the talk stage.

The mail arrived on Friday, and there in a stiff envelope is my new license. It's now an "Amateur Radio Operator Certificate" and combines the old Certificate of Proficiency you'd get for passing the tests (which was good for life) and the station license, on one sheet of paper. There's no longer an annual fee (which is nice for the individual, but I wonder how it will impact on the state of ham radio in Canada), and this thing is good until something changes.

The full details are here:
http://strategis.ic.gc.ca/radioamateur.e

Interestingly, there's an error on mine, so I'll have to get that corrected. As it is, it looks like I never passed a code test, but of course when I was first licenced, you had to take a code test.

And that is one sad thing about this new format. When I passed in 1972, you'd get a real certificate, with scroll around the edges and formally stating what it was you are proficient at. And it was signed by real people.

The new certificate looks like something a mail order company would send you to try get you to order. Sure, there's a signature, but it's part of the printing. It doesn't look like you've accomplished anything, which of course the old certificate did.

And since everyone who is already a ham gets one of these, dated April 1, 2000 one could look at these and imagine that ham radio didn't exist in Canada before the year 2000. It gives no indication of when someone was first licensed, which surely is something of importance to the individual.

Over 28 years, I've paid the government at least $490.5 for the station license. I've misplaced a few renewal notices, so I can't place when the fee went up in a couple of places. Back in 1972, I paid ten dollars for my first station license. It went up to $13 in '74 or '75, and stayed at that amount until 1984 when it went up by fifty cents. In 1985, it jumped up to $20, and stayed at that amount until 1990, when it became $22 a year. In 1994 or 95, it went up to $24 a year, right up till 1999 when we paid the fee for the last time.

The actual station license has changed over the years, too. Back in 1972, and I assume before that, the station license was issued for five years, though there was an annual renewal. Actually, looking now, it would seem the station licenses all expired at the same time; my first one expired in 1976, only 4 years after it was issued. This goes along with the concept of the renewal always needing to be in by March 31st, no matter when the license was first issued. 1987 was the first year that I was issued an annual station license. Stiffer paper was put into use that year; odd since one would think that if you needed to keep it for five years it should be stronger paper. The format changed a couple more times before this year.

In 1972, and I assume forever before that, it was the Amateur Experimental Service. The issuing department was the Department of Communications. The licences carried the signature of the Minister of Communications. The five year license issued in 1981 no longer referred to it as "experimental"; it was only the Amateur Service.

In 1995, "Industry Canada" became the branch of the government that issued the licenses, and the signature of the relevant minister was no longer on the station license.

Looking at these station licenses, in some ways the new certificate is warranted. The station license we've always gotten over the years is a generic form. So there is plenty of room to specify the frequencies for the license, when of course the license allows use of bands. And there is a place for a "company code" which doesn't really apply to an individual, though it probably did help for tracking purposes. There does seem something odd about individuals paying at most $24 being lumped into big corporations being issued multiple station licenses or a broadcast station with a big station license fee. CB licenses used to be the same form, and of course, licenses were dropped for CB some years ago, undoubtedly making hams the only, or one of the only, set of individuals being issued station licenses.

But I sure wish the certificate issued actually looked like a sign of accomplishment, which getting a ham license is, and acknowledged when someone had actually first passed the test.

And who knows what impact this new no renewal/no fee approach will have on amateur radio in Canada. Amateur radio is an exceptional service, but in acknowledging this I can't help but wonder if this will end up being an easy way to push it aside.

And here we have, encapsulated in a few lines, the stupidity and crudity of those who have devoted so much of their time to the destruction of a perfectly legal amateur radio net, which has been discussing current events on amateur radio for three decades now. One of these unspeakable individuals, K5MVK, even posted false and cruel allegations about a net participant's father's death on his web page.

It may be difficult to believe, but the on-air performance of the enemies of the net is even worse than their foul emissions on the Internet. See http://www.3950.net for numerous examples.

With every good wish,

Regarding this posting, take all the oranges,leave him the crates to pack in
and get the hell out of town and the best of luck. It's time that Badblood
be taught that on-the-air slander and Internet libel COST!

Subject: about hammer007
From: sledgehammer007@my-deja.com
Date: 2000/03/14
Newsgroups: rec.radio.amateur.misc
Hammer007, Robert Youngblood, KT4TR, all one and the same, is going to
learn an expensive lesson about libel. Does anyone remember "Jimmy Dale
Jr. back in jail again on drug charges. Details to follow"? I and my
attorney remember, and Mr. Youngblood's assets are being researched.
This outright lie, with no thread of truth in any manner, will
hopefully help poor Boobie Youngblood to have some manners, and respect
his superiors. Would anyone like some oranges?

WTB Yaesu Ft 8500 Control Head
My head and mic where stolen, I replaced the mic but need the control head to restore the unit back to usablility. Perhaps someone has a head possibly left over form a unit that was stolen from them? I hope not, I don't wish that on anyone but that's probably the oly way I'm gonna run into one.

Email me if you have one FS

No it hasn't Will. Flat out wrong.

It WILL be lowered come April 15th. It has NOT be lowered yet.

But I have to agree about the bitching just to bitch. That won't stop
for years. If it weren't for the NEW and IMPROVED restructuring,
you'd still hear some bitching about 'incentive' licensing from the
60's. 30+ years and that hadn't gone away, so what makes you
think this will?

Mike

I was starting to wonder when mine would show up. Thanks for the update.
When they merged the databases they merged wrong (I held two calls at
the time, VA3LDH and VA3SFL, which appeared to confuse them) and I know
where to look for my paperwork.

Being relatively new to ham radio (I passed my Basic on 1 April 1993)
all
my dealings have been with Industry Canada. But I've always thought it
was
neat that the yellow piece of paper on the wall of my shack is exactly
the
same form as they have at the CBC, or CTV, or CITY (now that I'm one of
those $%^&% Easterners :-) or Global, or...

Doc instead of worring about KT4TR you should concentrate on your own misgivings. Your behaviuor on the radio is a disgrace. It has been shown in the years past that you are not only a poor operator but you have emotional problems. Anyone who knows you over the years can attest to that.
Now your problems have caused you to come into conflict with the FCC. The hardest thing is to admit that you do have a problem. I would suggest you obtain some proffesional help to deal with this. It can only benefit you. Do it now Doc before something awful happens.
Maybe we have bumped heads in the past but I feel some kinship to you.
PLEASE before it is to late

Not on the Internet. However, I have a database where I have merged several of the QRZ CD's, the FCC database (both under the old XFS stuff and the ULS stuff), one of the SAM's databases, and several other sources. Give me the callsigns, and I should be able to send back to you what I have. Note: The first time that anyone released the data in electronic form was in 1992, so this may reach only into the early 80's. (I'm still working on cleaning some things up - such as some DB's have clubs listed as "...ARC" while others speel it out, etc.).

Chris,

You could buy yourself a HF ham radio, and have one of these helpful gents tell you how to modify it to work CB (11 meters). On that band, you can run all the power you want, use an echo mike, and DX all over the world now that the sunspot cycle is at its peak, all without taking that silly antique morse code test. Only old fuddy duddies use code anyway. Another option is to get your no-code tech licence and use it on the VHF and UHF portions of ham radio. There the hams are so polite and helpful that you will need a barf bag. Everyone is so happy and gay. The best band of all in the VHF portion for DX is the 6 meter band. This band not only will skip, but will also duct due to atmospheric conditions. I call it the grab bag band, because you never know what kind of DX is coming up next. It also has another good use. With 100 watts, or with a big linear, it does a real number on cable TV. You know that jerk neighbor or that butthole landlord of yours or someone elses that likes to watch those expencive pay-per-view events??? You can shut them off like a switch with 6 meters sideband or FM, and they won't have a clue, except that they will be mad as hell. One KW will wipe out everything in a leaky cable system for about 10 blocks, and the whole system if it gets into the main trunks. Wow what fun!

There's a brave new world ahead of you and others out there in CB and ham radio and I encourage everyone to take part in the fun.

Bye for now and enjoy!

You can shut them off like a switch with 6 meters sideband or FM, and they won't have a clue, except that they will be mad as hell. One KW will wipe out everything in a leaky cable system for about 10 blocks, and the whole system if it gets into the main trunks. Wow what fun!

There's a brave new world ahead of you and others out there in CB and ham radio and I encourage everyone to take part in the fun.

Bye for now and enjoy!

Leave it to herr strom to spin doctor a joke or satire. I thought it was damn
funny, and basically inline with the happenings. LOL
Also herr strom, to claim that the the
"So Called" net has been around 3 decades in it's present form -- is
RIDICULOUS !
Ps. you guys should learn to laugh at yourselves once in awhile,
everyone else does.

BEACHMASTER WROTE

>The Liberty Net criticizes people, countries, governments, and
>organizations on a weekly basis. Yet, when someone pokes fun at them,

Yes that would be great ! no more toilet paper will save trees ! :-)
There are yet (since the 80's) chinese toilets that do not require
paper. A warm stream of water clean your ass and dry air finish the
job. A great progess for humanity :-))

1146. FS: CUSTOM MADE SMA-TO-BNC ADAPTERS

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-14 00:00:00 UTC
From: gulyas@netzero.net
Message-ID: <8ak39k$oc2$1@nnrp1.deja.com>
Source record: 117058
Cross-posted to: rec.radio.swap,rec.radio.amateur.misc,alt.radio.scanner

Do you have a need for an sma-to-bnc antenna adapter that is custom
made to fit your H.T. or scanner radio?
Adapter allows you to:
Use the more popular and wider selection available of bnc antennas.
Quickly change your antennas to base,mobile or style use.
Help to prevent chassis connector from wear or from coming loose due to
always having to change your antennas.
Adapter features:
Gold contact pins for best conductivity.
Low profile size with a rubber covering for a factory antenna look.
The rubber base seals to the top of the radio for moisture and dirt
protection,plus providing additional antenna support.
No need to remove once installed to make any antenna changes.
$11.95 + $1.50 S+H (Sizes to fit most radios)
For complete information and to view a photo of the adapter go to:
WWW.QRZ.COM (SWAP)(ENTER KEYWORD SMA TO SEARCH CLASSIFIEDS)
OR EMAIL: gulyas@netzero.net
I welcome any questions or comments at my email.
Thanks for looking at my posting.

It's only an AGREEMENT, not a law voted by people representatives.
Legally every country can decide to eliminate CW from ham exams. It's
not democratic that few people oblige ALL THE WORLD to learn CW.
There must be a democratic vote. I'm sure if there is a vote, CW will
die.

Yes you are right ... it's not obsolete, CW is just prehistoric !
It's not because it's the second most used mode on HF, that this mode
is the best ! Do PSK31 lovers oblige all hams to learn all about PSK31 ?
No. CW exams are a nonsense in year 2000.

You could try keying the B+ to the driver stage while it's in the AM
transmit mode, then switch back to SSB for receive. Or, keeping it
in SSB, key an audio oscillator attached to the mic preamp stage.

These are "duct tape and bailing wire" approaches...

Jeff

>disappointed.

Try our specialty groups:

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Jeff

Did you know that actually there are some digital modes like
PACKET-RADIO or PSK 31. You can send the same text that in CW but with
much more efficiency ... :-))) . More, no need to speak in code, just
speak english normally. It is a nonsense to say that in CW, all the
words of a language exist. So say, that english is the easiest way to
communicate (see INTERNET) between hams and that's over !
And with this new digital modes you can send some pictures of a detail
of your last build equipment to the guy you are in QSO with. It's very
difficult to send color pictures in CW.

When the no-coders take over HF and ham radio, you coded dirtbags can mod your rigs for 11 meters and hang out with your own kind while those that you scorn clean up the mess you made, and use HF as politely as they use the repeaters currently.

The only lids are those that can do 10wpm or more.

Hammer007, Robert Youngblood, KT4TR, all one and the same, is going to learn an expensive lesson about libel. Does anyone remember "Jimmy Dale Jr. back in jail again on drug charges. Details to follow"? I and my attorney remember, and Mr. Youngblood's assets are being researched. This outright lie, with no thread of truth in any manner, will hopefully help poor Boobie Youngblood to have some manners, and respect his superiors. Would anyone like some oranges?

W4FQF,

If all you know is someone unidentified was interfering with you, then you should want to know the evidence against Doc. The fact that the FCC has taken a position shouldn't be proof positive of Doc's culpability. Since you witnessed this episode, maybe you can shed light on the authenticity of FCC's "evidence"-- that is, if you care about justice.

We should all be concerned with the quality of evidence, lest an innocent man be charged and, worse, subsequently lose his ham license. In my humble opinion, we are much to quick to charge and convict without any showing of evidence.

From my past fifty years on ham radio, I know that anything is possible. When I was on in the eighties, it was not uncommon for imposters to play tapes.

Any one of us can be set up. I pray this time around Riley contact me if anything I'm doing is open to question, because I intend to march locked step with every FCC directive.

Though I expect to have one of the strongest signals on twenty meters, I will give way to anyone struggling to hear another or wanting to make a call. And I will turn the other cheek to arguments and rejections, such as KE9RY's a few days ago when I had just struggled on the band with a tiny vertical. (How prejudice can perpetuate itself when one has not been on the air for five years is a mystery to me.) Most hams were great, according me a warm welcome.

Riley has made considerable progress in clearing the twenty meter band. With my puny signal, I was able to talk unimpeded, something impossible in the eighties.

Here's to great times on ham radio,

That's just not true, Jeff. Hams are dependent on Mother Nature to
provide a path for them. It is usually not there. There's a big
difference between finding *someone* to talk to and finding the
one person that you want to talk to. Reg Edwards and I tried
six times to hook up in a QSO and never made it on any mode
including CW.

The 2 meter beam will help but watch out shooting through your neighbor homes. I may cause interference on their home entertainment equipment. Also, depending on how much power, you may fall into the antenna/power compliance issue. If possible, look into moving it up the the attic since you will be using a smaller antenna. As for a outdoor omni-direction antenna, look at the "ventenna" An antenna that fits over your "stink" pipe so it is not obtrusive.

For 6 meters, SSB right now is real hot. Many early evening and weekend with peaks during contest and meteor showers.

Best of luck and 73's

Dennis WB3KUM/9

Tony,

Could you provide me with a list of issues you've run into with PKterm. Many times we find that either the problems have been solved with a later release, or it's just a usability issue. Release 1.4d of PKterm is the most solid release yet and not only fixes some issues with the program, but also works around some problems found in the PK-232 and PK-12.

As I've said here before, many problems running the program with the DSP-232 is because of the issues in the firmware of that unit. The firmware issues have been acknowledged by Timewave, and have offered a trade in program for this units.

I do want to look and address YOUR issues with PKterm. After all, if there are problems, we want to fix them. If problems go unreported, they may never be addressed.

Free feel to post them here in USENET and/or email me direct.

best regards,

>K8CPA

Most ISP's don't care, especially the larger ones like AOL. Also, by stating
your intentions publicly, as opposed to just doing it without telling anyone,
you've branded yourself as a "net cop", which is something no one likes,
including me.

If you're really that troubled by it, why not just put the offensive posters in
a kill file or ignore them?

I just took Element 4(b) last Saturday @ Charlotte Hamfest.

Its utopian to think the *OLD* 20 wpm code requirement served as a
"bad-apple" filter isn't it? :) If that was the case, I'd be all in
favor of keeping it
intact.

Keeping the existing code speed requirement isn't
going to insure the popularity of the cw segments of the bands anyways.

I passed the 13 wpm to get my Advanced, but I'd venture
to say I probably would have never upgraded to Extra Class because of the
20 wpm code requirement. I just wasn't motivated to improve my CW speed
just to get the upgraded license. CW is the last mode I'd use these days
anyways.

Lets let the hobby evolve and grow including its new licensing structure.

The real problem we should all be concerned about is loosing bandwidth and
privileges, etc., not licensing requirements.

The 5 wpm requirement is good enough for 21st Century Amateurs.

Such things are legitimate subjects for discussion, though I've
never been in QSO when they were discussed.

Considering the astonishingly numerous murders of its own people
committed by the current Chinese government, I would not dismiss the
allegation out of hand.

Nor would I find perversion surprising from "anything that moves"
Clinton, who is living proof that some White people are as
degenerate as the worst of the savages.

> Is
> that "The civilized behavior of the Liberty Net Participants" you're

> Vic winces at some of his "civilized behavior"

I've disagreed with many things that Steve has said, as I have with
others on the Liberty Net. Since many different points of view are
present, that's inevitable. But Steve isn't guilty of multiple
illegal acts and infractions of the regulations, as are the jammers
with whom you are so friendly. And, as I've proved here in this
forum, he's also innocent of the allegations on the jammers'
"Opinion Page."

>
> As for "the open calls for murder". Isn't it strange that no one
> has ever been charged with anything ?

[...]

The FCC did sternly warn W9ART about his behavior the night he stated several times, while jamming with his friend WA9KJI, that I "should be shot in the head." (Archived at http://www.3950.net) And K5BLB, whose threats of violence and open jamming and obscenities approach the limits of human belief, was also similarly warned.

I admit that that is weak enforcement; and I admit that the legitimate 3950 participants have shown great restraint in not making legal trouble for those of the jammers who have made similar threats.

But that in no way excuses the crudities or threats or illegal acts of those you so enthusiastically defend.

With all good wishes,

[...]

As far as subversion and sedition are concerned, I oppose them. In fact, I'd like to see the alien and domestic subversives who engage in the ongoing destruction of my beloved America prosecuted for their crimes, and then condignly punished by deportation or whatever punishment is deemed legally appropriate by the government of the restored Republic.

One particularly pustulant running Red sore upon the body of America is the University of Wisconsin at Madison, from one of whose computers (paid for in part by Americans, no doubt) you issued your lies.

I notice by your message that, by concentrating so strongly on their anti-American agenda there, the "University" has now abandoned not only all pretense of scholarship, but even of literacy.

How else can one explain an allegedly educated person, who poses as an expert in such matters, thinking that there is such a word as "propagandisizing," and repeatedly writing "subervesive"?

Honor bright,

The person who has so many false names and addresses and who posts, sometimes many times per day, in the radio newsgroups from a dialup in Cherry Hill, New Jersey, is the real author of that post -- not "Heinmann," who is probably fictional.

Why he would choose to lie about something as simple as correcting the url for the anti-American site referenced above is somewhat mysterious.

But perhaps lying has merely become a habit for Mr. Cherry Hill, and he simply can no longer help himself.

Pip pip,

> Did this guy finally wake up?

Something like that - I've been out of ham radio for about 5 years. It had evolved into a fairly useless service. New digital possiblities are emerging now that people are getting 24hr hi-speed Internet connections in their homes. Imagine being able to access the Internet via 9600bps packet from the laptop in your car. If hams aren't game, maybe we can start building up a hi-speed GMRS packet system. The problem is, hams are really set in their ways, and there hasn't been much experimenting going for years.

> GMRS and FRS have been around for quite some time.

Can you tell me exactly when GMRS and FRS started? I understand that GMRS has been around for sometime(didn't say otherwise in my post), but FRS is a fairly new service. If you can't help with useful information, you post was just juvenile drivel... "I knew about FRS before you did - nee-nyah-nyah nee-nyah-nyah!"

I was discussing that CW is a common mode among the world's HF
hams. The digital modes are not.

>You can send the same text that in CW but with
>much more efficiency ... :-))) .

It's not very efficient if the other operator doesn't have that
capability.

>More, no need to speak in code, just speak english normally.

Well, that eliminates any further QSOs with Viet Nam.

>It is a nonsense to say that in CW, all the
>words of a language exist.

I never said anything like that.

>So say, that english is the easiest way to
>communicate (see INTERNET) between hams and that's over !

That eliminates QSOs with non-English-speaking hams.

>And with this new digital modes you can send some pictures of a detail
>of your last build equipment to the guy you are in QSO with. It's very
>difficult to send color pictures in CW.

What if the other operator doesn't have that capability? At least we
know every HF-licensed ham has knowledge of code.

Why didn't you make any comments to what I wrote below?

Jeez, I get tired of hearing this. It was NEVER a "bad-apple filter."
The bell curve on idiots applies to Extras just like it does to brain
surgeons. It was a commitment-to-service filter. Now it's been lost.

> The real problem we should all be concerned about is loosing [sic]
> bandwidth and privileges, etc., not licensing requirements.

Let's review; since 195? (whenever 11 meters was given to the CRS) how
many kHz of HF (the only thing that counts in this whole discussion)
have we lost? My recollection is none, zip, zero, nada, zilch.

They were wailing about it in the 60s, they were wailing about it in the
70s (you should have heard the
death-of-amateur-radio-due-to-loss-of-frequencies pronouncements prior
to WARC-79), they were wailing about it in the 80s, they were wailing
about it in the 90s.

The truth is, there are more HF amateur frequencies available to more
amateurs now than ever before, and that includes those poor mistreated
"victims" of the incentive licensing wars of the late 60s.

We've had 160 meters functionally doubled in size and power restrictions
lifted, we have 30, 17, and 12 meters since the early 80s, and with the
reworking of the phone band on 10 meters (in conjunction with Novice
Enhancement), probably doubled the number of licensees eligible to use
the band.

You absolutely should be worried, however, about a dilution in licensing
requirements.

Listen up meathead. I'm such a bad op that my course, "Hola CQ-A Spanish Language Course for English Speaking Hams" was bought by the ARRL and a copy given to ham astronaut Owen Garriott which he used aboard his mission in the '80s. I received letters of commendation from NASA and Garriott. The only thing you have in common with outer space is puffing your way there according to what I heard you were packing at Dayton a few years ago. I'm sure you get my drift. Furthermore you're the only ham I ever heard of who took a re-test to downgrade. Additionally as I said publicly, I have no intention of getting back on 14.313 for obvious reasons yet it isn't bad knowing that my oral verbiage, logic, sarcasm and cutting ability so inflamed derelicts, Jew-haters, bible banging morons, felons, jammers, racists, cackling mentally deficient hyenas and dregs of society that their only recourse was to go begging to the FCC to get me off their backs. Not one could intelligently debate me on the air or on this board. Riley Hollingsworth is the boss and unfortunately did not appreciate my mannerisms even though I know full well I never jammed anyone but I don't question authority. He warns STOP or else-I stop, period. End of my attitude problem. It's over and my only reason for getting on the air is to have pleasant chats like in days of yore. Do me a favor David; don't feel kinship with me. Why? Because to me you are just one of the dregs of society to which I just alluded, in fact, you're so damn rotten you nearly got your head handed to you by Fred Roll . You're one to talk and lecture? You Just plain stink Tolassi and you'd better lay off Fred for good. How dare you insult his wife, marriage and other aspects of his existence? Unlike some, I can take constructive criticism but not from a fool like you. Simply stay in your own goofy world where you belong.

Has anyone done 1200bps or 9600bps packet on FRS or GMRS? The radios have MIC and SPEAKER connections.

This would be a cool use for all those 1200bps TNCs gathering dust in the corner. Heck, you don't even need a TNC - most computers come with a sound card that should be able to do 1200bps packet. Kids would DIG being able to use their home computers to send e-mail over their FRS radios to other kids in their neighborhood. A few folks could set up some GMRS digipeaters or nodes and link a whole community! A GMRS base station could be a gateway to the Internet for those that have 24hr Internet access in their homes. Many possibilities exist here. And it wouldn't cost hardly anything!

It will really freak the kids out to hear those packet tones on their FRS radios. Totally cool.

I'm not subscribe to rec.radio.amateur.misc so please email me directly.
I'm a hamradio freak, and would like to buy a RC-radio that can be
used on amateur radio frequencies. Anyway, I've emailed a few hobby
stores and asked how I can do this. I always get the response:
"You will need another radio and a qualified technician to legally work
on the
radio."
As you can see, that is not enough information :)
Anybody know WHERE I can buy this kind of a radio, or WHO actually
does
this kind of work to the radios? Or WHAT it would cost
:)
Not that it matters, but I really enjoy slope/thermal/handlaunch
stuff
from steptoe butte just south of Spokane. I'm in Pullman,
WA.
Washington State Univ.

Thanks

Oh Please! Spare us the melodrama. You sound like a soap opera;
complete with violin. Such words inspire people only when they believe
the speaker; not when he has the credibility of a fox caught in the
chicken coop professing loyalty to the flock.

Can't do it on FRS...It is against FCC regulations.

I remember in the FCC rules that only voice was permitted on the FRS frequencies. We looked into it a while back to find out of we could do a low cost FRS paging service.

I know, I have one :)

I'm working on getting my 10&12-year-old daughters licenses... It is going to be tough for my 10-year-old to pass, and without someone to talk to, my 12-year-old was starting to ask a lot of questions like "Why do we have to know all this stuff, just to talk on the radios?". That is why I got them FRS radios - so they could at least start to have some fun and experience with radios, and hopefully it will act as an incentive for them to continue studying with me to get their ham licenses, eventually.

Forget it - I found the answer....

95.627 Emission types.

(a) A GMRS transmitter must transmit only emission types A1D, F1D, G1D,
H1D, J1D, R1D, A3E, F3E, G3E, H3E, J3E or R3E. A non-voice emission is
limited to selective calling or tone-operated squelch tones to establish
or continue voice communications. See 95.181(g) and (h).

(b) [Pertains only to the Radio Control Radio Service.]

(c) [Pertains only to the Citizens Band Radio Service.]

(d) No GMRS or CB transmitter shall employ a digital modulation or
emission.

(e) No GMRS. CB or R/C transmitter shall transmit non-voice data.

Bummer... What we COULD do with digital... Damn Qualcomm.

HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH

It was a brag-rights waypoint. Nothing more. Nobody has shown any data indicating that Extras have a higher rate of serving the community, nor of developing advances in technology. About the only thing Extras seem to have excelled at (as a class overall) is on the Whine-O-Meter.

Non-english speaking hams are very RARE now. If there are some, they
probably experiment nothing in electronics, because all the data
books of semiconductors and components are in english. So, they don't
need a ham call :-)
For me, people playing chess on HF using CW is not ham-radio.

Kevin you've proved nothing but in your own mind. The things that you condone, agree with, stand for, espouse and diseminate, the " vast majority of people in this country" find repulsive.
You've proved little Kevin, if anything at all. However you have confirmed that everyone can expect your propaganda to still contain lies and misrepresentations. Your well known for that.

>Since many different points of view are
>present, that's inevitable
There is only ONE viewpoint presented on the "So called" net Kevin.

> And, as I've proved here in this
>forum, he's also innocent of the allegations on the jammers'
>"Opinion Page."

Again you've proved nothing.
I allege that he's a KKK member, along with the christian identity cult.

Listen to
http://www.angelfire.com/ga/3950Opjnions/aa8dp1.wav

As for your ridiculously funny propaganda about "open calls for murder" It's just more of the same from you. Lies and Spin Doctoring. You've used that little sound byte for two years get something new.
Isn't that all you've done for many years now Kevin is to write propaganda for the national alliance.

Check out 3950 Opinions and leave Yours !

Source record: 116932

That's right:

Here's the truth about his ONV from Kings Ville TX:

>
> 1. Why was a busy frequency on 20 meters (14.313) chosen as site for this
> alleged testing?
> ***IT WASN'T BUSY. IT WAS AS EMPTY AS YOUR HEAD AND FURTHERMORE I LIVE ON
> THAT FREQUENCY WHICH IS A DAMN SITE BETTER THAN LIVING IN ATHENS
ALABAMA*******

Dr. Hate's Lie de-bunked:

If the frequency had been clear, and the station had been properly identified as testing, then the NOV would never have been issued. The fact that the NOV was issued proves that the frequency was occupied and that the true purpose of the tape playing was to interfere with on-going communications.

> 2. Why was a frequency chosen that was already occupied by members of
The
> Better Amateur Radio Federation?
> ****THE BARF STANDS FOR "BIGOTED AMATEUR RADIO FACISTS" not the Better
Amateur
> Radio Federation. I GUARANTEE NO ONE WAS ON FROM THAT GROUP BECAUSE THE
> FREQUENCY SMELLED CLEAN.*******

Dr. Hate's Lie de-bunked:

The frequency was occupied by a number of B.A.R.F. members. That is the real reason why Dr. Hate continuously played the pre-recorded tape for a period of approximately an hour. Dr. Hate's feeble attempt to turn his very serious violation into a joke is further proof that he is afraid to admit the truth. He was caught in the act of causing intentional and malicious intereference. The FCC cited him for his actions.

> 3. What was the purpose of playing a pre-recorded tape of Adolf
> Hitler?*****IT
> WAS A TAPE OF HERBERT SCHOENBOHM DOING A ROUTINE ABOUT HOLOCAUST
> TRIVIALIZATION
> WHICH COME TO THINK OF IT WAS THE SAME AS ADOLF HITLER*********

Dr. Hate's Lie de-bunked:

Of course it was a tape of KV4FZ. What other tape would AF2Y choose to deliberately QRM the B.A.R.F.? A legitimate tester would never have used a tape of his supposed "enemy" to test their rig for BCI/TVI/Telephone

interference. The FCC must have agreed since they considered these transmissions to be deliberate and malicious intereference.

> 4. Why wasn't the frequency checked for activity and possible interference
> when the station identification was given?****THE JAR WAS EMPTY! ZILCH.
> NADA.WHAT MAKES YOU BELIEVE THE FREQUENCY WASN'T CHECKED? I ALWAYS CHECK
> FREQUENCIES. SOMETIMES I GET UP AT THREE 'O CLOCK IN THE MORNING TO CHECK
> FREQUENCIES. THE OTHER NIGHT MY WIFE AND I WENT OUT TO DINE IN A POSH NEW YORK
> RESTUARANT ON 38th STREET AND I LEFT AT NINE O'CLOCK TO CHECK A FREQUENCY AND
> THEN DROVE BACK TO FINISH MY MEAL.*******
>

Dr. Hate's Lie de-bunked:

This is another very sad attempt to trivialize a serious violation of the rules. Dr. Hate isn't capable of humor. He is simply trying to avoid admitting that the frequency was in use and that his transmissions caused intentional, malicious interference.

> 5. Why were the pleas of stations trying to use the frequency
> ignored?****YOUR
> SPELLING IS WRONG AND SO IS YOUR INTERPRETATION. THEY WERE YELLING,"PLEASE USE
> THIS FREQUENCY>*********
>

Dr. Hate's Lie de-bunked:

Dr. Hate isn't slick enough to slide out of this indictment of his operating practices. He was caught in the act of causing deliberate QRM. He was cited. The FCC never modified, withdrew or recinded their citation.

> 6. Why wasn't the testing done at night after the band was dead?****WHO SAID
> 20 METERS WAS "DEAD" AT NIGHT?BESIDES,I AM MORE ENERGETIC IN THE MORNINGS AND
> RUNNING UP AND DOWN A LOT OF STAIRS FROM THE FAMILY ROOM TO THE BEDROOM TOOK A
> LOT OF ENERGY. BUT THEN AGAIN IF I LIVED IN A LOFT AS YOU DO WITH SAWDUST ON
> THE FLOOR TO ABSORB THE STINK, I COULD HAVE TESTED AT NIGHT>*******
>

Dr. Hate's Lie de-bunked:

It does not matter when it is convenient for Dr. Hate to do his alleged "testing". One would think that an Extra Class amateur would know when the 20 meter is usually "dead" or very quiet. It was up to AF2Y to schedule his "testing" at times when he would be least likely to interfere, choosing frequencies that were unoccupied. Dr. Hate's insult routine is just a smoke

screen he uses to try and cover up the basic facts. He was caught QRMing a busy frequency with a pre-recorded tape.

> 7. Why would an Extra Class operator ignore all these factors and choose to
> cause deliberate and intentional QRM on a busy 20 meter frequency?***TO FIND
> THAT OUT I SUGGEST YOU ASK AN EXTRA CLASS OPERATOR WHY HE WOULD IGNORE FACTORS
> AND CAUSE DELIBERATE AND INTENTIONAL INTERFERENCE ON 20 Meters****
>

Dr. Hate's Lie de-bunked:

According to the FCC, Dr. Hate is just such an Extra Class operator. He is an operator who ignored the rights of others and deliberately interfered with legitimate QSO's on 20 meters. The FCC cited AF2Y because it was obvious to them that his alleged "testing" was a lie he dreamed up as an excuse for his psychotic need to interfere with amateurs that he hates.

> 8. What documentation is available to prove that the response to the Notice
> of Violation was acceptable?
> ****IF IT HADN'T BEEN, THE FCC WOULD HAVE COME DOWN ON ME AS THEY DID ON
> KV4FZ.
> I WOULD HAVE HAD TO PAY A FINE AND THEN TRIED TO LIE MY WAY OUT OF IT BEFORE
> JUDGE LUTON.*******
>

Dr. Hate's Lie de-bunked:

The FCC does not always issue NAL's in every case where a NOV is issued. The fact that the FCC showed leniency does not change any of the facts. The NOV was never modified or withdrawn. It is a permanent record of AF2Y's illegal activities on the amateur bands. A copy is available to anyone through a Freedom of Information Act request.

> 9. Was the Notice of Violation ever recinded or withdrawn?
> ****NO,IN FACT IT'S NOW BEING MADE INTO A MAJOR MOTION PICTURE STARRING TOM
> HANKS*****

Miracle of Miracles. Dr. Hate actually admits that the NOV stands to this day. It is a black mark against him and a black mark against all Jewish radio amateurs. Shame on Dr. Hate for bringing disgrace upon his people.

> 10. Is not true that the Notice of Violation is now a permane
> Just rememeber, I will post these "In your face" until you answer
> truthfully!
> ****YOU GOT ME. IS NOT TRUE A PERMANE AND IN YOUR FACE TOO******Doc,AF2Y
>

Dr. Hate's NOV is a permanent part of the FCC record and could very well be used as evidence against him in any future proceedings. All of his insults, sick jokes and other "avoidance techniques" will not change the facts cocerning AF2Y's very serious violation of the amateur radio regulations. Case closed.

Could you help out a poor, misguided, No-Code Tech for just a minute? Your argument has left me behind somehow. This part of the thread seemed to concern violations on 14.313, 3950, etc. Now, aren't those frequencies used by Amateurs who have already passed at least a 13WPM test? Given THAT point, this test filtered them out - how???????????????

I live in a townhouse in an apartment complex. We're not allowed any kind of outside antenna so I've been using a 5/8 wave magnet mount on a pizza pan near a 2nd floor window. I've been getting very good results with it and my Icom 2100 but as you know... good is never good enough. I'm thinking about buying a small Cushcraft Yagi (3element) and mounting it on a microphone stand here in the same room. Other than the directional advantages-- does anyone think I'll see a difference?
Thanks in advance.

Beachmaster:

If you had the background that Mr. Strom has, you would be defensive, too. Please read the following, which I posted several weeks ago but am repeating here because this is the sort of material that needs to see the light of day.

By the way, check out Mr. Strom's web site. What is the term for older guys who like little girls?

QUOTE FROM PREVIOUS POST

For the enlightenment of visitors to this newsgroup, here is a listing of suggested readings re: Kevin Alfred Strom.

http://www.splcenter.org/cgi-bin/goframe.pl?refname=/intelligenceproject/ip-4i4.html Contains an interview with Mr. Strom's ex:
QUOTE
A former insider speaks
For four years, Kirsten Kaiser, 36, lived with her husband on or near the West Virginia compound of William Pierce, the leader of the neo-Nazi National Alliance and author of the racist fantasy novel The Turner Diaries. Kaiser was married to Kevin Alfred Strom, who co-hosts Pierce's racist and anti-Semitic radio show and is one of Pierce's closest associates. In that role, she got to know Pierce's inner circle and some of its members' thinking. Over the nine years of her marriage, Kaiser came to question the violently racist views of the Alliance -- especially after the deaths of 19 children in the Oklahoma City bombing, which was patterned on an attack portrayed in The Turner Diaries. Today, she is living in Minnesota and going through a divorce from Strom. The Intelligence Report interviewed Kaiser about her life and acquaintances inside the Alliance, and how she came to leave.
END QUOTE

http://209.196.26.118/articles/Resign.htm

http://www.jdo.org/nazi.htm And scroll down the page to the entry for National Alliance

http://www.whiteracist.com/Jew.html

http://www.adl.org/poisoning_web/kkk.html

This page contains the following paragraph:
QUOTE
Now led by Shane Crowe of Louisiana, this group has numerous sites on the

Web as well. Unlike Robb's sites, those of the Michigan faction do not soft-pedal their bigotry. At the Web site of its Oregon chapter, this Klan openly and honestly declares, "we believe in White Supremacy. The Klan believes that America is a White man's country, and should be governed by White men." Blatant extremist views can also be found at the national Web site for Crowe's Klan, which features a prominent link to Stormfront, the text of Kevin Alfred Strom's "The Beast Is Saint," and a reprint of Henry Ford Sr.'s "classic" anti-Semitic text, The International Jew.
END QUOTE

http://spinoza.tau.ac.il/hci/spe/anti/internet1.html scroll down the page to the table

http://www.sociology.org/content/vol003.002/kallen.html Where you will find this quote:
QUOTE
Excerpted from: "Evil in High Places", by Kevin Alfred Strom.

THERE IS EVIL IN HIGH PLACES in America today... because there has been a revolution in this country and the American people lost. The revolution... the takeover of America by [Jewish] aliens and the traitors who served those aliens... was engineered and executed by the same forces who... brought the scourge of Communism to Europe.... The Jewish revolution is now complete - but the revolutionists feel far from secure. Now that they are in power, their main concern is staying there... They want to infiltrate agents into groups they merely suspect of lawbreaking. And who do you think they "suspect"? The Mafia? Jewish organized crime gangs in New York and Los Angeles? Homosexual activists who fling AIDS-infected blood at innocent churchgoers? Jamaican cocaine dealers who kill almost with impunity on our city streets? No. It is you and I, it is anyone who opposes their evil agenda, it is anyone who wants a return to the values that made America great... They would take away the last of our freedoms, the freedom to speak, and they would frame, they would plant evidence, they would lie, they would kill to stay in power .
[I urge you to] speak out against those who would turn our beloved America into a brutal Third World police state.... When our people realize that hundreds of thousands of us are speaking out, they will join us, and when enough of them do that, we will be the state - the American government will once again be in the hands of true Americans. The outward-bound 747s will be... overloaded with traitors and alien subversives and their ill-gotten lucre, heading for Israel or elsewhere where their evil revolution may still be in power. But the Jewish revolution will be finished here. America will be America once again. And our sons and our daughters will be able to look with clear eyes into a future once again brighter than the sun.

http://www.patriot.dk/Pearlharbour.html

http://www.ferris.edu/htmls/othersrv/isar/Institut/CCC/sharks.htm Where you will find this gem:
QUOTE
British neo-fascists and youth
Wider-ranging recruitment efforts are currently under way. While the council has been largely made up of aging southern proponents of "the lost cause," last year it began an effort to recruit a younger generation of followers, setting up an education committee and a youth chapter.
The youth chapter was developed by Mark Cotterill, using the false last name Cerr, around Washington, D.C. Cotterill, a Briton, is said to have brought 100 young people into the CCC. What Cotterill doesn't boast openly about are his connections to the National Alliance ? his friendships with Alliance founder William Pierce, and Pierce's chief deputy, Kevin Alfred Strom. Pierce's novel of a future race war, The Turner Diaries, served as the blueprint for the deadly 1995 bombing of the Oklahoma City federal building.

Cotterill is well known in Britain, which he left three years ago. There, he was associated with the neofascist National Front and its successor, the British National Party, as well as American distributor of a far-right periodical, Right Now. He also has been linked to the Ulster Defense Association, a paramilitary Protestant group in Northern Ireland.
END QUOTE

http://hatewatch.org/who/pierce.html Mr. Strom may have a real future:
QUOTE
Presenting an image of restrained academic bookishness in front of main stream media, Pierce is more blunt in the company of "friendlier" audiences. Shortly following the death of poet Allen Ginsberg, who was Jewish and gay, Pierce stated frankly that he believed that persons who published material such as Ginsberg's should be shot. This speech was reproduced at his Web site, which is emblazoned with the motto "Free Speech." He also once wrote in an Alliance encyclical that "all the homosexuals, race-mixers and hard-case collaborator in the country who are too far gone to be re-educated can be rounded up, packed into 10,000 or so cattle cars, and eventually double-timed into an abandoned coal mine in a few days' time." This statement is, of course, eerily similar to the actions of Hitler's Third Reich.

Despite Pierce's stark neo-Nazism, the National Alliance is a consistently growing organization, research shows. Pierce has actually been successful in starting National Alliance chapters nationwide including the New York metropolitan area which has one of largest Jewish populations in the world. National Alliance meetings begin with a roll-call of members (first names only) but always include the names of three specific individuals: Revilo Pendleton Oliver, a deceased, Illinois-based professor of Classics who wrote several racist and anti-Semitic tracts during the 1960s to 1980s, Bob Mathews and David Lane of the Order. At the calling of these three names, all members present shout "Here!"

Now In his mid-60s, it is unclear who will follow Pierce when he dies. Speculation that he would be succeeded by his media-savvy lieutenant Kevin Alfred Strom lessened when Strom left the National Alliance (at least publicly) nearly two years ago. This was also the case with Milton John Kleim, Jr., Pierce's one-time "point man" for the Internet who is in his mid-20s, but he too has left the National Alliance, and the far-right, racist movement altogether. Kleim has thoroughly recanting his previous points of view. Pierce's most visible lieutenant is his North Carolina lieutenant, Will Williams. But Williams, with his southern accent and inability to harness his blatantly racist point of view into anything that can sound even remotely rational, would not likely be a successor that would be sanctioned by Pierce. However, if Pierce does not have a hand-picked successor, then the future of the National Alliance without a William Pierce would seem in question.
END QUOTE

http://users.erols.com/murple/propaganda/racist/mlking.html

http://www.faem.com/oliver/oliver-1.htm

http://www.loop.com/~bramble/conspir.html
QUOTE
Dave Middleton, editorializing in The Capital Christian News, the Christian Coalition's publication for Rensslaer County, NY, believes that the U.N. is poised to take over the U.S., aided by (Jewish) humanists and scientists. Middleton claims that three orbiting satellites can project 3-D holograms onto the planet and people "will be fooled by the false signs and wonders" into accepting the invasion.
The ancient paranoia has resurfaced in response to the modern plague: An organization in Orange County, California, believes that HIV was created by the KGB as part of a plot to take over the U.S. According to this theory, mandatory quarantining of HIV-positives is the only way to stop the Communist invasion.

Christian Identity Online features one of the finest HIV-conspiracy speeches. Kevin Alfred Strom, speaking on the "American Dissident Voices" radio show (July 10, 1993), blames the spread of HIV on "the homosexualization of America" through "the power of organized perversion" and "the controlled media." The media, of course, is run by "the multicultural, one-world agenda" of the "forces behind Liberalism" -- those pesky Jews!

Strom pumps up the volume when he tells people to avoid the "trendy, fashionable part of town whenever possible," as "this is often where the highest percentage of homosexuals are to be found." People should move into "racially, culturally, and medically healthier" [read: racially pure] areas that offer lower risks of contact "with those in high-risk groups, including Blacks, Third-World immigrants, homosexuals, and drug users."

And don't think that crazy ideas about gays spreading epidemics started with Christian fundamentalists. After the original outbreak of Black Death in 541, Emperor Justinian decreed that people had provoked God to anger and

retribution because of perpetrating vile acts with other men

That sounds like about the right time frame for that series of call. Try
QCWA (http://www.qcwa.org). Click on the "How" button for instructions
on getting them to help verify your call.

I'm far from defensive, Mr. Schlatter. It is, I hope, accepted in
the sense in which it is meant when I point out that you're raving
again.

> Please read the following, which I posted several weeks ago but am repeating
> here because this is the sort of material that needs to see the light of
> day.
>

It's odd that you would feel that I am preventing my own writings
from "seeing the light of day," especially when I have published
them both in print and on the Internet. For quite some time I also
broadcast them via several 50,000-Watt radio stations.

> By the way, check out Mr. Strom's web site. What is the term for older guys
> who like little girls?
>
[...]

What is the term for people who make foul insinuations about those
with whom they politically disagree?

I am a father of a little girl, Mr. Schlatter, and anyone who would
despoil a little girl's innocence should go to jail for a _very_
long time, assuming he is permitted to live.

My web page, which celebrates the beauty of the women and girls of
our race, and which has featured beauties of many ages, including my
own mother, has never contained even a particle of indecency.

By the way, for those who have been following the case of the false
accusations posted about me and my family by those with a political
agenda, and by some with an agenda to take my children from my
custody based on my political beliefs; you will happy to know that
those efforts have failed utterly -- all the accusations against me
were denied and thrown out by the court.

With every good wish,

--

Stupidity is stupidity; and crudity is crudity, Chief. There are
ways of criticizing and poking fun that do not involve them.

The civilized behavior of Liberty Net participants is in striking
contrast to that of the jammers and their confrères, whose

maunderings regularly include references to excrement and unnatural uses for genitalia, to say nothing of the open calls for murder.

Some audio samples of the jammers' inexcusable vomitings are archived at:

http://www.3950.net

Good luck in the contest,

Hi All,

I was wondering, is there anyone in here, that is from Frankfort, In?

I'm looking to get in touch with William Norman. N9MJH. Or "hillbilly bill" as he was known to me and my family. I really miss talking to the guy. and my family was wondering if he's doing okay or not. we kind of lost track of bill over the last few years. Please advise me via e-mail!

and you know bill's e-mail address, please forward that!

or if you talk to him on the air. tell him to call Charlie's son in Detroit, he's wanting to get in touch with him!

Thanks!

Which processor? The BC9000XLT uses a Hitachi H8/338 series. Specifically
the HD6413388F6.

There is a Hardware manual and a H8/300 Series Programming manual
available from Hitachi or their representatives.

Accusing the President of incest without a shred of proof. Accusing
the Chinese of eating aborted fetuses, again without proof. Is
that "The civilized behavior of the Liberty Net Participants" you're
referring to ? As for stupidity and crudity; I refer you to "DP". Even
Vic winces at some of his "civilized behavior"

As for "the open calls for murder". Isn't it strange that no one
has ever been charged with anything ? Or, could there be a slight
chance that your interpretation is somewhat skewed ? Then again, the
Liberty Net does seem to have a penchant for not letting facts get in
the way of their accusations. Yes indeed, fine "civilized behavior".

1253. FRS/GMRS as gateway to Amateur Service

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-15 00:00:00 UTC
From: horseshoestew@my-deja.com
Message-ID: <8anjvb$8o2$1@nnrp1.deja.com>
Source record: 116964
Cross-posted to: rec.radio.family,rec.radio.amateur.policy,rec.radio.amateur.misc

I've been working with my 10&12-year-old daughters to get them prepared to take the new Technician class license test sometime after April 15th. While the new 35 question Technician exam will be slightly easier than the old Technician test(and definitely shorter than the old combined 65 question Novice/Technician requirement), it still is going to present a bit of a challenge to my 10-year-old; and without a peer to talk to, my 12-year-old was starting to wonder, and began to ask questions like "why do we have to learn all this stuff, just to talk on the radios?". I was able to get them interested initially, because they thought my Kenwood TH-22A "looks cool"; but I saw that they were going to need some kind of immediate reward to keep their interest up.

Of course, there was always the old 100mW Barbie/GIJoe walkie-talkies; but most of us have been down that path - and know it is leads to boredom after about 30 minutes. And I wasn't about to expose them to the CB "zoo"(besides, CB HTs are too bulky and inefficient).

So, I stumbled across the new Family Radio Service(FRS). The unlicensed FRS offers 14 UHF frequencies(a little above 70cm band), with a 500mW transmit power restriction using very restrictive HT-bound antennas on VERY inexpensive transceivers(as low as $25 at Kmart, up to $75-$125 for a good Motorola radio). Advertised range is 2 miles, with actual range about 7/10 mile(if both parties hold their antennas vertical and steady). I picked up a couple of them this afternoon, and my youngsters have already started limited communications with some other young teenage girls in the general area that have these devices. I found that the language was generally rated PG-13(acceptable to me), but there was one R-rated comment from one of the girls(her dad probably works 11 meters). Luckily my kids aren't interested in that kind of stuff, and they just moved to another channel for the time being.

While the 7/10 mile range beats the heck out of the 1/10 mile range of the 100mW HTs, it is still just a little too restrictive to be perfectly useful as its intended 2 mile range was supposed to allow - like keeping two vehicles in contact, or keeping the family in communication at Disneyland, a park, beach or stadium.

Oh well... But wait - there's more! It turns out that the licensed General Mobile Radio Service(GMRS) has 7 frequencies in common with the FRS. On these frequencies, a GMRS radio is limited to 5W power(typical GMRS HTs come with 2W), and 20ft(above ground or structure) base antennas. By paying the one-time $75 GMRS license fee, and using a single $125 GMRS 2W HT, the range of the FRS radios can be extended

from the normal 7/10 mile to the following predicted ranges from GMRS base(based on antenna type):

Stock GMRS HT rubber duck - $125 - 1 mile
Better GMRS HT-mounted antenna - $175 - 1.25 miles
Car rooftop-mounted antenna - $200 - 1.5 miles
Home rooftop-mounted antenna @20ft - $300 - 1.75 miles
Home rooftop-mounted antenna @40ft - $350 - 2 miles

So, the final cost for a still very limited two-radio GMRS/FRS system is:

GMRS base - $350
GMRS license - $75
FRS radio - $75

Total - $500

But, you could put a MUCH more capable amateur system together for:

HT 1 - $175
HT 2 - $175
Amateur license - $6

Total - $356

Much cheaper(and with used equipment, the price could be under $150), and instead of being limited to under 2 miles, you could now talk using your HT thru one of the many open repeaters to other stations up to 100 miles away.

My point is, instead of getting caught up in trying to build up their FRS systems to get some kind of range out of them, folks should look at FRS as a starter system, and at some point should consider taking the simple 35-question Technician radio license exam instead of building up an expensive and limited GMRS system. The entire question/answer pool as well as practice examinations, are available online. One cool site is:

Those are not trolls either. Please review your usenet terminology.
Here's a start.
http://www-ieee.eecs.berkeley.edu/~benco/humor/TrollingManual

After reading this it's my belief that if you are ever trolled, you
would never know it. Ever. Therefore you are not a good candidate for
trolling. Stop worrying and use your newsreader filter. You'll get the
same results and you will make fewer enemies. Think about it. Some of
the people on this group are nuts.

Your slander and malice postings will also cause you great pain. Llgpt will
be a minghmare and if you doubt it please call Mr. Bello, he has copies of
all your postings, be careful !!!! you can find Mr. Bello in the phone book
, take a look.

See, Polly ran his mouth, saying nasty things about me, but the
hillbilly fool didn't think (of course, Polly NEVER thinks!) I was
listening in. I called him on his remarks, and he didn't like it. From
what Riley e-mailed me back after I sent him what happened, pompous-ass
Polly may be in for a surprise. Polly never told the truth in his life.
I guess Riley has noticed this. I guess Riley contacted the other
person who Polly was qsoing with, VE3GJB.

1260. Re: Former CALLSIGN database

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-15 00:00:00 UTC
From: wa2rsx@NOSPAMPSE.com
Message-ID: <38cf81af.130879403@netnews.worldnet.att.net>
Source record: 116971

Thanks for your offer to help. However, my previous Ham buddies date back into the late 60s and early 70s when I was last in touch with them.

I suppose that I could write some form letters and mail to addresses found in telephone book/web-net whitepages.

An example would be WA2RKL, WB2ZDY, WB2ZKX, WB2ZGG, WB2PUX, WB2ZTQ, WB2ZGI.

Wouldn't it be great if the FCC webpage allowed me to plug in a callsign and report back status and history, etc.

Thanks again.

>I decided, I've had enough.

What could have possibly made you so upset
over all of this 14.313 / 3.950 stuff ??

These two freq's are gathering points for
retired, old, white, Protestant (and some Jewish)
rich men, who have nothing better to do than kibbitz
on the radio all day or night.

It's a way for them to re-live their days of youthfull
vigor and inhibitions. This has great psychological
and physiological benefits! Just think off all the
retired guys that have nothing better todo than watch
The Price is Right and take the old lady to the shopping
mall...

Let these trolls go - their only here as Reily Hollingsworth
has scared them off of ham radio, but just as sure as cows
come home at 2:00 and the swallows return to San Juan Capistrano
every year, they'll be back on the radio again soon. I give em
till July at the latest.

Hi!

I got a problem with my Kenwood TS-440S AT.
When I turn the power-switch on, nothing but the light of the s-meter
goes on.
A few weeks ago it was just the same, but after a few seconds or
minutes,
a relay was clicking and everything worked fine.
I opened the case to look for bad connections, but I found nothing.
Unfortunately Iï¿½m not a professional in electrics.
Did someone have the same problem???
Answers please also directly to my mail-adress

Thanks!

Ingo

Hey George, what about the time you threatened to club N8IEZ with a baseball bat at the Dayton Hamvention? Maybe that doesn't count since you spent the weekend cowering and hiding. How does it feel to know that Jimmy O'Brien's wife has more balls than you do? What a sad and pathetic life you lead. You'd be totally useless if you couldn't be used as a bad example.

Have a nice day!

I don't think he had a daddy. After what that dumb bastard posted about
my mom, anything is game as far as I'm concerned.

Ease up Chuck before you pop a gasket. This medium is to have fun.
Do you want to censor people from these groups just because they
don't see eye to eye with you. This is "AMERICA" and people have a
"right" to say anything they want to. If you don't like the
freedoms we have here is "AMERICA' I suggest you find a ?better
country to live in and also go to a ?better news group.:)

> yet.

Have you tried doing a name search? Both QRZ and WM7D callsign servers
have a feature that does that.

Also, if any of them had a 10-10 number (that you know) you could search
using that. The 10-10 database folks are pretty good about keeping up
with callsign changes.

Chuck, check to see if your newsreader has a "kill thread" command.
I use TRN on UNIX; hitting "K" on a particular article will "mark as
read" all follow-ups to that article.

> OK...tell us how you would determine when that goal has
> been met? Just what would be the metrics that we should
> measure against to which we can determine that the
> service is "moderately useful"?

This is good dialogue. Of course, what is "useful" to one individual, is "useless" to another. However, I am talking about the "usefulness" when you average it over the entire population of the United States of America. Hence, HF is "fairly useless", because only a small portion of the population finds it "useful", while the vast majority find it "useless".

Let me also say that we shouldn't even attempt to make the service "very useful"; the corporate communications lobby would NEVER allow it. Things like "business communications", and "cellular phone systems", are obviously "very useful", and obviously off limits.

So, I would define a service that is "moderately useful" as one that provides a service that is useful to a large segment of the population in "selected enviornments". Restrictions would be imposed to insure that the use of that service would not have any significant impact on commercial communications systems.

I think a good example of a system that is "moderately useful"(and one that did recently get approved by the FCC and past the communications lobby) IS the FRS. There are no license restrictions with the FRS, but it provides very limited privileges that fall short of the goal of allowing reliable family communications. I am working on a petition to the FCC for a new ARS license class that would provide a new "moderately useful" service to the public (call it "beginner", "communicator", "UHF communicator", "family" or what have you) that would provide privileges on a portion of the 70cm band. The new licensees would be allowed to use the upper 10Mhz of the 70cm band, with antenna and power restrictions matching those of the 7 GMRS channels that overlap with the FRS, and with a restriction that they not be allowed to connect thru a telephone autopatch(except in an emergency).

The new class would provide an alternative path from those wishing to upgrade from the FRS to the GMRS. The operating privilges would be similar to GMRS, but with restrictions on business and phone autopatches. However, there would not be the 18-year-old age limit.

It would be more "family" and "hobby" oriented and less "business"
oriented than the GMRS.

The new license class would have the following simultaneous goals:

1) Provide a reliable short-range non-business communication service
that would be useful to a significant segment of the population in
group settings, but which would not compete with existing business
communications systems(A family of 5 isn't going to provide a cell
phone to each one of its members).

2) Encourage basic knowledge of radio, electronics, operating
principles and etiquette among the general population.

3) Provide a gateway license to the Amateur Radio Service that would
appeal to more than just a small segment of the population.

The "Communicator" license exam would consist of 25 fairly simple
questions. Emphasis would be put on understanding the existing
operational, safety, etiquette and emergency questions from the
Technician pool that relate specifically to their privilieges. The
communicator would be required to have a general understanding of Ohm's
Law and Power relations, but not have to carry out any calculations.
They should be required to have a general understanding of how antenna
length relates to wavelength, but not have to carry out any
calculations. General knowledge of simple resistive circuits, and
their power dissapation, would be required. Knowledge of capacitors
and inductors would not be required.

The new rules won't affect any operation that you're currently licensed for.

There will only be 3 license classes, and the 3 which go away are allowed to
continue as renewals only. Test elements change as a result.

For more details, download the FCC's R&O (December 30, 1999).

We plan to go up Cape York via OTR this August with two vehicles.
To stay in touch with each other and to get help in case of an emergency,
we want to buy radio sets.

Which system shall we get?

There is the old CB (27MHz), LPD with 443MHz and PMR with 446MHz.
Here (Austria) we can use all these systems without any kind of permit or licence.
Is it the same in Australia?

Note that the novice class of license will not be available to new applicants as of April 15. The only way for an unlicensed person to become licensed and NOT LOSE any element credits under the new structure would be to take all the elements for the general class of license, all before April 15th. [Taking all the elements and becoming an extra class will work too....]

Wait a minute now....he has a portable SW receiver and a "TINY TENNA".
From what I hear the "Tenna" matches his IQ.

Is this a troll?

You haven't had to do Morse morse code to get into the hobby since 1990.

The Technician license class(present and future)requires NO morse code test. If your friend wants to get on HF, then he will have to pass a 5wpm Morse code examination, and the old Novice/TechPlus practice tapes will work fine. After April 15th, there will only be one Morse code examination level for ALL license classes(5wpm), so your old 13/20wpm pratice tapes won't be of much use after that.

Source record: 116770

Today I've gotten quite a few e-mails asking if I post under the name SLEDGEHAMMER007. NO,NO a thousand times NO. Something else-I'm asked about the word "minghmere." The best I can come up with is that's how KT4TR spells "nightmare" when upset, nervous, discombobulated, dilapidated, frustrated and constipated. He angers very easily. Loses his composure. Begins biting into grapefruits and oranges and anything else organic within sight. Third question: when will I return to 14.313? Answer-NEVER. Riley Hollingsworth is dissatisfied with my demeanor which is good enough for me. Sitting on .313 accomplishes nothing but generally speaking breaks down to listening to boring hacks who act like old washerwomen hanging out their clothes on the line while gossipping. I'm not interested whatsoever. You know what that frequency is becoming? A minghmere.
AF2Y,Doc

I'm sorry madam, but the description you supplied is applicable to the great majority of the participants of this newsgroup, leaving many in the position of wondering just specifically who you are talking about. - It could be almost anyone here!

Could you be a little more specific? Any additional clues would go far in narrowing things down a bit and so would be greatly appreciated by many of the cussers and dis-cussers here.

So amateur radio has been around since before 1912 and you didn't get licensed til 1966? Applying your logic, "when did you finally wake up?" So what if this guy just "discovered" GMRS and FRS? Lets not put down folks who just learned of the sevice or that it might be useful to them. Too much negative on here already.

February 16, 2000

CERTIFIED MAILï¿½RETURN RECEIPT REQUESTED

Mr. David J. Tolassi

136 Sterling Hill Road

Barre, VT 05641

Subject: Amateur Radio License ï¿½New Call Sign

KB1EVE

Dear Mr. Tolassi:

On September 7, 1999, you were notified that your license had been downgraded to General Class as a result of your not passing the Advanced Class examination. You had been re-called for testing pursuant to Section 97.519(d)(2) of the Commissionï¿½s rules, 47 C.F.R. Section 97.519(d)(2), on June 18, 1999.

As a General Class licensee, you can no longer use the Advanced Class call sign KC1ZQ. Your new call sign is KB1EVE. You should receive your license document shortly. The expiration date remains the same.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

Enforcement Bureau

>> with their opinions, if you don't mind.
>
>Why don't you state some sources?

Morris county NJ supports the 147.895 repeater with
taxpayer dollars. Many of the townships in the county
have active ham RACES groups which the towns
support to some degree with funds for equipment, etc.

>My statement stands - in today's world, it has become "fairly
>useless".

Your statement (IMNSHO) is false.

>Especially when you apply it to everyday life.

It is what each person makes of it. My 60 mile commute
becomes much more enjoyable because of ham radio.
Of what use is playing golf, softball, fixing antique cars,
flying model airplanes, etc? You have the wrong perspective
if you only measure the meaning and value of ham
radio in the narrow perspective that you do.

>If you start
>talking about emergencies, well it becomes a little more useful - but
>not much. FEMA can handle things pretty well these days. They don't
>need a bunch of "Amateurs" getting in their way.

FEMA does NOTHING in the way of emergency
communications on the state, county and local scene.
I suspect you have minimal understanding of the
role FEMA plays in the grand scheme of things
having to do with emergency preparedness.

>FRS and GMRS have far less frequency space, and are severly limited by
>power and antenna restrictions, but yet they are much more useful
>services to the common man.

Hey, we hams have never been viewed as being
common anyway.

>> Hams, on the other hand, have no such dependence. It's the *only*
>> communications medium in which any two operators anywhere in the
>> world can communicate directly without using government or commercial
>> communication services. Those same two operators don't even need to

Well, there's two issues here. One is the people who PASSed
the 13WPM and are still lids on voice.

The other is the people who USE CW for fun.

No arguement, people who use CW generally are more well-
behaved when they use it. And I'd even have to say they are
more well-behaved in general as HAMs. But then, I think
that's more a function of the fact they enjoy the hobby for the
'communication' aspect.

The people who have passed CW to 'get something' and then
are idiots are the other point. They are generally the loudest
people for the arguement of "I did it you should too" for maintaining
CW as a requirement. And they are loud and obnoxious in general
as well.

The CW operators on the other hand are on average more mellow,
although they do have some die hard idiots there too, but they
DO seem to behave themselves when in the CW bands.

Mike

One important aspect of both GMRS and FRS (as well as
many other services) is the ability of manufacturers to
produce the equipment for those services that is
small, easy to use and reasonably priced. THAT
was not the case for GMRS in the early days. Just
look at the size and ease of use of an FRS HT
today. FRS HTs can be had for under $100 for
a pair. A friend recently bought a pair (only
had 2 channels) for $40 at KMART. Now that the
equipment is more available at affordable
prices, more people will use (discover?)
those services. Some of those new users
of cheap FRS may then look into ham radio
as offering greater capabilities and enjoyment
beyond the simple short range personal comms..
We (the ham community) should encourage those
folks to do so.

Cheers,
Bill K2UNK

> including CW.

What's just not true is your claim, Cecil. Knowledge of propagation and some modest but decent antennas will put lie to your statement. You need to put your signal on the right band at the right time. With the exception of the three years I was in Finland and not as active on the air as usual, we've managed weekly Sunday skeds for the past thirteen years on 20 or 15 meters. An honest estimate of the number of times we've missed connection due to non-existent conditions would be less than ten times--even during the periods of solar minima. That's Cincinnati, Ohio to West, Southern and now East Africa.

'JOC runs less than the legal maximum power and his antenna is a four element Mosley tribander at about 40 feet. I have an identical antenna at 50 feet. This one doesn't require an engineering degree or a Mensa membership. Choose your band; choose your time. To say that the path is usually not there is baloney.

Well lets start with on amateur packet or any ham freqs you can't discuss anything business related. Nothing that can be business at all. So if I send a message to my friend that I work with and we talk about what we are going to do the next day or about a stupid customer that can't get logged on because they are using their password for their user name then we just broke the law. Chances of getting caught are slime to none but it is not legal. Packet on FRS would be great. We use it to talk about things all day long and it would be nice to be able to send messages that the casual listener would not get. Are the scramblers legal?

Hello, and I hope someone has what I need.

I recently purchased an R4C, and I would like to get some addtional
2'nd IF crystal filters for it. Specifically, the 1500, 250, and 125
hertz ones. They don't have to be Drake brand, but they do need to be
a direct plug-in (on the back of the rig) and fully operational.

Please call or email info with prices to:

NeilR@innermedia.com

Thanks all!

Jim, it's not the test that's a filter, it's the actual use of CW
which acts as a filter. Go down to the low end of any band and listen
to the CW QSOs -- you'll hear none of the nonsense which occurs on
the phone portions of the bands. Even the riff-raff can pass the code
tests.

Banning phone would clean up a lot of problems very quickly.

I think you would be OK. You can't use the Ham frequencies to promote
your business. Ie: you can't talk about how good your company is. But, you
can talk about stupid users and such.

I said "fairly useless". Big difference between "fairly useless",
and "absolutely useless". When you leave off those little words, you
can really change the meaning of things. I'd like to see the service
made at least "moderately useful".

There's a difference between racism and anti-Semitism. Herbie lives on a black island can ill afford to be perceived as against skin color. However when a man gets on ham radio and persecutes the Intercon net because according to his own words, "It's a Jewish organization set up to steal monies from phone companies," that makes him an anti-Semite. Okay?

> allowed there.

Yes, you are right. However, you are a bit late with your input; if you look at the response to my own post regarding whether packet was legal on FRS(on alt.radio.family), I posted the excerpt from the pertaining FCC regulation yesterday.

The fact that digital communications are allowed on GMRS/FRS is more incentive for FRS/GMRS folks to move to the Amateur Service.

> GMRS started back before CB. CB is listed as CLASS D and GMRS is

... in how many words?!
Jokes apart, if you are intersted, you shoud buy a
book on the subject.
There's a long way between the micro and the antenna!
Too long to explain here.
Good luck. 73 de IK2VTJ, Piero.

No, you can not conduct business on the amateur bands, but you can have the conversation you mentioned below and it would NOT be against FCC regs.

Yes, packet on FRS would be interesting, but it IS against FCC regs.

In defense of Mr. Tolassi, I think he has made a ham radio first.

He (to my knowledge) is the first and only licensed operator that
tested and downgraded his license class. Amazing ain't it?

This term "anti-Semitism" is a deuced odd one.

Apparently, burning 100,000 Semitic Iraqis alive with firebombs
after they had surrendered was not "anti-Semitic." And the
massacres at Sabrila and Shatila of largely Semitic Palestinians
have never been termed "anti-Semitic."

Yet, if Mr. Schoenbohm merely asserts that some small group of Jews
have engaged in shady practices, that statement, even if true,
apparently _is_ "anti-Semitic."

Bizarre!

With every good wish,

1363. Important info for Dimmy O' Brainless..Defining Gross Obesity For Jimmy "Dough-Eater" O' Brien

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-16 00:00:00 UTC
From: KC8JBO <kc8jbo@my-deja.com>
Message-ID: <8arge6$4sm$1@nnrp1.deja.com>
Source record: 116827

Dear Hiram, GA Fats,

Recently, it as come to the attention of many that you are one big, fat, fucking tub of lard. Disgustingly fat in point of fact.

Seeing as how you are so much fun to poke with clue sticks, we'd hate to see
you go and snuff it before we are finished with you.

With that in mind, we provide the following information. Heed these life saving facts well, oh eater of cookie dough, for unless you do, you will surely drop dead well before you really need/want to.

Gross Obesity Defined:

Gross obesity is defined as weighing more than twice your ideal weight or
being more than 100 pounds overweight.

What are the risks of being Grossly Obese:

Obesity is a more serious condition than being overweight because there is a
greater risk for serious illnesses. Excess weight in all parts of the body
puts an added burden on all body functions. The most common complications are:

- high blood pressure
- stroke
- heart disease
- diabetes mellitus
- osteoarthritis, a disease of the joints causing pain, swelling, and stiffness
- impaired functioning of the heart and lungs
- gallbladder disease
- hyperlipidemia, or increased fats in the body, often associated with higher
cholesterol levels resulting in heart disease and/or stroke.

If you are grossly obese, it may be more difficult for you to obtain such
health care services as good physical exams, x-rays, and surgeries. In men,
obesity can lead to increased risk of cancer of the colon, prostate, and rectum.

How is it determined that one is Grossly Obese:

One measurement of obesity involves determining the BMI (Body Mass Index). The
BMI is calculated thusly:

Weight (in Kg.) / Height.(in Meters) Squared (Ht. x Ht).

What is a "normal" BMI:

A "normal" BMI is about 22 to 23. A BMI of greater than 25 is generally considered overweight. A BMI over 30 is considered obese (World Health Organization Criterion).

What is Jimmy's approximate BMI:

Assuming a height of 6 feet, and a weight of 300 pounds, Jimmy's BMI works out
to a rather stomach turning 40.72. By all medical definitions this is GROSSLY
OBESE.

What Jimmy can do:

- He could choose to purchase a triple blade razor and shuffle off this mortal
coil with some quiet dignity. Having no diginity, this appears unlikely.
- He could have two appendages amputated to realize an immediate reduction in
total body weight. His head and ass would seem to be appropriate.
- He could have his mouth wired shut to reduce his doughnut/raw dough intake.
- He could have his stomach stapled and a portion of his small intestine removed. The gerbil will appreciate the freedom.
- He could have a Hoover vacuum cleaner nozzle inserted under his skin and the
fatty deposits sucked out. Excess skin would also then be surgically removed. No doubt many burn victims would benefit from this.
- He could confess the inner failures that motivate him to over-eat.
- He could get off of his fat ass and get some exercise. Again, unlikely.
- He could just have that heart attack/stroke and succumb to his manifest
destiny of a lonely, unnoticed, but deeply appreciated demise.

I deeply regret having called you a fat fuck Jimmy. I was selling you much
too short. You are a Grossly Obese fucker. I won't make that mistake again.

Have another tube of cookie dough, and think about what your poor overworked
heart is going through. The next time you struggle to get up off of the toilet, and the sweat is streaming over your rolls of fat, think about

the
searing pain of a massive coronary. Maybe you'll be lucky, and it will
be a
quick stroke instead. Yeah, focus on the positive angle, Jimmy.

Tear into that bag of Cheezies and pause to consider the fact that
people who
are *not* Grossly Obese can actually look down and see their feet.
Without
being out of breath and red in the face.

When the Dunkin' Doughnuts truck makes the daily delivery to your hovel
think
about the fact that each one of the crullers you slurp is reducing your
time
on this planet. And that when your time comes they will be planting you
in a
piano crate, not a nice comfy coffin.

And when you do feel the pressure of that heart attack that is just
around the
bend, consider the source to be *yourself*. You alone are 100%
responsible
for the sad sack shape you are in. You've eaten yourself into an early
death,
and there is _nothing_ you can do about it.

That razor is sounding better all the time, isn't it Jimmy?

Now tell some more lies over the air again, Fatso.

NO. The FCC has stopped issuing and renewing RACES
callsign licenses. In any case, call it RACES, ARES, or
whatever, it has NOTHING to do with the FCC except that
we are all licensed hams. The county of Morris still
supports it, RACES or not.

1372. help wanted on 433 MHz Transmitter project

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-16 00:00:00 UTC
From: Claudia Graf <cgraf@datacomm.ch>
Message-ID: <38d02bc4@news.datacomm.ch>
Source record: 116843

For a very special purpose I built a radio beacon transmitting on 433.92
MHz. As transmitter module I use a
Radiometrix (www.radiometrix.co.uk) tx2 transmitter. Its output is 10mW on
50Ohms. The beacon is controlled
by a Pic Microcontroller.
Everything works so far, but what I need is a better output of about 300 mW.
Can it be done with just a few parts ?
The PCB board which I will design has to be as small as possible (the 10mW
version is 1.5 X 0.5 inches...)

Can anybody help me ????

Thanks
Chris

I can be reached under cgraf@datacomm.ch

They are going to three license classes Technician, General, Extra; and are eliminating new Novice, TechPlus and Advanced licenses(although existing licesees will maintain their priviliges and can renew them indefinitely).

The 13wpm and 20wpm code tests have been eliminated. In addition to the regular written tests, one will only need to pass a 5wpm test to become a General and Extra.

Those wishing to enter the hobby as Technicians now will need to pass a single 35 question written examination. Previously they had to pass two examinations containing a total of 65 questions.

The rules go into effect April 15th. There is one other issue affecting you as a TechPlus - if you take and pass the 30 question General written examination(or have proof you already have passed one in the last 6 months), then you can apply for an "instant General" on 4/15/2000, and avoid the new 35 question General examination(to be honest with you - there isn't much difference). If you're are not going to get on HF - why bother upgrading? I may do it, but only because I will be taking my kids down to get examined, and won't have anything better to do.

CLIFTON, NJ [UPDATE]: The FCC sent a Warning Notice March 1, 2000, to Amateur Extra licensee Charles Schwartzbard, AF2Y, advising him that the FCC has information indicating that the licensee has been "engaged in deliberate interference to the ongoing communications of licensees W4FQF and KB4MXL on the 20-meter amateur band." FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth noted that this was his second warning to Schwartzbard regarding deliberate interference. He warned Schwartzbard that if the FCC learns of or monitors "additional instances of this behavior" it would designate his amateur station license for a revocation hearing and his operator license for suspension. The FCC had written Schwartzbard last fall, citing information indicating that the licensee "may have ignored requests from other licensees operating on adjacent frequencies to correct your transmitter emissions in accordance with good Amateur practice." At that time, the FCC requested information from Schwartzbard regarding his use of a linear amplifier, automatic level control, an microphone gain settings for his home and mobile 20-meter operations, as well as other relevant information. Hollingsworth again cautioned the licensee against "airing personal conflicts with other licensees on the Amateur bands." Hollingsworth told the ARRL that Schwartzbard did not dispute the allegations outlined in the FCC's letter. Copyright © 2000, American Radio Relay League, Inc. All Rights Reserved.

1376. Facilitator (Tutor) Required AR

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-16 00:00:00 UTC
From: Ron <ron@internetexpress.com.au>

Source record: 116847

Hello -
A group of 7 Australian Amateurs provide a free online line Amateur
Radio and electronics course.

http://members.xoom.com/ronber/amateur.html

The student downloads readings in Adobe PDF format in their own time
and studies them. An assignment of roughly 20 questions is emailed
to the student - when returned it is assessed and any helpful comments
give.

For a full description of how the online course operates please got
to the URL and read about this course

WE NEED A FACILITATOR(S) IN THE U.S.A
==========
The Australian group of facilitators is pretty flat out. We take on students
from anywhere in the world. We are trying to get additional facilitators in
AU. We are getting increasingly greater numbers of requests from the
USA and could REALLY use a facilitator(s) there to run the course as
we do or as you choose.

We can provided all assignment sheets (to a facilitator) and model answers
and assist the facilitator with any problems

There is a message board available from the web site where all students
and faciliators can communicate 'globally' though most communication it
direct facilitator-student facilitator-facilitator

We do not like to turn anyone away - if you can join us please visit the
site - read "About this Course" and look around - Then if you think you
would like to be a faciliator in the US please drop an email to Ron
WE NEED YOU and AR needs you.

This course is totally free - no fees or any charges are implied, requested,
or sought or for that matter wanted.

Please consider

Yes and growing.

There are repeaters, but they are few and far between. If you buy a rig, get one with sideband and at least 100 watts. You will appreciate 6 more with the right equipment. Many HF rigs come with 6 at 100 watts or more.

6 is also much smoother and easier to work in a mobile in rough terrain. That is why the utilities and government still use lowband fm in rough and rural areas.

Good luck.

Radio Oger

Source record: 116856

Now there is an open question. Typically, in times of low solar activity, here in the NYC area there is very little activity on 6 meter SSB. A few stalwarts inhabit the band and there is a low level of answers to CQ's.

Six is a very strange band. It has all forms of propagation. At various times during the year a form of propagation called sporadic E enables communicatiion generally between 700-1200 miles. This E layer skip can last from a few minutes to hours. The areas often change...here generally from south to west.

F layer skip comes at periods of high solar activity. This year being a peak year one could expect some major F skip with world wide communication possible.

When the conditions are good...6 meters sounds like 10. And I suspect it will get very crowded very quickly.

At other times 6 is subject to aurora propagation, ducting and other things I can't even name. It can be very exciting for the serious weak signal devotee.

However, a warning. During most of my 35 years on six, except for some periods of very high activity back in the mid fifties to early sixties when the only SSB band for Technicians was six...the band is quite dead. It's really a bunch of guys listening for the band to open.

My best advice is...if you are not into weak signal...and you are looking for a place to "rag chew"...I wouldn't select six. If you have it in your Xcvr and all you need to invest in is a three element yagi (rotator mandatory) at 40 feet,give it a shot.

KK7HO decreed:

>
>There is only ONE viewpoint presented on the "So called" net Kevin.
>
>

That's not true. Although the participants tend to agree on many things, they most certainly don't agree on everything. Like-minded people tend to associate together. What's wrong with that? Even YOU have stated over the air that you agree with many things that are said on the Net.

But even if there WAS only one viewpoint ... SO WHAT? WHAT BUSINESS IS IT OF YOURS? TURN THE DAMN VFO IF YOU DON'T LIKE IT!!!!

>
>Again you've proved nothing.
>I allege that he's a KKK member, along with the christian identity cult.
>

So? What if he IS those things? SO WHAT? Who the hell are you to tell people what they can believe? This is the United States, Tim, not the Soviet Union .... or at least it USED TO BE.

It didn't.

I wasn't referring to the "test", merely that overall I find less
obnoxious behavior in the CW sections / with CW ops than I do in the
phone segments. Occasionally there's some yahoo sending "FU" , a
little carrier swishing etc (probably just slid down from the phone
freq's for a minute or two ;-)) but *far* less nonsense than
you'll find on the phone freq's.

That's fine if they don't mind being leashed. The poor folks are help-
lessly dependent upon untold billions of dollars of computer equipment
belonging to thousands of corporation, interconnected by millions of miles
of cable, staffed by thousands of workers putting in tens of thousands of
man-hours per day to keep that incredibly complex system running.

Hams, on the other hand, have no such dependence. It's the *only*
communications medium in which any two operators anywhere in the
world can communicate directly without using government or commercial
communication services. Those same two operators don't even need to
purchase commercially-built radios -- they can build their equipment
themselves.

What if we're using homebuilt equipment? Does that count?

What if we're on phone? Packet? RTTY? SSTV?

Is it the mode which bothers you, or that we're playing chess?
If it's the chess game that troubles you, what would be an
acceptable QSO content which would qualify as "ham-radio"?

There are literally thousands of QSOs which take place daily,
covering every possible conceivable topic; which of them fall
into your "ham-radio" category?

Note that we also play chess by Internet, too. Do those not qualify
for your definition of "e-mail"?

Why don't you state some sources? And what do you mean we?

My statement stands - in today's world, it has become "fairly
useless". Especially when you apply it to everyday life. If you start
talking about emergencies, well it becomes a little more useful - but
not much. FEMA can handle things pretty well these days. They don't
need a bunch of "Amateurs" getting in their way.

FRS and GMRS have far less frequency space, and are severly limited by
power and antenna restrictions, but yet they are much more useful
services to the common man.

You are starting to drift off subject. Folks migrating over from FRS/GMRS aren't going to give a rat's behind about talking to Igor in Kamchatka. They want to be able to keep track of their friends and loved ones on public outings, camping trips, visits to the zoo, parks, Disneyland, the mall, sporting events, the beach - and eliminate the fear of not knowing where their children are; for a reasonable price, without having to support the lavish lifestyles of the CEOs of Qualcomm and Nokia Corporations.

Right now, vast fields of perfectly useful VHF and UHF frequencies sit virtually idle.

What is wrong with trying to recruit more hams, and make the service more useful? Don't worry, you won't have anything to lose, they won't care anything about your sacred, miniscule and noisy HF bands.

1398. Question on FRS antenna type and length

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-16 00:00:00 UTC
From: horseshoestew@my-deja.com
Message-ID: <8aq9ot$8e7$1@nnrp1.deja.com>
Source record: 116869
Cross-posted to: alt.radio.family,rec.radio.amateur.misc

I was looking at the FCC regulations on FRS antennas, which reads as
follows:

95.645 FRS unit and R/C transmitter antennas.

The antenna of each FRS unit, and the antenna of each R/C station
transmitting in the 72-76MHz band, must be an integral part of the
transmitter. The antenna must have no gain (as compared to a half-wave
dipole) and must be vertically polarized.

Obviously the FRS radios aren't using a 1/2 wave dipole, as it would be
.3 meters long for the frequency the FRS radios operate on(~465Mhz).
But what kind of antennas ARE they using, and what kind of radiation
patterns do they have?

Hello -

This is a second posting as no replies as yet

A group of 7 Australian Amateurs provide a free online line Amateur
Radio and electronics course.

http://members.xoom.com/ronber/amateur.html

The student downloads readings in Adobe PDF format in their own time
and studies them. An assignment of roughly 20 questions is emailed
to the student - when returned it is assessed and any helpful comments
give.

For a full description of how the online course operates please got
to the URL and read about this course

WE NEED A FACILITATOR(S) IN THE U.S.A
==========
The Australian group of facilitators is pretty flat out. We take on students
from anywhere in the world. We are trying to get additional facilitators in
AU. We are getting increasingly greater numbers of requests from the
USA and could REALLY use a facilitator(s) there to run the course as
we do or as you choose.

We can provided all assignment sheets (to a facilitator) and model answers
and assist the facilitator with any problems

There is a message board available from the web site where all students
and faciliators can communicate 'globally' though most communication it
direct facilitator-student facilitator-facilitator

We do not like to turn anyone away - if you can join us please visit the
site - read "About this Course" and look around - Then if you think you
would like to be a faciliator in the US please drop an email to Ron
WE NEED YOU and AR needs you.

This course is totally free - no fees or any charges are implied, requested,
or sought or for that matter wanted.

Please consider

You've probably heard me mention a time or two the Amateur Packet Radio network in Europe being much more advanced and developed than anything in the US?

Well, the CB operators over there are better off too. They CAN and DO use digital, and operate a CB BBS network similar to that used by Hams. It's legal over there.

Before you post maybe it would be a good idea to review the rules
for the service you are talking about. This way there will be no
issue in what you write.

Also by reading the rules for GMRS you will see that packet is not
allowed there.

GMRS started back before CB. CB is listed as CLASS D and GMRS is
listed as CLASS A. Go to the FCC WEB page and look up the
information you ask.

RC controllers are assigned to the 6 meter band. Go to the ARRL WEB
page and look at the 6 meter band plan. I don't know the
frequencies on six.

Hey, guys and girls,

I know what let's do!

Let's pass the hat and buy dump huck Charles a big honkin' CB rig and a
train ticket to Europe and we'll be rid of his constant whining and
burping.

And that's the way it is!

Walter

You neatly diverted the issue, Dave, which was the claim that:
"any two operators anywhere in the world can communicate directly".
My financial condition is NOT the issue. The basic question is
can two average hams, located anywhere in the world, using average
dipoles and average 100 watt transceivers, communicate directly
on HF anytime they want to. I say the answer is NO! I tried it
multiple times with G4FGQ and we could not carry on a QSO.

I'll ignore his disgusting call for my death and his personal
insults, since I have learned that AF2Y is not susceptible to reform
or ethics.

But I must point out that Andy was on the Liberty Net the last time
I listened a few weeks ago, and AF2Y is just, well, doing what he
does best.

With every good wish,

You have lost track of the issue which is - is the following statement
true or false?

"... any two operators anywhere in the world can communicate directly ..."

All operators don't have 40' towers and TA34's. The average operator has
a dipole and 100 watt transceiver. The statement said "any two operators".
Does that mean two operators using 5 watts to attic antennas? If not, the
statement is false.

Oh dear, you don't know, do you? Dave is an expatriot, chock full of license class prejudice.

> Most likely, you never worked the guy.

Oh, I'm certain that I've never worked the guy at his present QTH.

> That would explain why you aren't in his log.

Yes, that would certainly be the reason I'm not in his log (???). Yet I'm provided with a different reason that I'm not in his log. That wrong reason is that I'm not a DXer.

> Brian, you really aren't an idiot, are you?

No, but I'm beginning to think that I'm surrounded by them.

> band different from a serious band??

But I did. You obviously did not read my reply. I don't think that there are any "kiddie bands." Some Extras that I know think the 10M band is the kiddie band. I was just trying to confirm if ALL Extras thought that it was the kiddie band. Do you think that there are kiddie bands?

Again, I missed nothing. You presume too much.

> You wanted a definition for a 'real DXer' and I gave it to you.

And it was a fair description. You seem to have a knack for making relatively obvious declaratory statements.

> If you want to be a 'real DXer' then you go out and EARN the license needed to do it, and
> quit moaning that life is
> unfair, that there is license class discrimination, and that you somehow have been
> mistreated.

I've earned the license that I have, and I've enjoyed working so much DX with my current license class. I feel no shame in the many thousands of QSL cards that I've sent abroad (via the buro). You and Dave however, seem to think that doing DX isn't doing DX unless its being done by someone of a higher license class than the one I have (can't let the kiddies have any fun). That of course, is your mistake. You'll get over it someday - when maturity sets in (maybe).

> (Actually Brian, you CAN get DXCC on 10 meters, but then I can't see you
> doing something like that.)

But of course. And so license class discrimination rears its ugly Extra head again. You've been outed. Why is it that whenever there is a bad attitude to be found, I can usually peg the license class of the owner? But I do have to wonder why you don't have a spiffy 1x2 Extra call. I mean your previous call was a 2x2 as well. What did you gain?

After 15 April, it will be much harder to identify the bad attitude Extras because they will be diluted with so many new guys having lots of good fun. But rest assured, when a bad attitude ham rears his ugly head...

Dave, I don't think that you're low enough slime to avoid working me because of my license class. You've never worked me because I haven't been of HF in some time. But you have yet to explain to me why you say that I'm not a DXer. It would be an easy enough thing for you to do, but you just don't seem capable. Is it my license class?

> > > I would love to know how you differentiate a kiddie band from a

I'm happy enough with my current license class. Don't blame the ARRL DXCC desk.

Dave is especially good at diverting the issue. Pointing it out does not get him back on track. The only way to beat it is to continue down the road of inanity that he paves.

Gary Danaher wrote:

> Brian,
> Let me understand this. You don't work HF frequencies.

Not often - rfi tears up my neighbors tv reception. He's a WWII vet and a POW. I respect him
too much to upset him.But I did fill up just a few logs (HF even!) in the Republic of Korea,
Guam, and Somalia.

> You are complaining that an operator in Tanzania hasn't worked you.

No. Where did you get a silly idea like that? I don't care to work him. What's another Tanzanian?

> Further you
> are are complaining that he hasn't worked you because he discriminates
> on the basis of license class?

No. Where did you get a silly idea like that? He couldn't have possibly worked me since he first moved there because I've been relatively inactive.

> Humm.

Humm? Humm yourself.

> And you can't figure out why you aren't a 'DXer'?

But I know that I am a DXer. I'm not the one that can or cannot figger it out. Dave says I can't be a DXer. And he says that I'm not in his log. I'm just trying to figger out if I'm not
a DXer because I'm not in his log. He's not very specific and maybe thats what has lead to your
confusion and mine. But you do seem a little thick.

> Just a wild guess here, but don't you have to get on
> the air first?

I've been on the air. Helloooo?

> Why do I feel like I am having a discussion with a chimp?

You have simian tendencies? Check for opposing thumbs before replying.

> If you feel you are having problems with other hams because of something
> like your class, consider the possibility that it might be something else.

Yes, thats what I'm doing. I'm trying to discover why Dave might think that I'm not a DXer. He
doesn't say other than mentioning that I'm not in his log.

Thanks Gary, I'm still trying to get a handle on what a "real" DXer is and does. You haven't made it any easier for me. Darn! Maybe it was the band. What band did you use to contact Dave? Was it a real serious band like 20M, or was it the "kiddie band," i.e., 10M?

Greetings:

Thanks to all who have answered my previous question.

I have another perhaps minor question to clarify....

I just got my verification from the FCC stating that my tech plus was indeed issued before the 1987 cut-off. Now I come to find I can't find the actual ticket itself!! Question: when I go to the exam to upgrade to extra on 15 Apr, will this letter suffice....or do I now need to get a replacement ticket for the old tech lic that I will be obsoleting when I take the extra exam anyway?

Kiddie band? You really don't have a clue, do you? Without checking logs, I should imagine I've had contact with him on 10, 15, 20, and/or 40. I would love to know how you differentiate a kiddie band from a serious band. Honest. I've never heard anyone address them this way. Must be a carryover from CB or new to the block??

A real DXer tries to make a contact with a station in every DXCC entity on every band on every mode. Does that explain it?

Hey, I had a Siltronix 1011D!

Seriously, I first read this and thought "another reason to not drop the code req to 5 wpm". I then read that these guys had passed the 13wpm test and almost fell out of my chair. I guess just keeping the code req intact won't keep the "undesirables" at bay.

Gary, explaining what DX is to Brian is like trying to explain Einstein's theory of relativity to pond scum. It may look like it understands but it hasn't even got clue 1.

Maybe Brian can enlighten you as to his hundred's of dx contacts from Europe when he started up the fascinating pileup after rag chewing with an *I* station. Better yet, have him tell you the secrets of working 1000's of no code ja's.

But try not to get him started on his asinine comments on the ethics of qsling direct with a greenstamp or even an SASE..it's illegal

The rule says that you must have proof. It doesn't say that you need the expired license. An FCC document attesting to your previous date of licensing certainly should suffice.

The FCC didn't see it that way. They reiterated that the Morse code test
was meant to serve as an indicator of Morse skill, and nothing more.

> what has to be done to get one.

Are you saying that people who own Lexus's are somehow better than those
who own KIA's? That some greater morality is conveyed by being able to
afford the extravagance of an expensive car?

Your analogy, like most analogies, is flawed.

> In this case, amateur radio with full HF access required a series of

> restructuring has cheapened the process of attaining an amateur radio
> license.

"Cheapened"? I prefer to think of it "made it more affordable", by
reducing arbitrary and costly regulations.

> You see, when it's easy to get something, it doesn't have much value.

Typical crap. Many things are hard, but don't have any value, and
many things which are easy have plenty of value. I could dig a deep hole.
It would require lots of effort, but it probably wouldn't be valuable.
I could with reasonably little effort father a child, which certainly

would have lots of value.

Is someone who finds it easy to learn Morse code _less_ deserving of an amateur license than one who finds it harder? Taken to it's logical conclusion, this implies that stupid people deserve more than intelligent people, because passing the technical part of the test required more effort than for smart people.

> You don't appreciate it. You don't even care if you keep it. To those of

Have you not noticed that ham radio is now channalized, just like
CB....

Adam,

CLA-CMZ callsign block is assigned to Cuba. QSW means "Will you
transmit on_________?" QSX means "Will you listen for______on_____?"
Thus I surmise it is a Cuban HF point to point facility. I have set my
seperate receiver to 13.062 and see if I can be of further assistance.

An amateur studies to get his Extra so as to get privileges in the
Extra portion of each band. There are only other Extras in those
segments. QSOing with other Extras, who is he bragging to?

That makes me wonder why folks feel the need to put up 200' rotating towers and 3 element beams on 80M. Are they wasting their money?

Gary Danaher wrote:

> Kiddie band? You really don't have a clue, do you?

Gary, of course I have a clue. Its the OFs that have referred to it as the kiddie band that don't have a clue.

> Without checking logs, I should imagine I've had contact with him on 10, 15, 20,
> and/or 40.

He says I'm not in his log, so that must be what he means when he says that I'm not a DXer. Or it could be simple license class prejudice.

> I would love to know how you differentiate a kiddie band from a
> serious band. Honest. I've never heard anyone address them this way.

I have, and its not from the Techs that are thrilled with its world-wide communications capability. Maybe thats it - the Techs are there undeservedly or something like that.

> Must be a carryover from CB or new to the block??

Them's some pretty old CBers with some pretty old ham calls. I've even heard it from people whom I respect and should know better.

> A real DXer tries to make a contact with a station in every DXCC entity
> on every band on every mode. Does that explain it?

Believe me Gary, I understand. Of course, if the FCC regulations don't permit me to operate on every band, I hope you'll forgive those empty spots in the 5BDXCC. Thats probably why the ARRL offers the 1BDXCC.

1444. AF2Y is puzzled

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-17 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8au1s2rqr1@slb6.atl.mindspring.net>
Source record: 116656

Go to this URL:
www.avotec.com
Up will come K2IVX's website. He's Len Schaier who hangs around .313 and this board. One of the links says,"Len Schaier's Favorite Grandchildren-There not all mine but they are stilll my favorites."
Then you'll read "This page and some related pages are experimental and under construction."
His English is experimental and should be reconstructed. The man has a beautiful rï¿½sumï¿½, is a skilled electrical electronic ham radio computer technician magician clinician but doesn't understand that there's a difference between "there" and "they're." Hell, it's FUNDAMENTAL grammar. I learned it in the 5th grade. He should have written "they're" not "there" because the former is the contraction for "they are." "There"is an adverb telling "in what place." I know what I'm talking about because I have a working knowledge of 2 foreign languages; I tutored German and Spanish plus a bit of English in the side pocket. Furthermore my Spanish course."Hola CQ-A Spanish Language Course for English Speaking Hams" was taken along by astronaut Owen Garriott (I forgot the exact spelling of his name) on his mission in the '80s for which I received letters of commendation by NASA and him. Also my course was used in every FCC Field Office in this country until Gingrich cut off their funding. And word has it that my German course is now being used by Strom during goosestepping practice.
Getting back to Mr. Schaier, he offers links to four grandchildren- Tyler Ethan Schaier and knowing about Lenny's unskilled English, he probabaly wanted to name the kid Taylor and Tyler was the closest spelling he could muster; Elizabeth Spiegel possibly related to the catalog; Alex Hines unrelated to ketchup since the product is Heinz and Jake Langberg. What the hell is going on here? Is he running a day care center or a highly sophisticated transistor trap? Something funny's going on and I want to find out if Mr.Schaier is licensed to be operating either a nursery school, day care center or pediatric ward on Long Island.

Whoa Mr. Sherin. Is this the same Bob Sherin who, on the air for eons, fought for "Herbie baby". Congrats Mr. Sherin--you have seen the light. Herbie not only would steal the pennies off a dead man's eyes but when no one's looking, would pluck the stiff's baby blues out of its sockets and sell them to an eyebank.

Interesting Mr. Maus. Can you imagine how easily Hilter could have ruled the world had he not had such an obsession about Jews. He could have had not only the genius of Jewish Einstein working for him but other Jewish geniuses as well such as Edward Teller, Enrico Fermi and others who developed the Manhattan project which ended up as fireballs over Hiroshima and Nagasaki. And who knows how the world could have prospered from much of the brain-power destroyed through extermination? My God, they could have developed a synthetic brain to replace Lloyd's sawdust.

In 5H as far as I know there is only one class of license, so no, there
is no 'class prejudice.' Most likely, you never worked the guy. That
would explain why you aren't in his log. Brian, you really aren't an
idiot, are you?

You still didn't explain anything at all. Come on now. How is a kiddie
band different from a serious band??
>
> > Must be a carryover from CB or new to the block??

Be careful of the people you claim to respect. It doesn't speak well for
your ability to select friends.
>

Again, you missed the point. You wanted a definition for a 'real DXer'
and I gave it to you. If you want to be a 'real DXer' then you go out
and EARN the license needed to do it, and quit moaning that life is
unfair, that there is license class discrimination, and that you somehow
have been mistreated.

(Actually Brian, you CAN get DXCC on 10 meters, but then I can't see you
doing something like that.)

Doc my friend,

Despite Herb's failings, he was indeed persecuted, along with the fabricated evidence. In the end, though, he became his own persecutor--and prosecutor.

Herb's story is not over. Hopefully, he'll set his life straight, thereby redeeming himself. Herb Schoenbohm has so very much good to offer the world!

Actually, the R&O makes no such claim. Procedurally, the FCC may accept it, and the ARRL says so in its interpretation of the R&O, but nowhere does it say anything like "... expired license OR EQUIVALENT ..." in the text of the R&O. However, the current license (or expired within the 2 year grace period) isn't optional.

Cecil has, in the past, alluded to his pile of investments and has tried
to impress with the loot he made at Intel. Now he's calling me rich and
he refers to himself as an "average" guy who can't afford a beam or an
amplifier. Either he was B.S.ing earlier or he is now. He can't, by
his own admission, be taken seriously.

It could be a baloney sandwich too but it isn't. It could be that you
have never heard me because you're busy here. It could be that you've
never been able to crack the pile because if you were any weaker you'd
be receiving. If I'm running stations at 200-250 an hour, do you
actually believe I have time to check a guy's license class before he
goes in the log?

I'm happy to report that Chip (the ol' man himself) will be on this weekend on 10M with the Fractal Quad Yagi, working Europeans. He will be on about 1300 UTC somewhere in or near about 28490 to 28500 KHz. He will try (but no promises) to get on both days of the weekend so take a listen to see how that lil' fractal antenna plays! Usually he stays on an hour or so.

Background info can be found on the ham page on

http://www.fractenna.com

Chip's fractal antenna work has appeared in RadCom, Practical Wireless, World Radio News, 73, Communications Quarterly, Radio Revisita, Monitoring Times, QTC, Scientific American, Discover, Science et Vie, and many other magazines.

Hear and work the latest innovation to the world of antennas from Chip himself:-)

Yep, been listening off/on this afternoon to them. They are sending
message traffic. Most originating from Havana (at least for now).
They are receiving on 12 mhz. Not being profecient in Spanish all I
can copy is the format and the Spanish text. BTW they are using a bug.

Sigh. I'm going to try and explain this once, but I don't think you'll get it. Perhaps "service" wasn't the right word. Let's try "activity." It (the code test) was a commitment-to-activity test.

You see, when there is something valuable to be had, it's value is largely a function of its accessability. If you want a Lexus, you have to jump through a lot more hoops to get one than if you were satisfied with a KIA. No one tells you to get a Lexus, you decide on your own whether you want one. Oh, you are subject to marketing and other psychological effects, but only you can decide whether you want to do what has to be done to get one.

In this case, amateur radio with full HF access required a series of steps to be followed. Everyone had their own reasons for getting their General or Advanced or Extra. Some elected not to do it at all. But it was never "bragging rights." The bragging rights came from attaining Honor Roll, or BPL, or Top Ten in SS, or WAS, or participating in SET or RACES. Some of those achievements were facilitated by a higher license (higher than General), but none required it.

What you people in your 20s and 30s don't realize is that the restructuring has cheapened the process of attaining an amateur radio license. Maybe you don't care as long as you get your HF access. One pig-head, who has been rah-rahing the new regs ad nauseum, is already pooh-poohing HF entirely. He didn't even get to the implementation date before he bailed.

You see, when it's easy to get something, it doesn't have much value. You don't appreciate it. You don't even care if you keep it. To those of us who valued ham radio, its requirements, its charm, cheapening the activity has decreased the value of something we cared a lot about and worked hard for.

That's what commitment-to-activity means. I want to see you work to get a license, not because I had to, but because I want to know that you'll value it, take care of it, keep doing something in an activity that means a lot to me and a lot of others.

And to those of you who spout the "HF, who cares" crap; in polite society, one doesn't denigrate an activity or belief that someone else holds dear. Ham radio has been a very important part of my life for many years. It's not up to you to judge whether it should have been, whether it was worthless, or whether I need to get a life.

So take your "newbie whining" (unless of course that that's your chosen activity, in which case I'll respect it and keep silent about it) and put it elsewhere. Learn to appreciate something's value for the resources you have to expend to attain it.

Write me back in 5 years and tell me what you've accomplished.

I have for sale an Icom IC-211 All mode SS/FM/CW Transceiver. This rig is in EXCELLENT shape with only a few minor surface scratches on the top. This is a real beautiful rig and here are some features: transmits and receives from 144mhz to 147.995 MHz in FM, USB, LSB or CW modes. Output power is 10 watts PEP SSB, 10 watts on CW and 1-10 watts on FM. This rig has a Com-Spec Tone Board installed for PL Encoding for repeater use. Has dual VFO's and can work simplex/duplex and has repeater offsets. RIT, Squelch, Volume, RF gain, VOX, dimmer switch. This outfit can run on AC or DC, and has a built in power supply with AC power cord and Shure Microphone and a copy of the operators manual. 7 digit frequency readout. This is a GREAT Heavy Duty Rig, that is very well built, operates excellantlyand is in EXCELLENT CONDITION! I am selling this due to space limitations and my upgraded and have decided to buy an Icom 706. I am asking $325 plus shipping ($10.00). If you have any questions or would like a pic emailed to you, please contact me! Thanks much!

Lloyd, not every Jew is as mendacious and malicious as AF2Y. You may recall Andy, WB2MVU from 3950, from whom I have learned many interesting things.

It is unfortunately true, however, that the Jewish establishment which so largely controls our media in this country contains a large contingent of "Dr. Hate"-like individuals, who bear a great deal of responsibility for the destruction of the Old America and everything she stood for.

With all good wishes,

Not important. Most of the people with the attitude I described fit that
demographic.

> > He didn't even get to the implementation date before he bailed.
>
> And this hurts you . . .how?

Because instead of taking what the hobby, MY hobby, had to offer, he put
forth more effort to deride the requirements than would have been
necessary to meet them (he already has the license for the part of the
spectrum he's now most interested in). Now that the standards have been
lowered, instead of being a productive part of what he purported to
want, he's moved on to something else. Easy come, easy go.

> > You see, when it's easy to get something, it doesn't have much
value.

Fundamental law of economics.

> Then please explain all of those Extras who get caught jamming or
acting
> like idiots on (and out of) the ham bands?

See my previous remarks regarding bell curves. Note in all the
enforcement actions the distribution throughout the license classes. And
I don't defend a single one of them. I think they should be run out of
radio, Novice to Extra. That's not MY ham radio.

> I would have to say that I've accomplished quite a bit in the nearly
20
> years that I've been a ham. What have YOU accomplished?

Honor Roll; 1st place finish in 9th area in 10-10 QSO party; 10 years as a VE core leader; president of local radio club, 3 times selected Ham of the Year in same; 5 years of monthly newsletter columns in same; 2 years newsletter editor (while president); FD chairman; 2 parents, 1 spouse, 2 offspring all licensed; 5BDXCC; taught Novice class in locally produced cable television series; presenter on tower safety at W9DXCC convention and several local clubs; published QST author; local tower expert (>70 installations) are all accomplishments, I'd say. The rest of my curriculum vitae is Life Member ARRL, Life Member QCWA, Life Member 10-10.

Now, may I point out, those are things that are important to me. Some of you couldn't care less about any of those. That's too bad. In mainstream ham radio, which doesn't seem to be well represented here, those are generally recognized achievements.

According to the "duck test" this is basically your Technician license
exam with all the icky hard stuff taken out.

Translation: the current Tech test is too hard for my kids.

Let me guess, carrying out calculations is just an arbitrary hurdle that may have had some basis in the past but isn't relavent in modern amateur radio practice. The ability to calculate is no indicator that the applicant will be a good operator, so should not be part of the licensing requirements.

How would the power dissipation of resistors be important but capacitors and inductors not? Oh,...reactance. That pesky algebra.

On the air, each of us has a persona.

Be it folksy, serious, erudite, breezy, preachy, friendly, angry, polarizing, our words speak volumes about our image. One ham's hero can be another's demon. Riley Hollingsworth seems to champion a middle ground, as he undeniably is cleaning up the airwaves.

Is our on air personality the real McCoy? Consider two hams whom you most likely know. Neither is aware of this post before publication.

One is Rich Whiten, WB2OTK, mocked, defiled and deprived of his license over an allegedly specious reading of the law. The other bills himself as a "distinguished talk show host." Steeped in history, sociology, philosophy, political science and more, he can out-debate the best of us--and he relishes debate.

For years the "distinguished talk show host" crusaded against bypassing telephone companies yet wound up doing just that. He was convicted of a felony for unauthorized usage of Caribbean Long Lines Services. When he denied his documented misdeed to the FCC after, he lost his license.

Old news, this is a foundation of what's next. Because fresh news crossed my threshold today in the form of a used Alpha 78. The seller, Rich Whiten, WB2OTK, honored his agreement in every respect. He sent pictures, negotiated in good faith, fastidiously packed the amplifier and shipped it promptly. What's more. he offered to send the difference between the actual shipping charge and the $100 I provided. Showing its precious care, the Alpha 78 is in mint condition.

Nearly ten years ago I bought another amplifier from the "distinguished talk show host." After paying for it, I awaited arrival, not exactly the Whiten clockwork. When the amplifier arrived, it was sloppily packed and badly corroded. According to my amplifier engineer, restoring it would be prohibitive. No problem, I thought; I'll ask the seller to make me whole. Well, I'm still waiting and waiting ...

Two different real life deals; two different hams. Only one met the acid, reality test!

No, my 12-year-old is almost a genius; I will be able to get her to pass it in about 2-3 months(without just memorizing the answers). But once again(like the 13wpm code test), ham radio licensing requirements are out of line with the privileges.

I think the "communicator" license WOULD be a good thing for ham radio. But the fact is, ham radio isn't ready for it yet. We will have to wait for a couple more years for some more Extras to kick-off, and then something like my proposal will get implemented.

The idea is for them to understand the concept. Like I said before, my eldest daughter is a near genius. She is in sixth grade and is already taking 9th grade algebra - she has NO problem with this math. I work with her almost everynight on her algebra homework - we both enjoy it very much. I will admit that my 10-year-old(who is an above-average student, but not a genius) does not know algebra, and probably won't be ready to comprehend this stuff until she is 13. Hence the idea of a family-oriented license.

And by the way, I won't have anything to gain from this, because by the time this gets instituted my kids will be too old to benefit from it.

I'm probably going to just get a GMRS license, and done with it.

Sorry, but I don't see how this is such a bad idea.

I just got an E from someone named "Norskie Thunder" who claims has been keeping " Badblood "under surveillance for quite a long time. Another bit of intrigue revolving around this strange dude from Vero Beach, ostensibly no relation to "Son of a Beach" however similarities do exist. I shall try to keep the "esteamed" members of this confederacy informed as the latest news breaks.

It sounds like you feel that amateur radio licensing should be akin to plug and play--just pick up the radio, send in a fee for the license and start talking. Amateur has always been a service dedicated to experimentation, research, and development. The no code group has turned into the appliance operator class. No gripe from me about a no code license---MANY of those licensed that way have upgraded and MANY who experiment with the higher frequencies have no need to. Looking at the numbers though it is clear that most are just satisfied with going down to the RadShack and picking up a 2 meter talkie so they can hit a repeater, and never mind joining the local club to support the repeater.

You want your children to be licensed. That's great. How badly do THEY want to be licensed? As a parent, I can assure you that if they want it bad enough, they will study and learn what they need to learn, or more accurately in this case, memorize what they need to memorize, to achieve their goal. There are enough 9 year old Extras out there that it isn't news any more, and they more often than not aren't genious candidates--just motivated kids who sat down and learned the stuff.

If you and your kids think that all there is to amateur radio is grabbing a talkie and yacking all day, you are missing the point of the hobby.

It is extremely unlikely that anyone interested in FRS is suddenly going
to see the value in R&D and get an amateur license.

The reason for the response was that what was posted here on the
group was like this just happened. Also the reason I did not get
into ham radio in 1912 is that I wasn't even a twinkle in my mother
and dad's eyes at that time.

No, it was related to the sort of activity that we did in the 1930's.
SSB and FM rendered it obsolete decades ago. It is no more reasonable
to demand skill in CW for a ham license than to demand that all hams
pass a 50 WPM typing test. In fact, it is LESS reasonable, as a greater
number of hams in the US use keyboards than are active on CW.

Or in other words, "It ain't fair!"

The fact is that the requirements have finally become reasonable, and
the "Incentive Licensing" experiment officially pronounced a failure.
The only people whining about it are those few who bought into the
scheme in the first place.

I was first on the net with a terminal and a 300 bps modem, both of
which were built from kits. To use your reasoning, I should whimper and

whine about the way all of you appliance operators have taken over MY hobby.

But look what happened -- without you marginally-competent owners of storebought computers, we wouldn't have the explosion in computer technology, cheap processing, or the Net as it is today.

> > > You see, when it's easy to get something, it doesn't have much

But gee, didn't they "prove" their greater right to the bands than someone like myself, a lowly Technician who spent his time doing emergency communications rather than learning 20 WPM code?

> 10-10.

Most of that means NOTHING. You might as well have been in the Flower Club -- you haven't listed MINUTE ONE of emergency communications experience, which is one of the reasons that they give us all that spectrum in the first place. Maybe one of your students has gone ahead and picked up the slack for you -- if not, then even your VE and teaching mean nothing.

You are probably also the kind of guy who would show up at a disaster without training, then get all hot and bothered when I assigned him to a team led by a 19-year-old no-code Tech (who, in her three years as a ham, has put in a couple of hundred hours in training and and actual disaster communications work).

> Now, may I point out, those are things that are important to me. Some of
> you couldn't care less about any of those. That's too bad. In mainstream

> generally recognized achievements.

The fact is there there IS no "mainstream of ham radio." The hobby is broken up into a smorgasbord. A ham picks his or her areas of interest, each of which is exclusive of the other (that is, you can only run one mode at any given moment, even though your rig may be set up to let you run any of several).

Burt,
If you are so bored, why are you still hanging around the radio groups?
Sounds like you have a problem with ego. If you are so unhappy, send
your license back and have it cancelled. If you aren't that unhappy,
quit griping and do something positive for a change.

I have been trying to find information about a regular CW
broadcast on 13.062 MHz, in the marine band. The transmitter's call sign
is CLA, and it is apparantly sending some kind of frequency coordination
or relay data (QSW, QSX, etc). Does anyone have any information about
this station?
Thanks!

Exactly the point, DUMBASS. You make comments about HF, but you are
unable mentally to learn the code or the General theory portion. But
this lack of knowledge doesn't prevent you from spewing your ill-
informed opinions on HF in this ng...Go back to your village, Lloyd,
they're missing their idiot.

But the claim was that any two hams anywhere in the world can QSO
with each other. 49 years of experience tells me that is just not
a true statement. And of course, hams with thousands of dollars
worth of antennas and amps have the better chance of pulling it
off.

Hmmm. You don't spend much time on HF do you? As I listen to 2M FM in both the Chicago area and the Miami area, I can tell you that FM is a distant 3rd in activity in ham radio. Sorry, but CW is still the 2nd most popular ham activity.

> It is no more reasonable
> to demand skill in CW for a ham license than to demand that all hams

Where do you get that?

> The fact is that the requirements have finally become reasonable, and
> the "Incentive Licensing" experiment officially pronounced a failure.
> The only people whining about it are those few who bought into the
> scheme in the first place.

Translation: I just couldn't do the code.

"Incentive Licensing" was no experiment. It was the law of the land for more than 30 years. When first implemented, Extras comprised less than 5% of the ham population. Now the percentage is what, 20%? or more? When first implemented, there were very few Advanceds (no new ones had been licensed in about 20 years). What is the percentage now? Failure indeed.

> I was first on the net with a terminal and a 300 bps modem, both of
> which were built from kits. To use your reasoning, I should whimper
and

Clean miss. I guess they didn't teach logic at the school where you
allegedly took economics.

> But look what happened -- without you marginally-competent owners of
> storebought computers, we wouldn't have the explosion in computer
> technology, cheap processing, or the Net as it is today.

Clean miss. You should have some idea of whom you're maligning before
you start blasting. This is my first store bought computer. The last
dozen or so I built; and not from kits.

> > > > You see, when it's easy to get something, it doesn't have much

>
> No, sorry. If you had actually TAKEN Economics, you would have been
> told early in the course that the lawys of economics DO NOT APPLY to
> several fields, including hobbies.

Another clean miss. There was no such postulation. You made up the part
about hobbies to support your nonsensical reply. You really should have
some idea of what you're talking about before you make your wild
assertions. You don't have any idea of what courses I've taken.

> > > Then please explain all of those Extras who get caught jamming or

>
> But gee, didn't they "prove" their greater right to the bands than
> someone like myself, a lowly Technician who spent his time doing
> emergency communications rather than learning 20 WPM code?

You're the one applying the "lowly Technician" label. There was a
standard; they met the standard. That's all they proved. You CHOSE not
to meet that standard. You remind me of the guy who killed his parents
and then begged for mercy from the court because he was an orphan.

Moreover, what did you want from amateur radio? You mention 20 WPM, does that mean you wanted an Extra? Why? All you needed was 13 if you wanted to get on 20 meters. Hell, all you need was 5 if you wanted to get on HF at all. Still will. Are you saying you couldn't even pass 5?

If the time it would have taken to learn 20 WPM CW is all the time you have spent on emergency communications then you haven't much to show for your 20 years "experience."

> > > I would have to say that I've accomplished quite a bit in the nearly
> > 20
> > > years that I've been a ham. What have YOU accomplished?

Okay, let's hear it. What have you done?

> Most of that means NOTHING.

To you. I told you it might not. I don't have to defend my record at all. But you asked what I have accomplished, and I listed them. Where's yours?

> you haven't listed MINUTE ONE of emergency communications
> experience,

Well, who knew what you would consider important? I have hundreds of hours in emergency preparedness exercises, including real tornado spotting such as the Plainfield (IL) tornado. I have run dozens of nets and have given presentations at clubs on communications techniques.

You, on the other hand, haven't listed MINUTE ONE of anything.

> ...then even your VE and teaching mean nothing.

Whatever you say. When it comes to training and certifying you had better ask around as to whether most hams consider that important.

> You are probably also the kind of guy who would show up at a disaster
> without training, then get all hot and bothered when I assigned him to a
> team led by a 19-year-old no-code Tech (who, in her three years as a
> ham, has put in a couple of hundred hours in training and and actual
> disaster communications work).

With 30 years as an air traffic controller, I have more structured communications experience than any 10 people you can name. Couple that with years of contesting experience and any disaster communications group would be happy to have me aboard. And I would be happy to serve. I've forgotten more about protocol and structure than you'll apparently ever know.

> The fact is there there IS no "mainstream of ham radio." The hobby is
> broken up into a smorgasbord. A ham picks his or her areas of interest,
> each of which is exclusive of the other (that is, you can only run one

> mode at any given moment, even though your rig may be set up to let
you
> run any of several).

That is nonsense. Amateur radio is a broad fabric, yes which does have a wide variety of interests, but most adherents don't necessarily have just one single interest. Run one mode at a given moment? Like when my packet station is connected to the 220 MHz PacketCluster, I'm coordinating some DX on 2M FM, and working it on HF CW?

You don't have enough to show for your alleged 20 years in ham radio to continue this conversation.

You have to be rich to afford a TA34 and a 40' tower? Puhleeze!

The operative word in all this nonsense is propagation. The strongest signal, bar none, ever recorded in my shack in Illinois was on 20 meters from a guy in Pennsylvania running 100 watts to a tri-bander at 30 ft. It's all about where the skip zone is.

Cecil,
Except for times when solar storms pegged my s-meter, at some time of the day or night, on some frequency, I have propogation to a given point on the earth. Propogation might last for no more than 15 minutes, but it is there. No, not every day, guaranteed. Most days. It might be 10 meters and it might be 40 meters. The solar flux, the A index, the K index, time, angle, etc. all impact this as well as the mode. I have worked stations on cw with armchair copy and then was unable to copy the same staition on the same band on phone. Nobody is claiming that you can have a qso that sounds like a digital phone connection with the guy across the street.

Ha!! No, it means that I can work anyone in the world, given the right time, mode and frequency. You don't have to have a 100 foot tower and 5 element single band Yagi to hear or be heard. My 99 cent surplus store Koss headphones do just fine!!

Mr Eugene Possum Belly I have noticed that you are using the phrase "moan faggot moan" quite a bit lately. While that phrase was used periodically on 3950 (it worked wonders) it may not have the same effect here. You just don't have the same emphasis as the "originator". Oh by the way, the phrase is copyrighted by the "loudest station in the nation" K5BLB and I think you should send him a royalty check as soon as you finished your work in this NG.

Check out 3950 Opinions and leave Yours !

I am currently studying to take my Tech exam and it has been suggested that I might start with a 2 meter or a 144/440 mobile radio. Since I am new at this and do not want to spend a lot of money to get into this, is there a good Internet source that I might search of this equipment. Any advice on type of equipment for a beginner will be greatly appreciated. Is there such equipment for less than $200??

Sent via Deja.com http://www.deja.com/

No need to. As I have learned from the personal experience of being maligned, all that
needs to
be made is the accusation.

Welp, you finally provided your reason why I'm not a DXer in your last post. That reason is
that
you believe that I know nothing of DX. Prior to that, I had to guess the reason - and you
did

state that I wasn't in your log.

> > > Brian, you really aren't an idiot, are you?

>
> I have never made a statement such as you attribute to me. You're
> fibbing again. That is your mistake.

Welp, until you finally came up with your reason for why you think I'm not a DXer in your
very
last post, you left me guessing. Do you see the word "seem" above? As in "it seems to
me...?"
But thanks for finally saying that you think I know nothing of DX, and thus you reason for
having
stated that I'm not a DXer. The mystery is over.

> > > (Actually Brian, you CAN get DXCC on 10 meters, but then I can't see you

Source record: 116545

I hope this presents an interesting take on things, but the change in rules finally provoked me INTO getting an extra. When I heard the rule change, I knew it was now or never and wanted to take on the challenge to do it under the old rules, so that's what I did.

Something similar happened that backed me into becomming a ham. I had a paper route as a kid with a local ham as a client. We built things together, he gave me equipment that I still have, and I used albums he gave me to practice the code. As a young kid, I hated the discipline of it and had "better" things to do so never did it. After all, I could go over to his house and play.

Well, as soon as I heard about the new "no code" license, I went with a friend to check out a local club and passed the test, but while I was at it, I wondered how much of the code I remembered as a kid. Turns out I had about half the letters that I still knew! So I studied a little bit, we lived in different times and there were now morse code computer programs, so I played with that for about 2 weeks and passed all my written tests and 5wpm. 2 weeks later I passed 13wpm and stayed at advanced until they said they were basically dropping the code requirement. You never know what will inspire you, but it my case it was wanting a personal accomplishement.

Neither Dave or I have suggested for a nanosecond that we hold lower
license classes in contempt. If anything, just the opposite. Just
another fabrication of your mind to justify a bad attitude. You need to
crawl back from whence you came and pursue another hobby. It's apparent
that there is nothing here that interests you in any constructive sense.

I have tried, demo, bought and used countless Login Prgrams and still have
not found one even close to my needs.

Search using Call Signs
Search using dates
Search using bands
Search using frequencies
Search using names
A decent sized comment area for each entry.

I am open to all and any suggestions to what you use or feel is a good one.

Thanks!
Mike

You have got to be the absolute stupidest motherfucker I have yet seen on the Internet, and I've come across a lot of assholes in my 6 years of surfing the Internet. You wouldn't be saying that shit if it were your son or daughter that those sick fucking cowards murdered now would you? We all got teased in high school, hell I used to cry damn near every day from being teased by a bunch of fucking bullies, but I never went in and gunned down a bunch of people! Keep talking shit like this and the FBI will be at your doorstep, if someone else doesn't kick your ass before they get there. You would idolize those two sick fucks, you're probably a bigger coward than they were! You are also probably not even a real ham!

The ARRL has planned the dumbing down of the hobby for years,probably
starting with thier comments about the SEPT agreement.They only hold
back so the membership remains and doesn't castrate them.

Rick accurately portrays my position with the exception that I run ham stuff exclusively under Windows 98 and have not tried his package because I am sufficiently happy with XPWare that I do not choose to go through the pain of adopting a new solution - his PKTerm may be wonderful - but XPWare does all I want with consistency.

An open letter to AF2Y:

AF2Y, I hope after this time, you will quit qrming my qsos with KB4MXL and others on amateur radio frequencies.

On the other hand of course, you can still post your rambling discourses on this forum without the FCC yanking your ticket. (I don't care what you and your West Virginia stooge say here any way). And it is very harmless to me. Like they say, (sticks and stones etc).

I knew someone was qrming, but you are very idiotic to qrm me again when you had been warned by the FCC before. Will you never learn!! Next time the amateur radio ticket and your precious extra call will be no more. Thank you Mr Hollingsworth for catching this serial qrmer.

hi, I have a adi AT-204, this adi says at-204, and is made by adi. Adi told me this radio was 4 to 5 years old. My question is on how to modify this radio. Does it modify like the at-600? If you have any Idea, if it does, or happen to know the modification (rx and tx) please let me know. I have checked the web, and found the at-600 and the htx-204 but not the adi at-204..again, thanks.. PLEASE email me at kf4plp@mytalk.com I would greatly appreciate it! have a nice day.. kf4plp

> Greetings:
>
> Thanks to all who have answered my previous question.

How many times do I have to read messages from hams that send a
"Thank You" addressed to ALL. When one seeks help and
someone takes the time to respond, the least the receiver of
help can do is send a simple individual reply for thanks. After
all-the respondents to this call for help responded one by one.
I have received up to 75 messages in a call for help and sent
individual thanks to each. It was very time consuming, but it
was the right thing to do.

Would you at your wedding, if you were the groom, get up at the
end of the reception and yell out, "Gee, Thanks everyone for the
gifts?"
If you are a T Y P I C A L ham--absolutely.

It is unlikely you will respond to this if you did not even bother to
respond to someone who H E L P E D you.

Welcome to ham radio-set your watch back 40 years

Brian,
Let me understand this. You don't work HF frequencies. You are
complaining that an operator in Tanzania hasn't worked you. Further you
are are complaining that he hasn't worked you because he discriminates
on the basis of license class? Humm. And you can't figure out why you
aren't a 'DXer'? Just a wild guess here, but don't you have to get on
the air first? Why do I feel like I am having a discussion with a chimp?
If you feel you are having problems with other hams because of something
like
your class, consider the possibility that it might be something else.

Brian,
Your problem here is that you are much too interested in what other
people think of you. Figure out for yourself if you are DXer or not, get
a band pass filter on the neighbor's tv, ground your station well, and
get on the air.

First off, the operative word is "some." There are fewer than about 50 or 100 posters here, and many of them don't do what you describe. In any event, it is a far cry from the population of ham radio in general.

> What a shame!! Ham Radio has degenerated to nothing but name calling.

Not Ham Radio; the internet. The ability to be anonymous removes the spectre of accountability. Some people, when not subject to external oversight are unable to exercise self discipline. Come to think of it, that's what happened to some small parts of ham radio when there was no FCC enforcement. Maybe you're right...

> And 20 plus years ago, I thought being a ham was a respectable thing!
> Boy was I wrong!

No, you're not wrong. r.r.a.m. is NOT a bellwether of amateur radio society. The vast majority of hams are respectable. There may be a number of people who try to make out that they're not, but they're not worthy of your consideration.

Mr. Average, you are the one who introduced the bullshit about my wealth and your lack of it. If you didn't want to make an issue of it, why add untruths to your tale? The question was not originally limited to someone using 100w and dipoles. You added that portion as well as the bullshit. You'll keep refining the story and adjusting the conditions until they suit you. You can't be taken seriously. If you mean that your and Reg can't QSO, say that. If you mean that others can't arrange a time and band during this period solar activity during which they can have a QSO, you're wrong. If you two can't QSO on 10m when you are making the attempts, choose a time when propagation exists for the contact. Otherwise I'm forced to discount the views of two self anointed antenna gurus.

By the way, a decent amp can be purchased second hand for $250-$350.

That isn't my problem. I've been here for nineteen months. A DXer
searches for the DX. The DX doesn't frantically search the bands for
another U.S. QSO.

So, in your heart you're a DXer? I did not say that you are not a DXer because you're not in my log. You're not a DXer because you don't know anything about DXing. You have been (but are not now due to your spate of inactivity) a rag chewer at distance.

You don't read well or your powers of retention are fading.
I have to run now, Brian. I'm busy scanning my logs for lower class ticket holders so I can make sure that my QSL manager does not inadvertently issue QSL cards to any of them. We can't have that.

Stay tuned! By next week, Cecil will have changed the situation so that the ops are running five watts and mobile whips.

Used tribanders are cheap as are push-up masts. Second hand amps can be cheap too. I've worked plenty of fellows using verticals, dipoles, indoor antennas and mobile setups.

Another part of Cecil's faulty logic is that one of the two stations might have a rig running 100w and a low dipole (why can't he have a high dipole?) and the other might be running an amp and tribander.

The main thing you have to understand about Cecil is that he only wants to play games with semantics. He has told us that nothing he posts here can be taken seriously. The fact is that most hams who want to participate in worldwide communication are not going to limit themselves to low power and low dipoles. Cecil's claim that two stations using such stations can't reliably communicate is bogus.

Dear YLs and OM,

DTC's regular Morse exercises transmitted every Monday at 19:00 h
local time in DL on 3575 +/- 3 kHz are available on the Internet as
well, being in downloadable MIDI-file format.

Currently three speeds are offered for download:

Speed "90" (= 18 wpm): http://www.muenster.de/~dtc/nr14_90.mid

Speed "60" (= 12 wpm): http://www.muenster.de/~dtc/nr14_60.mid

Speed "45" (= 9 wpm): http://www.muenster.de/~dtc/nr14_45.mid

Hoping you'll have some fun decoding either on the air or from the
Internet, you may check out your capabilities in decoding Morse. For
ease of reference the content of the Morse code transmission / file
may be accessed at DTC's web site using

http://www.muenster.org/dtc/cwtext.html

Your opinion and suggestions are welcome: dtc@muenster.org

toook a break from 75 meters to pen this charming diddy!

Danny and Dylan, time to lock and load.
Cruise through the school on Vengence Mode.
Gettin' back at asswipes that gave you grief.
Time to show these snobs that even misfits have teeth.

Weapons oiled, magazines full.
School today will be anything but dull.
No-necked jocks and Jeezoid girls,
Klebold & Harris cometh to nuke your world.

Out in the parking lot, the first victims fell.
Two robopunks on a mission from Hell.
Reach the front enterance, kick open the door.
Doomsday's here! Time to even the score.

Crowds in the cafeteria, all in a bunch.
Today's menu will be "lead lunch".
Security cameras witness from above.
Yuppie larve franticly push, run, and shove.

Adrenalin pumping, the purest of nature's liquors.
The herd tries to run, but the bullets are quicker.
Surveying their work, Dan & Dyl take pride.
More of their tormentors have paid with their lives.

Continuing on in their divine spree.
On a beeline right to the library.
Wimpering pre-corpses, hiding under desks.
"Excuse me teacher, do you have "If" on VHS?"

Playing hide-and-seek and peekaboo games.
With every bullet each "victim" reaches fame.
Cassie prays to God in front of Klebold.
Too bad for Cassie, God's put her call on hold.

At hyper-mach speed, the bullet flies from the gun.
One less drone for Pat Robertson.
Room of quiet study, now private abbatoire.
The few who survive will still have their mental scars.

Cop cars FINALLY start to be heard from outside.
Time to bring down the curtain on this final, joyous ride.
Off to a corner, our heroes settle in.
Say a final farewell to each other, then do each other in.

Their spirits are freed, no one can fuck with them now.
Leaving all the idjits behind to wail about "why?" and about "how?".
"Columbine" was once meant to describe a gay flower.
But now and forever is a word for >Nerd Power<.

Society tries to erase all the signs.
But Danny & Dylan's legacy cannot be denied.
From their mansion in Hell, they laugh and drink beer.
While Cassie (Dylan's fuckslave) submissively bends over to take it in
the rear. BAAAAAA HAHA HA HA!!

(bet U didn't know Kliebold was studin for his Tech plus eh???!!!)

April 20th, 1999. Doomsday for jocks, jeezoids, and other such elite
fucks. The lesson has been delivered.

I've purchased and installed a high pass filter for his television set. During this installation, I
noticed a "rats nest" of cable, a switch box, and a VCR. Then he said he had another TV that was also
being interfered with as well. Meanwhile the "rats nest" TV is still being interfered with. He
didn't want me to rewire his set.

What are you so puzzled about, it's very simple don't do it again!

CLIFTON, NJ [UPDATE]: The FCC sent a Warning Notice March 1, 2000, to Amateur Extra licensee Charles Schwartzbard, AF2Y, advising him that the FCC has information indicating that the licensee has been "engaged in deliberate interference to the ongoing communications of licensees W4FQF and KB4MXL on the 20-meter amateur band." FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth noted that this was his second warning to Schwartzbard regarding deliberate interference. He warned Schwartzbard that if the FCC learns of or monitors "additional instances of this behavior" it would designate his amateur station license for a revocation hearing and his operator license for suspension. The FCC had written Schwartzbard last fall, citing information indicating that the licensee "may have ignored requests from other licensees operating on adjacent frequencies to correct your transmitter emissions in accordance with good Amateur practice." At that time, the FCC requested information from Schwartzbard regarding his use of a linear amplifier, automatic level control, an microphone gain settings for his home and mobile 20-meter operations, as well as other relevant information. Hollingsworth again cautioned the licensee against "airing personal conflicts with other licensees on the Amateur bands." Hollingsworth told the ARRL that Schwartzbard did not dispute the allegations outlined in the FCC's letter.

Please stop the obfuscation, Dave. The question was originally whether
any two hams in the world could have a QSO. You said all it takes is
a beam and an an amp on the proper frequency at the proper time. Beams
and amps are what rich hams have. That is NOT what the average ham has.
The average ham has a dipole and 100 watts. "Any ham" means any ham
including average hams.

> You added that portion as well as the
> bullshit. You'll keep refining the story and adjusting the conditions
> until they suit you.

I'm trying to stick to the original statement, Dave. You are the one
doing all the obfuscating. Here's the question again which you have
so far refused to answer. Can any two hams in the world have a QSO
any time they choose? Please answer yes or no. If you answer 'yes',
it means hams across the world from each other can use their QRP
rigs and attic antennas to have a QSO. I just don't believe it.

> If you mean that others can't arrange
> a time and band during this period solar activity during which they can
> have a QSO, you're wrong.

OK, Dave, let's run an experiment. You pick the time, frequency, and
mode and let's see if you and I can establish a QSO. I am actually better
equipped than the average ham. I have a rotatable dipole and can run 500
watts maximum. If you refuse, I will know you are just blowing smoke.

Dave, what is it about "any two operators anywhere in the world" that
you do not understand? I am disagreeing with Jeff's above original
statement, not anything else. I assume you are supporting Jeff's
original statement and that's the subject of the argument. Everything
else is your attempt at diversion and obfuscation. "any two operators"
means *any two operators* including QRPers with attic antennas.

Pick a date, time, frequency, and mode and prove that you and I
can establish a contact from Tanzania to Texas and I will freely
admit and report it here. Reg Edwards and I were not able to
establish a QSO using 100 watts on 28.8MHz at 1500Z. He has an
inverted-V and I have a rotatable dipole.

Dave, you are the one who is changing things. Jeff said *any two operators*
anywhere in the world could talk to each other. That statement includes
five watts and mobile whips. What is it about "any two operators" that
you do not understand?

> The fact is that most hams who want to
> participate in worldwide communication are not going to limit themselves
> to low power and low dipoles. Cecil's claim that two stations using
> such stations can't reliably communicate is bogus.

Jeff said "any two operators", Dave. That statement includes all kinds
of rigs and all kinds of antennas. You are changing, diverting, and
obfuscating the original issue. Please just say whether Jeff's
following original statement is true or false.

> Jeff said:
> > Hams, on the other hand, have no such dependence. It's the *only*
> > communications medium in which *any two operators anywhere in the
> > world* can communicate directly without using government or commercial
> > communication services. (emphasis mine)

Jeff didn't say any two operators in the world with beams and amps.
If he had said that, I wouldn't have objected to his statement and
you wouldn't be trying to defend an impossible position.

Even with your expensive equipment, Dave, I would say the odds of
you and I establishing a QSO between Tanzania and Texas on the date,
time, frequency, and mode of your choice are only about 50-50.

You can't back up that untruth by any statement or deed on my part.

> > Most likely, you never worked the guy.
>
> Oh, I'm certain that I've never worked the guy at his present QTH.

Gary, on the other hand, is in my logs from two different spots.

> > That would explain why you aren't in his log.
>
> Yes, that would certainly be the reason I'm not in his log (???). Yet I'm provided with a

That is not what I said at all. Please produce the statement proving
it. You're not in my any of my logs from any spot I've operated. You
are not a DXer. Those are two separate statements.

> > Brian, you really aren't an idiot, are you?
>
> No, but I'm beginning to think that I'm surrounded by them.

You may well be. That has nothing to do with this newsgroup.

You seem to have gone over the abyss, Brian. First it is morse as
"silly". Now it is "kiddie bands". That chip on your shoulder seems to
have been replaced by a cross.

> > > > Must be a carryover from CB or new to the block??

The reason that Gary nor I can see you attempting DXCC is not because of
your license class. It is in your attitude. You would and probably
will be a whiner if had an Extra Class ticket.

Vince, with all due respect, why are you burning so many bridges? Logically
you are accomplishing nothing but contributing to your own demise.

Restructuring certainly was NOT the ARRL's idea, or even their submitted
alternative plan. The FCC brought this on, if you are upset, direct it
towards them. I feel it was a long time coming however, so I suspect
anything you will do would probably be futile.

Please try to refrain from crossposting to eight newsgroups.

Such things are legitimate subjects for discussion, though I've never been in QSO when they were discussed.

Considering the astonishingly numerous murders of its own people committed by the current Chinese government, I would not dismiss the allegation out of hand.

Nor would I find perversion surprising from "anything that moves" Clinton, who is living proof that some White people are as degenerate as the worst of the savages.

> Is
> that "The civilized behavior of the Liberty Net Participants" you're
> referring to ? As for stupidity and crudity; I refer you to "DP". Even
> Vic winces at some of his "civilized behavior"

I've disagreed with many things that Steve has said, as I have with others on the Liberty Net. Since many different points of view are present, that's inevitable. But Steve isn't guilty of multiple illegal acts and infractions of the regulations, as are the jammers with whom you are so friendly. And, as I've proved here in this forum, he's also innocent of the allegations on the jammers' "Opinion Page."

>
> As for "the open calls for murder". Isn't it strange that no one
> has ever been charged with anything ?
[...]

The FCC did sternly warn W9ART about his behavior the night he stated several times, while jamming with his friend WA9KJI, that I "should be shot in the head." (Archived at http://www.3950.net) And K5BLB, whose threats of violence and open jamming and obscenities approach the limits of human belief, was also similarly warned.

I admit that that is weak enforcement; and I admit that the legitimate 3950 participants have shown great restraint in not making legal trouble for those of the jammers who have made similar threats.

But that in no way excuses the crudities or threats or illegal acts of those you so enthusiastically defend.

With all good wishes,

--

Kevin Alfred Strom.

Cobra 2000 GTL
Excellent condition, original box & packing, mic, external speaker, extra D104 stand mic. Extra channels added by local pro along with higher output power supply transister for increased RF power output and clarifier mod. All done professionally. Beautiful radio but hey gotta build that down payment for the homestead :) Will ship 50 states insured UPS at no extra charge. $325

Radio Shack HTX-212
2M mobile unit used as base unit. Great condition $125

Yaesu FT2500M
2M mobile unit w/ CTCSS board. Excellant condition, with orginal box, manual etc. $200

TrippLite PR-12
12A 12V power supply used to power the HTX. Mint condition. Very clean power output. $60

Cushcraft AR2 Ringo
2M base antenna, great for attics and other small areas only 4ft tall. Mint condition. $35

Diamond SG7500NMO
2M/70cm dual-band mobile antenna with HD magnet mount. $60

2) 30ft sections of 9913F coax, was used indoors only. $15 each

MFJ-407C
Deluxe Electronic Keyer, Mint condition. Only used to practice code for about 6 hours total. $50

Bencher BY1
Iambic keyer paddle w/ black base. Only used with 407 to practice code. $65

Yahoo email is so my main mail won't get spammed to death. Email me at yahoo and I'll provide my normal email.

Doc,

As you know, we do not agree on many things. But I must throw bouquets
your way for the piece about the consequences of extermination.

Laced with great examples, it ended with a plausible conclusion sparking
responsive thought. You developed your subject magnificently. More,
you dressed the piece in words and phrases that connect.

If I stood on my head--which I actually do, I couldn't match that piece
of writing.

Nope, you are trying hard to make it the whole crux of the
debate but it is not working. The whole crux of the debate
is whether your statement that "any two operators" can establish
a QSO is true or false. It is prima facie false, Jeff. If I can
find just two operators who cannot QSO with each other, your
statement is false.

But if the two operators use all their equipment and skill and still
cannot establish a QSO, your statement is false. I contend that there
are at least two operators in the world who will never establish a QSO.

> Next time, try CW!

Uhhhhhh Jeff, we did try CW - CW didn't get through.

When it comes to his job, I wish Herb only well. Considering his proven defects, it stands to reason that station management might be reluctant to showcase him.

Coming back is within his reach, if he'd concentrate on building character. Others, such as Charles Colson, have been in worse positions, regained public trust through selfless effort, garnering greater trust than they had originally.

Let's hope Herb takes that road. There. he stands a chance of channelling his immense intellect into the public good.

That certainly does NOT make any sense, Jeff. You are just
trying to wiggle out of your original statement. If you had
really meant that you would have said, "Any operator anywhere
in the world can find someone with which to communicate
directly."

Rick - please don't make these things up.

Most databases can have any number of keys. You can sort or search on any field in any but the lamest of databases whether that field is indexed or not. It's just that the performance isn't as good as on an indexed field. The performance difference isn't likely to be even measurable in the sorts of databases amateurs are likely to have.

For example, it happens that just yesterday I was doing what is probably the most demanding sort of search, I was doing

SELECT NAME FROM TABLE WHERE NAME LIKE 'ABC*';

where NAME isn't an indexed column and the table had >34,000 records in MS Access. These searches took about 2-3 seconds on a PII/400. Not stellar but certainly tolerable, and I'd be surprised to see many amateurs with that many entries in a single call database.

Mike

It happens that I have been looking at a lot of loggers to check compatibility with my QSLMaker program. While I haven't seen a program that does all that you want, I did see a logger that someone on QRP-L did which is based on MS Access, and allows you to do all of those things from the datbase tool itself. If you have Access, and if you are not totally resistant to learning a tool like that, it might be the ticket. I don't have ready access to the note, but if you have MS Access and are interested I could go digging through my mail archives.

John,

I've been coding for 25 years at the assembly and C level, including low level O/S code (PC-Mos, a multi-user,multi-tasking DOS) so I don't make things up. As you know many of the older databases that were hand coded in some older program only allowed keys to be indexed on one or two fields. You're talking at a 4GL level with your SQL statements with Access, which I agree is a much better database engine.

Hi John,

I was referring to the hand coded databases in many of the DOS based program which use a flat-sequential file system or indexed sequenctial.

And we both agree that Access and other 4GL databases do allow for index of any field. LogWindows uses the Raima database which allows for this also.

Gentlemen, Gentlemen...

Jeff, Cecil, Brian, Gary, Dave, etc.; you are all decent guys, but can
I suggest that we only discuss DXing issues on Amateur-only threads?
This thread was about getting FRS-users(mainly kids) into Amateur
Radio, and is cross-posted to alt.radio.family.

Thanks.

Stewart - N0MHS

Isaac,

Charles Colson paid for his misdeeds as Nixon's henchman with prison time. From there, he turned his life around, devoting himself to forming prison ministries. When he got out, he stayed active as society's servant.

Overstating Herb's misdeeds is mistake. All he did was tinker with Caribbean Long Line's Service as a computer hacker would. At trial in 1992, he was simply not the kingpin of crime, the prosecution made him out to be.

With two of his convictions reversed post-trial because of fabricated evidence, the one that remains is a weakling. "Possession of a counterfeit access device with intent to defraud," designed to combat credit card fraud, was applied to Herb in a most unusual way. His conviction rests on numbers in his head. Turned out that one out of three numbers accessed Calls, which had essentially no safeguards. This was an easy way to bag anyone so situated because, a felony, it was without jurisdictional minimum amount.

While it can be said that Herb has used continuing bad judgement, first in front of the court and then before the FCC, he should not be viewed as any major felon. His problem is a personal one: Being unable to confess wrongdoing and then, like Colson, acting to avoid the consequences. Don't count him out; it is never too late!

That was a joke, Cecil. Sorry I didn't append a smiley.

>You are just trying to wiggle out of your original statement.

Not at all. Let's review what you edited out:

See my previous article regarding the maritime service. On the ham
bands, two ops would need to set a frequency on each of several
bands. Day: 10m, 12m, 15m, 17m, 20m. Evening: 30m, 40m, 80m, 160m.

A frequency on each of several bands, Cecil.

In regards to your failed QSO with Reg on 10M at 1500Z, I wrote:

Why didn't you also establish, in advance, a frequency on 12M for
1505Z, a frequency on 15M for 1510Z, a frequency on 17M for 1515Z,
and a frequency on 20M for 1520Z??

Why did you edit out those paragraphs, Cecil ?

>> The post didn't say with each other!

>Do you know how silly that sounds?

I regret leaving out the smiley. But you edited out the serious comment:

See my previous article regarding the maritime service. On the ham
bands, two ops would need to set a frequency on each of several
bands. Day: 10m, 12m, 15m, 17m, 20m. Evening: 30m, 40m, 80m, 160m.

When you wrote: "Pick a date, time, frequency," I responded with:

Not one frequency! A frequency on each of several bands, Cecil.

You continued, "Reg Edwards and I were not able to establish a QSO using
100 watts on 28.8MHz at 1500Z" and I then wrote:

Why didn't you also establish, in advance, a frequency on 12M for
1505Z, a frequency on 15M for 1510Z, a frequency on 17M for 1515Z,
and a frequency on 20M for 1520Z??

Those two operators CAN establish communications if they set up
a sked on more than one band. Let that be a lesson to you, Cecil.

Yeah, it's his choice. WWII vet and *former* POW aside, he could repair
his TV or live with TVI. You can lead a vet to water but he'll probably
want cognac.

> your fifteen years on the road. No, that's asking too much of you. I'll go eleven for eleven.

Looks like everything back before the nineteen months is "used to be". I'll be happy to get back to the land where they don't know how good they've got it after my time abroad. My wife will be lucky if she gets me on a plane to visit the in-laws near Helsinki every few years once I hang it up in seventeen months.

> > OH2, OH0 and OJ0/K8MN (mid '80s and mid '90s), J52US, 9L1US, A22MN and

> I've probably got the A22MN card. I wonder if that means anything. I wonder if I was searching for you or
> if you were searching for me?

If I searched for you I found you four times on 10m from A22MN. It certainly does mean something. It means you don't need another A2.

> > Please forgive him. He holds an Amateur Extra.
>
> Has he said anything derogatory about me?

He doesn't even know of your existence. I spoke with him for an hour this evening and neither your name nor call came up. We must be terribly lucky since we're able to make the sked week after week, year after year. According to Cecil, that's damn nigh impossible.

Dave 5H3US, K8MN

There you go again, blaiming a failed sked on someone else. *You*
should have included other bands besides 10m at 1500z: 12m at 1505z,
15m at 1510z, 17m at 1515z, 20m at 1520z.

>I figured Dave was good enough to pick the best frequency.

Don't try to pass off a failed QSO on someone else. Your sked between
Reg and yourself should have included bands besides 10M at 1500Z;
12M at 1505Z, 15M at 1510Z, 17M at 1515Z, and 20M at 1520M. (Or
maybe you should have used CW!)

> powers of concentration as my two year old.

I've never been away from "Martti's not a millionaire". My reason for this is that Martti's isn't a millionaire by any stretch. I told you that Martti has a townhouse in a Helsinki suburb and a summer cottage some distance away. The summer cottage has lake water pumped to it and has no central heating. He uses an Alpha for heat. Martti doesn't work, Martti doesn't eat. Nokia pays for Martti's home in China and for several trips back to Finland each year. That's part of Martti's salary package.

My home here is provided by the U.S. government. Your tax dollars (and mine) pay for it. Uncle Sam provides water and electricity. Uncle Sam provides most of the furniture. Those things are part of my salary package. They don't make me a millionaire any more than Martti is a millionaire.

> And was there any other implication to the statement that I wasn't in -your- log other than not being
> in your log? You must have said that for a reason. What was it?

Let's go back those eleven years. I was in Guinea-Bissau after you had your license. I made 75,000 QSOs from there. You weren't one of 'em. I made over 60,000 QSOs from Sierra Leone. You weren't one of 'em. For most of my stay in Bissau, I was the only ham in the country. I was certainly the most active ham in 9L. If you were chasing DXCC, you missed two very easy ones during the time when I was very active, especially on 10m. During that same time, quite a few DXers worked me on 10 bands. Some worked me on both CW and SSB. Fewer managed to catch me on six or seven bands on RTTY. Enough reasons?

Cecil has revealed how little he actually knows about ham radio. If he gives me the choice of frequency, time and mode, he's going to lose this one but an extremely wide margin. I chatted with WA8JOC, WD8SDL, K8LEE and K8NW/6 this evening on 15m as I have nearly every Sunday we've attempted it. Afterward, I ran about 150 QSOs throughout the entire continental U.S. including Texas. Several of the stations were mobile. I could do it nightly.

1644. Norskie Thunder

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-19 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8b3f4c$r6d$1@slb7.atl.mindspring.net>
Source record: 116523

I have gotten 16 E-mails from a person(I assume a male) who calls himself Norskie Thunder and knows a heck of a lot about BadBlood or so it seems. Incidentally this person is NOT from Florida because I turned to my chief header reader and expert intelligence agent Victor Laszlo who verified it. I didn't know what Norskie Thunder meant and was told the following. Allegedly BadBlood is married to a Norwegian gal and presently they are either preparing for an ugly divorce or are in the process of going through one. It's obvious then where Norskie comes from and the Thunder part must signify anger. Once again, I cannot prove anything but if it's true, I hope she takes him to the cleaners. I guess the adage is true, "As ye sow, so shall ye reap." If Riley wasn't around, do you realize what would happen? Here we had a Vero ham who made a career out of probing into everyone's private life. He used to call Don Anderson's parole officer to create trouble for W4JYZ. How about the private documents relating to Jimmy Dale and Richard Whiten? He even called N.Y.U. College of Dentistry to cull private info about my years there. How about his "investigation" of Bill, NK4D? And Douglas, NR5T? I mean this Vero Beach Dick Tracy was riding really high and mighty, right? Yep, if Riley hadn't put an end to this kind of garbage I wonder how BadBlood would like the divorce court proceedings read over ther air providing of course Norskie Thunder knows what he's talking about? Gee whiz-I'm another Walter Winchell. "Good evening Mr. and Mrs. America and all the ships at sea; let's go to press."

Your own netnews guidelines say to edit out all that is irrelevant.
That's exactly what I did. You followup was irrelevant to your original
"any two operators" statement which was prima facie untrue. Two QRP
operators with attic antennas on opposite sides of the globe usually
cannot communicate under any circumstances. Two mobile operators on
opposite sides of the world usually cannot communicate under any
circumstances. HF is *NOT* more reliable than the internet.

You forgot to put a smiley on that one also, Jeff. You know and I
know that QRPers with attic antennas on opposite sides of the world
will almost never hear each other no matter how many frequencies
they try.

I cannot listen on multiple frequencies at the same time. Can you?
When I said pick a time and frequency, I meant a time(1) for frequency(1),
a time(2) for frequency(2), etc.

The argument is about your statement that "any
two operators" can QSO. Two mobile operators may *NEVER* hear
each other no matter how much time they spend and how many
frequencies they try. Your statement is just false, Jeff.
Defending it makes you look like a dunce.

It would have proven nothing if we had been able to QSO, Jeff. There
are always multitudes of hams in the world who cannot QSO with any
other ham in the world. Your statement is laughingly false. "Any two
operators" CANNOT QSO anytime they want to. Try mobile from Texas to
Antarctica.

I require a 2SC372Y NPN transistor for a Yaesu FT101E Transceiver. Since the transistor is used in an oscillator that determines the carrier frequency, a direct replacement is necessary. Newer transistors like a 2N222A will not work because they have higher gain and different B-E, B-C capacitances. (Freq off and output level too high). Anyone know a source of this transistor preferably in Canada. This is a long shot but please E-Mail me if you can help.

I give it a 50-50 chance, Dave. My 30ft tall dipole has a high angle
of radiation. But one success does not prove that "any two operators"
in the world can establish a QSO. However, one failure proves the
statement to be false. You go mobile in Tanzania and I'll go mobile in
Texas and let's see what happens. For Jeff's statement to be true, a
QRPer in Tanzania and a QRPer in Texas would have to be able to establish
a QSO anytime they choose. Jeff's statement is prima facie false. You
and he trying to defend it is just nonsensical. Would either of you stake
your life on it being true? Certainly not!

In Southern California, there should also be an IQ test for amateur radio.

[A story I heard a long time ago:]

A certain operator burned up his 1,200w+ 2m amplifier because he stuck a screwdriver through the handle of the circuit breaker because it kept popping every time he tried to talk on "435." Duh! It's popping for a reason other than "because it can."

I'd like to bring everyone up to date on my follow ups with users of the newsgroup with this subject.

I've written emails to the four people that has responded to Gene's request to find out why they recommended XPWare or PkTerm. First, I'd like to thank both Jim and Roger for responding and clarifying that they weren't recommending it OVER PKterm, but just recommending it since they have never used PKterm and just liked XPWin..

Also, as I've written here before, when it comes to Windows 3.x based software,. XPWare is the way to go. PKTerm and Pacterm 98 are 32 bit software programs that don't run under Windows 3.x.

As for the other two emails, one bounced because of a fake email address and the other never responded publicly or privately to line he wrote that said PkTerm = buggy. If I don't get information about issues, I can only assume they never existed, or it was because of the lack of knowledge of how proper Windows based software works.

CSS is dedicated to making the best ham radio software at a fair price. The only way to do this is to get the input of everyone we can, on how to continually improve the product. And I thank every one who has done this so far.. your input is so valuable to us.

If your are looking for mods to expand the frequency
coverage (aKa CB and "11.5 Meters") forget it.

The HTX-10 has firmware driven tuning. Modfications such as
were easily performed to the Uniden HR-2510 are NOT applicable.

(which is probably why the radio was a sales disaster for the RatShack)

Mike,

This may be due to the way some databases work. Most only allow a primary and secondary key for the main database. What you're looking for is a multikeyed database to sort the contacts in an order you specifiy.

In some cases, these reports can be done with Crystal Reports and database that use Microsoft Access. Might want to check with the Logging program vendors if that is supported.

<f1dfr@my-deja.com> wrote:
>For me, people playing chess on HF using CW is not ham-radio.

What if we're using homebuilt equipment? Does that count?

What if we're on phone? Packet? RTTY? SSTV?

Is it the mode which bothers you, or that we're playing chess?
If it's the chess game that troubles you, what would be an
acceptable QSO content which would qualify as "ham-radio"?

There are literally thousands of QSOs which take place daily,
covering every possible conceivable topic; which of them fall
into your "ham-radio" category?

Note that we also play chess by Internet, too. Do those not qualify
for your definition of "e-mail"?

Dan, W4NTI,

Want you to know, I always appreciate your responses. I put so very much effort into many of my posts that I feel non-plussed by the paultry number of responses.

To make a difference, for me, is to spark responses, as in the education profession--positive and negative. Some times I learn how naive my opinion was, and I am educated accordingly. I've even apologized in here for what turned out to be my mispost.

I've already stated that you knew nothing of DXing some time ago during
your "Martti-As-Millionaire-DXer" series. If you had to guess the
reason after wiping the egg off your face then, you have the same powers
of retention as my dog.

Jesus isn't bad. Then again, you ain't him. Dragging your cross around
is a bad thing. Playing the martyr over your guesses as to what someone
thinks of you based on your license class is ridiculous.

That varies on a case by case basis. It certainly depends on what an
individual says or does. I don't limit this to amateur radio ops.

That doesn't make sense. No one who holds an Extra ticket worries about
what higher class licenses might think about him. There are no higher
class ticket holders. No one who holds an Extra ticket states that he
can't attain 5BDXCC since he can operate on any band. Then again, you
could hold an Extra ticket and still not be a DXer--especially if you
aren't on the air.

You could suggest places he could take his equipment for service. You
could suggest that he invest in some snap-on ferrite chokes for his line
cords, audio and video cabling. You could just stay off the air and
lump it. It's your choice.

> > I hope your neighbor gains his release as a prisoner soon. The war has been

I'll fill you in on my terrible secret, Brian. I have so many QSLs from a decade-and-a-half on the road that I don't save 'em all. I retain those which count for awards, those which confirm a QSO for a difficult path (long path VKs and JAs on 6m from West Africa, West Coast U.S. on top band, etc.), those which are pleasant to look at and those which have a personal note. The others are tossed. I don't have storage space for several hundred thousand QSL cards.

operated from?
> Maybe we have worked before.

I do not see what you mean. If I saw what you meant, we might not be
having this exchange. To answer your question:

OH2, OH0 and OJ0/K8MN (mid '80s and mid '90s), J52US, 9L1US, A22MN and
op at OH0MD/OJ0. QSLs for any of them can be obtained from WA8JOC.
Please forgive him. He holds an Amateur Extra.

Dave 5H3US, K8MN

>You have lost track of the issue which is - is the following statement
>true or false?
>"... any two operators anywhere in the world can communicate directly ..."

The post didn't say with each other!

From my own experience, when we had traffic for one of our cutters or another ship in the Pacific during daylight hours, if we couldn't reach her on 12 MHz, we'd try 16; if not 16, then 22; if not 22, then 26. At night, we'd try 500 kc, if not 500, then 2 MHz; if not 2, then 4, then 6, then 8. I can't recall ever not being able to raise a ship on HF; sometimes it took a little time finding her, though. We kept beacons running on 4, 6, 8, 12, 16, 22, and 26 MHz; which ever beacon a ship heard, she'd remain on that band; if she had traffic for us, we'd hear her right away since we also kept guard receivers locked on the calling frequency on each of those bands. (We had about two dozen Collins 651-S1 receivers at the radio station, all tuned to the various calling frequencies.)

What hinders establishing communication on amateur radio is that HF calling frequencies were never established like was done in the maritime service.

Not necessarily with each other!

>statement, not anything else. I assume you are supporting Jeff's
>original statement and that's the subject of the argument. Everything
>else is your attempt at diversion and obfuscation. "any two operators"
>means *any two operators* including QRPers with attic antennas.

See my previous article regarding the maritime service. On the ham bands, two ops would need to set a frequency on each of several bands. Day: 10m, 12m, 15m, 17m, 20m. Evening: 30m, 40m, 80m, 160m.

>Pick a date, time, frequency,

Not one frequency! A frequency on each of several bands, Cecil.

>Reg Edwards and I were not able to establish a QSO using 100 watts on
>28.8MHz at 1500Z.

Why didn't you also establish, in advance, a frequency on 12M for 1505Z, a frequency on 15M for 1510Z, a frequency on 17M for 1515Z, and a frequency on 20M for 1520Z??

"As communicators first and foremost..." (Oops, wrong thread!)

>Jeff didn't say

Here's what Jeff (me) said (in regards to the Internet):

Those poor, leashed folks. They're helplessly dependent upon
untold billions of dollars of computer equipment belonging to
thousands of corporation, interconnected by millions of miles
of cable, staffed by thousands of workers putting in tens of
thousands of man-hours per day to keep that incredibly complex
system running.

Hams, on the other hand, have no such dependence. It's the *only*
communications medium in which any two operators anywhere in the
world can communicate directly without using government or commercial
communication services. Those same two operators don't even need to
purchase commercially-built radios -- they can build their equipment
themselves.

Now, those two operators, if they're truly communicators, will have
set up a sked on not one single frequency, but on a frequency on
each of several bands, something you and Reg failed to do.

So you're back to "Martti's not a millionaire!" Good grief, you say he has two homes in
Finland and
Hans says he's VP of Nokia and is living in China. That should be quite enough unless
Finland is so
socialized that the two homes are Section 8 housing and Nokia/China is some kind of work
study
program. Whatever; I love eggs. And that never was the thrust of that thread. You have the
same
powers of concentration as my two year old.

But lets develop this a bit further. You say I'm not a DXer, and you think that I know
nothing of
DXing. Could you be a little less thick and provide examples of why you think I know
nothing of DXing?

And was there any other implication to the statement that I wasn't in -your- log other than not being
in your log? You must have said that for a reason. What was it?

Its also his choice, isn't it? I was going to wrap up his cords (and yes, I have split torroids to put on
them). He didn't want me to mess with them.

> Eleven years back is "I used to be on the air" territory. What do you
> do now?

No Dave, not 11 years back. "-The- 11 years prior" The whole eleven years. As in one, two, three, four,
five, six, seven, eight, nine, ten, eleven. Tell you what, I'll give up those eleven years when you give up
your fifteen years on the road. No, that's asking too much of you. I'll go eleven for eleven.

> OH2, OH0 and OJ0/K8MN (mid '80s and mid '90s), J52US, 9L1US, A22MN and
> op at OH0MD/OJ0. QSLs for any of them can be obtained from WA8JOC.

I've probably got the A22MN card. I wonder if that means anything. I wonder if I was searching for you or
if you were searching for me?

> Please forgive him. He holds an Amateur Extra.

Has he said anything derogatory about me?

> Is there much activity on 6 meters?

=======
I bought a TS-60 a year ago and until a few months ago -- a little activity on local repeaters and some sporadic E propagation to nearby states. When the solar flux reached 200+ , the skip started in and here in San Diego we are working and hearing, Hawaii, Australia, New Zealand, New England, Canada (eastern), and VP6BR has been on from Pitcairn Island. Old timers tell me when the SFI gets up in the high 200's, Europe is possible for short openings. I'm too new to 6M to attest to that however.

Good Luck

Probable correct, but consider this...fear. Llllloyd knows that when
he gets on HF it will be like chum at a shark feeding. I cant wait to
hear this jerk on 75 at night.

And no I wont jam him. But after I tell everyone about his antics
here, I'll sit back and watch the sharks circle.

1685. FS: Motorola 900 Mhz Trunked Mobiles

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-20 00:00:00 UTC
From: meadowcomm <meadowcomm@erols.com>
Message-ID: <8b61td$e5h$1@bob.news.rcn.net>
Source record: 116392
Cross-posted to: alt.ham-radio.vhf-uhf,it.tlc.cellulari.motorola,rec.radio.amateur.misc,tnn.radio.amateur

Dear Newsgroup - This is our second post to the group, We had success with our first post so here goes again.

(Our apologies to the two companies that e-mailed us back last time. We had a computer crash and lost your contact info.)

Our company was hired to remove these radios from company vehicles. The radios are clean and work fine.

4 Maxtrac Privacy B7 900 Mhz mobiles. (Model Number D37MWA5GB7AK) Trunked or conventional. Comes with mounting bracket, but no microphones.

12 Motorola GTX 900 Mhz Trunked Radios. (Model M11WGD4CB1AN) 12 watts, 12.5 channel spacing, trunked or conventional. Comes with mounting bracket, but no microphones.

20 Motorola Spectra 900 Mhz (Model Number D37KGA5JB5FK) 30 watts, trunked or conventional. Version has 6 buttons and rocker switch for volume and mode. Comes with microphone, mounting bracket, and DB15 connector. Willing to split the into two lots of 10 if 20 are too many.

Additonally, dispatch had some power supplies. We have three for sale:

2 Motorola Base Station Power Supplies. (Model HPN-3000A New model number: REX-4201A) 10 Amps. Will sell together or seperately.

1 Astron SL-11A Power Supply 50% Duty Cycle.

Best offer on any items + shipping charge. We have these items on auction sites and reserve the right to decline any offer made here.

For additional info: Contact Chris or Tony meadowcomm@erols.com Please leave name and contact number. References available on request.

You definently have been out of the loop.

Vanity calls were reinstated in 1996. There's a processing fee. Anyone can apply, but unless you're reclaiming a call previously held or a call of a relative, the new call must be an allowable call for your class.

Extra calls now being sequentially issued are of the pattern "A$#$$".

ROFLMFAO! yeah right! hahahahahahahahahahahahahahahahahahahahahaha
hahahahahahahahahahahahahahahahahahahahahahahaha
hahahahahahahahahahahahahahahahahahahahahahahaha
hahahahahahahahahahahahahahahahahahahahahahahaha

hahahahahahahahahahahahahahahahahahahahahaha
hahahahahahahahahahahahahahahahahahahahahaha

>* Get free, secure online email at http://www.ziplip.com/ *

So another sophmoric "threat." You're a really boring little fuck,
pissbowl. You lack the brians, ability, etc. to put together such a
device. Hell, lameo-fag, you can't even spell "painfully" correctly.
Ah well, an idiot savant like you might get lucky. Now go back to your
ghetto apartment, feed your pet roaches, fornicate your dead mom adn
let your dad cornhole you as he does on a daily basis.
I'm mocking and laughing at you, pissbowl.

For sale parts for FT-101Z.

Ask what you need and make an offer. All parts are in good working conditions unless otherwise noted.

Buyer to pay S/H.

Send all inquires to: servis_za_elektroniku@iname.com

I'm not sure if this has been posted and if not, READ...it's important.

[Text | Word97]
"Internet: The American Experience"
An Address by
William E. Kennard
Chairman
U. S. Federal Communications Commission
to the Conference on
"Internet & Telecommunications: The Stakes"
Paris, France
January 28, 2000
(As Prepared For Delivery)
Thank you, President Hubert, for that wonderful introduction. It is a great pleasure to be in France.
I would also like to thank you for inviting me to participate in this conference to share our experience with the Internet and telecommunications in the United States.
I understand that this is the first conference on the Internet for the Autorite de Regulation des Telecommunications (ART), and that you have taken an active role in the organization of this timely event. I would like to commend you and your agency for your efforts. The topics of discussion at todayï¿½s conference are extremely important.
The Internet and demand for data transmission are transforming the telecommunications industry, and providing tremendous benefits to citizens around the world.
I believe that all countries can benefit from the growth of the Internet, and that greater participation in the information society.
It has been our experience in the United States that the fastest way to expand access to the Internet is to create the conditions for a robust, competitive telecommunications market. An essential element to ensuring that such a competitive environment is created is to have a strong independent telecommunications regulator.
I have had the opportunity to meet on several occasions with my counterpart and colleague at the ART, President Hubert. I am pleased to say that we have had many good, productive discussions thus far, and I have heard a great deal from him about his views on communications policies in Europe.
I am convinced that he has the vision and capacities necessary to lead France into the Internet age. I am committed to providing whatever support we at the Federal Communications Commission can provide to him, and I urge you to do the same.
I also would like to commend the efforts of Secretary Pierret. The tremendous progress towards liberalizing the French market since the 1996 Telecommunications Law was adopted here is due, in large part, to the

commitment of the ART and the Ministry of Industry, to make sure that France is poised to take advantage of the information revolution.
I sense a firm recognition by the French government that the world as we have known it -- where distance and isolation have kept people of different cultural, linguistic and social backgrounds apart from each other -- is quickly disappearing. That world is being replaced by a system of global connectivity, in which what happens in France and the United States, respectively, has a real, profound impact on the citizens of both countries, and in which huge amounts of information can be freely exchanged with no more than the stroke of a few keys on a computer.
France, like the United States, has a common vision to promote all that the Internet has to offer.
We all agree that competition is the best way to do this. Competition brings consumers the benefits of choice and innovation at more affordable prices, and is the best way to ensure rapid deployment of the telecommunications infrastructure.
Recognizing our common vision and the globalization of the Internet and e-commerce, I believe it is essential that we work together to find the best way to advance our goals.
For this reason, I have come to France to talk about the telecommunications revolution, and how the Internet is changing the world forever.
I have come to learn about what is happening in your market, and to give you an update on what is going on in mine.
I have come to discuss what we have done at the FCC to promote the deployment of a robust, advanced telecommunications network ï¿½ our successes and our failures ï¿½ and to provide whatever assistance I can to you as you transition this market from one of monopoly to one of competition.
With that in mind, I would like to share with you how the global telecommunications revolution is reshaping the foundations of the United States economy.
Nowhere is this reshaping of U.S. society more apparent than with the Internet. The Internet and demand for data transmission are transforming the U.S. economy.
In 1996 there were 27 million Internet users in the United States. Today there are roughly 80 million, a nearly 200 percent increase.
Our Internet traffic is doubling every one hundred days.
Over 40 percent of American households have Internet access.
In 1998, the U.S. Internet economy generated an estimated $300 billion in revenues, and accounted for 1.2 million jobs.
And electronic commerce, which will be 90 percent business-to-business, is projected to be a trillion-dollar activity in the next three to five years.
Already, directly or indirectly, through our information and telecommunications sectors, the Internet is linked to one-third of my nationï¿½s real economic growth. Because costs are decreasing in these sectors and in the Internet, the Internet also has helped reduce the rate of inflation by one-third.
The communications and information sectors, coupled with the Internet, now account for about 15 percent of our gross domestic product.
But these numbers do not adequately express what it is like to be alive in America in the age of the Internet.

There is a fever in the air, a speculation about possibilities, even an expectation as almost every arena of human thinking and ingenuity joins the Internet.
We file our taxes over the Internet. We apply for jobs over the Internet. We check the cinema times, and reserve seats on airplanes over the Internet. We even fall in love over the Internet, although we do not yet know whether the Internet divorce rate will be higher or lower than is normal.
There are 43 million web sites on the Internet, and few major retail businesses in America today operate without a web site.
Those businesses work directly with their customers, eliminating costly layers of brokers, wholesalers and other middlemen.
Electronic democracy is very alive over the Internet. Out of 535 members of our Congress, only a few do not have web sites, and these representatives are from states or districts where their elections are uncontested.
That tells you something about the power of this medium.
But for the Internet economy to develop to its full potential in your country and mine, there must be an available, affordable broadband telecommunications infrastructure. As you know, this will only happen when there is true and full competition in our communications networks.
That, really, is the blueprint that we think will help these networks thrive and succeed, and it is a vision shared by many of us in America and, Iï¿½m pleased to say, by many in Europe also.
To a large degree, the design for this network is already in place in the U.S., with competition taking hold in many portions of the network.
Last week, for example, I attended a conference of competitive local exchange carriers in the U.S. Like many of the start-up companies in France, these companies have been formed to compete against the local telephone monopolies in the U.S. for local telephone customers.
The energy and excitement at this conference was tremendous. These companies invested $18 billion in 1998, garnered six percent of local telephone revenue in the second quarter of 1999, and are adding around one million lines a quarter.
Today, they are poised to take a higher percentage of local telecom revenues, especially in the rapidly growing data market.
We have seen tremendous progress in mobile wireless as well. Since 1994, subscribership for wireless phones has more than tripled in the U.S. Real prices have dropped by 40 percent, and most of our major cities have at least five mobile phone providers, with some having as many as seven.
Long gone are the days when a mobile phone was viewed as a status symbol or something only available to the wealthy. With Third Generation technology on the horizon, wireless is poised to capture a larger segment of the telecom market.
None of this dynamic growth happened by chance. It was a direct result of government policy.
Where competition was present, our policies allowed the market at issue to operate free of government regulation.
At other times, such as when we were introducing competition to monopoly sectors, we had to act aggressively to break open monopolies and promote competition.
These decisions required that we have the independence from political

pressures to make the tough decisions. And it meant that we have enough authority to back up those decisions with aggressive and predictable enforcement.

Whether we opt for restraint or active regulation, both types of decisions are subject to significant scrutiny. And in that type of environment it is important that we not shrink from our duty to put the interests of consumers above every other concern. Ultimately, if the consumer wins, the economy as a whole does as well.

For many decades in the United States, the monopoly telephone network retained exclusive rights to provide services and equipment. Beginning in the late 1960s, however, our courts and our Commission determined that, as long as equipment connected to the public telephone network did not harm the network, it ought to be unregulated.

This decision affected all kinds of equipment, such as telephones and answering machines, and eventually computers and even fire alarms. As a result, the market for terminal equipment flourished.

As an unintended by-product, the decision placed into the hands of Americans flexible, inexpensive equipment, such as modems, that they eventually would use to reach the Internet. Even today, the entry price for connecting to the Internet may be dropping from a thousand dollar computer to a hundred dollar palm pilot.

Also in the 1970s, as computers and communications were coalescing, the Commission made an effort to distinguish between the data processing of basic telephone service and the data processing of other, or enhanced, information services provided by commercial computers.

Basic telephone service remained uncompetitive, so the Commission continued to regulate it, but the Commission decided that enhanced services were highly competitive, and should be left unregulated. This decision, of course, contributed to the explosion of computer services in the 1980s, and, ultimately, to the Internet.

In the 1980s, our courts decreed that long distance service (essentially the services that cross state borders) be made competitive, in place of the AT&T monopoly that had provided the service up until that time. As a result, today we have 600 long-distance companies, and rates have dropped 56 percent in real terms since 1984.

But the unintended consequence for the Internet was that these competitive carriers laid the solid, backbone fiber-optic infrastructure upon which our Internet rests today.

Two acts of Congress, a 1993 act giving the FCC authority to auction spectrum, and an extensive 1996 act to break down barriers to competition, made competition the cornerstone of our telecommunications policy.

The 1993 Act gave the Commission the authority to auction spectrum for the provision of telecom services. The Commission used this authority in 1994 to introduce additional wireless competitors to the cellular duopoly.

Before auctions, the Commission used comparative hearings and lotteries to award spectrum licenses. Comparative hearings took too long, delaying service to the public. Lotteries often resulted in spectrum being assigned to people who were merely speculators, and who had no intention of developing the full use of the licenses.

Auctions decreased by four times the amount of time it took to assign

licenses, and ensured that the spectrum went to those who were most eager to use it to serve the public.
Beginning in 1995, we used spectrum auctions to introduce competition to the cellular incumbents. The result has been lower prices and more choice for U.S. consumers.
The Telecommunications Act of 1996 introduced local competition by giving the FCC the tools to break open the incumbentï¿½s control over the local loop. The Act did this by requiring the unbundling of the incumbentï¿½s network elements, cost-based interconnection; and co-location.
Implementing these requirements has not been easy. Thankfully, however, I have been given the tools to do the job.
Regulators like me need decision-making authority. We also need enforcement authority.
In the past, we have not been always been as aggressive in enforcement. However, we have learned that all the rules on the books will not bring competition if the rules are not honored. It is critical for the regulator to have enforcement authority to step in, if necessary, to stop the inevitable attempts by the incumbent to slow down the pace of competition.
The local exchanges in the U.S. have been monopolies for 100 years, but now, because of unbundling, co-location, and cost-based interconnection, new competitors are beginning to offer local services. As they do, we are unleashing the incumbent providers to compete freely with the new providers, and the telecommunications network is flourishing. The same dynamic can occur here in France as you introduce competition.
I do not want to mislead you into believing that we at the FCC have never made any mistakes. To the contrary, we have made many mistakes.
If I had to sum it up, I would say that the vast majority of the mistakes occurred because we allowed incumbents to convince us to not open markets, or to slow down the introduction of competition from new entrants.
Along the way, for example, we made a mistake in the wireless market when we decided to only allow two licensees to provide cellular services in each market. This was a huge mistake since it created a legally sanctioned duopoly. As a result, consumers paid too much for cellular calls, and the licensees had no incentive to innovate their services.
Luckily, in the 1990s, with our PCS auctions, we changed this policy and allowed many new entrants into the cellular market. As a result, in the last five years, real wireless prices have plummeted 40 percent, and competition has thrived. In many markets, we have five competitors, and in the larger markets we have up to seven cellular providers.
The satellite industry also suffered from our mistakes. We initially denied satellite TV companies the right to offer some programming that cable companies offer after the cable companies argued that this would be too much of a threat for them.
Fortunately, in 1992, we changed our rules to allow satellite providers access to popular cable packages. The result has been robust competition in the industry to the benefit of consumers.
The common theme of these stories is that in every case where we made mistakes, we did not have enough faith in the marketplace.
Whenever we sided with the incumbent, we were on the wrong side of history. In those situations, consumers were the losers, and our economy suffered

because it was unable to expand as rapidly as would have otherwise been the case.
We did not make a mistake, however, with the Internet. As a result, we now have robust competition for the provision of the Internet, and that service is thriving in the United States.
In closing, let me say that France is extremely important to the United States, and our ties are very real and deep.
Therefore, our two countries must work together as partners, learn from our mutual experiences, and support each other as we undertake the challenges of the emerging information society, and build the networks necessary to support this society.
Speaking about our partnership reminds me of a story about another kind of partnership. This one involves a husband and a wife.
The husband was very sick, so he and his wife went to see their doctor.
After the examination, the doctor asked to speak with the wife in private about her husbandï¿½s condition.
The doctor told the wife that her husband was very sick, but that she could help him get well if she did just a few important things. Upon hearing this, the wife anxiously said, "Please, doctor, tell me what I can do to help my husband."
The doctor said, "All you have to do is make sure that your husband has three hot meals a day and that you take very good care of him. You must relieve him of his chores and avoid quarreling with him at all costs. And when he gets home from work each day, you must relieve him of all his worries."
After hearing this, the wife joined her husband and left for home. While in the car the husband, who had seen his wife talking to the doctor, asked his wife, "What did the doctor say?"
The wife turned to him and said, "Iï¿½m sorry, dear, but I think you are going to die."
The moral of that story is that partnership, cooperation and support are essential to achieving our goal of a robust and truly global information society.
I firmly believe we can make it happen, and I pledge to work with you in partnership toward that end.
###

I think the difference here is that you're trying to make it sound as
though Jeff said any two operators WILL make contact. It's certainly
true that the potential exists that any two operators could make
contact.

I thank you Mr. Sherin for your kind remarks. Many things can be taken lightly or with the proverbial grain of salt but NEVER intolerance. Bigotry is as dangerous to America's stability as any covert or overt force used by an adversary in both peacetime and wartime. Bigotry divides us and divided we shall fall. Let us all do what we can to respect our fellow man.

in news:8b68dq$28e$1@nnrp1.deja.com...
> Good thing you wised up Roger, I can tell your voice.

You can bwhahahahahahahahahahahah! You dumbass, you continue to
demonstrate you fucking stupidity more each day. Do some more drugs and
go fellate little boys as you like to do, douche-bag Tolassi.
You know my voice,,,,,,,yeah right, like you knew the Advanced element
test, huh?
At LEAST I have never had to retest. You didn't even know
what "permeability" was, huh, dumbass? That's why you asked on
frequency. Did you ever figure it out? An "old-time" ham like you
should know what it is? Or are you just too stupid ?
No, you pussied out of the Advanced because some "bugs were biting
me".....
Bwhahahahahahahahahahahahahahahahahahahahahahahahahahahahahahaha!
What a girly-"man." No wonder your first wife turned into a lesbian.

Look, faggot, I don't get on 14.313 anymore. Get over it. I know you
really wanted to find a new boyfriend since, shamu Jane is going to
weight watchers, but I've told you fag-boy, I don't go that way. Oh,
and I think the DEA would be very interested in you bringing marijuana
across state lines. Say you're going to Dayton? Well, maybe the highway
patrols in those states you'll have to drive through will be alerted
for a drug dealing faggot named Dave.
Go slop Jane a while, the SOW may need it. Did you get that cyst
removed from your neck yet, freak? Maybe your employer would like to
hear tapes of their employee on the air and his behavior.
Now go eat your "hoagie" with the man-ayise aka sperm, er mayonaise,
and don't forget to slop Janie.

If they can, and they try, then they will. That's the way I read it.
It reminds me of the old myth that "CW gets through when no other
mode will". I'm just giving Jeff a hard time.

That effort would have been wasted, Jeff. Reg wouldn't have known
I was there. I don't even know if English hams are allowed on 12m.

It's a logic problem, Jim. If there exists two HF hams anywhere in the
world who cannot make contact then the statement is false. I am convinced
that there are at least two HF hams in the world who cannot make contact
with each other.

KK7HO and Doc,

If I could have a wish granted, it would be to see posts which educate in some way. Flaming one another is futile.

Understanding you have every right to say what you want, I'm asking everyone to ponder the benefits that will arise from focusing. If we left personal animus at the door, discussion would be much more fruitful.

What do you all think? And you needn't agree with me.

"Irrelevant"? That's the whole crux of the debate.

>Two QRP
>operators with attic antennas on opposite sides of the globe usually
>cannot communicate under any circumstances.

And two ops using full gallons into dummy loads cannot, either.

I assume the two ops will do what is necessary to take advantage of their
current propagation conditions to ensure a communication circuit. Common
sense dictates that 1 mW into a wet noodle won't always work.

Cecil, I dropped alt.family.radio from the header:

W6RCecilA <Cecil.A.Moore@IEEE.org> wrote:
>Jeffrey Herman wrote:

>> I regret leaving out the smiley. But you edited out the serious comment:
>> Those two operators CAN establish communications if they set up
>> a sked on more than one band. Let that be a lesson to you, Cecil.

>You forgot to put a smiley on that one also, Jeff. You know and I
>know that QRPers with attic antennas on opposite sides of the world
>will almost never hear each other no matter how many frequencies
>they try.

Again, I assume those two ops, if they're serious, will do what is
necessary to take advantage of current propagation conditions to ensure
the existance of a communication circuit. One milliwatt into a wet noodle
is not a serious attempt to establish a circuit.

>I cannot listen on multiple frequencies at the same time. Can you?

1500z, 1505z, 1510z, 1515z, 1520z -- those times are not "at the same
time."

>When I said pick a time and frequency, I meant a time(1) for frequency(1),
>a time(2) for frequency(2), etc.

No, you said you and Reg tried 28.8 (SSB!) at 1500z and failed to
establish comms; it was my suggestion that you both should have then
tried 12m @ 1505z, 15m @ 1510z, 17m @ 1515z, 20m @ 1520z.

Next time, try CW!

From: lingua_franca@my-deja.com
Message-ID: <8b4a0ckng1@nnrp1.deja.com>
Source record: 116452

Well, after being inactive for over 15 years, I'm finally gonna do it!!
I'm going to upgrade from Tech ot Extra come this April!!

Got a few questions I hope some folks here can help me out with.

Way back when, the word on vanity callsigns was that they were only
granted to Extras and then only rarely. Basically, if you weren't some
kind of special event station or something, you wouldn't get it. So
don't bother applying. But I've seen a lot of talk about them all over
again.

Soooo, what's the scope on them now? Is the FCC back to issuing them?
With all the rush that's sure to come this April, how will they be
handled.

Also, just what's the new format for Extra callsigns now. Back in my
time, they were 2x1 and 1X2, starting with A, K, N or W. But I imagine
those must be used up by now.

Thanks in advance for your help!

Keep going, Cecil. You'll soon get this thing fine tuned enough by
adjusting terms and conditions that it will serve whatever strange
purpose you've come up with.

Wear the dunce cap one more time and your name will be permanently
inscribed on it.

> your life on it being true? Certainly not!

Hell, you've now gone from 100w and dipoles to QRPers and mobiles. I
just stated I worked some mobiles last night. If you want to fine tune
the thing until the conditions prove your claim, go for it.

A dipole for 20, 15 or 10m is not too low for DX communication. It is
nearly 1/2 wave in height at 20m. If you were talking about 80m, we'd
have a different scenario. What limits your height to 30 feet? A guy
who wants to communicate worldwide would hardly limit himself to 30
feet. Even if community restrictions limited him to that height, he'd
surely be clever enough to invest in a vertical or a minibeam.

It is silly for you to make a bet with me on my ability to work someone
in Texas on a regular basis giving me the choice of frequency and time
is almost a sure thing. Listen in most any Sunday evening at 1800z on
or near 21.335 as I QSO my QSL manager and friends then work the pile.
I don't know if you can break the mob with 100w and your dipole but
many, many others have done so. The number of California, Texas,
Arizona, Utah, Washington and Oregon QSOs last night was quite high.
Even more were worked on 17m until 4 AM here.

When you want to try mobile, let me know. I'll put the Hercules II amp
in the car if you like. You can figure how loud I'll be. If some guy
using a dipole in California gave me S9+20db last night, do your
engineer thing: Subtract the gain from my four element "rich guy"
tribander and reduce my power from 400w to a poor man's 100w. Now how
strong would my signal be? Could I still communicate with the fellow
with 100w and a dipole in California?

The Holocaust is usually thought of as an anti-Jewish effort when in fact perhaps less than half of its victims were Jews. If it helps, concentrate on the others. To paraphrase Isaiah, ye shall know the truth and the truth shall make you work.

I know of no way to close without sounding patronizing so I won't.

Good for you Lloyd. Yes, they existed and my father lost family in them and one named Zische Schwartzbard is listed on a Ukranian site on the Internet. Although nothing can ever bring back the murdered, it's important that a skeptic like you understands the truth and I believe you do. And Lloyd that's why NONE of us should profess superiority over anyone else be it based on color of skin, ethnicity, gender, religion or sexual preference. As soon as one group believes they're superior to another, they try to prove it with words and actions. And actions lead to genocide. Try to understand that we are all the same UNDER the skin. We are all the same, independent of what God we worship if we worship at all. We are on this planet to AID not kill one another. That is God's real plan.

But did you do it *from* a mobile? Jeff said, "any two operators".

> If you want to fine tune
> the thing until the conditions prove your claim, go for it.

Actually, I am not fine tuning anything. Jeff's statement covers all
operators and all equipment including QRP rigs used with mobile antennas.
Exactly what is it about "any two operators" that you do not understand?

> A dipole for 20, 15 or 10m is not too low for DX communication. It is
> nearly 1/2 wave in height at 20m. If you were talking about 80m, we'd
> have a different scenario. What limits your height to 30 feet?

At my age, 30ft is as high as I choose to climb. I have the sections to
take it to 60ft and decided against it. If I can't do my antenna work by
myself, I don't do it.

> It is silly for you to make a bet with me on my ability to work someone
> in Texas on a regular basis giving me the choice of frequency and time
> is almost a sure thing.

When both are mobile running 100 watts each? Jeff said, "any two operators".

> When you want to try mobile, let me know. I'll put the Hercules II amp
> in the car if you like.

There you go with the expensive equipment again. Most operators don't
possess an amp. Jeff said, "any two operators". That would apply to
both ends being mobile at 100 watts. All some operators own is a QRP
rig tied to a short antenna in the attic. Yet Jeff's statement says
two of those operators can make contact half way around the world.
That's what "any two operators" means, Dave.

Please answer the question, Dave. Can "any two operators" running
5 watts to attic antennas reliably establish a QSO from Tanzania
to Texas? If the answer is 'no', Jeff's statement is false.

> If some guy
> using a dipole in California gave me S9+20db last night, do your

> with 100w and a dipole in California?

We are not talking about random contacts, Dave. We are talking about "any two operators" in particular. Of course, you and I can always find someone to QSO with. But "any two operators" means you and I can keep a schedule no matter what equipment and antennas we are using and no matter what the band conditions. It is a prima facie false statement. Defending it is making you look silly. If I can find two operators in the world who cannot make contact, then the statement is false.

For a while when I was with Intel, I was in charge of establishing emergency HF practice communications among the Intel sites. We had a multi-band schedule using beams and amps and could not always establish two-way communications. I remember one solar flare in particular at the bottom of the sunspot cycle that pretty much wiped out all HF propagation. Think about it this way. If any two operators in the world could make reliable HF contact, there would be absolutely no need to use a satellite.

You have a 2 year grace period in which to renew. You cannot operate radios during that period but all you need do is get the license form from the FCC and file it.

You can check the online databases such as http://www.qrz.com and as soon as your license is shown valid, you can start operating and you don't have to wait until you actually receive your license. That particular site may even have a link to where you can download the proper renewal form.

It isn't about what I don't understand, Cecil. It is more about your nitpicking than anything else. It's a pretty sure thing until you start fine tuning the scenario to suit your purposes. I think we can exclude the QRPp types with saline wetted string for antennas and those trying to load a quarter wave whip for 2m on 40. You can mix 300,00 foot tall aliens having babies while dunking basketballs in the back of the bus if you like. You still have little idea of what is really possible.

I don't have any trouble communicating worldwide. It problem seems to be that some self-styled antenna "expert" in Arizona is having trouble working his G-land chum.

Yep, Reg thinks the multi-path made the QSB unmanagable.
I don't honor the no-CW in the phone bands gentlemen's
agreement. Guess I'm not a gentleman. I use CW whenever
and wherever I deem it necessary. Reg apparently does
also. Wonder of wonders, I tend to agree with Larry
on the use of CW in the phone bands. I've been doing
it for 48 years and nobody has complained.

The unfortunate truth is that Reg and I tried a schedule
during the recent DX contest. However, you did say, "any
two operators".

Don't know who that would be, Dave. I'm not an antenna expert and I'm
not in Arizona.

If you want to do a realistic test, let's try 100 watts using dipoles
between Tanzania and Texas. That's the equipment the average HF ham
has.

This purulent Kc8JBO person chastises people for not being able to spell.
Skimble-skamble postings seem to be the norm with him.
Why then is he so unable to spell " brain." I wonder what a " brian" is.
And He cannot spell " and." I wonder what an "adn is?

I've tried to look up "lameo". No such word.

Kc8JBO posted.....
"So another sophmoric "threat." You're a really boring little fuck,
pissbowl. You lack the brians, ability, etc. to put
together such a
device. Hell, lameo-fag, you can't even spell
"painfully" correctly.
Ah well, an idiot savant like you might get lucky. Now go back to
your ghetto apartment, feed your pet roaches, fornicate your dead
mom adn let your dad cornhole you as he does on a daily
basis.
I'm mocking and laughing at you, pissbowl."

Notice the idiopathic use of profanity in many of the postings.
" Now go back to
your ghetto apartment, feed your pet roaches, fornicate your dead
mom"

Nice guy. He eats with that mouth.
But still uses words improperly.
Improper use of the word fornicate. Fornicate means to have consensual sex with
a prostitute.
If his mother was a dead prostitute then the correct use would be as an
example,
"You should go and fornicate with your dead mother. " But then it would be
impossible to fornicate with her, when she is no longer. Fornication is
consensual. Dead people cannot give consent.

>can anyone tell me how the is modulated (analog or digital) and
>everything that is happening between the microphone and the antenna .

Aw, Come on guys, this can't be that hard! Let's think outside the
box we imprisoned ourselves in.

In any radio transmitter, you must first generate a radio-frequency
(RF) electrical signal, with sufficient power to generate radio waves
when it is applied to the antenna. An "oscillator" is the device that
generates the electrical signal, and "amplifiers" boost it to a level
that the antenna can broadcast. This signal provides the energy that
will carry the information or "modulation" (i.e., your voice) and can
be distinctly tuned by the receiver on the other end of the
communication. How the antenna converts RF electrical signals to
become RF radio waves is pure magic (and I'd like to hear an
explanation of that myself).

Modulation is the means of modifying the RF electrical signal by tiny
amounts that relate in some way to the input signal. In your example,
the input signal is sound , which the microphone converts from
pressure waves to electrical "audio" signals. These tiny electrical
signals are amplified and then allowed to modify the original RF
electrical signal. Regardless of how this is done (analog AM, analog
FM, or digital) the modulator varies the waveform in such a way that
the receiver on the other side of the planet can "de-modulate" it and
recover the original information (i.e., your voice).

There, that wasn't so hard, was it?

regards,
monty N5FC

Hi,
for Filtering ... I've always made a 4 diode bridge rectifier
from 1N4001,2,3 and some caps. Even if 1 had a wall transformer
that's suppose to be regulated, I've found that if I can't hurt,
and some caps. 0.1uF and 0.01uF .

voltage regulation ... 7805 = 5volts ? or what ever the device
needs as for volts in.

I had a chief engineer at KOEL who was of the opinion that there was no problem that couldn't be mitigated by adding more capacitance. By the time I had left the radio station, Arnie had wired in so much capacitance into virtually EVERYthing, that it would take a half hour from the time I pulled the switch, just for things to finally shut off.

The downside of that was that I could make a fresh pot of coffee between the time I pulled the switch in the morning, and the moment when the board finally came on.

But not even the Simon and Garfunkel records hummed.

>I'm just giving Jeff a hard time.
>

Dear Fellow Amateurs in rec.radio.amateur.misc:

On behalf of the non-technical, non-Amateur folks in alt.radio.family, let me respectfully request that you discontinue cross-posting to the FRS newsgroup.

Although there are many hams who participate in alt.radio.family, as users and advisors, the vast majority of readers consists of folks who simply want to use these license-free radios for family communication and who have little interest in CW and DX. While surely there are a few who ultimately will consider becoming Amateurs, it is not the intent of most. That makes this thread of little value in the FRS group, and it certainly has been giving a less-than-ideal first impression of our hobby.

Having been licensed for over 3 decades, I can appreciate a spirited discussion about Amateur radio! Nobody is asking you to stop your debate. We simply are requesting that you change the headers in your message so that alt.radio.family is not copied.

In spite of our sometimes heated exchanges, ham radio is, for the most part, a cooperative hobby. I find that folks are always ready to help someone with a problem.

I hope this same spirit will prevail in this situation. Thank you.

Sincerely,
Paul Folmsbee K5PF

We should have nuked the Germans to try out the Big Bomb and then gone after
the Japs. No one can tell me that we didn't have a deliverable A-bomb with
Adolf's name on it but declined because of the WHITE SKIN of Germans, Nazis
or not. The Japanese inhumanity paled by comparison to the Germans yet the
Hun were WHITE which made all the difference in the world to Harry Truman
who called the shots. Hell, we should have turned Germany into a Middle
European parking lot. The memories of the millions of Jews and non-Jews
exterminated in the camps and by other means called out for harsh
retribution and the best we could do was to hold the stinking Nuremberg
Trial which was the tip of the tip of the iceberg. Stalin had the right idea
after the Russians liberated the first camps.Execute every German who had
anything to do with anything involving them. But than
thanks to the benevolence and the squeamishness of the west, it stopped the
Russians from shooting down the murderous Hun bastards. Too bad!

Sir- I think that you are confusing spelling and keyboarding error.
"Brian" and "adn" are common errors made on those words while typing
them. However, when you have something that is blatantly misspelled such
as "Alberquerce" then you know that the person has a spelling problem.
There's no way that word could have been misspelled like that due to
keyboard error.

ERik

"Skimble-skamble," Hahahahahahahahahahahahahahahahahaha!
That's the pot calling the kettle black.

> Why then is he so unable to spell " brain." I wonder what a "
brian" is.
> And He cannot spell " and." I wonder what an "adn is?

Poor little typo-pouncer. What's "Phisionguy?" Don't you mean Fission?
I couldn't find "Phision" in the dictionary. What's the matter,
Lllllllllllllloyd, being a 27 year old virgin getting to you?

> I've tried to look up "lameo". No such word.

But, your picture is there by the definition as an illustration.

Notice the idiot "Phisionguy" forgot to capitalise the "He" in the
subject title, for starters.

> " Now go back to
> your ghetto apartment, feed your pet roaches, fornicate
your dead
> mom"

Poor, little self-righteous hypocrite. That's life, retard.

> Nice guy. He eats with that mouth.

Yeah, ask your wife/girlfriend. Or the EX-wife/girlfriend in YOUR case.

> But still uses words improperly.

"But _he_ still uses words improperly," my little hypocritical puppet.

> Improper use of the word fornicate.

"_There was_ improper use of the word fornicate."

>Fornicate means to have consensual sex with a prostitute.

You mean like YOUR mother? Obviously, you either can't read or are
talking out of your ass. Here's the definition, retard:

Fornication [for*ni*ca*tion] n. vouluntary sexual intercourse between
two unmarried persons or two persons not married to each other.

Fornicate is derived from Fornication, Cheeta. Prostitutes have nothing
to do with the definition, but a little certificate in "computer
operations" isn't really a full 4 years of college, is it?

> If his mother was a dead prostitute then the correct use would be as
an
> example,
> "You should go and fornicate with your dead mother. " But then it
would be

I guess a DUMBASS like you, Lllllllloyyydd has never heard that what
you and pissbowl practice is called necrophilia. I said in a previous
post that pissbowl keeps his dead momma's corpse around. What a stretch
in ILLogic. Consent was never mentioned, in fact pissbowl's dead mommy
probably would give consent.

I get a kick out of Seymour, WA9KJB. First for a big plus. He's 83, came though lung surgery fine and everybody's happy for him. Now for the minus side. He's a yenta. A washerwoman. A gossiper. For example. concerning the persons and events on 14.313 which "should" be of no interest to him, THEY ARE. I hear things like, "I shouldn't mention names" but he does. "I shouldn't get involved" but he does. "It really makes no difference" but it does. "I don't really care" but he does. "Talking about an incident stirs hot coals" but he does. "I really have no obsession about anything" but he does. "Riley's rulings don't intererest me" but they do. I should continue giving more examples of his pretentious attitude but I won't.
Walter Winchell. AF2Y

It's also a symantics problem - your specialty. Could and can are
synonymous in the statement. For your observation to be true, the words
can and will must be sysnonymous.

Not likely. For example, the ONLY way to get a 1X3 call now is under the
vanity call program.

Hello,

Im looking everywhere for a Kenyon T-656 plate transformer for my old
Harvey 80-T transmitter from 1936. This transformer was in a A6 case
meassuring 5" x 5" 1/8' x 5" and had a tappered 110VAC primary and
740-0-740 VAC secondary and rated 300mA.

If anyone out there knows where to find one, please write me directly...

Body handling: HTML body converted to readable text

Amateur Radio is not "cb" -- not just buying a factory-made, plug-and-play station and pushing the mic key, shouting, "CQ CQ!" While currently in the United States there exists a trend to make entry and upgrade to Amateur Radio privileges easier, there is something this hobby represents that is true for any amateur radio operator, in whatever country s/he resides. We represent our respective countries. We are ambassadors. When I talk with a Ukrainian Amateur, I actually come away thinking, "So that is how they act over there. That's what that country is like."

Amateur Radio to me is an art. The art of communication, the art of language, the art of electronics, propagation, etc. Perhaps that is why CW is so attractive to some people, RTTY to others, and why DXing is so hot to many others. It is more than just making quick contacts and feeling like you did something grand because your 1500 watts made it 3000 miles.

We Amateur Radio Operators are making connections. The human touch. Perhaps making peace and improving the human condition. Could it really be possible?

All of us are part of a large family. This hobby allows us to use technology in a pleasurable way to "reach out and touch someone" (remember that advert?) and make connection. CW is a mode, one of many. I take great pleasure in it. It inhances the experience of communicating. Sexy, some might think of it.

If we wish to encourage the long life and health of cw, or of any mode, perhaps we should nurture the sizzle. This has been said, and said again. We lead by example and through embracing those who choose this form of communication. The result is that more of us humans are connecting, forming a closer family around the world. No skin color. No accent. No gender. Pure exchange of thoughts and the sharing of common experiences.

I am a single dad, with two sons (11.5 and 13) -- and my life's work is to nurture them into leaders -- men who know the "real deal" and lead by example. Ham Radio is just a channel that allows society to communicate. What we communicate and how is an extension of who we are and what we believe. So my hope is that my boys, and I, exemplify a high standard that impacts the world of humankind with something of value.

Life is simple. Really, it is. And Amateur Radio is not God's gift to the world. But it is a very valuable pursuit. The foundation of this hobby is made in part of the value of life and the respect of each other. Modes of operation in Ham Radio is really insignificant. What we do through these modes is more at issue. CB became the mess it is because those with virtue left it to the lowest common denominator.

I hope to spark the kindling in other's minds. To tempt the non-amateur with the magic and sizzle of crossing boundries and issues, and connect. Be it with dit-dahs or with long-winded chatter.

(remember to change my email address when replying direct)

The war in Europe was over before we tested the first fission bomb.
If my memory serves me right, we tested in July '45 and dropped them
on Japan in August '45. Enriched uranium and plutonium were very
scarce then. There were those who argued against testing to conserve
the plutonium used in the weapon. A year after the war in the pacific
was over, our stockpile of fission weapons was less than a dozen. And
these would hardly turn anything larger than a moderately sized city
into a parking lot. Conventional bombing in Germany touched nearly
every part of the country. When it became apparent that the
physicists in Los Alomos would have a weapon ready in the summer of
'45, Curtis LeMay had to be told to curtail his bombing of a few
cities in Japan so that there would be a pristine target which to drop
the bomb on. This was a daunting task because LeMay had done a very
good job of leveling Japan up to that point.

>

No, what's interesting is that he's not actually denied it. He's pointed out that you can't PROVE anything, but he's not actually said that he's NOT possum belly.

As I learned by watching kids in school, what you say gives away what you're thinking. And if you subscribe to the theory that the person who hides behind a door, looks there first, you see that he's thinking that there is enough evidence to point to him unequivocally, but he's hidden enough that definitive PROOF will allude the accuser.

If he were actually innocent of the charges, he would directly deny the charge, suggest an alibi, offer witnesses...but he would never throw down the gauntlet challenging you to PROVE your claims, unless he KNEW in advance there wasn't any smoking gun. The innocent wouldn't KNOW what you had, and would be worried that you may be able to convict, so he wouldn't offer the challenge of proof.

Generally, only the guilty demand that you PROVE an accusation before directly denying it.

Generally, only the confident guilty offer that challenge after denial.

So what you've got is his indirect admission of guilt, by showing us which door he hides behind first.

I don't think your statement is true for two average hams running
dipoles and 100 watts. I think your statement applies to hams who
have invested serious money to achieve their world-wide HF
communications.

Hi All,

I am in desperate need of a schematic and parts list w/ numbers for the
Agrelo DFJr. antenna array. The J. Agrelo story is just too painful so I'll
spare you the details.
Thanks to Steve, WA3SWS for the info he sent me.
This unit had RF applied to the RX port and the little rx amps are blown.
Looking for those parts numbers.

Any and ALL help is greatly appreciated!

So do I, Jim, but you do NOT understand the thread. There is a world of difference between working another mobile at random and working one particular mobile at one particular time in one particular place on the other side of the world.

I am saying you cannot hit the bullseye in the dark. You are saying, yes, you can hit something even in the dark. I agree you can hit something, just not the bullseye.

I checked around on Dejanews and didn't find an answer to this question.

How long does it take the FCC to issue a new amateur license? I took my elements 2 and 3A (and passed them) on March 12, 2000.

When can I expect to have my new license for technician class? I've been checking www.qrz.com but nothing yet.

Thanks in advance.

Dave

This twit is not George, W4FQF. He is coming out of North Carolina.
Just as a guess I'd look for a gentleman called James Overfelt, K4VVV.
I'd check it out further, but it really isn't worth my time or effort.

And I don't respond to fools that use other people's calls.

Dan/W4NTI

Seems one could just make a simple cable
to connect the car cigarette lighter
outlet to the 4mm socket on a Yaesu
FT-10R HT instead of paying twenty
something dollars for their adapter. Am
I missing something? Is there some
filtering, current limiting (other than
a fuse), charging logic, or other
electronics in the Yaesu adapter?

Thanks for any experience here.

73,

KC0FGU, Pete

>The Holocaust is usually thought of as an anti-Jewish effort when in fact
>perhaps less than half of its victims were Jews. If it helps, concentrate
>on the others. To paraphrase Isaiah, ye shall know the truth and the truth
>shall make you work.

Half of its victims...hmm....considering some place the figure as high as
18million killed by the Nazis (namely: Jews, Poles, Gypsies, other Slavs,)
Yes, then, probably less then half the victims were Jewish. Still, besides
Jews and Gypsies, the others were "untermensch" and not singled out for
extermination. They were to be slaves, and if they happened to get sick,
injured, or defiant, then they too were killed.

For me, from 1939 on, we lost contact with our family in Krakow. In 1975,
my uncle traveled to Poland to search......a bribe of 3 blue jeans went a
long way back then. There was no trace of the Gmerek or Jakubiak. Who made
them dissappear....was it the Nazis or the NKVD(communists)?....We don't
know. Suffice it to say......The Nazis were BAD (is this a major
understatement or what!), as well as the communists.

So, while I don't hold to what BS preaches, at least he has started the gray
matter moving in Lloyd. Maybe I was too hasty in my killfile option. Maybe
there is hope for Lloyd, afterall he is still in his 20's (I assume).

I hope you will investigate further Lloyd, not from just Liberty Net
sources.

Best regards,
Jason Glavy,
Yokohama, Japan

1826. ACS Newsletter for 3/13/00

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!

.....

Please Welcome:

Francis R. Upton / W6FRU <w6fru@springmail.com>
Yucca Valley, CA
First, Thank you for a GREAT site.... I am a member of Morongo Basin Search and Rescue. I was with our LEICS unit until it was disbanded. I have been through your LEICS 40 hour Search course, it was very good for me. I have a interest. I hope that I can make a difference.

Laurence L. Larson <nikonshooter@eudoramail.com>
Los Angeles,CA.
I am a district level staff officer for the Los Angeles County Disaster Communications Service, and a Tech.PLUS amateur radio operator. After my upgrade on April 15, several associates of mine and I (all are DCS members) will begin developing 'traffic and parking garage friendly' mobile N.V.I.S. antennas...just as OES/ACS has been developing this capability, we belive that this type of propigation should be available to our served agency, as L.A. is a LARGE chunk of real estate. QUESTION...is it possible for me to 'sign on' with the ACS org. as an operator or associate to participate in the weekly 'NVIS NETS' that are

generated from Sacramento? Please advise. 73, KF6MOF
.....

What's New on the Net:

The new Florida Special Response Team-A (FL SRT-A) web page has
been redesigned and is now available on the www. Our web page
design company has made some major changes to the site,
streamlined it a lot and at the same time added a mission
resources section to it. The mission resources section
currently provides some useful tools for mission planning,
within the next few months we hope to add additional resources
for on line assistance. Our web site address is
http://www.flsrta.org Safe searching and a good weekend to all.
Best regards, Ed Wolff
.....

This week's EMCOMM Bulletin:

MC228 Are we Prepared?
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC228 Are We Prepared? For release 3/13/2000

If we have never experienced it, do we REALLY comprehend the
results of a _major_ disaster? Amateur Radio licensees and those
active in Emergency Response or Communications Units may have
their equipment prepared, but what about the family and the
family home?

We may think we have prepared, but it's a real shock when there is
no water, no electricity, no heat, no transportation and no way to
get them. Consider _JUST_ the loss of electricity. Do we realize
a. that public and private wells may not pump water?
b. that service stations have no means to deliver gasoline?
c. that grocery stores close because computer connected cash
registers and bar-code readers cannot function?
d. that refrigerators and freezers won't keep food
e. that traffic and street lights don't work?
f. that sewerage disposal system pumps may not function

Can we internalize the effect such events will have on us and our
family? Few can, so we ignore the travail, the trauma and
tragedy.

Yet, any moderate disaster can cause significant destruction,
injury and death, whether earthquake, hurricane, severe winter
storm or extended flooding. Partial or entire systems - roads,
water, electricity, gas - can be disrupted or destroyed. There
may be days, weeks, months or years without public services.

Disasters are not selective and occur anywhere, anytime - no matter how lulled to sleep we may be in communities that have not suffered such events.

We read about these events and watch them on TV, yet how do we interpret that to our own lives? More often that not we don't. It's just too much to think about contaminated water sources, or wells that won't work, about no electricity or no gasoline, no heating oil, gas or propane; of life being totally changed. We shrug it off and go about our daily lives, particularly if we live in an area that was NOT affected.

Yet, questions do arise. Some officials who were saying "prepare for at least 3 days" (i.e., loss of public services) are now saying "prepare for a month" One official recommended storing 200 small garbage bags for human waste disposal, intending they be put over 5 gallon buckets, then closed and disposed of by digging a hole in the ground. This is likely a reaction to massive disasters around the world causing the realization that nature is in control, not mankind; that massive events WILL leave some communities without services for extended periods.

So, let's sit down and review our situation. How will we heat the family in the dead cold of winter, or store food in the stifling heat of summer? How can we have water for a self sustaining family for, say, thirty (30) days? Maybe 50 gallon storage drums? (One source predicts a 55 gallon drum will supply a family of 4 for 2 weeks, just squeaking by.) Think solutions and implement.

Once we solve that, then let's help a friend or neighbor do likewise. Yes, it may never happen, but who knows, tomorrow the preparation that we do may help in ways we least expect!

- To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

- articles for these bulletins are actively solicited. They are for the benefit of all EMCOMM units, whatever the name. Please send suggestions, topics or submissions to cary.mangum@macnexus.org or cary_mangum@oes.ca.gov

Bulletins are on the ACS Web page: http://acs.oes.ca.gov -and a Landline BBS: 916-262-0856 (graphical & standard interface); and an Archive: ftp.ucsd.edu/emcomm and ftp.ucsd.edu/hamradio/races.

.....

Please let others in the emergency services field know of the newsletter, and encourage them to join... If you have opinions, suggestions or written material that you'd like to share with the group, let us know. We're always looking for new ideas and

suggestions that will benefit everyone.

See you next week!

>The unfortunate truth is that Reg and I tried a schedule
>during the recent DX contest.

You didn't put forth every possible effort to establish communications; 1500z on 10m should have been followed by 1505z on 12m, et cetera.

>However, you did say, "any two operators".

But those two operators have to do their part by putting forth some effort to establish a circuit. Using Galaxy GT-550's with burned out 6LB6 finals certainly wouldn't work. On some band, there will be a path; those two ops will need to do their part to find the band which will work.

I never had trouble raising a ship or cutter located anywhere in the Pacific; I only had to search the calling channels on 12, 16, 22, or 26 MHz during the day, or .5, 2, 4, 6, or 8 MHz at night.

Effort, Cecil, effort.

73, Jeff KH6O

For sale or trade:
"ITT Mackey Marine Reserve Transmitter Type 2017A 405-535 kHz, 40W output, A2 emission." Almost new condition except for some scratches on the top of the chassis (probably from rack mounting). Crystal-controlled with the following frequencies: 425, 454, 468, 480, 500 kHz. Front panel: Antenna tuning controls (course and fine), 0-5 amp antenna current meter, channel selector. This transmitter is solid state. Asking $395 plus shipping from Minden NV 89423 (shipping should be around $30 via USPS).

Do you get your $36 back or do you get your life membership dues refunded? Does canceling membership just mean that you are not resubscribing to QST? What metric can be used to see if the radio relay league is losing or gaining membership?

Is there any connection between membership numbers and the ARRL BOD authorizing expenditures to hire a public relation firms to address restructuring?

inside the HTX 212 is a varibla resistor near the center of the board beside a small metal enclosure, turning this resistor can adjust the deviation level far enough that it can be extremely distorted. i did this to about 15% beyond the defaults and used a 500 ohm dynamic microphone with it and get exellent results. i also found the stock mic really sucks after it gets old, it looses its ability to isolate the keypad data signal noise from the mic audio and makes a slight pulsating tone sound during transmit (they hear it, not you).

From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8bbvp3mcb1@slb7.atl.mindspring.net>
Source record: 116189

Tim, you're right but leave Strom to think up hideous propaganda to suit his pro-Nazi agenda. We had THE BOMB before Germany surrendered at Reims on 5/8/45 and COULD have used it during the winter of '44 when the Battle of Bastonge was taking place. It wasn't dropped because Germans are WHITE but tinged with red-the blood of innocents while the Japanese are non-white and let's not forget Pearl and all those atrocities perpetrated by the Yaesu and Kenwood ancestors. Do you remember the incendiary raids carried out by us and the British on places such as Dresden and Koeln? They were ordered by Viscount Lord Harris of the R.A.F. because he had irrefutable evidence that the Nazis were burning people which of course made sense since a great democratic German writer once penned, "In a country where books are burned, people are burned." And so Harris, after having conclusive evidence of the extermination camps, issued a warning to Hitler to stop or face destruction by fire. Adolf Strom...oops..I mean Hitler scoffed and approximately 280,000 German citizens were destroyed by fire which was a drop in the bucket when weighed against the millions killed in death camps. I just wonder how many of our and R.A.F. airmen were shot down during those incendiary raids when a couple of A-bombs could have done in the same 280,000 with fewer losses on our side? After all, didn't Truman okay Hiroshima and Nagasaki as the way to prevent a million Yank casualties in an invasion of the Japanese home islands? Were those guys in the Pacific Theater any more important than the ones in Europe? By not using one or more A-bombs on Germany, the answer was YES. History proved that no nation deserved more to be nuked into nothingness than Nazi Germany. Strom on the other hand wants everyone to believe that I advocate nuking Germany now which is outrageous. And one reason is because a person like Strom, with such rancid, sordid and filthy Nazi philosophy, would NEVER be able to get away with it in the Germany of today. Try going over there to preach Nazi propaganda and see what happens to you. You'll preach in prison and fast while in America it runs rampant thanks to Freedom of Speech which is unfortunately linked to Freedom to Hate and freedom to spread sentiments readily heard on the Liberty Net. Strom comes across on the Internet as a refined gentleman who'd never hurt a fly but in reality he's a very dangerous person known quite well to law enforcement agencies throughout this nation and abroad. He's listed in Raymond Frankin's Internet Hate Directory, a book that is not exactly chopped liver. His ex-wife went public regarding what a sinister creature he really is and hopefully his kids can grow up as decent Americans instead of as white supremacist hatemongering vile creatures like daddy dear. Tim Volz,you have had that man pegged right for years. Congratulations and thank you.

It's spelled QUASIMODO, the hunchbacked church bell ringer in Victor Hugo's "The Hunchback of Notre Dame." Incidentally coach Knute Rockne used him in tandem with the halfback and fullback on his team which tied Army 0-0 on Nov.9,1946 in Yankee Stadium.

My best guess is that his lawyer is writing or will write a writ of certiori to the Supreme Court which the FCC classifies as an appeal and while the appeals process is in motion, KV4FZ is allowed to transmit. I also feel that they are trying to prolong everything until REPUBLICAN George W. gets elected Prez. in November which will NOT happen. Herbie thinks the Democrats hate him but he's wrong. Everyone does!

Sure LG, that is obviously the intelligent solution. Let's throw out the supreme court....Hey while we are at it, let's get rid of all the courts....Oh yeah, the police too. Hmm, while we are shredding all the things that make this country a free and civilized society, we'll get rid of all the politicians, the presidency, and dissolve the senate. Lord knows the anarchy and chaos that you seem to be preaching will be much better. No one will be able to work because we will have to stay at home and protect our property from roving bands of violent pillagers, and we we could collapse the entire global economy. Yeah, that makes sense, let's destroy the world as we know it because YOU don't agree with a decision from the Supreme Court.

You are what's known in technical terms as a moron. You don't throw out an institution that has helped shaped this, the greatest nation on earth, for over 2 centuries because you disagree with a decision. You use the systems in place to change it.

You couldn't be more wrong. Disagreement with the majority is not grounds for exile. You are laboring under the delusion that the USA is a Democracy. It certainly is not. A lynch mob is a democracy. We are a Republic. This not only requires a government that is (supposed) to be elected and answers to the people but the majority's power is limited by the Constitution. This way, if everyone in America disagrees with, say, Larry Glickman' opinions, he is still welcome to them and, indeed, stand on the street and proclaim his opinion to everyone who will listen. The majority, under the law, can do nothing but argue with him. This way, the minority is protected as well as the majority.

I wouldn't have it any other way.

Once upon a time
I drank a little wine
Wuz as happy as could be

Then I smoked some dope
And sold a little rope
When Deaver came for me

I swore I�d give it up
Cuz pissing in a cup
Is not the way to be

It took three long years
Behind bars with my peers
To lurn this all to me

Gee..wish I may,
Wish I might,
Have Bubba back
For just one night.

You need to get some help for the severe emotional disturbance you have. Your violent nature can only serve your own destruction.

Am I a cop? No I am not. I happen to be in the Army. I have dedicated my life defending this country from "All enemies, both foreign and domestic." If you are preaching the violent destruction of the country, guess which one you are?

I hope you end up in jail and pinned to the wall by your roommate Bubba. The justice system we have works very well, and it has systems in place to change laws you don't agree with. Why don't you try it instead of talking about killing innocent people. If oyu are unsuccessful in changing a lwa, it is because the MAJORITY of people don't agree with your OPINION, and therefore, it shouldn't be forced on them. If you want to live in a place where the will of a small number of people can be forced on the entire population, then you shouldn't live in this country. A place like China, or Russia shares your views that the will of a small minority has the God given right to enforce there will on the rest of the country.

I don't give a good goddamn what you want, or what you think, anymore than I
care about which of your roomates ass you had your dick in last night.

The justice system we have works very well, and
> it has systems in place to change laws you don't agree with.

Right. The justice system works SO WELL that Governor Ryan of the State of
Illinois has just had to shut down Death Row because about 50% of the
inmates killed over the last number of years here were found NOT GUILTY
after going to their graves. Works *real well.* Just ask OJ. He'll tell
you.

Why
> don't you try it instead of talking about killing innocent
> people.

BECAUSE Supreme Asshole, those *innocent people* don't have a VOICE ! What
they do have is a Silent Screem, that can only be visualized on an
ultrasound monitor.

If oyu are unsuccessful in changing a lwa, it is because
> the MAJORITY of people don't agree with your OPINION, and
> therefore, it shouldn't be forced on them.

The innocents depend upon those of us who can be characterized as HUMAN to speak for them. They have no voice of their own. If they _did_, I'm sure the first words out of their mouths would be:
PLEASE DON'T KILL ME !

If you want to live
> in a place where the will of a small number of people can be
> forced on the entire population, then you shouldn't live in this
> country. A place like China, or Russia shares your views that the
> will of a small minority has the God given right to enforce
> there will on the rest of the country.

Precisely because you would LOVE this Jew to leave, is the reason I never will. I will remain a bloody thorn in your bloody smelly ass for as long as I can breath. And even after that. I consider it my Patriotic Duty to drive to and your kind to extinction.

Which supports my side of the argument. The greatest loss between transmitter and receiver is the path loss which the ERP of the transmitter system (and receiving antenna) must overcome with expensive antennas and amplifiers.

My Country, the United States of America, is my birthright, because I was born here. I have the papers to prove it.

That, evidently, is enough to establish my citizenship. NOT what I think; NOT what I do for a living; NOT who I vote for; NOT which politician's ass I kiss.

It is my country. I even own a small part of its real-estate. I have paperwork to document that also. That doesn't mean I have to agree with everything the Overlords proclaim. Or agree with ANYTHING the Overlords proclaim.

I have _personal_title_ to a special piece of real estate in Illinois. And furthermore share the ownership of ALL Federal Properties and structures. I would say, collectively, that makes this _my_ country as much as it does anyone elses.

I am trying to illustrate a point:

The Supreme Court of the United States of America decided, in a decision
called Roe vs. Wade, that women have a right to legal abortion.

Now in one respect, I support this, because in cases where:
a) the birth of the child would threaten the life of the mother, or
b) the birth of the child would result in a deformed (Down's Syndrome
baby), or
c) the baby is the result of a rape, or
d) the baby is the result of incest,
perhaps I will agree for a *medical justification* for terminating the life
of the infant.

_Beyond_That_, it seems to me that abortion in Amerika has become an adjunct
to Birth Control. Planned Parenthood (an organization here) is, imho, a
euphamism for Killing Center.

Murdering millions of children a year. How can anybody become upset over Columbine, which resulted in x number of deaths of kids, and not become upset over the wholesale slaughter of uncounted millions of babies? Easy. Because it is done behind closed doors, where nobody can see the ugly truth.

Now was this Decision of the High Court based upon a referendum? A direct vote of We The People? Like hell it was. In fact, it was not.

I would venture to say that if _everyone_ in the USA had to see what goes on in Abortion Clinics (euphamis for Killing and Extermination Camps), that this *Legal Authority* would be stripped away in a single day.

Except in the cases of medical necessity.

YOUR Newsgroup. I believe this is public domain. Your ego is even larger than your bravado. Since you threatened me, why don't you come here to VA. Let me know when you arrive, I'll meet you at the airport, and then send you home in a body bag little man.

You have serious issues you need to deal with, not the least of which is your aggressiveness. What's the matter? Not hugged enough as a child? Dad in jail? Drugs clouding your mind? Uncle Herman teach you to play doctor, and not let you tell your mom? More than likely it's a comnbination of all four.

Yes. I even see Armyslut's point. We are never going to get a committee to
agree on anything, nevermind an entire Nation.

But, and this is the important part, the decisions of the High Court are not
necessarily the reflection of the *will of the people.*

The decisions in the High Court are not voted on, except by the Justices
themselves. Can you see MY point? Why should anybody have to *swallow*
what comes out of that Den of Iniquity, when the wishes of the people that
have to live with those decisions don't even have any voice in the decision
!?

< rhetorical question; no reply required >

deep subject.

Do you not see this as a problem? Is there a REASON why
people would want to kill you? It couldn't possibly be your
sparkling personality. Think about your attitiude, and then
wonder why so many people would dislike you. I don't dislike
you, I just don't like to be threatened.

By the way, thanks for your address. I have forwarded your name
and address to the FBI, for addition and tracking as a likely
militia member that condones the violent overthrow of the US
government. That van out front, no really, it's just repairing
the phone lines.

Hi Eric -- from the ARRL page at URL:
http://www.arrl.org/news/restructuring/faq.html

7. I've got an Advanced ticket now. Someone told me that I'll revert to
General on April
15, 2000. Is this true?

Absolutely not, although this rumor has been making
the rounds on the Internet and on-air
discussion groups. You will continue to be an Advanced
class licensee and have Advanced class
privileges after April 15. Again, no one loses any
privileges, and all license classes stay the same.

Robert Morris farted forth:

>...intolerable prejudice, a viewpoint,
> I know, (sic) is shared by most ham radio operators.
> Bob Sherin, W4ASX

Sir:
To be "prejudiced," one must "pre-judge" an individual or
set of individuals by applying a pre-conceived set of assumptions,
before one actually knows anything about the individual(s) judged.

By the statement:
"a viewpoint...shared by most ham radio operators,"
you have pre-judged the majority of over a half million
individuals, about whom you know nearly nothing.

You are, therefore, prejudiced and a hypocrite.

Be so very kind as to keep your mouth closed, sir,
lest you insert your remaining foot as well.

I am planning to install a two-head halogen with motion detector above
my garage door.

Any info/experience about these devices being false-triggered due to
2-30MHz RF radiation within the area of the detector's scan ?

Are these devices FCC approved?
I had a bad experience with a Sears wireless door bell-chime that was
false-triggered. I now wonder if motion detectors might have same
problem.

Thanks.

Quite simple, The FCC has little white vans driving around looking for 'evil' folks like this, mostly once other HAM's or whoever complain. Any Transmitter can be 'found' using simple triangulation. This guy was stupid, that made it even more simple.

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-22 00:00:00 UTC
From: w4th@webtv.net
Message-ID: <13264-38D8F562-2@storefull-102.iap.bryant.webtv.net>
Source record: 116250

I am taking orders for 4cx400/gs36b Svetlana nos Russian Military tubes.
The price is $85.00 plus shipping per tube. These tubes are in great
shape and have never been used.
I also have in stock several matched pairs
of 4cx800a/gu74b Svetlana nos tubes. These are the tubes for the Alpha
91b/99 QRO-2500, the Acom-2000, and the Emtron amp from Australia. The
price on these matched pairs is $200.00 plus shipping. This is a great
buy on these nos unused tubes. A single 4cx800a from most places will
cost you $175.00 to $190.00, but these are matched pairs for about the
same price as a single tube. These tubes carry a 90 day warranty from
the Russian distributor.
Thanks for your time.

My experience with many of these devices is they are VERY susceptible to RF. I havn't tried any HF frequencies but VHF through 800 Mhz will activate them quite often.

Source record: 116253

Last month XYL got me FOUR sets of CD ROMs of ARRL QST magazine from 1950 to 1969 and computer here needs more memory to run. Each set requires 5 MB ram and a hard disk with at least 15 MB free space. My computer is getting tight already. These packs are unopened. All four for $100 and I'll pay the postage. Money order only, please.
Contact me at this email.
Thanks and 73,
Harolld

Dean's a nice guy, has a lot to say, has a puny signal and has a tendency to keep talking and talking until somebody hears him and the FCC did. I've never heard him intentionally jam anyone while trying to get along with everyone. His best bet is to GET OFF AND STAY OFF 14.313 as I did. The Comission is keying on it and can therefore easily misinterpret anything for something or something for anything. They have an itchy trigger finger so KEEP AWAY. Besides who in his right mind would risk his license on hobos who stink it up? An intelligent person has to make a point OVER Youngblood, Queenie, Jack Nicklaus Stevie Wonder MXL, Seymour SeeLess Who Gives a Bleep, Mac the Knife, Lenny the Shill e.g? Stop to realize that left on that frequency are just a FEW decent folks whom too will get in trouble with the Commission even after taking the high road because at times the high road is strewn with sheep dip and doggie cockka. At one time .313 was a real attraction but now it's nothing but a distraction-a distraction from real ham radio. When Riley says, "ENJOY HAM RADIO," he's right and staying on that bullbleep frequency DETRACTS from everything you've worked for to get a ticket. I've been talking to Dean when I can hear him which hasn't been too often for years and never found him offensive. He's somewhat a religious zealot though but then I suppose everybody needs a fix in one way or the other. I get mine through Carefree gum. I notice the way a lot of hams are jumping all over AC5IU for being the target of a letter from Riley which I have yet to see on the RAIN or ICE or SNOW report as well as the Webbed Feet Extra. Hopefully Dean will see this message on his own computer and if not, then will someone print it out and read it to him on the telly? He has an unlisted number which one of you might know. Tell him to take the show on the road and keep the hell off .313. He's too good for that outhouse. I say listen to the jerks but don't partake. Heh...heh...heh...I got the best...bought everything in Pittsburgh..heh..heh...I'm Peter but they call me Queenie..heh..heh..Does anyone in his right mind have to deal verbally with this guy and his friends?

You don't need a HF license to work emergency comms. Most are local
in nature and message handling is over repeaters. CBers could do
the same thing.

'They' proved their right to the spectrum by passing the necessary
tests.

********* "RARSfest 2000" *********

THE RALEIGH HAMFEST
and COMPUTER FAIR

SUNDAY, APRIL 9

NORTH CAROLINA STATE FAIRGROUNDS, RALEIGH

3000 attended last year! Giant, indoor flea market, plus plenty of
dealer and manufacturer booths, contests, meetings and forums, prizes,
VE Exams, and the famous "Saturday Night Social." FCC Forum with
Riley Hollingsworth!

PRIZES: GRAND PRIZE: Icom 706 MKIIG HF/VHF/UHF
4 HOURLY PRIZES: Icom 207H Dual-Band Mobiles -
One Each Hour, 11 till 2 PM.
Pre-Registration: $125 CASH!
(winners do not have to be present)

Location: North Carolina State Fairgrounds, Jim Graham Building.
Follow the Interstate 440 Beltline around Raleigh, to
exit 3 - Hillsboro St., and go west one mile to the
Fairgrounds. The Jim Graham building is at the
Southwest corner of the fairgrounds, just off
Hillsboro St.

Date/Time: SUNDAY, April 9, 2000, 8 am to 4 pm.
Building opens at noon Saturday and 6 am Sunday for
dealer/vendor setup.

Admission: Pre-register: $5 (before April 1st). Gate: $6.

Flea Market: Table/2 chairs: $14 by April 1st, $15 after April 1st.
120 Volt AC: $15 per connection.
Drive-In unloading/loading. Bring your own
extension cords and carts.

Parking: FREE on site!

Talk-In: 146.64

VE Exams: Given in the Holshouser building on the Fairgrounds.
Walk-in registration and testing begin promptly at 10 a.m.
You must show a picture ID to register. Exams are $6.65.
Contact: Charlie W4VFJ, 919-556-8551 (exam information
only please) email: w4vfj@aol.com.

Meetings: FCC Fourm with Riley Hollingsworth K4ZDH!

ARRL Forum with Roanoke Division staff, Army and Navy
MARS, NTS, and ARES forums. Times will be announced at the
Hamfest No DXCC QSL card checking this year.

Homebrew, Cash Prizes for Homebrew,
QLF/QBH QLF (left foot) and QBH (Both Hips).
Contests Contact: Rick KA3PSK, 919-870-8268.

General The NC State Fairgrounds hosts a permanent, general-
Flea- merchandise flea-market just outside the hamfest building.
Market: Admission to that flea-market is FREE!

Family Come make it a family event! Other activities available in
Activities: the area include the Fairgrounds Flea Market (free) and
Azalea Sale. A short drive offers Crabtree Valley Mall,
Blue Ridge Cinemas and NC Museum of Art.

Address: For tickets, tables, etc., make checks payable to
"RARSfest." Include your name, call, address,
and S.A.S.E !! Mail to:

Greg Miller W4IK
9408 Hinshaw Rd.
Wake Forest, NC 27587-4402

Requests received after April 1st, or without S.A.S.E.,
will be held at the flea-market vendor door on the west
side of the building.

1894. What broadcasts VLF signals (< 100 khz)

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-22 00:00:00 UTC
From: "R.G.S." <dejastockwell@my-dejanews.com>
Message-ID: <vY9C4.12575$1g1.289202@den-news1.rmi.net>
Source record: 116266

Greetings all,

I make some broadband low frequency EM measurements,
that are contaminated with what I guess is radio signals
(manmade and natural).

Where can I find out what is broadcast on the VLFs?
(anything below 100khz or 0.1 mhz)

I do know that there is a beacon at 55 khz, and I am
guessing much other stuff too.

Any help, pointers etc would much appreciated!

Cheers,
bob

1895. Dan Dews KK9G AKA Donkboy

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-22 00:00:00 UTC
From: Indy Ham <anonymous@cotse.com>
Message-ID: <200003222051.PAA13011@cotse.com>
Source record: 116267

Dan Dews KK9G AKA Donkboy is a cock sucking, packet radio, burn out. He was run off packet here in Indiana, and needs to be run off of Ham bands. He, and his Donkboy crew, are misfits of Amateur Radio in Indiana. The clic includes, Jerry Pestel KA9BSD David Jones WD9BFA Josh Wilson N9XDO and the King himself Dan Dews Sr. KK9G I overheard their QSO on a local repeater last night. I, just like them, hate no-coders. BUT, they voice it to strongly. I think they need to fuck each other a little more often and that will solve their hate and discontent problem. As far the Tom Jones being an attorny. This is no lie. I know him. He is a good lawyer. He is in Franklin Indiana. As far as us Indiana hams are concerned, Team Donkboy has no place in Amateur Radio. RUN THEM OFF THE AIR. If your in Indiana, listen for these late night loosers of 146.805 repeater, 147.015 repeater and 146.58 simplex.

1897. To PangK: Prejudice and Ham Radio

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-22 00:00:00 UTC
From: Sherins@webtv.net
Message-ID: <13211-38D92E7D-64@storefull-243.iap.bryant.webtv.net>
Source record: 116269

PangK,

Kindly post your responses here, and please refrain from sending me private email, less than respecful or not.

Sorting out the irrelevant, permit me to paraphrase your logic: Since I cannot speak for all U.S. hams, I cannot claim that most believe, prejudice is intolerable.
...
Though the United States has had its share of inequities, our country has also pursued curing them, e.g. the Fourteenth Amendment and subsequent Civil Rights Legislation. Thus, our social engineering ultimately rests on the fundamental "government of the people, by the people, and for the people."

In practical terms, with time the concept has broadened to include Chinese, Japanese, Jews, Catholics, African Americans and many other classifications. So important to our social engineerings is combating prejudice that specific laws providing judicial relief for aggrieved parties is increasingly being legislated.

What's more, since the beginning of the 20th century, our Supreme Court has recognized some classifications as "suspect." Not only are suspect classifications generally afforded more relief, but Affirmative Action programs champion them too.

While I understand, these policies are fair game for debate, bare faced prejudice in our society is intolerable. Here in the good ole USA, it is sociologically repugnant.

Therefore, since ham radio reflects a cross section of society, it can be safely said that most hams are against prejudice. In legal parlance, where these types of inferences are their stock in trade, the logical train can start with "judicial or official notice."

My friend, feel free to respond on the board, not by personal email. And, in another of my views, you'd do better to skip the denigration and focus on the issues.

Respectfully,

Bob Sherin, W4ASX
Miami, Florida

The "little white van" thing is a CB myth.Why not call the FCC and ask
how they do it,they WILL tell you.They are quite proud of the fixed
facilities as well as the briefcase sise equipment they can take on an
airliner to anywhere then set it up in a rental car.Triangulation works
but is rarely needed on a band with virtually no reflections,especially
when mobile dopplers are employed.

Yea, there I go again simply recognizing the FACT that the path between
any two stations makes more of a difference than the ERP of either
station.

HI:
I am planning on buying the new Radio Shack HTX-10 (10 meter) rig, but before I do I would like to hear from any HAMS who own one. I am going to use the rig at home & in the car. I used to have the older model R.S. 10 meter rig & that was a very nice all around radio...but it did not have a tone board for PL....I hope R.S. has put a tone board in this new rig!!! The $150 price tag is great...I wish R.S. would come out with a low cost HF rig that would cover 10-80 meters!!!!
Thanks & 73

Source record: 116275

A number of very high power (500kW and up) transmissions in the 20-30kHz range from various military (mostly naval) stations around the world. Some navigation and meteorological broadcasts from about 30 to 200kHz. 100kHz has many very high power LORAN C stations world wide. And if you move up a bit there are megawatt range AM broadcasting stations starting at 153Khz. There are also various other services, for example WWV and MSF both have time signal stations on 60kHz - these are the ones that control those neat radio controlled clocks.

A beacon at 55kHz seems a bit out of place - I wonder where you are and where and what it is?

There are huge amounts of imformation available in print and on the Net. You might try these as a starting point.

I like my HTX-10 just fine...I run it mobile and make plenty of contacts. It has great receive and the 25 watts is plenty to hold a good conversation when the band is open. I have used it on 10 FM also and it is a blast there. Would like more memories but hey for $150 it is a damn good radio..IMHO of course..

1917. How did they catch this outlaw??

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-22 00:00:00 UTC
From: N9NWO <N9NWO@AMSAT.org>
Message-ID: <csWB4.1220$A.226266@dfiatx1-snr1.gtei.net>
Source record: 116356

Given that there are millions of outlaw CBers, how did they
go about catching this one? It almost looks like they were
waiting for him.

ENFORCEMENT: EX-HAM FACES $17000 FINE FOR FREELANCING

The FCC has levied a $17,000 fine against a former Texas ham whom the agency says it caught FREELANCING. This as it notifies Leonard Martin, the ex-KC5WHN, of Houston that he is the target of the monetary forfeiture.

You may remember that back in July of 1999 that Martin was monitored and T-hunted by the FCC. This lead to proof that Martin was causing interference on the 20 meter band. This operation was also out of band for his then Technician class ticket. After a conversation with the FCC's Riley Hollingsworth, Martin turned in his ham radio ticket for cancellation on July 23rd. At that point all enforcement proceedings against Martin were terminated.

Last October Martin was again caught by the FCC. This time operating in the so-called Freeboard spectrum that lies between the top end of 11 meter CB and the start of the 10 meter Amateur allocation. FCC engineers attempted a station inspection but Martin denied them access. These allegations have lead to the FCC issuing the $17,000 fine to Martin. The FCC's Riley Hollingsworth says that the level of this forfeiture should show that the FCC means business when it says that no violations will be tolerated:

Hollingsworth here:

Martin was given the usual thirty days to pay the fine or to file an appeal.

(FCC, Newsline, RAIN)

ENFORCEMENT: MORE ON THE TAMPA PARTY PIRATE

The FCC has also levied a $10,000 fine against Leslie D. Brewer's 2-Way Radio in Tampa Florida. This for allegedly selling an unauthorized, fully assembled twenty watt FM broadcast transmitter to an FCC agent posing as a customer.

The Commission says that Brewer, who holds the Amateur call letters KC4HAZ, also calls himself the Tampa Party Pirate. The FCC also says that Brewer has been involved in the operation of an unlicensed FM station on 102.1 MHz, in the Tampa, Florida area.

(FCC)

Here is the longer version of the story. Hope this is helpful. By the way, this thread appears to be cross-posted to rec.radio.cb. At first, this might seem appropriate. However, this is simply going to cause ill will between hams and the participants of rec.radio.cb.

Please consider dropping the cross post to the CB newsgroup if this thread continues.

QRM

FCC Levies Hefty Fine on Former Amateur
NEWINGTON, CT, Mar 9, 2000--The FCC has told a former Houston, Texas, amateur that he's liable for a $17,000 fine for unlicensed operation and for failing to allow the FCC to inspect his radio equipment. A Notice of Apparent Liability for Forfeiture--an NAL--was sent March 3 to Leonard D. Martin, formerly KC5WHN, by the FCC's Houston Office.

Martin has bumped heads with the FCC on several occasions in the past two years. The FCC said it received a written complaint in May 1998 alleging that a station identifying as KC5WHN was operating on frequencies not authorized by his Technician class license. The FCC's Riley Hollingsworth sent Martin a Warning Notice in November 1998 outlining the complaints. In a subsequent telephone conversation with Hollingsworth, the FCC says, Martin "generally denied the unauthorized operation."

In February 1999, an FCC agent using mobile automatic direction finding equipment observed voice transmissions on 27.545 and 27.535 MHz--channels allocated to the US government and the Industrial Radio Service respectively. The FCC says the station failed to identify but responded to the name "Leonard." The FCC agent determined that the source of the transmissions was an antenna at Martin's residence.

The following month, the FCC monitored voice transmissions on 27.370 MHz--a CB "guard channel." Again, the station identified with the name "Leonard." Again, the agent tracked the source of the transmissions to Martin's residence. The agent knocked on the door, was met by Martin, and requested to inspect Martin's radio station. Martin reportedly refused. The agent advised Martin that operation on the 27 MHz frequencies was illegal because he had no FCC license to operate on those frequencies, and that his refusal to allow an inspection was also a violation.

The FCC's Houston Office issued Martin an Official Notice of Violation last April. Martin replied by letter, acknowledging that he understood that operating on the frequencies in question was a violation and that the FCC has full inspection authority. He also promised that "no further action by the Commission" would be necessary to ensure his compliance with the FCC rules. In July, Martin turned in his Amateur Radio license for cancellation. He was again warned about unlicensed radio operation.

Martin's troubles didn't end there, however. Last October, following up on complaints of RF interference to a telephone in Martin's neighborhood, the FCC again tracked transmissions on 27.535 MHz to Martin's residence. At the same time, the agent also observed the RF interference on the neighbor's telephone. Later that same month, the FCC monitored voice transmissions on 27.455 MHz that were tracked to Martin's residence.

Again, the agent knocked on Martin's door and asked Martin to inspect his radio equipment. Martin reportedly again refused, telling the agent he believed he was being "unfairly targeted for enforcement" because many other operators also transmitted on unauthorized frequencies.

The FCC NAL said that, based on the evidence, Martin "repeatedly and willfully" violated Section 301 of the Communications Act by operating without an FCC license and by refusing to allow an FCC inspection of his radio station.

"Martin's violations were repeated and willful, and resulted in harm in the form of electronic interference to neighbors' home electronic equipment," the FCC said in the NAL. "Martin was advised of these violations numerous times, both orally and in writing, by Commission representatives and Martin indicated that he fully understood the requirements of the Act. Martin repeated the violations after receiving these warnings." The FCC said that applying its Forfeiture Policy Statement and statutory factors to the case, a $17,000 forfeiture is warranted.

The $17,000 fine is the third major forfeiture levied in recent months in an Amateur Radio-related case. Martin has 30 days to pay or to request reduction or cancellation of the proposed forfeiture.

From ARRL web site:
QUOTE

The FCC has told a former Houston, Texas, amateur that he's liable for a $17,000 fine for unlicensed operation and for failing to allow the FCC to inspect his radio equipment. A Notice of Apparent Liability for Forfeiture--an NAL--was sent March 3 to Leonard D. Martin, formerly KC5WHN, by the FCC's Houston Office.

Martin has bumped heads with the FCC on several occasions. The FCC said it received a written complaint in May 1998 alleging that a station identifying as KC5WHN was operating on frequencies not authorized by his Technician ticket. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth sent Martin a Warning Notice in November 1998 outlining the complaints. The Commission said Martin "generally denied the unauthorized operation."

After tracking transmissions on various 27 MHz frequencies to Martin's residence on at least two occasions in early 1999, an FCC agent was twice rebuffed in his efforts to inspect Martin's radio equipment. The FCC's Houston Office issued Martin an Official Notice of Violation last April. Martin acknowledged the complaint and promised that "no further action by the Commission" would be necessary. In July, he turned in his Amateur Radio license for cancellation.

Martin's troubles didn't end there, however. Last October, following up on complaints of RF interference to a telephone in Martin's neighborhood, the FCC again tracked 27 MHz transmissions to Martin's residence. Martin reportedly again refused to let the FCC inspect his equipment.

The FCC NAL said that, based on the evidence, Martin "repeatedly and willfully" violated Section 301 of the Communications Act by operating without an FCC license and by refusing to allow an FCC inspection of his radio station. Martin has 30 days to pay or to request reduction or cancellation of the proposed forfeiture.

Heck, you know how rabid some HAMs can be. The amateur users probably ended up doing all the "footwork" and the FCC came in to do the prosecution. In certain parts of Indiana, some groups are more than willing to do a foxhunt if they know someone is screwing around out-of-band, as it appears this guy was doing.

Plus, he might have p.o.'d someone with some clout if he was doing his own programming. Nothing is said about the content of his illegal station.

Hey, the FCC has to justify it's money SOMEHOW.

Hummm.... doesnt Papa Budgery claim to be posting from France?

"A human being should be able to change a diaper, plan an invasion, butcher a hog, conn a ship, design a building, write a sonnet, balance accounts, build a wall, set a bone, comfort the dying, take orders, give orders, cooperate, act alone, solve equations, analyze a new problem, pitch manure, program a computer, cook a tasty meal, fight efficiently, die gallantly. Specialization is for insects." Robert Heinlein

Source record: 116369

>Heck, you know how rabid some HAMs can be. The amateur users probably ended
>up
>doing all the "footwork" and the FCC came in to do the prosecution.

Not so at all. The United States now has
an electronic easedropping capability known as ECHELON. They monitor all
electronic transmissions in the atmosphere and on hard line. So anything you
type in this newgroup will be monitored by the folks at the good old BIG
BROTHER U.S.Government.
The project Echelon is an NSA project that target certain words spoken on
the phone or written via E-mail or on the Internet. It's stated use is to keep
track of terrorists. It's actual mission is of speculation at this time.
Echelon can also be used to track
radio transmissions. This system can monitor all frequencies at all times. It
is of my opinion that Echelon is being used by the FCC in order to keep tabs on
the use of it's frequencies. Notice I say IT"S because it seems that the FCC
seems to think that they own the airwaves.But back to the point.
Mr. Martin was probably tracked using Echelon. The FCC and
Hollingsworth have stated several times that they have the same capabilities of
the monitoring stations. They are probably all tied together into a computer
network that utilizes Echelon's ability to track with great accuracy the
transmissions made by anyone.
Mr. Martin was caught by Big Brother and we are going to see more of
this. Unfortunatley, the state will use this to collect a lot of money from
people who think they can get away with making illegal transmissions. Got to
pay for all that new fancy equipment you know!

Doc,

You responses were enligtening to me. You see, with lifelong Bipolar 2 disorder, the climb to "normality" has been formidable.

Moreover, teaching English and freelance writing have inculcated the notion of delivering on every piece of writing. I've posted in History, Catholicism, Education and Unitarian. My inclination therefore is the serious side, though I have a highly humerous side.

Remember the post: Ham's Wife says hams low class, to which I replied: "Who is this low class Wife?" I need only exercise the funny side more often.

Point well taken, Doc.

OTOH, I CANNOT RULE PAPA BUDE OUT FOR THE FOLLOWING REASON:

Header references in post 1 < inflammatory >
References: <csWB4.1220$A.226266@dfiatx1-snr1.gtei.net>

Similar Header references in post 2 < example/control post >
mhRt4.116$oO6.3408@dfiatx1-snr1.gtei.net
5zXt4.1400$oO6.15706@dfiatx1-snr1.gtei.net

THESE are the *common links* between the two messages:
@dfiatx1-snr1.gtei.net

I say there is the *possibility* that budge _could_ be considered a candidate for the Line-Up.

Glickman

My .02:
The original offensive post went thru a nym server at MIT. Its
job is to "launder" the post thru places such as the 'chello'
server in France or Germany or....

Bubba was from @home.

You'll never trace a post that went thru the anonymous remailers
as the headers get stripped, then replaced. You can't trace them
back to the server that originated them, let alone the poster who
submitted it.

Interesting puzzle, nonetheless. :)

There's your problem. You're talking serious money and we all know from
your statements that you aren't serious. You've obviously invested
money which, like you, can't be taken seriously.

Hi Jan,

I just returned from

http://www.abortiontv.com/

and have made myself sick to the stomach enough to ensure a nice night full of nightmares. I can't imagine any HUMAN visiting this website, viewing the graphics and videos, reading the text, and continuing to *argue* that a fetus is only a *tissue mass.*

I will be screeming in my sleep again tonight; the other night it got so bad I found my wife sleeping on the sofa in the morning :(

Now to this Syracuse U path. Yes, it is _common_ for a lot of posts to get routed through this server. I have software that tells me how many *hops* it is between my computer and the one I am gleaning information from; typically runs anywhere from 10 to 13. Syracuse usually shows up as one of the routers.

That's not much of an indication of anything, im_h_o. Doesn't tell us much.

Anyhows, there's always the trashbin (spam filter). Lets toss these geeks into there with these *tissue masses* and let them writhe in the blood and dismembered body parts. It would be fitting justice.

I don't know how you feel about genocide. But since the Supreme Court of the United States has condoned it, and legalized it, you can consider me < because of that, and from now on > an Enemy of the State.

So you FBI types out there, go to the above URL, peruse the _entire_ site, and then come back here and tell me how great this Nation is. IMO, it's no better than Nazi Germany was in 1942.

Oh, why don't I move if I don't like it. BECAUSE this is MY COUNTRY. _YOU_ get the f out. Go to China where your brutality will be welcomed with open arms.

g-damn bastard f'ing rotton scumbags. Take that Supreme Court and stick it where the sun don't shine.

Cordially,

Your Pal,

Lg

"Freeboard"? The portion from 27.410 to 28.000 MHz is called the "Free BAND."

Haven't you figured it out. The FCC probably records 27.555 around the clock.
Here in Southern California, there's MILES of recordings (on magnetic tape) of
the more infamous repeaters.

Does anyone know how to replace the meter lamp on a Kenwood TS-440S? Does Radio Shack have a bulb that will work or do I have to get one from Kenwood? Also, I have partially disassembled the radio and tilted the front display unit down. The meter lamp is buried very deep inside. Is this even possible by a non-professional? All advice is welcome!

Thanks,
John N7MTB

Lawrence Glickman wrote:
>
---snipped for brevety---

The controversy over the abortion issue is rooted in the debate over when life really begins. I think that the Supreme Court jumped the gun in it's decision that life begins at the moment a baby exits the womb at about 9 months. It totally ignored certain very fundamental factors. One factor is that with current technology, babies are surviving just fine at only 6 months development. I am sure that in a very few years, technology will be available to artificially handle the whole process, from conception through independent viability.

So, the basic question is, when does a termination of a pregnancy, either miscarriage or abortion, become the death of a human?

Traditionally, a miscarriage in early terms of pregnancy has not been celebrated as a death. These go generally unnoted, without a funeral ceremony or other traditional death ritual. However, in these same traditions, in later terms of pregnancy when the fetus is recognizable as human, we called this "still born" and the child was given a funeral and the death rituals treated it as any other person.

I can see little doubt that, concerning late term and partial birth abortions, that a human is being intentionally killed. You can't tell me that, if you take a needle and suction hose and vacuum a child's brains into the sewer at the last moments before birth that you aren't killing a viable human. This person is quite capable of living independently from it's mother. At the six month point in the pregnancy, due to current technology, the child might also live with the aid of life support systems. I think that killing an unborn baby at this point is also murder. The argument that the woman has the right to determine what goes on in her body hold no bearing in these circumstances. I feel she has no more right to kill the baby, because of inconvenience, than if the child were, say, a year old and mom is tired of motherhood and finds child rearing inconvenient. I think that, other that a serious risk to the mother's life and health, no abortions should be permitted past the second trimester (6th month of pregnancy). This time period may also be subject to revision as medical technology advances.

My views on abortion in the first and second trimesters become a bit more hazy. I have already discussed the traditional treatment of miscarriages and based on this I cannot personally define if a fetus at, say, 3 months is a viable human or not. It is beyond my ability to determine such a thing.

In conclusion, I think first that the mother's life and health come first in any circumstance. I don't think that this is even debatable. Abortion in the last trimester is indeed the killing of a human and should be legally treated as such and should never be undertaken for the mother's purely selfish reasons. As far as rape, incest, or grossly defective fetuses are concerned, this can usually be determined in the first 6 months of pregnancy, except under very extraordinary circumstances, and an abortion can be performed then. As for first and second trimester abortions, society will have to work that out and it will forever be an issue.

Apparently the concept that pure Democracy is nothing more than
mob rule when passions are raised. And that a Representative
Republic exists to protect the rights of the individual FROM the
majority.

Keep in mind that if we had not been a Representative Republic,
but a pure Democracy, the Civil Rights Act would never have become
law, because the majority of Americans opposed it.

1953. FCC Violating Hams' Equal/Civil Rights

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-23 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <8922-38DA7E7F-4@storefull-243.iap.bryant.webtv.net>
Source record: 116042

Rich Whiten, WB2OTK, is taken off the air over an esoteric legal technicality. He is adjudged out of the hobby until he retests.

Herb Schoenbohm, KV4FZ, is convicted of telephone fraud in 1992, a felony, and found to lack candor in his FCC license hearing yet he is still on the air.

Other examples abound.

This selective enforcement is as plain as the nose on your face and, whatever you feel about the hams, the practice violates every Constitutional precept of our great land.

Equal rights is etched in the blood of our forbears who fought the Civil War. Nearly 100 years later, Dr. Martin Luther King continued the struggle, only to die at the hands of an assassin. And he is hardly the only casualty of the Civil Rights Movement.

Our tortured history has benefitted everyone, as Equal Rights has reached into every walk of life, from women's rights to the rights of the disabled. But there is a striking exception: the regulation of ham radio.

An anachronism harking back to Jim Crow laws and life before the Civil War, ham radio regulation is wielded on whimsey. One person makes the decision on shoddy "evidence" with which the accused isn't generally confronted. Maybe it's another hams secret whisperings or what the ham says that controls the official position.

This return to unequal justice sacrifices the gains of the past 150 year. While we all want cleaner bands, we should strongly protest arbitrary and capricious enforcement.

I don't think he forgot that. I never got the impression that Jeff was saying that band conditions have no affect on propagation. It's a given.

The baby killing industry may hide behind such fine legalistic
distinctions, but it is still murder in every sense of the word
except "legal definition".

Where, exactly, is the heinous crime in broadcasting ideas? But that wasn't
the question anyway. The question (and a good one at that) was why _this_
guy out of who knows how many? And the reply suggested several responsive
ideas. I'm most interested in the content of this guys broadcast. I'm
guessing that't the most likely reason for his being singled out.

Ayup, and what was the name of that community radio station out of Berkley? I also heard that 30 or so pirate radio stations in So. Florida were busted and kept down around a year ago. I've been here all my life and didn't even know we HAD pirate radio, that's how much of a problem they were causeing.

This type of action can be seen in many, many sectors of our society. Homeschooling is getting popular, crack down on truants and stiffen homeschooling requirements. X-Lation: "Don't let any more escape!"

Pirate radio is coming in vogue, bust `em all. X-Lation: "Stop them before they get the word out!"

Raves are happening all over the country. Outlaw their drug of choice (GHB) then insinuate that they are dirty, filthy, unwholesome orgies for children. X-Lation: "Don't let the captive associate and communicate freely! There's more of them than us so we CAN'T let them organize".

Isn't this more or less what LE people refer to as an "MO"?

Bob...

A very lame piece of work, if you are looking for an opinion. Here's why.

> Rich Whiten, WB2OTK, is taken off the air over an esoteric legal
> technicality. He is adjudged out of the hobby until he retests.

Rich shot himself in the head by turning in his license via AOL email. This is very well documented. This wasn't Rich's first brush with the FCC or the law. My recollection was he had a $7,500 NAL lifted on a technicality, and there's the matter of a felony bad check warrant from Florida... which he didn't appear.

His application will still be reviewed by the FCC if he retests. Hopefully he will be found unfit to hold a amateur license.

>
> Herb Schoenbohm, KV4FZ, is convicted of telephone fraud in 1992, a
> felony, and found to lack candor in his FCC license hearing yet he is
> still on the air.
>
Herb was convicted and still retains the right to continue to appeal his most recent action to the Supreme Court. I believe if he doesn't exercise this right, he will be formally notified to cease amateur operation.

> Other examples abound.
>
> This selective enforcement is as plain as the nose on your face and,
> whatever you feel about the hams, the practice violates every

You seem to forget that half our forbearers fought for the South, mine fought for the North, big deal. I didn't have anything to do with slavery, Little Big-Horn, the Russian Revolution, Holocaust, Vietnam, the killing fields of S.E. Asia, or assassination of Dr. King. What does the Civil Rights Movement have to do with two less amateur assholes?

Source record: 116057

Wow, pros and cons, thanks for the overwhelming response.

Now to the central question: Did Rich, in fact, abrogate his own license? Admittedly, he did write an email doing just that. Whether or not he sent it is immaterial, because he quickly renounced it. FCC rules require more formality than an email, a fact Mr. Hollingsworth ignored in Rich's case.

Generally speaking, the practice of law allows for reversible errors. All a lawyer need do is send a corrected or amended copy. Prejudicial errors are ones that are intended to stand. This too is the FCC rule, which requires certified letter (so it can be authenticated).

Liking the ham or for what he stands should have nothing to do with the disposition his case. No one would want regulation by vote of our community. Imagine what a chilling effect that would have on free speech.

Next charges are: Rich ran illegal power, was a 'radio thug," and something about a Florida check charge. This type of talk, whatever the charges, is scandalous rumor, having never been established nor has Rich had the opportunity to confront any such evidence, if it exists.

And finally, the specter of a bipolar attack driving Rich's conduct when he wrote the email. That circumstance, if it happened, supports his absolute right to retain his ham license. Remember, the American Disabilities Act and related law prevents discrimination against a wide range of disabilities.

p.s. Keep in mind, I do respect Riley Hollingsworth. I also would like to see KV4FZ turn himself around and keep his ham license.

Mr. Maus,
The fact remains that I have much respect for this Pope, a Polish boy made good. I had an Italian friend in high school named John Sicola who became a priest. At my 20th class reunion I asked him if he had higher aspirations and he admitted he did. He wanted to become leader of the Catholic world but I had to be candid. Whispering to him at dinner, I said, "You'll never become the BIG MAN in the Vatican because the last thing worldwide Catholicism needs is anyone named Pope Sicola." I never heard from him after that. No one is infallible. All a Pope is is the successor to Peter, a figurehead. Popes die too and are they surprised what happens! Nothing. They rot the same as we will and dancing in the clouds with Jesus is either a myth or a misses. The point is that this Pope is certainly special. In combination with Ronnie Reagan, he helped destroy the Soviet Union, so what can be bad? However if he was really serious about making amends to the folks who gave you Jesus Christ, then never should he have overlooked Oskar Schindler's grave in Israel and never should he poo poo the idea of canonizing him. Any Catholic who did what Schindler did in the face of not only rampant murder of the innocents but a direct threat to his own life for saving them, performed nothing less than a miracle even though it contained no supernatural elements. It was as important as any miracle ever performed by any saint and a stronger healing between Jews and Catholics would take place if that miracle was recognized, appreciated and acted upon by the Vatican. And if you want me to donate $100 to the Missouri Synod, tell them to do something for a change to earn the money.

Your points are all well made, AND with a modicum of humor.
Consider also that Schindler was able to convince anyone that a
clearly non essential plant was a factor in the war machine itself
showed a certain supernatural element. Regardless of your beliefs in
this matter, he did pull off a miracle.

Third:

And if you want me to donate $100 to the Missouri Synod, tell them

A month ago I thought this message board was on the verge of death. No longer. It's alive and vibrant as it should be. Furthermore it makes no difference to me whether messages are pro or con my own sentiments-the point is to POST,preferably identified. Expression is a human resource; take advantage of it. The Internet is freedom;take advantage of it. Remember, the pen is mightier than the sword and you can make a difference in somebody's life, hopefully postive. Don't worry about spelling and grammatical errors; just keep filth and libel out of here and have a good time. Spoofing is fun. A taunt here and there is not the worse thing in the world either; after all, we're supposed to be grownups, right? And so none of this "Mommy..mommy..Billy's picking on me" nonsense. And one thing that some might overlook. How about you who don't like to read? You find books boring and even newspapers and magazines. Yet, if you're here, YOU'RE READING. Congratulations.
Doc,AF2Y

But "murder" is a legal term and you are mistaken if you
think that abortion is murder. Webster's says that "murder"
has to do with committing a crime and breaking the law.
The great majority of killings are not murder.

Doc, The American way of protest is what we are doing. We are communicating based upon our principles, disseminating the information worldwide.

The first movers in any given movement are augmented, then subsumed by what follows. Given thinking people. this issue will appear in writing, news reports, on TV, on Web sights, in chats, NG's.

Maybe people will subscribe to a petition, protest in person. Or maybe there is some remedy that can be pursued.

In the U.S. we have many ways of expressing such opinions with the legitimate goal of remedying the situation.

Bob Sherin, W4ASX
Miami, Florida.

But Hans, "murder" is a legal term. Killing is a generic term.
Murder is illegal. Killing is not necessarily illegal. Killing
in self defense is legal. Killing in war is legal. Killing with
an abortion is legal. I will back you in getting third trimester
abortions outlawed but I doubt that abortion will ever carry
the death penalty like first degree murder does in some states.

If you were kidnapped and a living fetus was surgically inserted
into your body cavity, what would you do about it when you
discovered it a couple of months later?

Thanks for the ifo! I found the resistor and turned it enough to boos the audio just a little bit. Listened in on my scanner to make sure it wasn't distorted.

How did you go about connecting a different mic? and what mic did you use? I could use some help here as I don't like the stock mic either and would like to connect a desk mic I have to it since it's being used in the house as a base unit.
Is there and adapter from RJ45 to a mic plug of some sort?

I vote a thumbs up for Glickman too. I may not always agree with
him but, we need people that are willing to put their asses on
the line for their beliefs. I've had enough of the drone
mentality.

%%%% I agree with you on your views on abortion. I deal with human death every day of the week. (so far I have pronounced 32 people this year) and life is precious and abortion is wasting a life for convenience of the mother (insert other reasons here) In this modern time pregnancy is easily avoided, it is just a pill a day, an implant,a well placed snip or saying NO! The argument that it would be cruel to force someone to carry a baby from forced rape or incest is bullshit. In rape cases the victim is given a pill to take or given a shot to stimulate sloughing of the uterine lining (period) preventing implantation of a ovum. It is your eternal soul tho in jeopardy.

David Moffitt Lifetime NRA,GOA,TFA Member----and damn proud of it!

"Before a standing army can rule, the people must be disarmed; as they are in almost every kingdom of Europe. the supreme power in America cannot enforce unjust laws by the sword; because the whole body of the people are armed, and constitute a force superior to any bands of regular troops that can be, on any pretense, raised in the United States." -Noah Webster, An Examination into the Leading Principles of the federal Constitution (1787) in Pamphlets to the Constitution of the United States (P. Ford, 1888).

In listening to a repeater conversation by Josh N9XDO and
Dan KK9G I was very offended by the talk of " running
no-coders off the air." They need to be taught a lesson. I
think we should run them off the air. Just like the guys
from the 147.015 repeater need to be run off the air. Im
tired of Josh Wilson and Dan Dews, and im tired of the
political weather crap in this county. I believe that Josh
Wilson and Dan Dews are the ones that QRMed my net on
Sunday. You and I need to do something.

MFH

Huh, doesnt this show you about Hams in Indiana. This Merl
Heinlein http://www.mfheinlein.com merl@mfheinlein.com
thinks he is a private detective. Ohhhh, I am scared. Look
at his site. Itll remind ya of Dick Traci! No shit! Listen
to his net sometime. Sunday evenings at 8pm on the 146.805
repeater in Central Indiana. What a joke! You can tell its a
no-coder net.

On to Dan and Josh... keep up the good work. Help us run
these no-coders off the bands. Run Merl off that repeater.
We are going to QRM his net. We dont like Merl, and we will
ruin his name in the ham world. Starting with Hap Holli.
Tell him this interview will be the last.

Again, you are just nitpicking. The entire discussion revolves around whether or not abortion is murder. One side says you can't murder a fetus, the other says you are murdering a baby. To you, it's no worse that killing a bug. To Glickman, it's murder of a human. This is the essential gist of the debate. Trying to nitpick the meaning of a word is an underhanded way to try to get your opposition to agree with your principal argument.

>
> If you were kidnapped and a living fetus was surgically inserted

> discovered it a couple of months later?

Poor example. Babies don't get there that way. The vast majority of unwanted pregnancies aren't from rape, incest, or impregnation by a hostile alien life form. They get pregnant because they are careless and irresponsible. Abortion gives them an easy way out. Don't try to make it some noble endeavor, to right some evil. The vast majority seek abortions because they willingly engage in irresponsible behavior.

Gerd,

Thanks. I just noticed one crucial element of your post that hasn't been explored: KV4FZ's continuation on the air in comparison to WB2OTK's removal.

You argue that KV4FZ, Herb, is on the air pending exhaustion of his right to petition the Supreme Court. True. However, this is just the point I am making.

In fact, the FCC is not considering Herb's removal on the basis of the criminal case. Rather they are basing their action on Herb's failure of candor at his FCC licensing hearing. Please be mindful that Herb denied any involvement in the CALLS episodes, which are well documented in the trial transcript. While he was merely hacking, he didn't come clean with the FCC.

Therefore removing Rich on a technicality while Herb continues to operate is clearly a travesty of justice.

Silly example, LRod. For someone to be charged with the crime of involuntary manslaughter, there must be some careless or irresponsible action on the part of the defendant that caused the death of another person. I think it would be a stretch to find that in most miscarriages.

However, in your misplaced desire to trivialize the debate, you do make a valid point. If some criteria is ever determined by the courts as to when human life actually begins, then a miscarriage may well be investigated as a potential homicide. Once a being is determined to be human, all the other rights granted other humans will be vested upon the unborn child. With the rapid advances in medical technology, this determination will become ever more important. Imagine the day when people can be nurtured completely artificially. It will become important then to determine when that person is considered human under the law.

Why don't you just call it what it is? - killing a fetus.
There would be the question of whether killing a fetus is
homicide. Is a fetus a person? The law is somewhat ambiguous
on the point. Whether the killing of a fetus is justified or
not is not up to you to decide unless it is your wife or
daughter or girlfriend. Do you really want to poke your nose
into other people's lives?

The new Fawn Ridge subdivision in Calvert County, Maryland (20 miles ESE of Andrews AFB) has covenents which specifically ALLOW ham radio antennas. Three lots are still available and each is between 1.26 and 1.66 acres with the front 3/4 clear and the back 1/4 wooded with a stream at the back property line.

Call Barbara Beers, realtor, at 301-855-6679. She is handling the sale for KB4P who is keeping one of the 5 lots for himself

Subject: [ACS-NEWSLETTER] ACS Newsletter 3/20/2000

Welcome to the Auxiliary Communications Service Newsletter,
developed by the ACS Training Unit of the State of California
Governor's Office of Emergency Services. Please visit our ACS
Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in
emergency communications closer together by sharing common
ideas, and by introducing new technology into the emergency
services community. All individuals with an interest in
emergency communications, disaster preparedness or helping the
community at large are encouraged to participate here in an open
forum.

You will find a virtual community here, with representatives
from many different organizations with the same common goal:
emergency response. We encourage everyone, from whatever
organization you represent (or just yourself!) to bring us your
ideas, suggestions, concerns, manuals, handbooks, or opinions so
that we may share them with the group. To those of you who have
just joined us, welcome aboard!

.....

From the Mailbag:

From: Don Kulha, Sonoma County CA ACS, Russian River Response Area
Subject: EMC228 Are We Prepared?

The bulletin #EMC228 raised some excellent questions, some that I have
been considering and preparing for. I'd like to share some of the
solutions we've implemented here.

1. Water availability: Water is our top necessity. Although we have a
good developed spring these are known to have failed during earthquakes.
We store 100 gallons of potable water in thick plastic 50 gallon drums
as a fallback position. Additionally both at home and as part of our
response gear I have "British Berkefeld" gravity water filtration units.
These will filter out practically all bacteria, viruses, guardia, and
organic chemicals using a combined carbon block/ceramic filtering media
and our units (SS2, SS4) are capable of filtering 12 and 24 gallons of
water a day. Katadyn, Pur, and First Need are other commonly available
brands of proven effective water filtration equipment.

2. Fuel Availability: I keep some treated gasoline stored on-site. This has been preserved with either Stabil or Pri-G brand fuel stabilizing additives. Additives may not be necessary if fuel is rotated (used/replaced) every 6 months. I keep a Holley high volume 12 volt electric fuel pump outfitted with 10 feet intake/output hoses and 25 foot electrical leads with a fused cigarette lighter plug on the end. These are stored in a 5 gallon plastic bucket ready to pump fuel to or from our storage containers. Antistatic precautions must be observed for safety's sake.

3. Food: We have anticipated that in a major disaster food and commonly needed items may not be readily available OR be may be needed for the less prepared/fortunate. I store at least a 3 month supply of food and supplies such as vitamins, toilet paper, paper towels, batteries, coffee (and filters!), propane and medical supplies. The foods chosen do not require refridgeration are primarily common canned goods and include things like stews, meats, soups, chili, tuna, vegtables, pasta, fruits and asceptic packaged milk and juices. Additionally "comfort foods" for the kids such as puddings, cakes, candy, cocoa and powdered beverage mixes were deemed important. All these items were selected to be "shelf-stable" for a minimum of 1 year. Information on the storage life of foods is available as a FAQ at:
http://www.providenceco-op.com/fsfaq/fsfaq1-035.htm

4. Refridgeration/Power: I've developed a "minimum energy consumption useage profile" for times that power might not be readily available. This involved determining the power consumption of common articles and what power we could produce on-site under worse case situations. The minimal power senario (>.5kW/day) includes running several low power DC fluorescent lights, running AM, CB and Ham radios, scanners, nicad battery chargers, an RV water pump, a small TV for several hours, my coffee grinder and a fan. Power produced is stored in deep cycle batteries (2 golf-cart batteries in series is a good start) and used directly as 12 volts or inverted to 117vac. Our batteries (2x Trojan L-16's, 12v@350ah) are sized for 4 days of energy storage without battery state of charge dropping below 50%. Power for the batteries can come from several sources: utility, generator, jumper cables to a vehicle, solar or wind. The average refridgerator uses too much power so we store foods that don't require refridgeration...and we'll eat what's in the fridge pronto! Information on power consumption analysis is available in the file LOADCALC.PDF in the downloads section at
http://www.homepower.com

5. Toilets: Where water is deemed in short supply or too valuble to use flushing toilets or the municipal sewage treatment plant is not useable "sawdust toilets" provide a good alternative. Using a sawdust toilet invovles releiving oneself in a plastic bucket with an attached toilet seat. The bucket has a layer of sawdust, peat moss or other organic matter on the bottom and after use the new "deposit" is covered with the same material and bucket lid reinstalled (we put several slits in the lid edge to ease removal/replacement). When full, the bucket can be sealed/stored, dumped into a pit and buried or covered with more organic

material. The layer of covering material eliminates insects, odors and soaks up any excess liquid. This is a hygenic approach originally designed for composting toilets but works well in an emergency (better than having to dig up and empty dozens of plastic bags later). This approach is presented and analyzed in "The Humanure Handbook", ISBN: 096442584X, $15 at Amazon.com

These steps address filing a family's most basic needs. It not likely to replicate a family's normal consumption patterns for energy/food/fuels but will maintain a reasonable comfort level for them for quite some time and keep them healthy. We also store addition quantities of foods, first aid and sanitation supplies to aid in neighborhood/community response efforts if needed. Think and plan out your approach to these issues now and practice using your preparations so that if they're needed you and your family will be "acclimated" to them. This will help you identify problems in your approachs and forgotten items as well as making sure everyone knows how to use them if/when the time comes. Regards, Don

This week's EMCOMM Bulletin:

EMC229 Training Test Matrix
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC229 Training Test Matrix For release 3/20/2000

This is a training endeavor that can be used to show how the unit can assist a local agency.

In numerous areas - due to the success of cellular, internet, telephone and agency trunking systems - it has become difficult for Amateur Radio licensees to show local officials just how their services can be beneficial. This is especially true where there has not been a local emergency of a serious nature for a decade or longer; or new systems have replaced the Amateur Licensee in the minds of local officials.

A TEST MATRIX is the printout of an area test of point-to-point radio communications. It is conducted, tabulated, and then presented to appropriate authorities.

The purpose is to determine and show the effectiveness of radio communication on certain frequencies (Amateur, Government or Agency) from specific points or locations in the area.

For example, Orange County RACES did a test for 12 physical sites in their area to determine how well the various locations within the County could communicate with the Emergency Operations Center (EOC) on Amateur Radio frequencies. They used it to show their

local Fire Authority how Amateur Radio could communicate from the locations to the Incident Commander during brush fires.

The Orange County test results consisted of a columnar report of 13 columns across the top and a list of frequencies down the left hand column, Below that was other data relative to the specific location such as a parallel comparison of Cellular Service, name of who did the test, area and telephone numbers for a person at the site from which each test was conducted. They used Park locations, listing the Park Ranger by name and phone number and any pay phone at the tested site. Results were listed as good, marginal, not usable, not tested.

In thinking about what they did, it seems that the idea could be used by other units for several purposes. Fortunately the Orange County Fire Authority had recognized the use of Amateur Radio as an alternate means of communications during emergencies and had used RACES during past events.

However, in other areas of the country where such acceptance has not occurred, it may be necessary to include media coverage (of the actual field testing) to gain exposure and get officials interested. This is tricky, but if done in a quiet, effective way with skillful news coverage (newspaper, TV, public radio, etc.) it can work. Media coverage must be carefully done so as to put subtle and seemingly indirect pressure on public officials to recognize and use alternative communications. However, if done incorrectly it can have the harsh result of turning them off.

Consider the needs of YOUR area.
- Flood reports and control?
- Road reports (evacuation of an ADJACENT area; hurricane?)
- Large parades and public events - public control, anti riot?
- Special needs in your area?
- Storms (tornadoes?)

If you've done that test, was a published written summary report handed to appropriate agency officials? If not, do a Test Matrix and present it. The approach to use is this: seek NOT to convince local authorities of YOUR need to use your unit, but show how it can assist them in a real-world way, preferably ongoing rather than as a doomsday response.

We do it that way because our parents did it that way and our grandparents and so on. It's generally a good system, you take the (supposedly) wisest men and women in the country and you ask them to agree on issues that are of national importance. And it usually works quite well, but with every system there are flaws. I suppose we'll just have to put up with it until we all decide to change it. Or you could move into the mountains and live like a hermit.

Yah, I would _figure_ you for a boot licking snitch. Didn't doubt it for a
second. I'm sure your Mother and Father would be very proud of you.

And regarding the FBI, don't worry about it. They use my driveway for
parking space all the time. Maybe I should start charghing them !

Let's see:
The Gunrunner has already turned me in to the FBI
Gerry Schneider has threatened to cross international borders to do damage
to me
You are turning me into the FBI

Really......this IS getting a little tiresome. You can't expect me to get
very excited about this can you? After a while, the thrill of noteriety
begins to wear off.

What a dweebus. But don't worry, I think you have a lot of company. < get
it: *Company* > eh, _small_ joke.

No, there isn't a State Cop, Detective, local LEO, or Judge that I haven't
met at one time or another in the last 24 years here. They _ALREADY_ have
files on me. Believe me. If you think you're adding new information to
their database, save the 33 cent stamp. Spend it on a can of sodapop.

Now regarding why people in general don't like me? I am thought to have an
abrasive personality. Well, some of us do, some of us don't (pansies).

Maybe it's a genetic thing. I really don't know (care). The world, as you will someday conclude, is full of fruitcakes.

If I have earned myself that distinction, it is because of years of long and hard work :^) Now there are your Major fruitcakes, like
Saddam Husein,
Louis Farikahn
Slobodan Milosevich
Osama Bin Laden
I'm sure you can think of many more

and then there are the tiny fruitcakes, such as myself. Seems if you have a lot of money, it's OK to be a fruitcake. The only people who REALLY get punished on this planet are those in serfdom, such as myself.

Well there's a good reason if I ever heard one.

It's generally a good system, you take the (supposedly) wisest men and
> women in the country and you ask them to agree on issues that are of
national
> importance.

Come On, Damien. Do you _really_ think 12 Justices can fairly represent the best interests of 235 MILLION citizens? Without taking into consideration their wishes? (votes)? Gimee a break. That's Totalitarianism, not Justice. No different than the Russian Duma, or the Chinese whatchmacallit.

And it usually works quite well, but with every system there are
> flaws. I suppose we'll just have to put up with it until we all decide to
change
> it. Or you could move into the mountains and live like a hermit.

How do we change it? How can you vote somebody out of office (A Supreme Court Justice) that was _appointed_ to that office, rather than Elected? Answer= YOU CAN'T.

And we are stuck with these know-it-alls for perpetuity, or at least until they die off. What a f'ing shame. For all of us.

And why not? I can begin charging for parking space, say $12 for an all day
one-day *permit* on my _private_ property, and donuts are going for 75 cents
each; coffe $1 / cup :^)

HEY, is this going to be Tax Free income, or do I have to pay out to Uncle
Sam on this new windfall?

Plaintruth,

Please wait a minute. Are you privy to the actual evidence against Doc? Has Doc had the opportunity to see it and rebut it? Are there witnesses? If so, have they been in communication with the FCC? If so, when will Doc have the opportunity to confront his accusers?

When we follow the American blueprint of Due Process, many of these cases fall by the wayside. While we want efficiency of regulation, the accused should also have the right to see the basis and to answer that evidence prior to FCC action.

Not having thought through this problem before the following is sheer exercise.

The satellite has the advantage of being able to receive a ground signal at multiple points as it passes overhead so it can plot the points of weakest to greatest intensity. I don't think that would be sufficient to determine an XY axis since its orbit will always be perpendicular to the signal source.

If however the orbit could be changed and the signal were predictable, multiple passes would produce intersection points and resolve a location.

The same would be true for any elevated receiver. Commercial aircraft or appropriately equipped model planes.

The frequency is important. Microwave signals are easiest for a satellite to receive as that ensures line of sight and minimizes deflections and harmonics. Long wave transmissions that produce skywaves are much harder to pinpoint.

Food for thought for survivalists in these days of GPS and active RF implants.

QST reviews this radio in the April 2000 issue. Check your news stand before
you buy.

From page 75:
"CTCSS capabilities are not provided and, apparently, there are no internal
sockets for installing an optional tone board. The serious 10-meter FM repeater
aficionado will consider (this) to be a disadvantage.
"Aftermarket manufacturers....offer a selection of CTCSS tone boards that
should be adaptable.....but some minor radio surgery will be required. Break
out your soldering irons!"

Doc, I usually agree with your writings but could you 'prove' that
the bomb wasn't dropped on Germany because they are 'white'. I
don't buy your analogy. Were you on the project or within the
government and know something that we don't or are you just anti
gov. and if there 'could' be a possibility that it is true 'it is
true'.

Tim,
The only chance the Republicans had to capture the White House in 2000 was a man named McLain. They blew it and Gore will eat George W.'s lunch. Why? Because after the Dems lost in 1980, '84 and '88, they changed their image to one of CARING which was used successfully by Clinton. If I said it once I've said it a thousand times, as long as the G.O.P. is held captive by the religious right wing, a stranglehold which McLain wanted to break, you will have a Dem President. It's as easy as that. For example, Bush adamantly refuses to meet with any gay group. That tells me he writes them off as unworthy of a vote but it gets more involved. It says that HE DOESN'T CARE. He addressed Bob Jones's higher school of bigotry which sends the same signal. America has changed SIGNIFICANTLY which George W. will not recognize while Gore will. Al will therefore take advantage of Bush's shortcomings and tear him apart in debates, make him look like a backwoodsman and win. The G.O.P will rue the day when they turned thumbs down to Arizona John.
Doc

Still playing the big shot lawyer, huh Bob. I think the FCC is very
good at winnowing out the problem qrmers. AF2Y falls in that catagory.

The fact that you want to play lawyer does not change the fact that
AF2Y was, is, and now again, a charged deliberate interferer. Branded
for all to see by the FCC not only once but twice. I hope they have
a "three strikes and you are out" rule. It serves no purpose to have a
career trouble maker, rule breaker, evil person like AF2Y on amateur
radio.
Don't ket the door knob hit you in the ass AF2Y on your exit from
amateur radio!!

Plain truth all the time

Because the USA is a republic, not a democracy. Citizens of the USA are
guaranteed inalienable rights that cannot be voted away by the tyranny
of the majority. Presently, a woman's right to determine the contents
of her own body is one of those inalienable rights just as free speech
is one of your inalienable rights.

Nope, that's one characteristic of a free republic where every citizen possesses inalienable rights. How would you like your inalienable rights taken away from you by the tyranny of the majority? Women have an inalienable right to determine the contents of their own bodies. If they didn't, rape would be legal.

I don't agree with everything one does with one's body. But I respect the concept that a person's body belongs to that individual person and comes with a legally defined set of property rights.

Regardless of AF2Y's personal insults, which have no effect whatever on the facts, and regardless of the time frame involved, the fact remains that AF2Y endorsed genocide of the entire German people.

I have never endorsed genocide of any people.

Yet AF2Y and dupes like KK7HO and K5MVK attempt to make _me_ out to be some kind of horrible person, apparently because I agree with the founding fathers that our race and culture deserve to survive, while people like Doc Hate can spew open calls for nuclear destruction of an entire ethnic group, and maintain an unchallenged pose of benevolence.

That's hypocrisy of such a high order that probably a new word should be invented to describe it.

Honor bright,

--

Kevin Alfred Strom.

2025. FUNERAL ANNOUNCEMENT

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-23 00:00:00 UTC
From: Brother Diggin Plantum <anonymous@cotse.com>
Message-ID: <200003231650.LAA10773@cotse.com>
Source record: 116164

FUNERAL ANNOUNCEMENT FOR EXPOSED PERSONAS
THIS WEEKEND

Services for the recently departed

POSSUM BELLY

and

DONKBOY,

killed by misadventure, will be
held at Potter's Field Saturday at 1 PM.

Visitation will be from 1 PM until 2 PM.
Guests who wish to spit are requested to
aim well so that the floor around the coffins
will not become slippery.

Bro. Plantum will deliver the eulogy, entitled:

"Jesus Even Forgives Morons."

Music, provided by Sister Groannscreech,
will include "Thank God and Grayhound You're Gone"
and "Tomorrow's Gonna Be a Brighter Day."

Interment will be at 2:30 PM.
Time will be provided before the graves
are closed, so guests are requested to refrain
from urinating on the caskets
until they are actually in the ground.

After the graves are closed, grave dancing
will commence and continue until midnight.
Band provided but BYOB, please.

So let it be written. So let it be done.
Amen

look, this martin guy is an idiot. he has been asking for it for years.
you can't rub uncle's nose in it and expect to get away with it. it is
a known fact that martin has been involved in much more than what is
mentioned here. uncle is not going to get exercised because someone
turns you in for interfering with their phones. there has to be much
more for them to get a hard on about your radio activities. i always
find it interesting how these types of threads mysteriously get started
on a cb radio ng. somehow , i think some ham guy is getting some kind
of carthartic reponse seeing somebody get busted. it kind of makes them
feel relevant. but the missing issue here is why is always seem to be
some crackerhead white boy getting busted being a butthead. i mean,
when is the last time anybody ever heard of one of these mega watt
black owned stations getting busted. i have never heard of one, maybe
somebody can refresh my memory. big george , bless his pea picken
heart, agitated on channel 12 at whatever power levels he could muster
for over twenty years and to my knowledge the fcc never even gave him a
courtesy call. but you get some good buddy doing some nonsense, and he
gets busted. see my point. heck , over these united states there are

tons of big stations that have been transmitting for years and have never been bothered about it . surely they have neighbors who complain, but whatever. all i know is , i think that i am going to change party affilations. it is obvious to me that only liberal democrats are allowed to operate mega watt stations with impunity. so now you can call me democratically curious dan, and i am back out.....

That's the problem Cecil,

You're playing *word games.* And *word games* are killing 1,500 babies a year. In the USA alone. We haven't any reliable stats for anywhere else, nevermind the US, but this is a best guess from the Extermination Centers alone (Planned Parenthood).

You don't even know about fetal organ harvesting. Or pressuring women to have abortions while they are under the influence of IV drips. Or how when these fetuses are opened, their hearts are most often beating, although their limbs are not animated. Or how *doctors* often break their necks and beat them to death with medical instruments if they are animated. Or drown them in buckets of water.

Your ignorance, and that of people like you, is what allows this unprecedented atrocity in the USA to continue unabated. Better learn some more about it before you pop-off.

You're telling me then if it was suddenly legalized, by the Supreme Court, to kill everyone of African American descent, that it would be OK in your mind, to do so. Because the Supreme Court said it was OK, you not only have their permission, you have their blessings.

This kind of sick and twisted thinking is what got us into this mess to begin with. As long as there are people like you around that don't know the difference between RIGHT and WRONG, I don't see the problem ending any time soon.

Wrong. Such operating conditions simply add to the likelihood that any
two stations can communicate with each other, thus supporting Jeffs
assertion.

Now don't get me wrong; I like the Pope. He's a nice fellow but not as popular as I. For instance if he and I would go onto the balcony overlooking Vatican Square with the hundreds of thousands below screaming and waving, I'm sure several would yell out, "Who's the guy with Doc?" But then again charisma is the name of the game; some have it, some don't. But all kidding aside, what he's doing and saying in the Middle East is sending mixed signals. Before leaving for the Middle East, he issued an apology to the Jews regarding the mistreatment of them for 2000 years by Catholics. That's nice and a step in the right direction since going to Israel with a chip on his shoulder wouldn't have been too smart.So he goes to the Middle East and is treated well in Jordan which made a serious peace treaty with her neighbor. Then he comes to Israel, visits the Church of the Holy Sepulchre, holds Mass, embraces Arafat, tells him how much he approves of Palestinian Statehood and expects to get a good bowl of chicken soup at Moishe's and David's on Kicchele Boulevard downtown Jerusalem. I mean what's with this guy? We know he's not well but is dementia part of the problem? Once again, before leaving, he apologized for the murders and persecution by Catholics for two millennia and then tells the Jews that he wants to see their homeland partitioned. That's like powerful Protestant leaders demanding that they be allowed to build a church next door to the Basilica in the Vatican. I'm seeing Papal poop instead of Papal sincerity. Maybe it's time for him to step down and turn the reins over to the oldest living Cardinal, Stan Musial? Now to be very serious for a moment. From time to time we hear about Sainthood being granted. Nothing wrong with that since it's an integral part of Catholicism and each faith is entitled to its own religious idiosyncrasies and customs. I think one of the prerequisites for sainthood is having performed a miracle and I wonder why the Pope never stopped to mull this over in Israel proper? You see there is a potential saint buried there and he was Catholic and is interred in the cemetery of Righteous Gentiles which is GUARDED by the Israeli military. His name was Oskar Schindler and you tell me it wasn't a miracle that this one man so meticulously protected and saved over 1,200 Jews from extermination right under the noses of the sadistic Plaszow concentration camp commandant Amon Goeth and his SS murderers? It wasn't a miracle that Schindler made them all believe that his enamelware factory was an ESSENTIAL war industry while in fact it did nothing but save the lives of the doomed? For God's sake, is there any wonder why his gravesite is guarded 24 hours around the clock? Why didn't the Pope acknowledge this? Why didn't he pay homage to this great humanitarian despite Oskar's womanizing and alcoholism? In Jewish writings there's a passage saying that to save one life is to save the world. It's true-think about it. It's like the adage that a teacher's influence is boundless. So there the Pope stood, walking the same earth Christ walked, preaching goodness and mercy and justice and ignoring the gravesite of Oskar Schindler. And over the years ignoring the suggestion that this man having

had Christ in his being was not good enough to being canonized? I say good try Johnny but you missed getting the brass ring.

"Any two stations"? Shirley, you jest. Two hams using 100w and dipoles on opposite sides of the globe invariably have *unreliable* HF communications. Wishing will not change that fact.

>i suspect a single telecommunication spy satellite can pinpoint
>transmissions without triangulation because it is not limited to a one
>dimensional view that ground based detection is. It could also monitor
>vast areas since there is much less atmosphere to go thorugh.

It couldn't pinpoint a ground location from a single short transmission,
since it doesn't know the precise direction that the signal is coming
from. If you had multiple satellites receiving the same signal at
the same time, the difference in time of arrival would tell you where
the source was. The GPS satellites have nuclear explosion detectors
that operate this way.

Also, if the transmitter continues to transmit for some time, and the
satellite is not in a geostationary orbit, the Doppler shift of the
the signal due to the satellite motion will change with time. The
specific *pattern* of the Doppler shift, plus a knowledge of where
the satellite was at each moment, tells you where the ground station is.

The old Transit satellite navigation system used this principle with
a transmitter on the satellite and the receiver on the vehicle (usually
a ship). It took one overhead pass (about 15 minutes) of just one
satellite to determine the ship's position.

Another variant of this is used by the SARSAT/COSPAS system that finds
emergency locator transmitters from airplane crashes. In this case,
the satellites have very simple transponders that pick up frequencies
in one band and retransmit them in another band. Ground stations
monitoring the latter signal measure the Doppler shift of any ELT
transmissions heard, and then from a knowledge of the satellite
position and the receiving antenna position they can calculate the
transmitter position.

I have better luck with my verticals than you ascribe to dipoles. An amp would make a couple more S units, and a beam, another S unit. But a good path can make 9 S units difference. Any two hams anywhere in the world CAN make contact - but obviously there has to be a path between them. I'm perfectly willing to accept that this wouldn't be the case if the band's not open, or if they aren't on the air, or if their antenna is broken, or any number of other stupid exceptions you might cite in order to try to make a case for your point.

A fetus is not a baby, by definition. Obfuscating the legal meaning of
words is obviously designed to elicit a subjective emotional response
rather than an objective rational one. You are the one playing "word
games".

> You don't even know about fetal organ harvesting. Or pressuring women to

Then get the laws changed. I would vote to outlaw third trimester abortions.

> Your ignorance, and that of people like you, is what allows this
> unprecedented atrocity in the USA to continue unabated. Better learn some

I am not ignorant, Lawrence. I simply believe that a woman has a right to
determine the contents of her own body. Otherwise, rape might as well be
legalized.

> You're telling me then if it was suddenly legalized, by the Supreme Court,
> to kill everyone of African American descent, that it would be OK in your

Nope, you still don't comprehend the difference between a republic and a
democracy. People of African American descent have inalienable rights
that cannot be legally violated by a Supreme Court decision. If it ever
happens, it will happen because of people like you who want to twist
the laws to their personal purposes.

> This kind of sick and twisted thinking is what got us into this mess to

His next, and last option, would be to appeal to the supreme court. I believe he has a certain amount of time to do this. I don't know what that is. The next step is a "cease and decist" from the FCC. Course they may never send that. Why he is still able to use his call you ask? He applied in a "timely" manner for renewal. And until acted upon by the FCC he is allowed to continue to operate.

Technically, this shouldn't happen, at least for an infrared motion detector.
The RF may be leaking directly into the circuit.

I had a problem like that with a fire detector, but proper grounding eliminated
the falsing.

You need to grow up and LEARN your American History.

This country, with its institutions, belongs to the people
who inhabit it. Whenever they shall grow weary of the
existing Government, they can exercise their
constitutional right of amending it or their revolutionary
right to dismember or overthrow it.
-Abraham Lincoln
First Inaugural Address
Monday, March 4th, 1861

Holds true today as it did then.
It's a shame he didn't believe what he mouthed.

> I hope you end up in jail and pinned to the wall by your
>roommate Bubba. The justice system we have works very well, and
>it has systems in place to change laws you don't agree with. Why

>people. If oyu are unsuccessful in changing a lwa, it is because
>the MAJORITY of people don't agree with your OPINION, and
>therefore, it shouldn't be forced on them.

Again, grow up. Learn what a Republic is versus a Democracy.
Hint. We are a Republic.

If you want to live
>in a place where the will of a small number of people can be
>forced on the entire population, then you shouldn't live in this
>country. A place like China, or Russia shares your views that the
>will of a small minority has the God given right to enforce
>there will on the rest of the country.

No, here it is SUPPOSED to be that the majority does not run roughshod over the
minority.

Then why doesn't the USSC allow me to protect myself if indeed they say it
is my responsibility to do so?
Why to they disarm me when I am in public, which is exactly where I am at
most risk?

You tell me they say we citizens are on our own. It is our responsibility
to protect ourselves, and at the same time you take away our ability to do
so, from the Executive Level all the way down to the State and Local level.

Do you see a problem with this? I do.

I may or may not agree with you on the abortion issue. It is just
impossible to have a reasoned debate if you deny the dictionary
meaning of words. We have nothing to discuss and we have no
common language because you have deliberately sabotaged the
language. Anytime you want to use the correct definitions of
words or even invent your own words, I'm all ears.

Can you believe the nerve of someone who refuses to accept the dictionary definition of words? He's not likely an engineer. We make our living using correct definitions. It's quite an argument. "You're wrong because I don't accept the definitions in the dictionary of the common language we are trying to use to communicate." Wonder if I can get away with that approach over on rec.radio.amateur.antenna? :-)

I've already has a much less extreme surgical alteration as a
responsible birth control option.

If castration is your preferred method, please do it before your
irresponsible conduct results in offspring. It is better that
your genes do not further contaminate the human race.

Am I to take that as a THREAT you snivvling motherfucker?
to quote YOU:

>Your only saving grace is that most of
> us in the military and in law enforcement share many of
> the same beliefs you do.

What would you do to me if you _didn't_ share many of the same beliefs that
I do? Smash through my door in the middle of the night and kill me and my
whole family? Then burn the house to the ground to cover *evidence*? Then
bulldoze the whole thing away do immunize yourself against criminal
culpability?

I think you need to be in the Brig, where you can be watched 24 hours a day.

I would wager everything I own, INCLUDING my Life, that you and your Ilk
would suffer enough heavy casualties as to be at the MERCY of the civilian
population were you to get any *ideas.*

There are between 235,000,000 and 250,000,000 of us who are _more_ than
capable of adding to your body weight by putting Hot Lead into it at close
quarters.

I wouldn't want to be in your skin were Civil War to ever breakout in this
Country. Too many bullets coming from every direction.

The biggest exception is that
> we are not as paranoid as we deal with government daily
> and understand how ineffective it can be.

How ineffective you are. Yes, tell us more about that. Didn't kill you
quota of innocent civilians yet this month?

Yes indeed. By all means, keep your nose in those *books* because those
books you can't seem to get your head out of are the source of all Truth and
Wisdom.

Here's something from a *similar* book from Nazi Germany, circa 1935:

"Circa 1935 : two Jewish pupils are humiliated before their classmates. The
inscription on the blackboard reads : "The Jew is our greatest enemy! Beware
of the Jew!".

Dictionary definitions. Indeed, W6, I see you are lost to the world about
you.

Want to wager some money on who has the higher IQ?

Our argument was not over abortion. Our argument was over the
foundations of the scientific method. Scientifically speaking,
elective abortion is killing a fetus.

Is it legal to kill a fetus during the third trimester?
Yes, it is presently perfectly legal.

Is it wrong to kill a viable fetus during the third trimester?
My personal opinion is, yes, it is wrong and I would vote to
change the law.

See how easy it is to be rational and logical without having
to resort to obfuscation?

Communications is impossible unless the two people trying to communicate
are using the same dictionary. The fact that you refuse to use the standard
dictionary of the language in which you are posting just means that you
have no desire or intention to communicate. Why bother even posting? Why do
you choose to confuse, confound, and obfuscate the language?

The dictionary is the bible of communications. Reject it and communication
is impossible. You might as well be speaking in unknown tongues.

Be it known that I am not a licensed lawyer. Charged all the time with playing lawyer, I am actually asserting citizenship according to the way I was raised on the Constitution. My Dad, once a Boston lawyer, encouraged us to speak out about injustice. He said, "He who sits on his rights waives them for all time."

His pride swelled the few times I spearheaded government policy through pro se litigation. We were taught to speak out and to join forces with those who oppose injustice (such as the Civil Rights movement).

: Fair enough but it's still not HIS country, it's everyones.

Actually, if there is a majority of Americans who decide
to kick out people on a certain basis, and they have enough
voters to control who gets on the Supreme Court (USSC).
Based on the assumption, from the extreme left-wingers, that
the Constitution is what the USSC says it is (a living document)
then if you control the presidency and the USSC then you
can dictate who has what rights.

Possum Belly,

So you are stereotyping all so-called HOA's. Ours happens to be neighbors who have chosen to join together in a non-gated, 5 square mile county area. Of course, you assumed the stereotypical, broadening your argument to discredit me.
I'm principle investigator in securing grants from the federal government to replant our area, shorn of vegetation mainly from Andrew. In retirement, I give my time freely to my community in many different ways, one of which is to build our community park.

I see your kind of bias on this NG all the time. When the subject jumps to personal attack, I know the writer has lost the argument on the material issue.

Do you believe yourself wise enough to judge whether a person is killed at an abortion or is it just tissue removal? Can you state with certainty at what point human life begins? What if you are wrong? Do you have enough knowledge and wisdom to answer these questions?

I don't believe that you would intentionally kill someone unless it were necessary. All I ask is that you take a moment, lay all the peripheral issues aside, search yourself, and ask these questions of yourself. Are you sure, beyond all uncertainty, that someone isn't being unjustly killed in an abortion?

I cannot be sure.

: . Each debater must be in each extreme corner, or appear to be
: > conciliatory, and by that, caputulatory. Which is nonsense.
:
: Nicely said, Peter. And abortion is not the only area where this is true.

The nice thing is that the NRA just ended any chance of there
now being a middle ground on guns. By forcing people to take
sides, there will be no compromises.

: A Radio Netherlands commentator made the same point re Ulster, a
penny-ante
: conflict which is a crashing bore to all but a few players (some like
Gerry
: Adams having political ambitions in the Republic or Westminster). No one
: gives rat tits about the issues just as long as the other side capitulates
: and recognizes the other as 'the winner'.
:
: While I tend to agree with most of the NRA's position, their tactics suck
: swampwater. Defending the keeping of small nuclear devices in my closet
: under the 2nd Amendment, the great teflon bullet fiasco that cost it so
: dearly in membership and support, and a frenzied defense of every
: drug-dealers weaponry ultimately will isolate its friends and cause it to
be
: defeated finally and totally. The gun- banners, of course, don't know a
: barrel from a butt and we end up with trigger locks on reenactment
: flintlocks. If the anti-gunners ever get their act together, all hell
will
: break loose. By trying to defend everything, the NRA defends nothing.
: Again, no one really cares about corpses but who gets to chant We're
Number
: One.

It is called "Tribalism". It is the "new world order" where we have
globalization with tribalism to counter balance it.

: Having had a job in a hospital when abortions were performed as D&C's
: (Dustings and Cleanings) and the local unwed mother home was going full
: tilt, I got a chance to see the results of some back-alley jobs first hand
: (at the age of 15). While we are having this tidy little debate about
when
: life begins, etc, desperate women will be dying alone in a pool of their
own
: blood. Because all of the opinions, laws, amendments, pronouncements, etc
: by all of the males and overage women are of little help to a young,

scared,
: pregnant woman and haven't been for 6000 years. We're Number One. Yeah,
: right.
:
: Dick McCollum N0BK (replies to rec.radio.amateur.policy only please)

Banning anything does not get rid of the easy access to that activity.
Drugs, alcohol, abortion or guns can not be banned. There will aways
be access.

Ham radio exams ARE NOT rocket science. The question pools
are published.

>Herb Schoenbohm, KV4FZ, is convicted of telephone fraud in 1992, a
>felony, and found to lack candor in his FCC license hearing yet he is
>still on the air.

Unfortunatly. Herb missed his calling. He should have been
Jim Jones' right-hand-man. I've listened to Obersturmfureher
Schoenbohm on 20 for years. The guy's technique is to bury
his marks in volumous non-sequitor BS, until they are so SICK
of listening to him they spinto the VFO. (It's an effective
technique mind you! - it's being used even now by that wanabee
preacher KC3AU each and every weekend on 14.313) Anyone who is
taken in by the blabberings of *either* of these knuckleheads
deserves to be "brain fu--ed".

A pity really...! One or both of them could easily open
up a "Rent-To-Own" business in some of the trashy neighborhoods
in Atlanta or Christansted and clean up big time instead of
blabbering away on 20 Meters and making not a dime for it.

What a WASTE of sheer marketing talent! Someone tell these two
modern-day Ponzi's to go open a pawn shop in Miami somewhere.
The cash could easily be "laundered" on St Croix.

I tell ya, I have to do the think for all these guys....OY!

Therein lies the crux of the motivation here - as a punative measure
against those whom they selfrighteously declare practice this "careless
and irresponsible" activity; to punish by usurping their personal rights
and freedoms; to legislate and impose their morality on someone else.

>
> ac6xg

Birth control is accessible and inexpensive in America. Women who
have an unwanted pregnancy, other than by force, are careless and
irresponsible. This is certainly an issue for society as a whole
because of the high probability that such behavior will be paid
for in some manner through individual taxes. Further, it is a
civil rights issue. Americans have the right to life as stated in
the Constitution.

In insisting that abortion be completely unregulated and "on
demand" you have imposed your moral convictions on the remainder
of society. The issue is society coming to some consensus as to
when human life begins.

I'll ask you. Are you wise enough to determine, definitively,
that an abortion does not end a human life? Can you state with
certainty when human life begins? Toss aside your political
affiliations for a moment and think about this.

I suggest that if you are going to jump into this debate that you
at least go back and read the preceding posts, in whole, not as
edited by successive posters.

That is couragous. Unfortunately, the ARRL BOD doesn't care what we do. I think they would gladly kiss 500 good hams goodbye if it meant they could sign up 1000 CBer's. There were alot of good hams that threw in the towel and lost faith with the league when the ARRL presented their restructuring proposal. The ARRL used to be a good organization with solid beliefs, they even showed concern for issues that were on the minds of non league members. I don't know what caused them to change, maybe it is just that they're to close to Washington D.C. and the liberal limp wristed Clinton Administration or Rep. Barney Franks home district and eight years of liberalism has rubbed off. One guy said he was going to cancel his ARRL life membership but I don't know if he ever did.

Your post has appeared here in it's entirety once already. Why do you feel it must appear again? I do not care to respond to all of it, or include text that I am not responding to. You made the remark, and I quoted it and commented on it. I believe the root of the Pro-Life movement stems in no small part from prejudicial attitudes like the one expressed therein.

> questions?

We are supposed to abide by the laws of the land. These laws define
a "person" and define when "human life begins". If they are wrong,
get them changed. But until they are changed, that is the *standard*
everyone must use if they are to communicate in a valid manner. A
word means what it is defined to mean. What you and I would prefer
words to mean, as my late uncle used to say, "doesn't amount to
a hill of beans."

This discussion is not about abortion. It is about the meaning of
words. You are using words incorrectly. I would vote for a new
legal definition where a "viable fetus" is legally treated as
a "person" and is therefore covered by the murder/manslaughter
laws. But until that happens, a fetus is NOT legally a person,
by definition.

> Are you sure, beyond all uncertainty, that
> someone isn't being unjustly killed in an abortion?

It doesn't matter what you and I believe if we are mistaken about
the definitions of words. The state legally defines the words.
We are forced to use the state's definitions if we want to communicate
in a valid manner. By definition, a fetus is not usually a person.
By definition, killing a fetus is not usually murder. What is so hard
to understand about the definition of words.

When you assign incorrect meanings to words, you are simply
engaging in obfuscation. Surely you know how to express yourself
using valid definitions of words.

Strider wrote:
> Your assertion that an unborn baby is merely a fetus is just
> that, your assertion.

You are completely missing the point. Stop emoting long enough
to realize it is not *my* assertion. It is the assertion of the
standard for the English language. From Webster's:

"fetus - an unborn or unhatched vertebrate."

Is an unborn baby "unborn"? - Yes. Is an unborn baby a
"vertebrate"? - Yes Therefore, an unborn baby is a fetus.
There is no argument possible! Words mean what words mean!
If you don't like the Webster's meaning of words, feel free
to invent some new words.

If we were speaking two completely different languages, we
would not be communicating. That's what you are advocating -
changing the standard definitions of words until no valid
communications is possible. This discussion is NOT about
abortion. It is about whether you are free to change the
meaning of words from the standard of the English language.
You are simply not free to do that without changing the
dictionary.

> This is the issue. You see no problem killing a fetus. I am
> disputing your assertion that an unborn baby is merely a fetus. I
> am asserting that, at some point prior to birth, it becomes a
> child.

Well, you are mistaken, by definition. Go get the legal definitions
changed if you want to. Until that change occurs, you are just
mistaken. It appears that you emote to such an extent that you
are incapable of logical/rational thought. If you refuse to
accept the dictionary definitions for the English language, then
no valid communications is possible.

> I adamantly refuse to reduce this discussion to any lower grade
> level to satisfy your continuing obstinance. You use whatever
> language you like to make your point and so shall I.

That's the problem. I am using English. You are not using English.
It only appears to be English thus leading to obfuscation. Thus,
nobody can or should take you seriously.

> As stated, it is my belief that, at some point before birth, the
> unborn baby becomes human and therefore entitled to all the
> rights and privileges protected by the Constitution.

The law says that's false so you must get the law changed for
it to be true. When you get the law changed, only then will an
unborn baby be legally a person. Saying an unborn baby is legally
a person presently is incorrect. What about that is so hard for
you to understand? With thought processes like yours, I am assuming
that you are not a man of science.

2126. KK7HO the whole truth!

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-24 00:00:00 UTC
From: Leon the Wolf <wolf@ourserver.com>
Message-ID: <38DBDFD4.C22338B9@ourserver.com>
Source record: 116019

```
The truth about KK7HO.(FAQ for the newbie)
-------------------------------------------------

(1) Who/what is KK7HO?

KK7HO is the amateur radio call given
to Tim Volz, of Las Vegas NV. In
amateur radio, its common practice to
use this FCC issued call sign as your
name, since it is unique. This and
other calls and personal information is
available on: www.qrz.com.

(2) Why does KK7HO post so many messages?

KK7HO is a frequent poster here on this
newsgroup. His posts are, for the
most part his opinion and attempt to
color issues and events to his own
'world view'. Its not uncommon for
KK7HO to post 5-10 one line messages
per day, all with similar content.

(3) Why is KK7HO so angry and full of hatred?

The basis for Volz's complaints is his
apparent disagreement with the views expressed on
the weekly shortwave amateur radio net, called the
Liberty Net. He has made much refernce to the
"tearing down of our government"

But it get's confusing here since he claims to
agree with much of what is said on the Liberty Net.

This group has meet there for well over a
decade, and frequently discusses current
events with a conservative view, unlike the
major media, and other 'typical' news outlets.

Sometimes these views have been termed as
"politically incorrect". Liberals and Volz
in particular find this political speech an
affront to his 'world view'. Because of this
he feels justified in disruppting any political
speech that he disagrees with, by any means
available to him.
```

(4) Why does Volz violate the amateur radio laws?

In the past (for over a year) Volz has claimed
that he was QRMed (jammed) as he was attempting
to use 3.950, by the Liberty Net members.

Volz and his fellow jammers will meet on the
frequency 3.950 mHz, before the net each Saturday
night for the express purpose of heckling and
tormenting the other amateur radio operators,

Then, when the net participants resist their jamming,
Volz and his assistants will claim that they are
the the victims, and loudly complain to Riley
Hollingsworth, and anyone else they can convince
of their lies.

Stop the jamming KK7HO.

Latest example of KK7HO's
criminal jamming operation:

: > You need to get some help for the severe emotional disturbance
: > you have. Your violent nature can only serve your own
: > destruction.
:
: These are the same words that England used to threaten the Colonies about
: 224 years ago. Didn't work then; won't work now.

As with the early Contintental Army, most Americans do
not have the training or the discipline needed to take on
a major military. Your only saving grace is that most of
us in the military and in law enforcement share many of
the same beliefs you do. The biggest exception is that
we are not as paranoid as we deal with government daily
and understand how ineffective it can be.

: > Am I a cop? No I am not. I happen to be in the Army.
:
: Big fucking deal. All that means is that I PAY YOUR SALARY. I am your
: *boss.* You work for _me_; not the other way around.

No, you pay taxes. The politicians are our bosses. And they
pay our salaries out of your tax dollars. And they have the power
to force you to pay.

Nor do we protect you. Our oath, both for the military and law
enforcement, is to protect the constitution (the system). People
(civilians) are expendable. It is your responsibility to protect
yourself. The USSC has so stated.

: > I have
: > dedicated my life defending this country from "All enemies, both
: > foreign and domestic." If you are preaching the violent
: > destruction of the country, guess which one you are?
:
: Put your money where your mouth is, or shut up.

And you are acting like the left-wing extremists. Don't
step over the line and become an enemy of the people.

: > I hope you end up in jail and pinned to the wall by your
: > roommate Bubba.
:
: I don't give a good goddamn what you want, or what you think, anymore than
I
: care about which of your roomates ass you had your dick in last night.

I think he was referring to your potential roomates.

: > The justice system we have works very well, and
: > it has systems in place to change laws you don't agree with.
:
: Right. The justice system works SO WELL that Governor Ryan of the State
of
: Illinois has just had to shut down Death Row because about 50% of the
: inmates killed over the last number of years here were found NOT GUILTY
: after going to their graves. Works *real well.* Just ask OJ. He'll tell
: you.

That is because those of you in Illinois have allowed the
corruption up in Chicago to fester. A corrupt liberal mayor,
who has forbidden the owning of guns who then has a
police force that murders unarmed blacks.

It is within your own hands to clean up that mess.
The rest of us have a fairer justice system in our
states.

At least our judges are not being sent to jail.

: Why
: > don't you try it instead of talking about killing innocent
: > people.
:
: BECAUSE Supreme Asshole, those *innocent people* don't have a VOICE !
What
: they do have is a Silent Screem, that can only be visualized on an
: ultrasound monitor.

You are sounding like a left-wing extremist of the '60s.

: If oyu are unsuccessful in changing a lwa, it is because
: > the MAJORITY of people don't agree with your OPINION, and
: > therefore, it shouldn't be forced on them.
:
: The innocents depend upon those of us who can be characterized as HUMAN to
: speak for them. They have no voice of their own. If they _did_, I'm sure
: the first words out of their mouths would be:
: PLEASE DON'T KILL ME !

So? How many people have you invited to
church? Convert people, don't go to war
with them.

: If you want to live
: > in a place where the will of a small number of people can be
: > forced on the entire population, then you shouldn't live in this
: > country. A place like China, or Russia shares your views that the
: > will of a small minority has the God given right to enforce
: > there will on the rest of the country.
:

: Precisely because you would LOVE this Jew to leave, is the reason I never
: will. I will remain a bloody thorn in your bloody smelly ass for as long
as
: I can breath. And even after that. I consider it my Patriotic Duty to
: drive to and your kind to extinction.

Ah, the culture wars.

Take responsibility for your actions. The men are just as "careless
and irresponsible." It only takes a few seconds to ensure a pregnancy
won't occur. (And why was the original x-posted to the radio NGs?)

Ah. Then by all means please explain how the meaning of the following
two sentences was altered by lack of context.

"They get pregnant because they are careless and irresponsible. Abortion
gives them an easy way out."

I already rebutted your post regarding this. But I'll cut and
paste for your convenience:

*******begin repost****

Birth control is accessible and inexpensive in America. Women who
have an unwanted pregnancy, other than by force, are careless and
irresponsible. This is certainly an issue for society as a whole
because of the high probability that such behavior will be paid
for in some manner through individual taxes. Further, it is a
civil rights issue. Americans have the right to life as stated in
the Constitution.

In insisting that abortion be completely unregulated and "on
demand" you have imposed your moral convictions on the remainder
of society. The issue is society coming to some consensus as to
when human life begins.

I'll ask you. Are you wise enough to determine, definitively,
that an abortion does not end a human life? Can you state with
certainty when human life begins? Toss aside your political
affiliations for a moment and think about this.

I suggest that if you are going to jump into this debate that you
at least go back and read the preceding posts, in whole, not as
edited by successive posters.

Strider

*******end repost*****

Are you going to attempt a straight answer to my questions or do
you plan to waffle around like your friend W6?

>He said "any two operators". He was arguing that HF is more reliable
>than internet because we don't have to rely on the government.

Never said nor implied such a thing. My comment concerned
how Internet users are dependent upon a highly complex web
of wires and machines versus the freedom amateurs enjoy:

Those poor, leashed folks. They're helplessly dependent upon
untold billions of dollars of computer equipment belonging to
thousands of corporations, interconnected by millions of miles
of cable, staffed by thousands of workers putting in tens of
thousands of man-hours per day to keep that incredibly complex
system running.

Hams, on the other hand, have no such dependence. It's the *only*
communications medium in which any two operators anywhere in the
world can communicate directly without using government or commercial
communication services. Those same two operators don't even need to
purchase commercially-built radios -- they can build their equipment
themselves.

"... can communicate..." is the key phrase. They "can communicate"
just like you "can learn higher mathematics" or you "can learn
to speak Chinese" or you "can be a pain in the okole." They'll
have to do their part to ensure that they "can communicate."
One milliwatt into a Cantenna won't ensure that they "can communi-
cate."

What you've described above is the quintessence of the war over this issue. It is ironically, also the textbook example of what Pro Choice means; to wit: Freedom to Choose, and let others to choose.

The real vortex of the WAR, here, is that some chose to believe that Pro Choice excludes the choice to be Pro Life. Which is the absurdity of politics in the latter half of the 20th Century. Each debater must be in each extreme corner, or appear to be conciliatory, and by that, caputulatory. Which is nonsense.

Sorry for interrupting.

Carry on.

It is interesting that the pro-choice people freely allow others
to be pro-life and/or pro-choice but most pro-life people want to
curtail and disallow personal freedom in the matter.

. Each debater must be in each extreme corner, or appear to be
> conciliatory, and by that, caputulatory. Which is nonsense.

Nicely said, Peter. And abortion is not the only area where this is true.

A Radio Netherlands commentator made the same point re Ulster, a penny-ante conflict which is a crashing bore to all but a few players (some like Gerry Adams having political ambitions in the Republic or Westminster). No one gives rat tits about the issues just as long as the other side capitulates and recognizes the other as 'the winner'.

While I tend to agree with most of the NRA's position, their tactics suck swampwater. Defending the keeping of small nuclear devices in my closet under the 2nd Amendment, the great teflon bullet fiasco that cost it so dearly in membership and support, and a frenzied defense of every drug-dealers weaponry ultimately will isolate its friends and cause it to be defeated finally and totally. The gun- banners, of course, don't know a barrel from a butt and we end up with trigger locks on reenactment flintlocks. If the anti-gunners ever get their act together, all hell will break loose. By trying to defend everything, the NRA defends nothing. Again, no one really cares about corpses but who gets to chant We're Number One.

Having had a job in a hospital when abortions were performed as D&C's (Dustings and Cleanings) and the local unwed mother home was going full tilt, I got a chance to see the results of some back-alley jobs first hand (at the age of 15). While we are having this tidy little debate about when life begins, etc, desperate women will be dying alone in a pool of their own blood. Because all of the opinions, laws, amendments, pronouncements, etc by all of the males and overage women are of little help to a young, scared, pregnant woman and haven't been for 6000 years. We're Number One. Yeah, right.

> It is interesting that the pro-choice people freely allow others
> to be pro-life and/or pro-choice but most pro-life people want to
> curtail and disallow personal freedom in the matter.
> --

Actually, if you look closely, neither side wants to permit the
other's free choice.

My own position on the subject, is that I'm opposed to abortion,
but I don't believe the issue to be the business of government.
Which makes me Pro Life. While not exactly Pro Choice, I dont'
belive it to be my business to interfere with what YOU, for example,
would choose. What neither side recognizes in its extreme element,
but what you and I may recognize here, is
that one may be Pro Life while being Pro Choice, and one may be Pro
Choice while being Pro Life, without logical, moral or legal
conflicts. I suspect there are more of us out there than there are
of the extremes, but these centrists on this issue are being told
everyday, that they cannot be satisfied with such a position, and
they must move to a more defined position on the issue. The Politics
of Opposition at work.

Pro Lifers would and do call me a coward; Pro Choicers call me a
hypocrite.

Each is threatened by and seeks to legislate the preclusion of the
other side.

And each has it's rabid element that seeks to take a "Must do"
position in either extreme.

Truth is, that neither side will ever actually win the issue,
because they're not only debating on different ground, but as you
correctly point out, speaking different language. One side speaks
morally and ethically, with adequate support and evidence in its own
behalf, while the other speaks legally, with equal measure of
support and evidence.

A meeting of the minds will never be possible between the rabid
elements because each denies the viability of the other's position.
What is moral, is not necessarily legal and what is legal is not
necessarily right. As long as each debates different turf...the war
goes on.

i just read in Time that a middle eastern family were denied swiss citizenship based on where they were born, not their personal qualities this was voted on by the town where they lived, taking majority rules a bit too far i think.

Peter, which bears no reference to your statement about your pants being down, the Missouri Synod should do more than sign a non-aggression treaty with the Vatican. In 1939, Von Ribbentrop signed a non-aggression treaty with the Soviets as he and Molotov signed the document and what happened on June 22,1941? The Protestant world must refrain, and vice versa, from attacking, physically and verbally, Catholicism and Judaism. I find it compelling that Pope John Paul apologizes to Jews for the excesses committed against them by Catholicism, yet Protestants say nothing and they are more responsible for such outrages as proven by the vicious anti-Semitism of Martin Luther. an ex-priest gone bonkers. The idea of ghettoizing and removing citizenship from Jews and dehumanizing them in every way possible was a GERMAN PROTESTANT, not a Catholic concept. The Catholics just murdered them. Let me tell you this, Mickey Maus..I like to tune across the shortwave bands and the stuff I hear from the religious rightwing evangelical Protestants is awful. Question: why don't you, who represent moderation and forthrightness, do something to control these screwballs who give Protestantism a bad name? Ever listen to the creeps on WWCR? Dangerous windbags to say the least. But when I tune in Mother Angelica(I think that's her name) on the Catholic EWTN network, she's a non confrontational, sweet and enlightening old biddie. Why is it that the RIGHTWING, not the general Protestant movement in America, is always trying to push stuff down our throats in an effort to control education and entertainment? They talk about "moral imperatives and family values" as if everyone else is a savage and that the concept of God belongs only to them. Like hell it does.It was the covenant between Abraham and Jehovah that was the spark setting off the whole shebang, right? Lastly, during the 10:00 P.M. news yesterday, I watched Pope John Paul at the Israeli Holocaust Memorial site. That man is a MENSCH and every Catholic in the world should be honored to have him as their leader. When he looked into that eternal flame and read the names around it, i.e Auschwitz, Buchenwald, Bergan-Belsen, Treblinka and others, he cried and those tears were genuine. I was deeply touched by his sincerity. No non-Jewish leader in the past 2000 years has done more to heal wounds than he and I am positive that, even though he didn't pay homage to Oskar Schindler, every Jew in this world respects and appreciates his efforts. It's going to be a very sad day for us all when that man takes his last breath.

> something that it is not does not lead to valid communications.

I believe that I am communicating with you. It is my belief that,
at least at the third trimester, it's a baby, not a fetus, and
it's murder, not just a toilet flush. Hiding behind
technicalities of the language do not strengthen your side of the
debate one snip. This just convinces me that you really have
little to say.

Of course, those who want unrestricted abortions couldn't look
themselves in the mirror in the morning if it weren't for
alteration of meaning and language like "fetus" (ohh! not unborn
baby) or "termination of pregnancy" (oh no! It's not really
killing a baby). I therefore am not going to play your little
word games with you. You know damn well what I mean and I
understand you fully, so cut the shit.

>
> > Don't try to make it some noble endeavor, to right some evil.
>
> I'm not trying to make it noble - just none of your business.

I hate to inform you, but it is society's business and therefore,
mine. The simple fact that something is legislated upon or ruled
upon by our court system certainly make this a valid public
debate. As a citizen of the US, I most certainly have the right
to debate and speak out upon any topic I please. Saying that the
abortion issue is none of my business is like saying that public
health, crime, and taxes are none of my business.

You just couldn't be more wrong.

When it is called for, I try to point out the cause and effect
relationship. In this case, I am referring to abortion being used
repeatedly by some women as a form of birth control. Which I believe
comes from the erosion of the family structure, religious, and simple
humanitarian values. Which is all directly impacted by the WoD.

What is the relevance of this statement? The entire issue is
about society's allowing, disallowing, or restricting a certain
activity. No society allows complete personal freedom. The
politics of our society is all about what is allowed and what is
not.

Source record: 116122

Again, points well made.

I, too, tune across the dial and hear the likes of Stair, and his kind. I'm amused by Gene Scott, I have to admit, although I certainly can't take him serious in spiritual matters. It must be the hats.

I have to confess, though, that I've rarely met a nun or priest that I've not liked, for exactly the reasons you've stated: they're kind and for the most part, gentle and understanding. No one typified this than Joseph Cardinal Bernardin, the late Archbishop of Chicago. Even as a Lutheran, I have to admit, I was moved to tears the day he died. He accepted his fate with such grace, and humor...tough to recall someone who showed such peace in the face of a grim death. I do have an equally tough time finding the same peace and grace, as well as compassion and civility among parishoners, however.

And the outpouring of vitriol on the shortwave bands for the Jews among religious conservatives has always baffled me. Some of the most gentle people I know are religious conservatives. When I was run over by a car in 1986, and we found out that my business partner had been pocketing my hospitalization insurance premiums, clients of mine, a very devout fundamentalist pair, put up the money to get me into the emergency room to reattach my left leg. Had I not been hitting on the admitting nurse months later, I never would have known. And I never would have been able to pay them back.
Why are the Protestant leadership as hostile as they are? Good question. But most wars on this planet have been started in the name of God. Oddly, not by Protestants. The Crusades come to mind. Not exactly a shining moment for religious toleration. And the first sign of forthcoming conquest, or political upheaval in many countries has been the appearance of missionaries who convert the 'savage natives' to the one true path.

But I must correct your point about the German Protestant's landmark decision to ghettoize the Jews, remove from them citizenship, and basic human rights to life. That has been a condition of Jewish existence for thousands of years, well pre-dating German Protestantism. Or Protestantism of any kind, for that matter. The Jews were unable to own property or claim any land as their own for more than 60 centuries into history, and didn't finally have a country of their own until mid 20th century. As culpable as the Germans may be for persecution, they are nowhere near the first, and sadly, will be nowhere near the last. And you

know that.
The general Protestant movement is a relatively recent
phenomenon, historically speaking, putting the bulk of the historic
abuse of the Jews again at the feet of the Catholics in this most
recent millenium. Which was the point of the Papal apology, of
course. And the reason the Protestant world has said nothing, at
this moment, is probably because they did not countenance the
historic mistreatment and slaughter of the Jews as a policy of the
body.
And you know that, too.

Interesting position on Luther. Considering that he learned his
vicious anti-Semitism as a Catholic.

It is still against the law to transmit out of band or on any frequency
that you are not authorized, such as police frequencies. This guy
was out of band. It is just that there are so many of them, why was
this guy singled out? Is the FCC now going after outlaw CBers?
And why such a huge fine????

BTW, my community passed an ordinance to allow the local
cops to enforce FCC rules against CBers.

2183. AF2Y says P.U. on Vermont

Newsgroup: rec.radio.amateur.misc

I did not make this up. It came from a very reputable newspaper on the Internet.

Canadian company aims to reduce cow flatulence to help environment
CALGARY, Alberta (March 23, 2000 8:17 p.m. EST) - It sounds like a joke, but a Canadian electric company insists an agreement signed Thursday to reduce cow flatulence - a source of one of the greenhouse gases that cause global warming - is no laughing matter.

I remember putting a 2 meter rig in the car before driving my son up to the University of Vermont to begin his Freshman year in late August of '86. However upon crossing over the New York state line into Vermont, the smell was so bad I lost all desire to ham it. Couldn't understand from where that stink was emanating although I kept passing one farm after another. While in Burlington it was explained to me that the odor was that of COWS leaving wind and apparently the Granite Staters were used to it. Little did I realize that those stinking cows would be responsible in later years for screwing up our winters in this part of the country. It was the mildest ever recorded. And time will prove that Al Gore was responsible for discovering the relationship between cow wind and global warming while George W. never contemplated anything so complicated and potentially devastating. In the meantime, Tolassi just sits there and sucks up all that smelly air which obviously is having an effect on his stability. A lot of hams say he's just nuts. I say he's fartistically overwhelmed which is the politically correct way of putting it.
Based on that article I hope you religious zealots finally realize that neither Jesus nor Moses nor Buddah nor anyone else will save us from destruction. Cow plugs will.

This is certainly a false statement. It is akin to the
"No Code = No Ham" statement. Pro-Choice means giving
each individual ownership and control of his/her life.
The individual is free to adopt a Pro-Life position if
he/she chooses so, sometimes, Pro-Choice = Pro-Life.

But you are *NOT* communicating with me because we are not speaking the same language. I am following the language standard defined in the dictionary. You are using different definitions apart from the standard of the English language. You might as well be grunting in Klingon. If you do not use standard definitions, communications is impossible. The *facts* are that it is a fetus and it's not murder. Deny the facts all you want - it just leaves you out in left field being uncommunicative with no one to talk to.

IMO, your attempt to obfuscate the English language is a ploy to avoid communications and try to introduce raw primal emotion into what could be a rational discussion. Old trick, won't work.

> I hate to inform you, but it is society's business and therefore,
> mine.

It is none of your business and it is none of society's business. It is a private, personal matter based on individual rights upon which this country was founded. Where do your delusions about your authority to interfere come from?

Your assertion that an unborn baby is merely a fetus is just
that, your assertion. It is my assertion that, at some point
prior to birth, it is a person. Killing a person, in some
instances, is murder. I am asserting that this is one of those
instances.

This is the issue. You see no problem killing a fetus. I am
disputing your assertion that an unborn baby is merely a fetus. I
am asserting that, at some point prior to birth, it becomes a
child.

I adamantly refuse to reduce this discussion to any lower grade
level to satisfy your continuing obstinance. You use whatever
language you like to make your point and so shall I. I refuse to
comply with your personal opinions on definitions surrounding
this subject so if you want to continue this discussion, get over
it.

> which this country was founded. Where do your delusions about your

> authority to interfere come from?

As stated, it is my belief that, at some point before birth, the unborn baby becomes human and therefore entitled to all the rights and privileges protected by the Constitution. One of those is the right to life. Killing a human is not a private, personal matter. Killing an unborn child 2 minutes before emergence from the womb is no different from killing it 2 minutes after. If a Doctor jabbed a needle into a, say, three day old baby's head and sucked it's brains into the toilet that Doctor would be up on murder charges. This brings the act into the public domain. The debate is, at what point does an unborn child receive the same privileges as those that are born? This is certainly not a private, personal matter.

Twelve hams were about to be licensed. The final
test was for them to line up, nude, in a garden while
a nude model danced before them.
Each ham had a small bell attached to his privates,
and they were told that anyone whose bell rang would
not be licensed because he had not reached a state
of ham purity.

The model danced before the first ham candidate,
with no reaction. She proceeded down the line with
the same response until she got to the final ham.

As she danced, his bell rang so loudly it fell off and
clattered to the ground. Embarrassed, he bent down
to pick up the bell, and then all the other bells began
to ring....

The wildly misnamed "civil rights movement" was and is the epitome of injustice, trampling as it does upon the sacred right of free association, and creating bogus "rights" and "entitlements" which, in many cases, represent exactly the kind of oppression and government thievery that the founders were attempting to prevent when they wrote the Constitution.

With every good wish,

Being praised by Kevin Strom is like akin to having Hitler say you were a good man.

Any criticism from Kevin Strom should be looked at like a badge of honor.

It's the same old story, same old song and dance my friends. Lies, slander, character attacks, defamation, and so on and so on.
Coming from people associated with hate groups.

They'll achieve nothing my friends except indicating to everyone {again} the extremes and tactics these defective character personalities will go to, to silence normal right thinking people. Nothing less could be expected from such a fringe element of society.

Naturally they do all of this while "hiding" behind many aliases and morphing into them as needed. It's like recent events {in the news} from a hate group member that walked into a church and started shooting up unarmed individuals. Guarantee this scum would not have done that if he thought most members inside would be armed and able to "retaliate". That's the reason for such anonymity by people in fringe groups while making claims and attacking people. They aren't willing to put thier money where their mouth is. So, "hiding" behind their many aliases while defaming affords them "some" degree of protection against "legal retaliation". So in closing I guess it's reasonable to say that that "Leon the Wolf" is actually chicken and Kevin Strom the egg.

The realities that engineers deal with are quite different from political debate. After all, it's not hard to prove the existence of gravity.

Political debate, as is the abortion issue, is not so nearly well defined as you would like everyone to believe. You continual droning on the definition of the word "fetus" is a case in point. As you pointed out, the dictionary defines a fetus as an more or less an embryo with a vertebrae. While this is technically correct, the definition as unborn child is also correct. One may use the word "primate" as a descriptive term addressing humans as well. I think that like the term "primate", the word "fetus" does not describe our human nature.

The point that remains unresolved is that, at some point as yet undetermined by society, a human embryo becomes a human being and is deserving of certain rights and privileges as such.

I still maintain that your attempt to force me to use you definition of an unborn child as a "fetus", while technically correct, undermines the true value of human life debate. An unborn human child is not merely a fetus, without rights and priveleges of a fetal dog, but it is a human. Humans are protected in this country from murder. The only question that remains is, when does an embryo become human.

I asked you before, W6, is you are wise enough to determine this for yourself. You believe yourself to be intelligent and learned. So, try engaging your brain and tell me when you think that an unborn child becomes human. Don't give me the crap about the Supreme Court decision. That was a purely political decision. This is the jist of the entire abortion debate. I believe that individual viability is the critical point, not when the child happens to emerge from the womb. Prior to that, I don't have an opinion as to the humanity of the unborn child.

In order that I may somehow ease your spastic, anal retentive tendency toward word definition, I define individual viability as the child's ability to live as an independent being, apart from the mother, even if in need of adult assistance. After all, with a strict adherence to individual viability, no child would be completely independent until about age 30.

And I suppose that "right thinking" consists ONLY of thoughts and ideas that conform to YOUR view of things? Funny how these folks who claim to be good, moral, patriotic Americans are always the first to marginalize and attempt to silence those who exercise their (supposedly) Constitutionally-guaranteed freedom of speech. That doesn't sound very patriotic to me!

Excuse me? I did not trivialize anyone's First Amendment rights, but, if you think that for one minute that verbal attacks, lies, or defamation are protected by the first amendment, think again.

Besides, what does being patriotic have to do with this thread? Some always hide behind and call themselves patriotic in order to justify their behavior. Is this the case?
ycthulhu keyed,

>Funny how these folks {the net?} who claim to be good,

Yeah - I can't believe he turned his whole 20+ line sig file into a post! Burp truly is way too old and repetitive, sorta like the New Hampshire windbag, W2NSD Wayne (if he's still around). At least his daughter got a scholarship from the ARRL a while back. At least somebody in the family is doing something worthwhile.

Source record: 115906

I just logged on to this "HAM" news group again and found that about 8 out of 10 posts were the hateful garbage about other hams that seems to pervade this site. I know that at least the authors would say that I just don't get the joke but it seems to me that disparaging remarks about others is not a very good joke and it is getting a bit boring.

Why am I forced to wade through the garbage to find the few ham related messages that this forum is supposed to be for?

Am I the only one getting a bit fed up with this childish nonsense?

> is deserving of certain rights and privileges as such.

You are mistaken. That *point* has indeed been determined by
"society". You just don't like the point that society has
determined. But that point is political, not scientific, so
you have a chance of changing it. I've already agreed to vote
for a change if I get to vote on it.

> I still maintain that your attempt to force me to use you
> definition of an unborn child as a "fetus", while technically
> correct, undermines the true value of human life debate.

Then you understand absolutely nothing about the engineering
personality. The subject doesn't matter, engineers refuse to
discuss *any subject* until the definitions are agreed to. When
communicating with any scientific sort of person, obfuscation
of the language is not allowed. Sorry, but that is just the
way it is.

There's a guy over on the rec.radio.amateur.antenna group who
claims his antennas perform better than the laws of physics
predict it to perform. That is essentially the same argument
you are using. You two are saying a thing isn't what it is
and/or is what it isn't. Please don't pattern your argument
after Clinton and say, "That depends on what the definition
of 'is' is."

> An
> unborn human child is not merely a fetus, without rights and
> priveleges of a fetal dog, but it is a human. Humans are
> protected in this country from murder. The only question that
> remains is, when does an embryo become human.

Nope, you are mistaken. It has already been determined when an
embryo legally becomes a person. You just don't like it. I don't
like it either but that's the way it is presently.

You have strayed from legal terms again. Of course, a human embryo
is human. Of course, a person is human. But legally, an embryo
is NOT a person, by legal definition. It is impossible to
abort a person, by definition. IMO, a fetus will *NEVER* be
declared a legal "person". There are just too many legal

ramifications for that to ever happen.

My house is dark brown and I would prefer a light tan. Does it
do any good to say my house is light tan? Nope, I have to get
off my butt and paint it. You have to get off your butt and get
the law changed. Until you do, a third trimester abortion is
legal. IMO, if you do get the law changed, it will be a crime
to perform a third-trimester abortion. It will not declare a
third-trimester fetus to be a legal "person".

> I asked you before, W6, is you are wise enough to determine this
> for yourself.

I am wise enough to determine the legal definition of embryo,
fetus, and person. It *doesn't matter* what you and I think.
What we think doesn't change the existing legal definition
of those words. The present legal meanings of the words are
the present legal meanings of the words. Maybe Aristotle can
get that through to you. "A is A". A thing is what it is.

> You believe yourself to be intelligent and
> learned. So, try engaging your brain and tell me when you think
> that an unborn child becomes human.

Human eggs are human. Human sperm are human. A human fertilized
egg is human. A human embryo is human. A human fetus is human.
A human baby is human. A person is human. Unfortunately for you,
"human" is not a legal term.

> Don't give me the crap about the Supreme Court decision.

Read my ASCII. Our discussion about abortion has not begun yet. It
will not began until we agree on a common language. Discussing a
subject without agreeing on a common language is lunacy.

> In order that I may somehow ease your spastic, anal retentive
> tendency toward word definition, I define individual viability as
> the child's ability to live as an independent being, apart from
> the mother, even if in need of adult assistance. After all, with
> a strict adherence to individual viability, no child would be
> completely independent until about age 30.

Now we're getting somewhere. I agree with you. Personally, I think
viability starts at about five months. I would support a law that
forbids third trimester abortions. But, IMO, the law would not
declare a six-month old fetus to legally be a person.

2219. For People Who Live In California

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-25 00:00:00 UTC
From: ME <NO_MORE_TELEMARKETERS@PLEASE.COM>
Message-ID: <38DD8325.D768EE1B@PLEASE.COM>
Source record: 115912

Help Stop Unsolicited Telemarketing Calls

I lose count of how many times every day I receive another phone call from Telemarketers. If it's not a person on the other end, it's a dead line or silence.

Likely you've received MANY calls that are a dead line. These calls come from Telemarketers using Predictive Dialers. A Predictive Dialer, dials numbers in advance, expecting the next Telemarketer to be free to pick up the call.

If the Telemarketer is free, you get to talk to someone pushing a product or service you don't want and many times won't take no for an answer. However, if no one is free in the Telemarketing group to take the call, in California, state law says they can't play a recording, so you get a dead line. If you go to YAHOO or any other search engine and search the words, "predictive dialer", you'll see that lots of companies make this equipment.

WHAT YOU CAN DO ABOUT IT:

There is a group in California trying to put a petition on the November 2000 Ballot. However, they lack the funds to hire people to gather the 420,000 signatures required.

You can help by going to their WEB Page, printing the petition, signing it, and mailing it to them. (In order to be legal, the petition must be printed on 1 sheet of paper.)

You can also help by passing this email to others in California, ask them to sign the petition, and pass this email on to others. (Do NOT send this email to anyone outside of California, their signature is NOT valid on a California petition.)

You will find information about this petition and the group promoting it at the links below:

http://www.stopjunkcalls.com/teleprop.htm

http://www.channel2000.com/news/specialassign/news-specialassignment-990219-220839.html

Ok. I am beginning to understand you, I think. Excuse me but it's somewhat like shouting and listening to someone that is submerged in a barrel.

As you read my posts, try to remember to insert the words "I think" or "I believe" in front of every sentence. Et al "(I think) a human embryo becomes a human being and is deserving of certain rights and privileges as such." is such a statement. I am trying to tell you of my beliefs and values, not what is the reality in the legal system now. It seems that quite often my personal beliefs and that of the law and political system differ else I wouldn't be bitching so much.

I think (I remembered to put it in that time) that in order
legally to gain the right to life, it may be that an unborn child
will be given a level of status near as that of newborn baby. I
can see the time in the near future where technology will allow a
3 to 4 month premature birth to complete it's development
artificially. Indeed, it may not be very long that true "test
tube" babies are possible. (I think) some legal status must be
developed soon to cover these babies as (I think) they are
entitled to protection.

Thank you for your message of concern. We have regrettably encountered a
few others who have had bad reactions to our topical antiviral ointments. In
addition to the neural liquefaction you are experiencing,
consumers have also reported high stool, seat cramps, delayed borgor rigmus,
and
shortness of pants. * A tendency to troll poorly has also been reported.

Our researchers are aggressively working on a treatment for these
painful and embarrassing side effects. Until such treatment becomes
available we recommend treating the symptoms by 1) eating as much cheese as
possible, 2) forget 3950kHz and try 2.5, 5, 10, 15, and 20 MHz. Listen
intently to the tones until the symptoms disappear.

At UM Pharmacuticles, Inc. we care about you, not just as a
consumer, but as a potential litigant.

Wishing you good health in the new millennium, I remain,
Affectionately yours,
Sincerely,

Engineers and scientists are a breed apart. We do tend to wear
a kind of blinders that keeps us firmly rooted in physical reality.
Some people, including my ex-wife, say engineers are not human. :-)

If you had said, "I believe the law should be changed to make the
following true ...", I would not have argued with you.

W6 is a *trip* as we used to say.

Here is something for your interesting reading.

http://www.ohiolife.org/index.html

I have downloaded the _entire_ site, which consists of
10 megabytes
= to about 2157 URLs.

I only do this to keep my phone bill down. You can read the site online if you wish, but it is the most cogent, comprehensive, and intelligent discussion of the issues I have yet to come across (besides, of course, the one's presented here !).

Now 10 megabytes is a LOT of information, and I have only read a little of it to date. Being a slow reader, I may never finish reading all the stuff at this one site alone. And I have found dozens of *similar* sites.

Please visit this site to read a little yourself. You can always return at a later date to read more if you want to. Bookmark the site as a *favorite* in your Web browser and you're all set. It answers many of the questions that have been asked here, regarding when life begins, how the Law defines *person* and so forth.

Good reading, and take your time. Comprehension is more important than speed.

[Don't ask why, but] I was searching for some information and got some results that may have people thinking about this hobby!

www.excite.com search: jail && "Los Angeles"

Result 1: A story about 2 sheriff deputies busted for selling drugs to inmates.

Result 2: The homepage at "www.435.org"!!!!!!!!!!
[This is the web site that pertains to the 147.435/146.400 repeater in Los Angeles. Very interesting that this would turn up SECOND in the above search.]

OK, so does this mean that "amateur radio" may have more than its share of "bad apples?"

I do not have the opportunity to locally test any keyers so when I make my purchase from AES or Universal I'd like to avoid making a mistake. From what I gather, a Bencher BY2 (chrome) or a Brass Racer would be the best first key for someone trying to learn iambic. Any comments would be appreciated.

Thanks to you all - Bruce

Yes, indeed. It makes many arguements impossible. It precludes wiggle room. It also precludes the loss of an argument when your opponent is armed with the facts.

This is what happens when students are allowed to dictate to the colleges what courses will be offered, and how they will or will not be taught.

When I was at University, the student body protested the mandated requirements on the curriculum for new students. At issue were foreign languages ("I'm never gonna use that,"), the sciences ("what the hell is that for? I'm gonna be a writer, why do I need Organic Chemistry"), logic ("yeah, like anyone ever uses THAT in everyday life"), and mathematics (who CARES about Analytic Geometry, I'm going to be a Doctor"). As a result, we have a superfluity of 'don't know, don't care's' arguing emotionally by shifting the language to encompass the feeling du jour to absolutely PREVENT a clear understanding of the issue, aguing in absolute ignorance of any factual content--the Dilbert "What I don't know or understand can't possibly be important, therefore may be accomplished in no more than 15 minutes without argument" theory of productivity.

Sad thing is, there are more of them than there are of you. Not just on this issue, but on most.

They were part of the BA program, which was the required program
for the first two years, for all incoming freshmen. The quotes were
things I heard said by students protesting the mandatory classes.
The thrusts of the protests were that a college/university program
should be most, if not all elective, to maximize the efficiency of
```

the educational process in order to secure high pay in the desired field. No sense in cluttering up the mind with things that will never be used.

Short sighted, it was. Since most of the 'clutter' is excellent background not only for fringe areas of the desired field, which one encounters everyday, but it also permits wider ranging understanding of things encountered out side of work, among other things. Including cogent and effective postings on Usenet. :)

Not to ignite the conflagration again, but it's the same thinking that holds that Code is just clutter for the mind, when the operator has no intention of using it. Limits on skills, and limits on understandings are a mystery to me.
Why someone wouldn't want to learn a skill is something that I will never understand.

Well "Al". nice to see you have the guts to use your real name.

You prove my point of the following:

A man went to a guts store to get some guts for dinner. He sees a sign
remarking on the quality of guts offered at this particular gut
store. So he asks the butcher: "How much for Engineer guts?"
"3 dollars an ounce."
"How much for teacher guts?"
"4 dollars an ounce."
"How much for ham operator guts?"
"100 dollars an ounce."
"Why is ham operator guts so much more?"
"Do you know how many hams you need to kill to get one ounce of guts?

Nahhh. Brother John is not a jammer. He tells it like it is and maybe that much truth makes some guys a little nervous. Or maybe it offends them because it "gets down where they live".

Whatever scenario fits the best. All I know is I hope Brother John keeps it coming on strong.

2261. AF2Y:commendation

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-26 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8blhok$ti7$1@nntp9.atl.mindspring.net>
Source record: 115693

I wish to commend all those DECENT hams who have been boycotting .313. From what I hear you have Seymour worried about its imminent collapse thereby preempting and finally ruining his daily vaudeville routine of "I shouldn't say this but I will" begun by the team of Smith and Dale, the originators of "Take off the coat, my boy." popularized in the early '40s and '50s on Milton Berle"s TEXACO STAR THEATER.
Keep in mind that the one thing that the McKeesport hyenic nincompoop, aerial daredevil "Norskie Thunder," Stevie Wonder Tiger Woods MXL, the Jolly Green Atheistic Giant from High Anus, Mass., the Memphis Moron and the soon-to-be mayor of Barnwell, S.C., WA4KBX (oy vey) want, are for YOU TO BE THERE. By avoiding it and them two things will happen:(1) they will simply be engulfed by their own pollution and self-destruct (2) they will come looking for YOU elsewhere thereby leaving themselves open to an enforcement letter.
Good people-LEARN FROM MY EXPERIENCE. The Commission is SENSITIVE about .313 and rightly so. Even if you're on .313 doing nothing but glancing at the latest QST, YOU ARE FAIR GAME. If you get a letter, proof of your infraction is not necessary-YOU ARE GUILTY. Do you understand? GUILTY. Avoid it by using any frequency other than .313.
Since I vacated the territory, the enjoyment factor has resumed for me on 20 meters. There are a lot of fine interesting hams out there so get in your fill before April 15th when the beginning of the end takes place i.e. when out hobby service becomes loaded with Alabama Lloyds, God forbid. Or go to 14.275 where the great ones hang out which has nothing to do with a topless bar.
Remember this; THE BUMS ON .313 ARE NOT WORTH YOUR TICKET!!
73,
AF2Y,Doc

Hi all,
I worked several DX stations on 20M this weekend, and could find QSL address info for all but three of them:

ZX2B in Brazil.
JI2ZEU in Japan.
J68TD in St. Lucia in the Carribean.

ANY QSL info - esp. on the last one - would be hugely appreciated. Like I said, they weren't in my Callbook 2000 CD, nor could an avid DX friend of mine find them either.

Please email me direct when replying:

2274. FS: Astron Power Supply transformers

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-26 00:00:00 UTC
From: KE4QJK <ke4qjk@qsl.net>
Message-ID: <AxvD4.1058$O96.291272@news2.mia>
Source record: 115706
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.swap

For sale:
Astron power supply transformers
(1) from an Astron RS-20M
(1) from an Astron RS-35M

I replaced the standard 110v transformers in my two Astron power supplies with switchable 110-220v transformers. The transformers which were replaced are now available. They are in perfect operating order, run quietly (these are not real hummers!)

RS-20 transformer: 110v ac primary, 34v (no load) ac secondary with center-tap. This transformer is capable of a continuous 16A cont. 20A intermittent current draw. There is a also another secondary winding, 44v ac but I don't know how much amperage draw is capable from it. $18

RS-35 transformer: 110v ac primary, 34v (no load) ac secondary with center-tap. This transformer is capable of a continuous 25A cont. 35A intermittent current draw. There is a also another secondary winding, 44v ac but I don't know how much amperage draw is capable from it. $25

Either (or both) would make a perfect replacement for your existing supply, a great addition for the hobbyist or 'built it yourselfer'!

Buyer would pay shipping from S. FL 33478
Vic, KE4QJK

2275. What in the HELLT is all this crap?

He lacks the scroat.

Blabtist John jams under the guise of religion.
His tired, trite discourse reminds me of a broken record.

I suppowt da cops, but I like the idea of smashing a "global economy" which is what God is going to do anyway!!!!! Dave !!!!!!

copsupporter wrote in message <277d493f.c304afec@usw-ex0105-038.remarq.com>...
Sure LG, that is obviously the intelligent solution. Let's throw out the supreme court....Hey while we are at it, let's get rid of all the courts....Oh yeah, the police too. Hmm, while we are shredding all the things that make this country a free and civilized society, we'll get rid of all the politicians, the presidency, and dissolve the senate. Lord knows the anarchy and chaos that you seem to be preaching will be much better. No one will be able to work because we will have to stay at home and protect our property from roving bands of violent pillagers, and we we could collapse the entire global economy. Yeah, that makes sense, let's destroy the world as we know it because YOU don't agree with a decision from the Supreme Court.

You are what's known in technical terms as a moron. You don't throw out an institution that has helped shaped this, the greatest nation on earth, for over 2 centuries because you disagree with a decision. You use the systems in place to change it.

I care! What is an obselete mode? What is an obselete test?
And what are obselete values! I don't have any grey hair.
Old is a relative term. However, I am in my 40's. I took my exams at an FCC office and still believe all exams should be given there. Ham radio took another step back when the VEC program was born. To many people get their license or upgrade because they have friends who are VE's. Ham radio took another step back when the no-code license was born. And now with the new license restructure, the hobby has move backwards even further. I don't have a VE badge to send back to ARRL but I can understand why people are doing it. I for one don't need a radio club from CT to speak on my behalf. They put out some nice books but , in my opinion, that is all they are good for.
Currently I have an Extra class license and I have it so I can work the lower 25 of the CW band.
I work ALL amateur radio frequencies from 160M to 23CM and use ALL modes, not much voice though.
Yes I do care the way our hobby is being flushed down the gutter buy the FCC giving in to people who don't want to work for their license and getting something for nothing!

That "small minority" does NOT have any God given right to put it's will on the majority. It is happening here. A small bunch of 300 "thugs" really controls the US & world. Maybe less than that. The Bible says "The Rich rule over the Poor."
Dave!!!!

copsupporter wrote in message <035bb113.d6c79322@usw-ex0105-038.remarq.com>...
You need to get some help for the severe emotional disturbance you have. Your violent nature can only serve your own destruction.

Am I a cop? No I am not. I happen to be in the Army. I have dedicated my life defending this country from "All enemies, both foreign and domestic." If you are preaching the violent destruction of the country, guess which one you are?

I hope you end up in jail and pinned to the wall by your roommate Bubba. The justice system we have works very well, and it has systems in place to change laws you don't agree with. Why don't you try it instead of talking about killing innocent people. If oyu are unsuccessful in changing a lwa, it is because the MAJORITY of people don't agree with your OPINION, and therefore, it shouldn't be forced on them. If you want to live in a place where the will of a small number of people can be forced on the entire population, then you shouldn't live in this country. A place like China, or Russia shares your views that the will of a small minority has the God given right to enforce there will on the rest of the country.

Just a reminder to all of Mr. Strom's views on the world.
Mr. Strom speaks in these articles:

http://www.stormfront.org/

http://www.natall.com/free-speech/fs961c.html

This is the web site for a neo-Nazi organization. Note their obvious
support for Mr. Strom:
http://www.stormfront.org/

In this article, an individual who was very close to Mr. Strom speaks.
http://www.splcenter.org/cgi-bin/goframe.pl?refname=/intelligenceproject/ip-
4i4.html

This URL describes one William Pierce, former head of the National Alliance,
an anti-Semitic, white supremacist organization. Mr. Strom was anticipated
to be Pierce's successor.

What's wrong with the name Civil Rights Movement? Stromitler, are you offended at the black man in America being able to move up? Why not? He fought and died too to give and preserve liberty. On the other hand you are more interested in tearing down this great nation. Go put on your swasktika armband, your jackboots and jump off a roof.

Johan, Blake, all the rest of you Thumbs Uppers,

You are cordially invited to my Wake when N9NWO gets through with me.

America's Dirty Little Secret is out of the bag.

Body count so far:

About 35,000,000 dead, since the Supreme Court gave permission to kill the unborn. Throwing my bones on the *pile* won't make any difference, not even to me.

Ever see that movie * Dead Man Walking * ??? That's me. I came up off the operating table twice already, when I should have / could have been shipped off to the morgue instead. I keep trying to tell people, you can't kill somebody who's already dead ! But they don't listen. :-)

Lg

Reminds me of when Jerry Fallwell debated Carl Sagan on Nightline.
Fallwell was forced to speak in "tongues" on the issues. Among the
biggest piles of nonsense ever shown on network television.

How do you know? Did he email you from sagan@hellnet.com?

You are entitled to your beliefs but so is everyone else. I have
multiple standing invitations to attend places where I can get
beaten over the head with a Bible any time I feel the need. I
don't.

>Old is a relative term. However, I am in my 40's. I took my
>exams at an FCC office and still believe all exams should be
>given there. Ham radio took another step back when the VEC

Are YOU willing to pay for the extra expense involved?

>program was born. To many people get their license or upgrade
>because they have friends who are VE's. Ham radio took another

That happened long before the VEC program was started.

>step back when the no-code license was born. And now with the
>new license restructure, the hobby has move backwards even

Times change. The hobby must change with them, or die.

>further. I don't have a VE badge to send back to ARRL but I

Understandable, since you lack even the courage to post with your name
or callsign.

>can understand why people are doing it. I for one don't need a
>radio club from CT to speak on my behalf. They put out some nice

Who's going to do it, then? I admit they do a lousy job, but they're
all we have. If folks like you would get involved and run for League
office, or at least vote, things would change.

>books but , in my opinion, that is all they are good for.
>Currently I have an Extra class license and I have it so I can
>work the lower 25 of the CW band.

In that case, the new rules will affect you NOT AT ALL. So what are you
whining about?

>I work ALL amateur radio frequencies from 160M to 23CM
>and use ALL modes, not much voice though.

So?

>Yes I do care the way our hobby is being flushed down the
>gutter buy the FCC giving in to people who don't want to

>work for their license and getting something for nothing!

Yawn.

Here's a question for you, Lawrence. Did God know beforehand that the
35,000,000 were going to be killed? If so, what could any puny human
have done to stop it? If God is omniscient, he already knew it would
be 35,000,000 even before he created the world and changing that number
would have made God wrong.

Speaking out so virulently against all Jews is ironic when you connect KV4FZ to your prejudice.

KV4FZ was real life beneficiary of the ingrained Jewish attitude of helping the beleagered.

After being asked by Herb to come down and help in his 1992 criminal trial, I was the one who cracked open the prosecution's fabricated evidence. Still, no one could save Herb completely from his proven tinkering with CALLS and subsequent lack of candor with the FCC.

since the option was either a VEC type of program or no licensing/rare licensing...which do you think is better for the service?

for this part of the world, the VEC program means you can take the test locally instead of having to drive to tampa or miami in the middle of the week.

seems the enforcement guys and gals discover questionable exams on a regular basis. if you have proof of fraud or cheating, please do pass it on to them.

folks that took the exam here on 3/4 (materials sent to VEC on 3/6), were processed by the VEC and sent to the FCC on 3/21 and new licenses were in the ULS lists on 3/23.

how's that?

looks like about 2/3 weeks depending on VEC backlog right now.

Hi W6 !,

Just finished working on the clothes washing machine. You know, when you
own a house, there is _always_ something breaking !!! It's the hobby that
keeps on giving (I mean _taking_).

Now what is this. Did God know beforehand.....

Ehm. I don't think so. It all has something to do with the concept of Free
Will. We can choose to thumb our nose at our Creator, or go along with the
program. Ask anybody, from any part of the world, and I think you'll get
pretty much the same answer.

You're just on the wrong NG. Peruse our speciality groups, instead:

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

Basically it is a attempt to make your callsign understood. I think it
is just a matter on not educating folks to use the "accepted phonetic
alphabet". Maybe that should be included on the new Extra test?

Dan/W4NTI

Dan is right; the user is trying whatever they can to get their callsign understood. I believe they are under the impression that since they're dealing with DXers, that country names would be universally understood. I would counter that with the observation that someone using Suomi for "S" would have zero chance of it being understood outside of Scandanavia. Not to mention the fact that no DXer that started after about 1975 has any clue as to where Zanzibar is.

Another problem, depending upon when the individual came along, is familiarity with phonetic systems of the past. The military in WWII of course had the old "Able," "Baker," Charlie," system, and the ARRL in the 60s had something that started with "Adam." You still here people today saying their name is Roy, "Roger, Oboe, Yoke."

I'm fortunate; I've been involved with aviation since 1966, including 30 years of ATC, and I've only known one alphabet. It's the ICAO alphabet that the military, the ARRL, and practically everyone else (except law enforcement) uses.

Of course that doesn't mean the DXer I'm trying to get to understand my call knows the ICAO system, so ocassionally I'll drop Quebec Germany on him instead of the proper Quebec Golf. Nobody gets "Quick Grits" or "Quack Grass" the first time, so they're out.

Source record: 115931

AF2Y will be occupied for the next few weeks and will not
be able to make posts to this group. Seems one of his
German neighbors erected an electrified, barbed wire fence
around Doc's back yard and has relegated Doc to a month of
hard labor making lamp shades. Doc is also on an ersatz
coffee diet with stale lumps of bread to keep his energy
levels up to snuff. His Kapo assures us that Doc will be
back in most of his vituperous splendor just as soon as the
electricity is shut off. Doc will keep in touch by passing
notes thru the fence to the SS persons who are looking out
for his well being. KC8JBO, Head Kapo, is on record as
stating, "Doc will get his allotted ration of broth and
black bread and will not suffer adversely."
The up side of this is that Doc will not have to wear a
tattoo. The down side is that KC8JBO already got his.
We are anxiously looking forward to Doc's release.

: That "small minority" does NOT have any God given right to put it's will
on
: the majority. It is happening here. A small bunch of 300 "thugs" really
: controls the US & world. Maybe less than that. The Bible says "The Rich
: rule over the Poor."
: Dave!!!!

Only because folks like you are divided, often do
not vote nor are active in your local community.

Therefore you give "opportunity" for a handful
people to run things.

The average christian is more at fault for what is
happening in America than anyone else. They
have the ability to change things. But they are
either too comfortable or too lazy to do anything.
And too many do not really believe in the power
of God.

: You need to get some help for the severe emotional disturbance
: you have. Your violent nature can only serve your own
: destruction.
:
: Am I a cop? No I am not. I happen to be in the Army. I have
: dedicated my life defending this country from "All enemies, both
: foreign and domestic." If you are preaching the violent
: destruction of the country, guess which one you are?
:
: I hope you end up in jail and pinned to the wall by your
: roommate Bubba. The justice system we have works very well, and
: it has systems in place to change laws you don't agree with. Why
: don't you try it instead of talking about killing innocent
: people. If oyu are unsuccessful in changing a lwa, it is because
: the MAJORITY of people don't agree with your OPINION, and
: therefore, it shouldn't be forced on them. If you want to live
: in a place where the will of a small number of people can be
: forced on the entire population, then you shouldn't live in this
: country. A place like China, or Russia shares your views that the
: will of a small minority has the God given right to enforce
: there will on the rest of the country.

March 1, 2000

CERTIFIED MAIL RETURN RECEIPT REQUESTED

Mr. Charles Schwartzbard

P. O. Box 1347

Clifton, NJ 07015

RE: Warning Notice: Amateur Radio License AF2Y

Dear Mr. Schwartzbard:

The Commission has monitoring information indicating that on January 13, 2000, you engaged in deliberate interference to the ongoing communications of licensees W4FQF and KB4MXL on the 20-Meter Amateur band. Such operation is contrary to the basis and purpose of the Amateur Radio Service, as set forth in Section 97.1 of the Commission's rules, 47 C.F.R. Section 97.1, and degrades the service for legitimate operators. Your attention is directed to the fact that this is your second warning regarding deliberate interference.

Please be advised that if legitimate complaints or our monitoring reveal additional instances of this behavior, we intend to designate your Amateur Station license AF2Y for a revocation hearing before an Administrative Law Judge, and further that we intend to designate your Extra Class operator license for suspension for the remainder of the license term, May 2, 2007.

Designation of your Amateur station license for revocation, and your Operator license for suspension for the remainder of term, means that you would have the right to appear at a hearing on the record before an Administrative Law Judge. The hearing would be held pursuant to the Federal Rules of Evidence and you would be allowed to submit evidence in response to the Bureauï¿½s case. Specific issues relating to your qualifications to be a Commission licensee would be detailed. The Bureauï¿½s case would consist of sworn testimony by witnesses and of documentary evidence, including monitoring evidence, both in its direct case and in any rebuttal presentation. You would be subject to cross-examination on any testimony or other evidence you submit.

At the conclusion of the hearing, proposed findings of fact and conclusions of law would be required to be filed by both parties, after which the Administrative Law Judge would render a written decision.

Additionally, we again caution you that airing personal conflicts with other licensees on the Amateur bands will result in the loss of your Amateur license.

Sincerely,

W. Riley Hollingsworth

Special Counsel for Amateur Radio

Enforcement Bureau

Message-ID: <20000327185957.02616.00005277@ng-fa1.aol.com>
Source record: 115743

Hi All:

I SHOULD know the answer to this question, but I don't.

I have vacation/retirement property in NE lower Michigan. 10 acres of woods, 2 acres of lake front, a 6200 acre lake, and more goodies. The closest repeaters are about 20 miles north in Rogers City and 25 miles south to Alpena.

I was thinking of getting a 2m/440 (50W/35W) rig that I can use for cross-band repeat, so I can use my HT on a 440 simplex freq, and cross-band repeat to a 2m repeater.

So my question is, with such a set-up, do need to have some sort of an auto IDer on one or both bands.

Thanks in advance,
Bob

There are many reasons. One of the main ones is that you could dammage your transmitter. Most of the transmitters are made to work into a low SWR. If it is very high, say 5 or 10 to 1 the transmitter will do one or two things. Most likely cut the power output back or over heat the final amplifying device and burn it out.

That might be one reason that you are not getting into a repeater or not getting many responses on the low bands.

As the frequency goes higher, the losses in the coax goes up and the more SWR you have , the more additional loss you will have.

2338. HTX-212 Help

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-27 00:00:00 UTC
From: Glenn Anderson <ke4clu@freewwweb.com>
Message-ID: <8bov71$5gg$1@news.smartworld.net>
Source record: 115745

I bought a Radio Shack HTX-212 at a pawn shop. Naturally id didn't have a manual. I have a problem that I can not logically figure out. In the top left corner of the display there is a little bell. Sometimes the radio beeps and I think the bell is the culprit. How do I turn this function off? What is it for anyway?

Please respond by e-mail to ke4clu@freewwweb.com gander@wcps.org

Thanks in advance,

Glenn Anderson KE4CLU

Perhaps I did not make my question clear.

I realize that the SWR gives important information about the antenna match.
One needs a good match. My point is that examining the forward and reverse
power one can also determine wether the match is good or bad without knowing
the actual SWR.

>

I will rephrase the question. I apparently did not make myself clear.

I know that a good antenna match is critical to getting out a good signal.

My point is that knowing only the forward and reverse power will give me a good idea that the match is good or bad without having to calculate the SWR from these figures.

Perhaps reading and understanding the question will make the somewhat snide remarks unnecessary. :)

Robert

Why do you think he would learn? With an ego the size of his, it
is beneath his dignity to believe that he has done something
wrong!

I, for one, hope that he doesn't learn and will be cast upon the
sea of discarded fools that have only each other to communicate
with. (pardon my ending a sentence with a preposition).

I agree with you 100%. I posted a question about ham radio here and when i came back the next day to see if anyone had replied to it I had to wade through this sewage treatment plant of a newsgroup and I couldnt even find my original post to see if there were any replies. This is all a waste of internet space and serves no other purpose than to advertise globally just how ignorant and stupid some hams really are. I'm glad I'm not so stupid I would post things here to be seen by people all over the world.

Peter, you wrote something I deleted. You had a leg attached and then hit on the admitting nurse? Obviously it wasn't the middle one.

About Luther, look at it this way. I agree-he learned his anti-Semitism as a Catholic BUT...when if the religion he began represented a drastic departure from the old, then why didn't he follow through by casting old old hatreds too? Because the rotten mean streak in him as a Catholic lay surpressed as he tried to win over and convert the Jews at the outset. Upon failing, the attitude towards the Jews by the Reformation once again took on the same sickness as Catholic days proving Luther to be a two faced slimeball. Yet depite his evil, he was probably one of the most important men to ever walk the face of our globe because if it weren't for him, who knows for how long the mind of man would have continued to be enslaved and trampled by the Church of Rome. Maybe there would have evolved an age of enlightenment but WHEN? As European intellectualism prospered thanks to Luther, the Jews suffered UNTIL it finally dawned on certain kings that these people who rejected Christ were worthy of consideration and after that, with degrees of freedom permitted, Jewish intellectualism in all phases of development fluorished to the point of changing mens' thinking forever. Incidentally you are a bright and articulate man with whom I enjoy this type of dialogue. I hope some will benefit from it. After all, flagrant stupidity here must have an end somewhere.

Luther was a part of the Catholic church when he changed
He was not trying to break away from the church, but simply trying to fix some scars in the church
Some of it was right, but most of it was wrong
He was excommunicated from the Catholic church and was not considered a part of the church anymore.
He was almost killed, but a friend of his saved him and he hid out while he wrote his famous Ninety-Five Theses.
He also took out 7 books of the Bible.
Only the one true Catholic Bible still has the 7 books.
The Catholic Church was the 1st church. Try tracing a other church back before Luther and you'll find their is only Catholics before then.

Ah, if that were only true. Polls in the 70's showed a majority in favor of legalizing pot, but it remained illegal. Polls have shown a majority in favor of legalized prostitution, but it remains illegal. The vast majority exceed legal speed limits and a DOT study proved then ineffective, yet they remain with us. Moreover, legislators fight referendums tooth and nail - the majority in California legalized the medical use of marajuana and the government is still trying to get around them.

Unfortunately, folks like you and I have to work and thus have little or no time to lobby our legislators whilst those who only work Wednesday evenings and Sundays have plenty of time.

Some change in the ham tests were needed. They were out of date. Only old farts and cheap losers use tube final rigs in the USA in 2000. Such questions were a waste and needed to be revised in favor of digital questions. Look at the revised testing pool ? They were dumbed down, not modernized, just like the code test.
The ARRL went around telling us they HAD to steer the FCC into lowering the bar, because FCC was going to do it anyway. Seems the FCC went and did what it wanted despite this. So wouldn't it have been better if all those "real MEN" as K1ZM wrote in his book on 160 had gotten their balls out from between their legs and said "no drastic changes geared toward the high school GED holder" ? Give a liberally controlled government agency an inch, it takes a mile. Usually not for the better. They lost their wiggle room by saying what they wanted.
No, of course the ARRL wouldn't do that. No change, no new license books. No change, no new ads. No change, no more of the same old, boring designs coming from Japanese engineers who are showing as much innovation as American engineers did in the final days of the major American ham radio companies.
BUT WAIT.
Just when you thought they had plenty of new revenue sources, ARRL takes a hobby that has become deathly boring since the 1980's and turned it not only into a MORE boring hobby but yet another source of revenue by pushing for CEUs.
So it was necessary to lower the bar, but raise the bar ?
Of course it was. By so doing, ARRL makes it appear that they give a crap about standards in ham radio, when the truth is they kowtowed to FCC with their sloppy 5 and 12 wpm "Canadian-bacon Proposal".
You can tell these people graduated from state universities with no academic standards, if they graduated from any schools at all.
But since ARRL pulls its great philosophers from the ranks of Lentini Communications, landscaping companies, disgruntled schoolteachers and career contesters, we wouldn't expect any better.
Notice that on their discussion board, they don't allow free speech, even for those of us who ante up the $34 a year ? The dictators have spoken. There will be ARRL Certification and anyone who dares to say "why bother, after you just helped lower the standards" will have their message bounced by a moderator.

Because the NCTA was asking for change and they got it. Now the
PCTA is asking for that change to be undone, i.e. a step backwards.
Eliminating the med/high-speed code requirements was "getting on"
with the hobby. Going backwards certainly would not be.

Well, Luther didn't break way from the church, as much as attempt
to reform it. Lutherans are often called 'Catholic-Lite', for good
reason. If anything his doctrines were designed to return to a
fundamental Christian Church, but still the Church of Rome. From
everything I've read, he seems to have missed the boat a bit. But
the inate prejudices remained intact.

The hatred of the Jews, however predates Luther. It predates
Catholicism. It even predates Christ. That it took centuries to

begin to unravel the anti-jewish doctrines built into life in the world is not surprising. Truth is, that this doctrine flourishes even today, given some of the breathtakingly hostile posts here. It's not likely to be undone by an exchange, or series of exchanges between yourself and me. Don't get me wrong, I don't justify the anti-jewish doctrine in anyway. I don't really understand it, either, although I can see where Judaism would be threatening to many. I'm just not surprised that it has taken centuries to begin meaningful dialogue between Christians and Jews.

As far as conversion is concerned, well...that's been a tradition in virtually every sect. It's the nature of the beast. So to speak. True faith requires sharing the wealth and the kingdom of heaven, by force if necessary. The missions to virtually every corner of the earth to convert the local heathens to Christianity are well documented thoughout the centuries. Just as the Mormons and Jehovah's Witnesses do today in this country. It's not a sign of hatred, or anti Semitic meanness that Luther tried to convert the Jews. Just following the doctines that had been part of his church for centuries.

It is also the nature of the beast that hatred of the Jews has arisen from grassroots of religious population when in fact, the fundamental doctrines say nothing of it. By analogy, in corporate society, dilution of an idea through many levels of management, become mandates by the time what's left of the original idea reaches the frontline workforce. A musing in the board room of a conscientious and gentlemanly President, about motivating the sales force to bring the numbers up, can by ambitious and vindictive middle mangement become a "20% increase in sales by the end of the fiscal month, or your fired and you'll never work again." Words of a compassionate and gentle Pope, can easily become distorted through many levels of personally ambitious clergy to become backbreaking tasks of pennance in the congregational sanctuary. Words rebuking the Jews for the execution of the Christ can become a call to war and genocide by the time they filter down through centuries of the less enlightened, and less spiritually peaceful. We all know what the result of exactly such filtration can be.

Intellectual intimidation by the Church of Rome has been a historical headline for centuries. Often times by the Pope himself. Science suffered mightily under the political strain of a threatened Church. Luther did break the spirit, if you will, of that intimidation by his rebellion. And opened for much of humankind an intellectual freedom, that has permitted the church driven stranglehold on development of human civilization to fade.

For many, however, those who do not choose to be so enlightened, or unburdened...for those who seek the counsel of a spiritual leadership, the disdain for others not like themselves, will

continue. And the doctrines in conflict will continue to be filtered through ambitions and frailties of human spiritual guides, with similar deleterious and hateful results. As Papal doctrine continues to move toward brotherhood among beliefs, finding commonalities instead of solely differences, other spiritual guides will rise to fill the void. Brother Stair comes to mind.
The nature of the beast.

sideband,
You don't ask easy questions, do you? The 'Tech'
license gives you a partial 10 meter use, and all bands
from there up (VHF/UHF). For the same co$t and a little
bit of code (5wpm), you get access to all the bands with
the General class license. More people 'talk' their
selves out of passing the code test than ever 'couldn't'
learn it.
For VHF/UHF radios, your idea about a 'mobile' may
be the best bet. Just be sure to get more power-supply
than you think you'll need. Too many 'amps' never hurts
but too little will always make you wish you'd got the
bigger supply to start with. Also, unless you just have
to have a 'pretty'(matching) power supply, don't buy
bother with the radio's brand of power supply (over priced).
One of the after-market power supply does exactly the
same thing, and is usually much cheaper.
Antennas might be a problem, depends on how 'understanding'
your 'landlord' is. Can you put an antenna on the roof?
If not, your going to have to 'make-do' with an in-door
antenna, or stick one out the window.
The radio... thats like asking what kind of car to buy.
Some like Fords, some like Dodges... same for radios. The
best thing is to do lotsa research (ask around).
Good luck with the tests, finding the 'best' radio for
you, and I'll listen for you (on 80 meters hint-hint).
'Doc

2377. Why do I want to know my SWR?

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-27 00:00:00 UTC
From: Robert Spoecker <ke6nij@thegrid.net>
Message-ID: <e5PD4.14491$84.1562915@alfalfa.thegrid.net>
Source record: 115816

There is a very interesting thread going on about what SWR is.

Why do I need to know what my SWR is?

If I put my Bird meter between my 10 Watt transmitter and an antenna and my forward power measures 10 Watts and my reflected power is so low that the meter's needle barely moves I know this is a good match but if I measure 6 Watts forward and 3 Watts returned I know I have got a problem. This is intuitively understandable.

If I put an SWR meter in line and it reads an SWR of 1:1.3 I know this is good and a reading of 1:10 is bad.
I know this only because I have been told what SWR is good and what is bad but I have no intuitive feelings about these numbers at all.

I guess an SWR meter gives you the information with one reading instead of two but that is about all the advantage I can think of.

> Why do I need to know what my SWR is?

They are just two different ways of expressing the mismatch in your system. Most hams have been exposed to SWR and many have a better idea of how to interpret a particular value as to its desirability in their system (2:1 or 10% reflected power is generally considered an acceptable match. Anything less than 1.5:1 is generally considered not worth the effort to try to improve)

Either (SWR or reflected power) can be calculated by knowing the other, so if you really feel you need one when you can only measure the other, just crunch some numbers. The ARRL Handbook should have all the information you need.

Be very wary of anything printed about mismatch and SWR unless it comes from the ARRL Handbook, Kurt N. Sterba (WorldRadio magazine), or Maxwell's "Reflections." Be even more wary of anything you hear. There are more hams misinformed about SWR than there are grains of sand.

Why???
Every time I need to operate HF, I just open my trusty call book and
pick myself out the call of the day. Kinda like the lottery.
I have real cool idea of putting A W K and N on the first wheel, 0
through 9 on the second, and the alphabet on the next three wheels of a
one arm bandit. Just pull the lever, and it picks the call of the day
for you.

What could be better than that??

10-4!

: > us in the military and in law enforcement share many of
: > the same beliefs you do.
:
: Am I to take that as a THREAT you snivvling motherfucker?
: to quote YOU:

NO

: >Your only saving grace is that most of
: > us in the military and in law enforcement share many of
: > the same beliefs you do.
:
: What would you do to me if you _didn't_ share many of the same beliefs
that
: I do? Smash through my door in the middle of the night and kill me and my
: whole family? Then burn the house to the ground to cover *evidence*?
Then
: bulldoze the whole thing away do immunize yourself against criminal
: culpability?

You do not get it, do you? We share your beliefs, we are
no threat.

: I think you need to be in the Brig, where you can be watched 24 hours a
day.
:
: I would wager everything I own, INCLUDING my Life, that you and your Ilk
: would suffer enough heavy casualties as to be at the MERCY of the civilian
: population were you to get any *ideas.*

I am heading off to Ft Polk this summer. It is exactly this
type of conflict that we will be war gaming. That is because
everywhere in the world we are fighting militia style movements.
There are no big armies, just little guys.

Initially we take big casualities. Then we get smart. Most of the
fighting is much like Vietnam or Afganistan. Traditional warfare
does not work.

: There are between 235,000,000 and 250,000,000 of us who are _more_ than
: capable of adding to your body weight by putting Hot Lead into it at close
: quarters.

Over half are sheeple.

: I wouldn't want to be in your skin were Civil War to ever breakout in this
: Country. Too many bullets coming from every direction.

Neither would I. But there are many who would love to see
us self destruct. Once a civil war started, there are those
who step in from outside to make sure that we would not be
a constitutional government. More likely we would divide into
several countries who would be fighting with each other for
centuries afterwards. There are those who do not like us being
the strongest country out there.

: The biggest exception is that
: > we are not as paranoid as we deal with government daily
: > and understand how ineffective it can be.
:
: How ineffective you are. Yes, tell us more about that. Didn't kill you
: *quota* of innocent civilians yet this month?

And you are full of fear. As Paul said, "We are not given
the spirit of fear but of power, love and a sound mind." If
you are paranoid, it did not come from God. It shows a lack
of trust in God.

: > : > Am I a cop? No I am not. I happen to be in the Army.
: > :
: > : Big fucking deal. All that means is that I PAY YOUR SALARY. I am
your
: > : *boss.* You work for _me_; not the other way around.
: >
: > No, you pay taxes. The politicians are our bosses. And they
: > pay our salaries out of your tax dollars. And they have the power
: > to force you to pay.
:
: Let's see. Government _steals_ my money, gives it to our corrupt leaders,
: who in turn give you a *cut* of the proceeds. Sounds like something out
of
: The Godfather, if you ask me.
:

You got it. But then only 24% of the adults voted last
time. Sounds like if you do not vote, you get cut out.

: > Nor do we protect you. Our oath, both for the military and law
: > enforcement, is to protect the constitution (the system). People

: > (civilians) are expendable. It is your responsibility to protect
: > yourself. The USSC has so stated.
:
: Which side of the wall you choose to fire from is your own business. I
: consider any incoming, from _any_ source, Enemy Fire, which is to be
: terminated with extreem prejudice.
:

When the Marines secure a building, there is nothing
left. Seems like you have the same mindset.

: > : > I have
: > : > dedicated my life defending this country from "All enemies, both
: > : > foreign and domestic." If you are preaching the violent
: > : > destruction of the country, guess which one you are?
:
: Ahhh, let me think. The Domestic Enemy? Than why don't you either do
: something about it or shut the fuck up. You know where I am. Come and
get
: me.
:

Do not have to. The way you are mouthing off,
you are going to do something stupid one of these
days anyway. Too much fear and too much pride.
Bad combination.

: > : Put your money where your mouth is, or shut up.

: Einsatzgruppen Uniform and maybe we can be friends.

I serve my country and my God. As have all my family.
You have nothing to fear from those of us who support
the constitution. Do not let the Left brainwash you into
being so paranoid.

: > : > I hope you end up in jail and pinned to the wall by your
: > : > roommate Bubba.
: > :
: > : I don't give a good goddamn what you want, or what you think, anymore
: than I care about which of your roomates ass you had your dick in last
night.
: >
: > I think he was referring to your potential roomates.
:
: They can't be any more homo than yours are.

Very much more. The prisons are full of those
who screw each other. The military still has been
free of much of that influence. And the military is
heavily skewed to the right. Very religious as well.
(The Navy might be an exception.)

: > : > The justice system we have works very well, and

:
: Within my hands to clean up the mess? Within my hands? Are you referring
: to this Glock I am holding on to or the ballot box?

The ballot box is more effective. There is power
in groups. Too many of us on the right just want
to live in our own little world, not dealing with others.
We can not continue to do that and still survive. It
takes unity, family structure (to include grandparents,
aunts and uncles - real family) and community. There
are many out there in Illinois who agree with you.
Work together.

: > At least our judges are not being sent to jail.

From: gulyas@netzero.net
Message-ID: <8bmdtvhbi1@nnrp1.deja.com>
Source record: 115846
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment,rec.radio.swap,rec.radio.scanner

Do you have a need for an sma-to-bnc antenna adapter that is custom
made to fit and protect your H.T. or scanner radio?
Adapter allows you to:
Quickly change your antennas to base,mobile or different style use.
Use the more popular and wider selection available of bnc antennas.
Prevent chassis connector wear or from coming loose due to always
having to change antennas.
Adapter features:
Gold contact pins for best conductivity.
A low profile design with a rubber covering for a factory antenna look.
The rubber base seals to the top of the radio with no spacers needed
for moisture and dirt protection.
The base provides a positive antenna support for all applications.
No need to remove once installed to make any antenna changes.
$11.95 + $1.50 S+H (Sizes to fit most radio models)
For complete information and to view a photo of the adapter go to:
WWW.QRZ.COM (SWAP)(ENTER KEYWORD SMA TO SEARCH CLASSIFIEDS)

No No No, Joe ! ! ! ! You have it all wrong ! ! ! ! Kevin promised he was going to RE-pnet of all his evil deeds. You can check it out. Call "Brother" Tilton and ask. Call 1-800-705-7000 and ask if Kevin called in to RE-pnet.

And have your credit card ready. "Brother" Tilton may be in the market for a new yacht. And we all want to help with that.

1-800-705-7000 - call in today ! ! ! !

Send them to the ARRL outgoing QSL Bureau. If your not a member, this
is a good reason for you to join.

"Mellowing with age?" Don't f****** count on it you piece of human waste.

I am a retired Army colonel. At age 55, I run 10 miles daily and bench press my own weight.

As a college student in Alabama in the 1960's, I marched with Martin Luther King and would do it again.

I served in Vietnam so trash like you can speak freely.

Your views, in addition to being ignorant, are as repulsive to me as the views of Hitler.

Go jerk off in front of one of your photos of pre-pubescent girls.

the last thing we need in this country are more people,period, granted in
this day and age there is no good excuse for unwanted pregnacy, but, less
people , less welfare,etc, while I'm on the soapbox, its about time to close
our borders to immigrants too!!!!!,later, and I really wish you'd quit
posting in rec.cb,oh you know what I mean, not quit posting but cut it from
your consolodated postings , I myself am a hell of a lot more concerned
about gun rights,and voting the present administation out of office than
worrying a whole bunch if somebody does the hard working taxpayers a favor
by having an abortion,

Mr. Schlatter, you are not a gentleman.

And your grotesque, untrue, and obscene attacks upon those with whom you disagree do you no credit. Either you are emotionally overwrought and cannot think rationally, or you simply have no arguments for your own position (since one presumes that if you had any, you would present them).

It is charitable, of course, to assume the former.

Happy Spring,

--

Kevin Alfred Strom.

Awww come on Joe. Give Kevin a break. Read my last post. Kevin said he was going to call "Brother" Tilton and RE-pnet of his wickedness.

Call 1-800-705-7000 and ask them. And while you have them on the phone, make a generous pledge on "Brother" Tilton's new yacht. By working together we can make "Brother" Tilton a bigger item than Jim and Tammy.

1-800-705-7000 - Call today .. don't delay. All major credit cards accepted. RE-pnet for the kingdom of Tilton is at hand.

>Call Barbara Beers, realtor,

Just a reminder: The term "Realtorï¿½" is not a synonym for "real estate agent". It is a registered trademark which should be capitalized in print and followed by the registered trademark [TM]symbol. It indicates membership in a national association and adherence to a strict Code of Ethics, the preamble of which reads in part:

"Under all is the land. Upon its wise utilization and widely allocated ownership depend the survival and growth of free institutions and our civilization. Realtorsï¿½ should recognize that the interests of the nation and its citizens require the highest and best use of the land and the widest distribution of land ownership. They require the creation of adequate housing, the building of functioning cities, the development of productive industries and farms, and the preservation of a healthful environment."

Finding a subdivision where antennas ARE allowed is a refreshing change. Of course, lot sizes such as you describe help a lot!

I can't think of any reason to assign omniscience to the Creator. I am in AWE of The Creation, so whatever is _behind_ this Creation, whatever it might be < I am working with the model of cause and effect here > I am therefore in AWE of The Creator for making this reality *possible.* Whatever mechanisms are at work here, according to my definition of Creaton, are a subset of the Laws that Rule the Unvierse. Many of which we do not understand at _all_.

Now if we throw a bag of marbles into a room full of cats, does _any_ Entity know how and when they are going to rearrange them? Within say the next 24 hours? I don't think so. And thus I believe that the universe has an amount of uncertainty built into it. YES it is true that if we understand _some_ laws of physics, we can predict the outcome of some events. In that respect, we ourselves can forsee part of the future.

But behavior is not as predictable as billiard balls on a pool table. For example: Would The Creator be able to *know* all the next series of 1 billion numbers to come out of true random-number generator?

I don't think so. Not if the algorithm was one that produced _true_ random numbers (many are _not_).

And so I think it is with human nature. Perhaps the DESIGN has been foretold, that is the framework of our abilities, but the details reveal themselves through chance and serendipity, amongst other methods. This is what I think. And believe.

The idea that God knows what fish are going to make it to their spawning grounds each year is ludicrous to me. I can _believe_ that it is ordained through Natural Selection < a subset of the Laws that Rule the Unvierse >, that some of them will make it, but to be able to know which ones, how and when.....well, I can't go along with that. There is simply no evidence to support that theory that mankind is presently aware of.

Sorry Whisky Tango,

This is an old habit of mine; trimming posts to keep bandwidth down and intelligibility up. Some of the posts I see here have 20 *froms* at the top, and a bunch of unintelligible junk in the middle from 14 posts ago, and so forth.

In the interest of brevity and comprehension, I have the habit < for better or worse > of only posting parts of the previous message; assuming that if anybody wants the entire message to refer to, it is further up the thread.

Not completely true. Have you flown over the coterminous USA recently?
There is much land available for settlement away from the urban areas.
Furthermore,what makes you believe that some of these 35,000,000 will not go
on to become great scientist, men/women of letters, and so forth? We are
throwing away our FUTURE when we kill off these helpless beings.

and yes
> sir ,I do think you folks are , well wouldn't be as rude to call you

> people's business,????

This is what we said during World War II. Let's just mind our business.
It's not _our_ problem. Maybe if we ignore it it will go away. It didn't
go away.

personally I think for years, with the forms of birth
> control that are available,the fears of aids or some other creepy
> disease,there wouldn't be so many unwanted pregnacy's, but I think a lot
of
> our population are lazy and irrisponsible,*just whom we want contributing
> 35,000,000 more people to the gene pool*,

Well, just because the parents of these unborn humans may be irresponsible
does not allow one to conclude that their progeny will turn out to be the
same.

What I do think, is that society has become so materialistic, so devoid of
humanism and regard for life, that all society is interested in is the
hedonisitic pleasures of the moment. Nothing more. Nothing less. My
feeling is that this is a recipe for self-extinction.

Hello all. I am new to SW and as of yet have not taken any of the tests. I have taken some of the sample tests and don't think a tech. calss will be any problem. I was commo in the army about 10 years ago and got to work with the teletype a little before they pulled it from service. I have been looking for and at some books but haven't found what I really want to know. My questions are:
With a tech. class keyless license, what band/s and limitations do I have access to?
What kind (not brand name) of radio should I get?
What kind of money are we talking to get set up? (probably a mobile set up in the apartment but not a handheld)
I live in an apartment so my options for an antenna system will be very limited. Will this be a problem?
Any recomendations for an antenna?
Thanks in advance and I look forward to talking to most of you. (I have been reading the ng for a while and see a few people I might want to stay clear of :-))

Some tend to forget how scary it was right after the Soviets tested, and again after Sputnik. In both cases America found itself much weaker than anyone thought - first in conventional forces after the joyful, runaway demobilization in 1945, then in intercontinental nuclear delivery capability in the late 50's.

Oh please! Are you actually listening to yourself as you type this
dribble? The government, and governments, are so far up the butt of
amateur radio and its practices, it isnt even funny. The internet can
provide much more private and uncensored speech than any amateur radio
service would ever allow. At present, the people in China are recieving
and sending messages of freedom via the internet without the Chinese
government jamming, blocking or manipulating the contents, in addition
to the US governements amateur policy prohibiting conversations of
a "political" nature.

My son video conferences with friends all around the world, in a secure
digital format, regardless of ionospheric conditions for hours on end.
You try that with your Yaesu MP-1000.....

We've just had a couple of more incidents here in Arkansas where it looks like the defendants are going to be tried for double murders because the defendants killed pregnant women. In Arkansas, one can be tried for murder for the killing of an unborn baby -- except if it was during a legal abortion.

Many pro-life people couldn't care less about the morality of those who seek abortion, and our motives stem from other concerns such as the agonizing death of unborn babies which we consider to be human beings, and our perception of society's growing lack of respect for life. You unfairly generalize if you try to include _all_ pro-lifers within your claim about "imposing _their_ morality on someone else"; I can't deny that there are many who do fit that description, and they are usually the same folks who condemn others for drinking alcohol, or for gambling, etc.

I was not aware that castration is a form of birth control available here in the U.S. Can you name one licensed doctor who will perform that procedure for the sole purpose of birth control? Or do you mean "vasectomy"?

Bob, we who heard you on the air day after day defending Herbie knew plain and simple YOU WERE USED but your spirit of generosity, benevolence and humanitarianism overpowered your reasoning. It's become abundantly clear by your postings that you possess extraordinary command of language and law although your legal savvy and love of Constitution were those of your dad's and handed down. There is one Long Islander on this board and on the air whom I consider a disgrace to his people who are mine as well-a man who'd sell them out in a wink of an eye because he lacks the vocal and written skills and courage to stand up for what's right, while you, who offer a somewhat timid but highly intelligent approach, get your points across succinctly and brilliantly. I wish I had your patience and skill but alas must suffer the travail of bluntness and impetuousness and what all this has to do with Herbie Schoenbohm I'll never know except for the fact it took a Jew, a people he loathes, to extend himself in an effort to free the windbag. I used to think you were all wet but have discovered you're indeed dry.

Found this in another Newsgroup. Another
one of the few Giants of the recording
industry has left us and this mortal coil...
...sniff..sniff... well'l miss ya Ian!!

****

Alas and mourn all ye nations, I learn that Ian Dury has
cacked it from colon cancer.

It's hard to believe in these days of corporate music dominating
the airwaves, but it was once possible to hear music performed
by a spastic (Dury had polio) that focused on masturbation,
sex, drugs, sex, drinking, sex, vandalism, sex, and more sex.

Yes, we should all pause to remember the man who named his
first album "New Boots and Panties" and took it to No. 1 behind
a single about S&M (Hit Me With Your Rhythm Stick), not to
mention a single about jerking off (Do It Yourself).

Ya know, if there really is a band in the afterlife, I'd like to think
it's actually formed from nasty motherfuckers like Fred "Sonic" Smith,
Frank Zappa, Root Boy Slim and Dury.
--
Strayhorn

Not Duke policy, etc.

"Man, you should have seen them kicking Edgar Allan Poe." - J. Lennon

ObT: Frank Zappa is dead, and yet David Byrne continues to pollute
the planet.

I wish you'd keep it, and continue your testing sessions, making
sure that the code tests you provide require a passing score of
one-minute of perfect copy, and one-minute of perfect sending.

>I realize that the SWR gives important information about the antenna match.
>One needs a good match. My point is that examining the forward and reverse
>power one can also determine wether the match is good or bad without knowing
>the actual SWR.

Here's the relationship between the Standing Wave Ratio (SWR) and
forward/reflected power:

1+s
SWR = --- (1)
1-s

where s = square root (Pr/Pf) (2)

where Pr = reflected power and Pf = forward power.

Solving for s in the first equation gives you s in terms of SWR:

SWR - 1
s = ------- (3)
SWR + 1

Squaring both sides gives:

Pr/Pf = (SWR - 1)^2 / (SWR +1)^2 which provides a nice proportion
connecting all the parameters.

Let me add something to what I wrote above: In equation (2), if
the reflected power, Pr, approaches zero, s will approach zero,
causing equation (1) to approach a ratio of 1/1 or 1:1.
On the other hand, in (2), if Pr--->Pf, then s--->1, so that
in (1), SWR---> infinity, the worst case scenario.

Maybe that will help you see the connection between all these
parameters.

hobby (hï¿½bï¿½ï¿½) noun

An activity or interest pursued outside one's regular occupation and
engaged in primarily for pleasure.

Part 97 specifically says that ham radio cannot be used for commercial
purposes. Hence, it falls under the above definition of a hobby.

According to the book I am looking at, Now Your Talking published by ARRL, the 5 minutes of code will be sent and then you have to answer 10 fill in the blank questions about the transmission. The questions may also be multiple choice. 7 out of 10 passes. If you fail that, the test admin. has the option of looking at your copy for 1 solid minute of perfect copy. Also, sending is not a requirement that you MUST display. It is the option of the test giver. "The commission (according to Now Your Talking published by ARRL) has decided that if you can demonstrate receiving ability, you can most likely also send at that speed."

The definition of a word in the English language undermines the value of
human life?
How do you figure?

> An
> unborn human child is not merely a fetus, without rights and
> priveleges of a fetal dog, but it is a human.

Most people probably have trouble thinking of it as such, but in the
greater scheme of things in the universe, it is probably no more
significant than any of God's other living creations. We hold ourselves
in higher regard than other species. We don't know that God agrees with
us about that. Why should he?

> I believe that
> individual viability is the critical point, not when the child

If the religious right would agree with you about that, then perhaps
change would come about. But I don't think they are satisfied with that
idea. They want to carry it out to extremes. Hence the stalemate.

I don't know God's mind. However, my opinion is that unwarranted killing of humans is detrimental to our society. Heck, unnecessary killing of anything is wrong to me. It cheapens life. I personally don't kill anything for fun. If I kill something, it's for food or euthanasia. I'll include self defense in that if necessary. I highly value all life but I do value humans more.
>
> > I still maintain that your attempt to force me to use you

> How do you figure?

Defining someone in a negative manner is often the initial step toward changing the opinion that killing them is OK. Hence, we rename our enemies as Krauts, Gooks, Reds, etc. because if we just called them people then some of us really wouldn't want to go out and kill them. Giving them such a name dehumanizes them so then teen age boys can be more easily taught to shoot those inhuman things more easily.

So it is with calling an unborn child a "fetus". Fetus us technically correct, by the book, but it's used by the pro abortion side because they know they can't justify killing unborn people.

I think we should hold our own species in higher regard. I'm sure
if a squirrel had enough brain cells to comprehend life and death
then he would hold squirrels in higher regard, too.

It's been my experience that the solution that pisses off both
sides equally is likely the best one. BTW, although I feel I get
along well with the Great Spirit, I'm really not a church person.

Speaking of pissing people off, I've seen many complaints about
cross posting to the radio groups. I plan to delete them from the
posting groups on any future replies concerning this thread. If
you want my reply on anything, it will be solely to
misc.survivalism and you will need to subscribe to this
newsgroup.

Next two Melbourne, Florida, exam dates are:

April 1 - last of the exam sessions we're holding before restructuring.

To be held at the Azan Shrine Temple, 1591 W. Eau Gallie Blvd., Melbourne, FL. this is on Eau Gallie Blvd. just east of Eau Gallie High School, between Croton Road and US 1.

Registration starts 9:30 AM. Bring two forms of ID, original and copy of amateur license, original and copy of any active test credits, pen, pencil, calculator and the exam fee of $6.65 (cash or check payable to ARRL/VEC).

April 15 - first of the exam sessions we're holding after restructuring.

Melbourne, Florida, Amateur Radio Examinations are held at the Salvation Army, 1080 S. Hickory St. This is just south of the Community Educator's Credit Union at Nasa Blvd and Hickory St.

Registration starts at 1 PM (note the change in time!). Bring two forms of ID, original and copy of amateur license, original and copy of any active test credits, pen, pencil, calculator and the exam fee of $6.65 (cash or check payable to ARRL/VEC).

Call Bill Newkirk, WB9IVR, at (321) 724-6183, or e-mail at wnewkirk@iu.net. Please note that due to various activities, waiting to the last minute to call if you have questions may mean I won't be there to answer 'em.

Hmmm...Not to mention the fact that one leg of my inverted vee was down
because of high winds and had to be put back up at that time........
I didn't have the rig ON.

2466. Re: Why do I want to know my SWR?

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-28 00:00:00 UTC
From: LRod <lr0d@my-deja.com>
Message-ID: <8bp8bdkku1@nnrp1.deja.com>
Source record: 115760

I thought I gave a fairly complete and unsnide answer.

In any event, in view of some of the responses, let me reiterate that SWR is misunderstood by more hams than there are grains of sand.

Case in point: SWR, by itself isn't necessarily a bad thing, nor is it a measure of antenna "goodness." It *could* give an indication of antenna/feedline health if it changes, either slowly over time, or suddenly, but not as a matter of primary measure.

Reflected power (that power that gives us an SWR reading) is not lost power as a consequence of reflection. It eventually gets radiated. A high value of reflected power MAY have an effect on the transmitter, particularly in the case of a solid state final, although most modern solid state finals have SWR protection built in.

Pi-networks in tube transmitters can handle a good variety of loads, and of course a tuner can match quite a wide variety of loads, depending on design. In each of these cases the transmitter is protected, and the SWR is of no consequence with regard to the transmitter.

But the far more serious (in terms of radiating a signal) effect is the LOSS of power from the feedline loss. If your feedline has 3dB loss/100 ft. (typical for RG8) and is 100 feet long, your transmitter puts out 100 watts, and there is a 2:1 mismatch, you will have only 50 watts initially reaching the antenna. There, 5 watts will be reflected. Of that 5, only 2½ will reach the transmitter, where it will reflected back down the line, netting 1½ watts, of which only 1.125 watts will join the original 50. Total: (with one reflection) 51.125 watts in the ether.

If that same signal with the same 2:1 SWR were transmitted into a virtually lossless feedline such as open wire, all 100 watts would reach the antenna, where 10 would be reflected back. All 10 would reach the transmitter and would be reflected back to the antenna, where 9 would be radiated along with the original 90. Total: (with one reflection) 99 watts in the ether.

Examples of reasons why that 99 watts might not get the best ride from that point include, antenna efficiency, height, pattern, etc.

Note that resonance (or, I guess, "resonets") is not on the list. Long wires, rhombics, zepps, etc, are all "non-resonant" antennas. They are all also best fed with an open wire feeder for maximum power transfer and minimum feedline loss.

Please note my earlier admonition and don't trust this or any other answer except those in sources I cited earlier.

THE FCC ISSUES $7,000 FINE FOR ILLEGAL EQUIPMENT SALES

ARRL - The FCC has affirmed a $7000 fine on Cellular Systems Northwest Inc of Enumclaw, Washington, for willful and repeated violations of the Communications Act and FCC rules relating to the sale of transmitting equipment.

In a Memorandum Opinion and Order March 16, the FCC said Northwest, a consumer electronics dealer, on two occasions in 1997 and 1998 sold and offered to sell "external radio frequency power amplifiers -- commonly known as 'linear amplifiers'" to two different FCC agents posing as a member of the general public. The FCC said the amps were capable of operating in the 27-MHz Citizens Band. A Notice of Apparent Liability was issued in June 1998.

Northwest sought recission of the $7000 forfeiture saying it never intended to offer or recommend the linears for CB use; its violation was unintentional; that it had ceased selling the illegal equipment; and that it is "small retailer" attempting to make ends meet. The FCC was unmoved and upheld the $7000 fine. The company was given 30 days to pay.

From the ARRL Letter, March 24, 2000

AUSTRALIA TO GET REDUCED MORSE CODE REQUIREMENTS OVER SIX MONTHS

WIA - The Australian Communications Authority (ACA) intends to lower the Morse code licence test speed for full access to HF bands in VK from 10wpm to 5wpm within the next six months. (It will maintain both the Unrestricted and Intermediate licences).

The Wireless Institute of Australia this week received an "in principle" acceptance by the ACA to its submission for the code requirement to be reduced.

The decision to adopt a lower code speed in VK comes days after a similar government decision in South Africa, earlier decisions in Britain, US, Sweden, and Gibraltar. Also seriously considering 5wpm are Canada, India and Germany.

The WIA in its submission to the ACA had acknowledged a difficulty in lowering the Morse code speed that would arise with reciprocal licensing agreements that referred to the VK Unrestricted Licence which has 10wpm qualifications.

The ACA has agreed with the WIA's suggestion to overcome the difficulty, namely maintain the Unrestricted Licence with 10wpm, but also upgrade the operating privileges granted to the existing VK Intermediate Licence.

The Intermediate Licence currently requires the passing of 5wpm Morse tests, and has restricted HF bands - 80, 15 and 10 metres.

Once the ACA upgrades the Intermediate Licence, holders will have full HF band access.

The VK news comes days after the South African Radio League achieved a new all HF band licence that requires 5wpm.

The ACA in advising the WIA of its decision, said that the Unrestricted Licence would still be available to new applicants, and while Intermediate Class licensees gained full HF access, they would continue to be issued unique three letter J and K callsign prefixes.

The ACA in its reply to the WIA said, "Given the overseas trends in relation to this matter, the ACA agrees in principle to implement changes to Australia's Amateur licensing arrangements in relation to the requirements for Morse code.

"In recognition that it is likely that the international requirement for Morse code will be considered by the World Radio Conference in 2002/3, the proposed changes are minimal in scope.

"It is proposed that the Radiocommunications Licence Conditions (Amateur Licence) Determination No. 1 of 1997 and other Amateur documentation will be amended prior to the Sydney Olympic Games."

The WIA had submitted that due to an expected number of visiting radio amateurs arising in Australia for the Olympics, that it would be ideal to have the changes in place by then.

The WIA now has the task of revamping the pool of VK Amateur Regulations Examination papers to reflect the proposed changes.

From the Wireless Institute of Australia, March 25, 2000

SATELLITE TELEPHONE COMPANY SET TO FLAME OUT FLEET OF SATELLITES

W8MMQ - Iridium, a satellite telephone company, announced earlier this month that it will be cutting service to its 55,000 customers, and that it will de-orbit its fleet of 66 satellites over the next year.

The company announced this decision after filing for bankruptcy. The company, which Motorola holds a large stake in, spent between $5 and $7 billion on its satellite network, making this one of the costliest corporate disasters in history.

Iridium tried to find a company that would take over its operation, but ultimately announced that no qualifying bid was received. Iridium's satellite phones were reported to cost around $3,000 each, and calls placed using the system were $.07 per minute.

AN UPDATE ON THE W8MMQ WEB SITE

W8MMQ - You may have noticed a change at the W8MMQ web site over the weekend of March 24. We attempted to try a new design, with new content, that did not go over to well with some visitors.

As a result, the old W8MMQ web site is now back in place, and will remain as it is for the time being. I do intend to update the radio modification archive in the next few weeks, but the rest of the site will not change.

If you have any comments on the site, please email me at email@w8mmq.net. I would be happy to read your message, and get back with you as soon as I can.

THE WEEKLY DX REPORT

Two new East Timor calls to look out for are 4W6UN and 4W6MM. In addition to these, 4W6/VK2QF is planning to operate between the 29th of March and the 5th of April on the 40, 20 15 and 10 metre bands, CW and SSB.

F5VCR, G3SXW, G3OCA, G4CWD and G4BWP will be active from Abokwa Island, Ghana, between the 1st and the 6th of April. They will operate on 10 to 40 metres SSB. Their callsign is yet to be announced.

Peter, G8BCG, will be returning to the Solomon Islands to re-activate H44PT on 6 and 10 metres. Operation is planned to commence on the 28th of March and continue until the 9th of April. Full details, logs, recordings and pictures can be accessed via the RSGB web site. QSL via G8BCG.

DU1KG/DU4 is planning an operation from the Calagua Islands in the first week in April. This island group was activated for the first and only time by I2YDX/DU4 in November 1994. This counts as OC-202 for the RSGB Islands on the Air awards programme.

KG4VL is currently active until the 29th of March from Guantanamo, counting as NA-015 for IOTA. QSL via N5VL.

Advance warning that S05R [zero five] (a new prefix) will be active from Western Sahara from the 17th to the 23rd of April.

YC8XNE and his wife, YC8XWJ, are residents of Sula Island, Indonesia. New to pile-ups, they are often helped by net controllers. Look for them around 21,260kHz in the afternoons. A contact will count as OC-076 for IOTA. QSL via YC8TXW.

From RSGB News and 425 DX News

UPCOMING CONTESTS AND EVENTS

Visit the ARRL Contest Calendar at http://www.arrl.org/contests/ for more contest information.

The SP DX Contest, sponsored by the Polski Zwiasek Krotkofalowcow (PZK), will run from 1500-Z April 1 to 1500-Z April 2. Operate phone and CW, on 160, 80, 40, 20, 15, and 10 meters only. Single operator, all band or single band, mixed mode, phone only or CW only; multioperator (multiband, mixed mode only).

The Japan International DX Contest, CW high-band portion, will run from 2300-Z April 7 until 2300-Z April 9. Work JAs only. High bands are 20, 15, and 10. Operate no more than 30 hours (JAs operate full 48).

AND ... IN CLOSING

Thanks for reading this edition of the W8MMQ Wire! This newsletter is produced and distributed each week by Dan, W8MMQ, and is available free to all radio amateurs.

To subscribe to this newsletter, email email@w8mmq.net. Your email will be read and answered as soon possible. Your email address will not be given or sold to any other company or organization.

Again, HOW MANY WARNINGS does this guy get? The next obvious question is WHY does he receive all these warnings?

Why has the FCC not removed this eternal nuisance from the amateur radio service, despite having more than sufficient reason to do so?

Do you suppose the answer may be a three-letter word that starts with "J" and ends with "W?"

>the actual SWR.

Here's the relationship between the Standing Wave Ratio (SWR) and
forward/reflected power:

1+s
SWR = ---
1-s

where s = square root (Pr/Pf)

where Pr = reflected power and Pf = forward power.

Solving for s in the first equation gives you s in terms of SWR:

SWR - 1
s = -------
SWR + 1

Squaring both sides gives:

Pr/Pf = (SWR - 1)^2 / (SWR +1)^2 which provides a nice proportion
connecting all the parameters.

>>
>> Reminds me of when Jerry Fallwell debated Carl Sagan on Nightline.
>> Fallwell was forced to speak in "tongues" on the issues. Among the
>> biggest piles of nonsense ever shown on network television.
>
>I missed seeing it; which one was spouting the nonsense? ;-)
>
>Bill Velek

1==> Gee, I dunno Bill, depends on whether you prefer extremely
conservative Protestants such as Fallwell or atheistic apostate Jews
such as Carl Sagan, doesn't it?

2==> Maybe we could put an atheist such as Sagan at the extreme left
and a conservative such as Falwell at the extreme right. If consider
this scale of belief in God as

0 [Sagan] ----------------------------------10 [Falwell]

Just where do you want to put the RCC and your own beliefs? Please
assign numerical rating between 1 and 10 for your own beliefs and what
you think the beliefs of the RCC are.

3==> Please repeat the same exercise with belief in the Bible, please.
RCC belief [in your opinion] and your personal belief.

4==> Know that you like to try to "live in the middle" but just for
the convenience of those of us who actually believe in the Bible, how
do you want us to evaluate you?

Perhaps the materialistic scientists would like a statement from you
as well.

5==> Haven't seen many members of the "fence sitters union" posting on
the >misc.survivalism< group, but there might be some.

Hey, come on,middle ground, all out, roll up, support Velek who seems to want to occupy the "middle ground" between belief/disbelief in the Bible, for a start.

6==> A few weeks ago either Walter or I mentioned the "Church of Laodicea" as mentioned in Revelation 3:14 and following verses.

Did you bother to look it up? [Just curious... You did say in an earlier post that you hadn't read all of the Bible, didn't you?

7==> Incidentally, have you been following the news on the "Ugandan cult" situation? Now seems to be more of a case of murder than suicide.

Wasn't it you who once made some remark about the dangers of Protestants following the guidance of the Holy Spirit without the guidance from the RCC?

8==> Would you now like to comment on the religious affiliations of the leaders of this particular cult?

...Yes, I realise that perhaps you are perhaps too petulant to read my posts, but perhaps someone else will comment on them, or otherwise bring them to your attention.

9==> Uh, didn't I read something recently from you in which you said something about crosspostings from JBTs? ....If so, can you explain why you have crossposted to the following newsgroups with this post?

****
rec.radio.amateur.policy,misc.survivalism,rec.radio.amateur.misc,rec.radio.cb
****

[I will do the same crosspost, for this one post, just to establish my point. I apologize to the members of those other groups. I'm posting from /misc.survivalism/.]

It's not an oversight....It is snooty HAMS doing what they do! Kinda makes me glad I'll miss it by a few weeks on moving back to Jersey.....3 weeks and counting!
They just want to yap with their "know it all" ham buddies on 2 meter WT's rather than have someone set up there with 11 meter although they may even understand that CB'rs are going to go there with plenty of cash to spend on their overpriced crap. How many used 75 dollar D-104's will be displayed this time around? You might want to save your time and money and go to Yonkers!

I'll take a "wait & see" on this one.

>Al Abernasty STOP JAMMING OR YOU ARE GOING TO BE SORRY!

Big Al knows nothing else. He's been jamming on ham r. since the early
70's. This is his swan song however. He's gettin as much jamming
in as he can before his liver gives out from all the booze he
consumes each day. I give him a Year at the most before he
takes a permanent "dirt nap". (and boy-oh-boy how the champaign
corks will fly all up and down 75 meters when he finally kicks
the old bucket and departs this mortal coil!)

2493. Yellowstone Park, Wyoming - Park Frequencies

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-29 00:00:00 UTC
From: jesse <jlm@hotmail.com>
Message-ID: <01bf999d$ae7854a0$57e04bcf@oemcomputer>
Source record: 115487

This may not necessarily be a Ham question, but what frequencies do the rangers in the park use for communications? Can you contact them on any of the Ham bands in an emergency situation? Any local repeaters? Planning on spending a few weeks wandering the wilderness out there over the summer, and don't want to be completely cut off from the outside world if something 'bad' happens.

Thanks for the info in advance,

-Jesse

Doc, you might just have a point of legal tenure here.

I have often wondered, does an individual (unknowingly
or without informed consent) give up some of his or her
Constitutional Rights of Free Speech when one signs their
610 Form and/or Licence?

If I was in your shoes right now, I would consider taking all
of the Official Communications you have received from the FCC
to either a competent attorney, or perhaps the American Civil
Liberties Union. Methinks that the latter organization may
show some interest in the more "esoteric" facets of the law
as to how it applies to individuals licenced by the Private
Radio Bureau, and how these stack up against prior legal
decisions which might be relevant and/or applicable in this
case.

I think we will agree that "hate speech" and "profanity" as
exemplefied by George Carlins "Seven dirty words" is where
we must draw the line. A discourse on a "personal conflict"
however seems to be a different animal alltogether.

It may also help to check the legal def. of the phrase
"personal conflict" in Black's Law Dictionary. This may
be a starting point as to where someone such as the ACLU may
be able to start from and clarify a point of contention.

>Let's analyze something. There is a DRASTIC difference between A religion
>and THE religion. If one listens to KC3AU, one will be led to think the
>Christianity is THE religion, not A religion. Not only that but John
>quantifies and qualifies it even more.

Not only that Doc, In my humble opinion KC3AU is BROADCASTING
his beliefs on ham radio. All you have 2 do is listen to him.
Listen to the *exact selection of words* he uses on the air when
he's monologing. If you listen carefully (and better yet RECORD
and analyize them) it is quite apparent that KC3AU is *Deliberatly
addressing* all and anyone who may be listening to him, including
shortwave listeners who he has called out on several occasions.
If this ain't using ham radio for the BROADCASTING, then I don't
know what is the real meaning of the term! (BROADCASTING is also
specifically named as a violation in Part 97.)

Irb.

Why would ANYONE reveal their real name to you, Doc??? ESPECIALLY since you are famous for contacting employers of those you hate, and telling lies about them!

Isaac

There certainly is! There's a whole "sub-industry" (mainly meant to assist disabled persons to use computers) concentrating on "morse-to-computer" access methods.

Point your browser to http://www.uwec.edu/academic/hss-or/Morse2000/

Considering that this "radio" is on 11 meters I find no problem with
Doc's response. Now you want to hear this one? I know what to do to
fix it....but I wont tell him. One less outlaw on the bands is fine by
me.

Thanks for your intelligent input,Irb. I save on my hard drive and/or print out my communications of importance so we know where we stand on very relevant issues yet I don't see the sense in making waves as the blustry winds die down. Don't get me wrong; I want to see enforcement take place on the bands. I welcome it yet rebel at actions that can be deemed unconstitutional and...I'll save it for another day. I believe the FCC defines "broadcasting" as ONE WAY COMMUNICATIONS and KC3AU, in my opinion, is innocent of it. There'll always be someone in QSO with him as he proceeds to go off the deep end, as he attempts to reinforce his beliefs as if to say ,"I'm not sure but I'll feel better about things if someone agrees with me."At least that's the feeling I sometimes get but my concern is WHAT'S BEST FOR HAM RADIO. WHAT'S BEST FOR THE CAUSE, so to speak. Do his daily pontifications and reactions to them meet the definition of basis, purpose and scope of amateur radio? If I got on .313 and talked about, for instance, hillbilly redneck mentality, it would provoke reactions which would be interpreted as contrary to basis, purpose and scope. If I got on and condemned John Rocker undoubtedly it would provoke a reaction even though just about every newspaper, radio station and TV station outside of Macon and environs called him a stinking bigot. But I am not allowed to say what's on the minds of so many. Why not? Because to hell with my First Amendment rights. I'll provoke a reaction and the CAUSE takes precedence over my fundamental guaranteed rights. Since therefore the CAUSE will be hurt by reaction I might create, then that same cause will be similarly affected by John's religious monologues which similarly provoke reactions but I, unlike John, do not have Riley's private number on which to complain. Riley has requested that EVERYONE COMPLY. Everyone should do his or her part to keep the lid on .313 and to allow this constant "pulpiteering" is CONTRARY to the basis, purpose and scope of amateur radio! I welcome your input on this subject, pro or con, but gentlemanly. I do not want input from any religious fanatic of any faith since I consider them obnoxious beyond belief. Since the issue of supposed impartial enforcement and free speech is of paramount importance to to our hobby/service, please post your replies to the forum rather than to my E mail address.

>but not the FCC's.

The question was a straw man. Not every detail about ham radio is
spelled out in Part 97. Since the Part 97 makes it OBVIOUS that ham
radio is an avocation (hobby) rather than a vocation, there is no reason
to spell it out. Anyone with a funtioning brain (yes, I know this
excludes many hams) can figure this out without for himself.

You're right; I didn't believe it. So I took a look. Any post more than
about 3 lines long is written by someone else and pasted in by 'vfp.
Sometimes he credits them, and sometimes he doesn't.

The funniest part? They all have his number over there, too.

You can get the newsgroup posting out of the idiot, but you can't get
the idiot out of newsgroup posting.

Solid state is definatly the way to fly. Some of the new amps have
protection from bad swr and accidental shorts and reverse power. Be sure
to check out all those features. The solid states are more rugged also.
They will really take a beating, and really pack a punch these days.

Even the commercial transmitters (50KW) are now solid state.

I have been running solid state instead of tubes for years now, and I
really like it. There is no maintainance, or tuning. Just push the
button and start quacking. (Like breaker 19 on my IC706)

Good Luck!
Radio Oger

Every time I need to operate HF, I just open my trusty call book and pick myself out the call of the day. Kinda like the lottery.
I have real cool idea of putting A W K and N on the first wheel, 0 through 9 on the second, and the alphabet on the next three wheels of a one arm bandit. Just pull the lever, and it picks the call of the day for you.

What could be better than that??

nnrp1,

You seem to have a need to tear down. Even if someone has a drinking problem or whatever, do you need to throw that into an unrelated compliment?

Undeniably, Dan shows wisdom by putting thought and skill into his posts.

Your post tells me nothing about Dan but everything about you and your insecure state mind. Instead of poking around for weakness, we need to encourage the strengths in one another.

Source record: 115515

While you are not calculating the exect SWR , by compairing the forward and reverse power, you are doing a rough SWR calculation. Just knowing a 100 watts forward will not tell you much and knowing 5 wats reverse without knowing how much forward will not tell you much either. Five watts reflected with only 20 watts forward is useally bad and 5 reflected with 1000 forward is good. Afterall SWR is only a ratio of the forward and reverse power.

I have just picked up a Cushman CE-50 that seems to have a bit of a problem. I cannot seem to receive a signal thru it even though the squelch seems to work. I also seem to be able to generate a signal OK and the modulation circuits seem fine. I have the manual but it doesn't seem to be very complete with the servicing information. Can anybody help or point me in the right direction. Thanks Don KB6GQA Please respond via email.

Now who else would get busted in Hickory NC for jamming? I wish that the FCC would GET OFF THERE ASSES and get Capt. Fuit, and alot of the QRMers on 313. If Herby isn't supposed to be on the radio the FCC will get him. So why is it so important to jam him and risk losing your lic. That goes for all our CB operators on 14.313 too. God knows there are alot of THEM! Riley is right 10-meters is HOT! Maybe he can get us 11-meters too! After the 15th Amateur radio is going to be one big CB band so whynot let use use 11-meters too.

I would refer you to that and the FCC rules which are on the web so you don't just take my word for it. Here is one site...
http://www.columbia.edu/~fuat/cuarc/Part-97.html (text) or here
http://www.arrl.org/field/regulations/news/part97/ the cool ARRL site or here from the FCC
http://www.access.gpo.gov/nara/cfr/waisidx_99/47cfr97_99.html

If you think about it, you aren't operating a repeater if it isn't up without your constant monitoring. If you are in control of it wandering around your property and can shut it off remotely or by running over to it, it is no different than people crossbanding from their ht to the car to a repeater. All you have to worry about is that YOU id. That covers your HT and your simplex crossband rig (you listen on the HT and the other rig doesn't retransmit back to you). If you duplex crossband, the other repeater id'ing will key your rig, thereby creating transmissions you might not think about. This could be a gray area, and although nobody ever says anything about it, especially because you would normally turn it off if you couldn't id every 10 minutes, technically your crossband rig is transmitting and should id within 10 minutes of the other repeater bringing up your rig.

You could also make an argument that this is an auxilliary station and you have to transmit in the 431-433 and 435-438 frequencies. Check the rules about remote control under 220mHz and make sure you follow the band plan to use the proper frequencies. You would, of course use tone, just in case to keep from interfering with other stations and keep them from having easy access to your rig.

My Adams has a problem from the day I brought it.

On AM the transmission is fine (4watts) and adjusting the mic gain has the expected results.
However, on SSB (4watts instead of about 12PEP) when I adjust the mic gain it starts a nothing, peeks at about 1 3rd of the way round the dial then rapidly dwindles to nothing at about half way and stays there for the rest of the dial.
I have had the cover off and adjusted, then replaced ct7 (ALC). No change.

I am suspecting the mic gain control itself, but because it works on AM I'm not so sure.

I brought the set second hand and it had a digicscan professionally wired in.

I live out in the sticks and it will be difficult to get a "real" tech to look at it, does anyone have any more ideas on what I can look at?

Cheers and thanx in advance

Thanks for reading my message.

I have just acquired a Icom IC-740 HF - no mic came
with the radio, could someone advise me on what microphone was the original
microphone with this rig?

If that microphone is no longer in production, could someone please
advise what microphone would be the best for this radio?

Please email replies directly to ngwd@flash.net

> > >Amateur license.

I wonder if this statement means that one cannot take an opposite viewpoint in a non-hostile sense to a controversial subject such as religion? Is anyone allowed on 14.313 to argue, for example, his or her case against KC3AU's religious diatribes. It might be dangerous since KC3AU has Riley's home number which blows apart the entire concept of equanimity in enforcement. Think about it hams-why should any ham have the private number of anyone in ham radio enforcement who is SUPPOSED to be 100% forceful yet impartial?
Is it therefore impossible to reason that just possibly religious similarities can sway Commision opinion? John Occhipinti is a decent family man and an American in every way but when one tunes to .313 and hears nothing but bible banging day in and day out..when one tunes into a ham frequency that never was noted as one for religious study and reflection such as ARMS below .300..when one tunes in to a frequency in which someone is calling his "brothers" to be seated in his own private church, it's a bit much. KC3AU is NOT broadcasting because there are others in his missionary QSOs however do his sermons reflect the basic nature, purpose and scope of ham radio? I ask if oftimes the negative on-the-air reactions legitmately reflect the same thing but then again would they be audible if not provoked? Let's analyze something. There is a DRASTIC difference between A religion and THE religion. If one listens to KC3AU, one will be led to think the Christianity is THE religion, not A religion. Not only that but John quantifies and qualifies it even more. The Born Again movement is THE ONLY credible way to salvation, not A way. Keep this in mind-it's the ONLY WAY at the expense of every other Christian or non-Christian denomination. In a pluralistic diverse society such as ours, something which has made America great and will continue along that road, there is no such thing as THE religion of the U.S.A. COMMERCIAL A.M. and shortwave stations dedicated to evangelism are prevalent and no one disputes their right to present such views be they loud and obnoxious or subdued and rational. But must this compulsion, this obsession with MY WAY OR NO WAY be also integrated in amateur radio? And if questionable, why then is it overlooked by enforcement in our hobby/service? I think it's about time for us to hear a reply to this question on either Hap's RAIN report or elsewhere. Let me give you an example which lends credence to my theory. John Smith gets on the ham bands and for example talks up George W.Bush in the same dogmatic sense as does KC3AU his brand of religion. What then happens? REACTION, possible boisterous reaction which is exactly what Riley disdains. Does then Mr.

Hollingsworth have the right to castigate and warn the politically minded ham? If so is this not an abrogation of his Constitutional guarantees? Just think about it fellow hams because it is a very important concept. That specific ham just may get a letter telling him that his type of speech and attitude do not reflect the basis, purpose and scope of ham radio and the reason is because it evokes the type of reaction that does not represent the basis, purpose and scope of ham radio. Is there anyone out there who can honestly say that some of the reaction to KC3AU's on-the-air ministry doesn't fall into the same catagory? The hooting, hollering, catcalling, noise and other forms of cacophony in response to these sermons represent the basis, purpose and scope of ham radio? Of course not, therefore I ask why the same limitations on freedom of expression applied to me and others are not applicable to John? Question: if I posed the same argument on the air as I now do on the Internet, would I not be leaving myself open to sanctions? You bet and my question is WHY? Riley is right in the following sense: ham radio must never be a circus. I ask if it must be a pulpit? Let me stress the following-KC3AU has every right to believe in whatever God he chooses and by the same token, an atheist such as WA2EXQ must have that exact right too. But when either view turns a frequency into the circus we must avoid to save our frequencies as stated by the Commission, then even the hint of a double standard must be dealt with.

>too!

You have that backwards, my friend. Hams had better start making full use of 10-meters. Otherwise, outband CB'ers will take *IT* over. It's a game of sheer numbers here.

Not trying to start a flame war here, just stating the facts. Already, "stray" freebanders can be heard daily on the lower (CW) portion of 10-meters. If they tune up there and hear no activity, they consider it an "empty" frequency and begin transmitting. Then, they bring their friends. Then, their friends bring THEIR friends. Then....

Use it or lose it, gang.

Toomanyradios@aol.com apparently didn't understand my post. The main thrust was to iullustrate the difference between a religious study group and ofttimes down and out Billy Sunday bible banging fire and brimstone preaching on ham radio. Whether or not any person or persons should be able to use a specific frequency for religious purposes other than DISCUSSION while still maintaining the basis, purpose and scope of amateur radio. Whether bible banging is the only provocative act on amateur radio allowed to foster less than desired reactions contrary to the basis, purpose and scope of amateur radio and yet go unscathed, uncontrolled and unpunished. And finally whether or not non-Christian bible banging or outright atheism or voodoo or devil worship would be allowed the same latitude and respect in the realm of Commission enforcement policies. Now if what I just wrote, toomanyradios, is too confusing for you, it's because you are a birdbrain who has been brainwashed into believing it's your way or no way or you're not going to heaven which is exactly what evangelists desire. Amen.

Don't forget that not every amateur in the world uses the same phonetic word system. French and Spanish speaking nations in particular are taught different words. I'm amused though at some of the new guys--especially the nets. Heard one guy try to convey the 'X' in his callsign by saying 'xanadu'.

The President Adams is built on the Uniden Chassis and is a great Radio
almost a classic - It could be your microphone amplifier the gain of which is
contolled by the Mic gain pot. The pot itself could be crook or the mic
amplifier itself I would certainly eliminate this first. Its a bit hard to
assume that becuase it works on AM that nothing is wrong with the mic amp or
pot. From memory AM has a preset pot as modulation is fixed in the Uniden ad
should no be adjusted. -

Have you tried giving the rig a bit more audio power though an external
amplified microphone - this may not work if the mic amp is shot - however it
will work if the pot is shot.

You could try bypassing the mic amp and pot altogether with an amplified
mic -

With the ALC trimmer cap out of circuit or wond to nothing you should be
getting full power (and overmodulated)

Try to eliminate the micamp and its gain control

I don't think there is very much wrong with yout rig - its a great chassis

Regards

To turn off the 'Bell' first press the F button. Then press the DTMF button.
The Bell will disappear. You'll notice right above the DTMF button in red is
"ALM" that stands for alarm. All those functions listed across the top of those
buttons in red are accessed by first pressing the F (function) button.

I have two questions, but they are similar problems so I'll ask them both here. First, I am having a big problem with RF feedback from my HF setup into my computer and vice versa. One strike is that the antenna is a dipole in the attic not too far above my head. The culprit seems to be the keyboard. When I type, I can hear clicks on the tranceiver. And when I xmit, the computer starts going crazy as it responds to various keystrokes being induced by RF. Any suggestions? Also, I am running 10 meters mobile with a Rat Shack HTX-10 and either a wilson 1000 or a 102" whip. When a trucker comes up and keys down on CB, it burries my entire 10 meter band (gotta be more than 4 watts these guys are using). Any remedies for that? Thanks for your help. Happy Hamming.

What the real pisser here is that the FCC is so busy busting legal stations that they don't have the time to go after illegal stations. Why do you think CAPT fuit and Al Abernasty are still on the air. I think the FCC needs to spend more time on 11-meters. I say lets anex 11-meters and make it a ham band again. Lets stick that CB trailer trash above 225MHz and be done with them! Hell where I live there is a guy with a sign in his front yard saying he does mods on CB radios. The FCC has known about that trash for years. SO I THINK THAT THE TRAILER TRASH Freebanders are winning! Riley get off your ass and show us something. The freebanders are taking over! Its just a matter of time and 10-meters will be just like 11-meters. BREAKER BREAKER SKIPLAND!
covert62
Do you want lower gas prices then lets allow IRAQ to sell oil. Did you know that the minister of Kwaitt IS ALSO the minster of OPEC. What does that tell you about that back stabbing bastard! I bet if we allow IRAQ to sell oil again OPEC will step up production!

>>>Yeah,I'm kind of wondering too,it seems to be a little bit
too,well,smart,for a Lloyd post(I've been lurking a long time here,I
couldn't post(work PC).I can't figure out how anyone thinks the
pictures,testimonies,and admissions,from victims and witnesses is all
a lie!A friend's dad was a film developer and later a analyst for the
army from 42-50,and he had movies he copied that were the most horrible
things you ever saw.Some of this stuff is on A&E and the History
channel in sanitized form,but I saw the raw footage about 20 years
ago,and I still get shook up thinking about it.Executions by
hanging,strangling,cutting throats,firing
squads,stabbings,drownings,freezing,beatings!A lot was shot by and for
the Germans themselves,in color yet!One of the really nasty things
shown,that was kind of justice by negligence,is when a German Captain
(it might be major)is captured wearing really pitiful looking
prisoner's clothing,claiming to be a jew.First off,he was twenty pounds
overweight,had all his teeth,and was "unclipped"!The soldiers (brits
and US)just smoked cigarettes while the former prisoners of his,made
him dig his own grave,make him beg not to die,and finally use what look

like ice picks(but short)to just pick him to death,and they finally piss on him just before he passes out.Then,they buried him alive!The soldiers are looking up in the air,at their watches,or at the ground while it's happening.After he's buried,they shake the hands of the prisoners,and give them cigarettes!The prisoners then danced on his grave.There were six or seven similar events filmed,but that was the worst,some just got an the crap beat out of them,then the soldiers took them away.There was a house they show with a table made out of femurs and topped with a "cloth" made by the tattooed skins of prisoners.The soldiers themselves beat him to a pulp when they saw it.
This is not to say the russians were any saints in the way they treated german POWs,but the Nazi's seemed to really be into it..

> What could be better than that??

Designing your one-armed-bandit so that it will always generate a LEGAL U.S.
callsign.

For the U.S.: "A" followed by a digit is not valid (these are assigned to
other countries). Calls which end in "SOS" or any "Q-Code" are also not valid.
Good luck in designing around the latter cases.

2588. Ham traffic a joke

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-30 00:00:00 UTC
From: Burt <k1oik@yahoo.com>
Message-ID: <sWGE4.13365$Of2.561456@typhoon.ne.mediaone.net>
Source record: 115592

Recently I was told that several messages were passed on a local two meter "traffic" net that exemplify the type of traffic hams think useful. The text of the message was essentially "thanks for a great time with you today", the real joke was that the official formal routine traffic was being passed on the net between the actual receipents. And two of them see each other every day. They could have easily said the words to each other IN PERSON and probably already did. And cut the BS about training, in most cases hams can train for 20 years but when D-day comes they pee in their pants. Last September this same traffic net interuppted a hurricane weather net to pass the the type of traffic cited above during Hurricane Eduardo.

Burt,

I received the April issue of QST in the mail yesterday. I was
reading the correspondence on
page 24. One of the letters is titled "Top ten things a ham
needs in his/her shack."

Reason #2 reads "A picture of you with your arm lovingly wrapped
around your loved one, ie, that
brand new transceiver!"

It pretty much emphasizes your point of where hams place their
priorities.

Surrre. That's why after nearly two months the FBI and
several other "intelligence" organizations still can't
find out who took out cnn.com, yahoo.com and several other
major web sites. They were beaten by some pimple-faced
teenagers, and now all FBI Director Freeh can say is
"Blame Canada".

Can you say "egg on your face"?

I can certainly understand the emotional feelings and attitudes of the many hams who have DONE IT THE HARD WAY, whether this was CW at 13/20 wpm, or driving 150 miles to the FCC Field office to take exams, or whatever. ONE SIMPLE QUESTION. When will it get through your thick heads that this IS NOT THE ISSUE? A lot of hams did it this "hard way", and no one is criticizing them for having done it. But unless something had massively changed in the hobby, it was doomed to go down the tubes. I don't see how so many can be "blind" to this reality.

What responsible governmment (or businesses) is going to sit around when spectrum is at a premium, amateur radio is not growing, and the on-air behavior of the "old and wise ones" is embarassing to all. If you haven't studied a frequency chart recently, you ought to do so, and NOTICE how "generous" the allocations are for Amateur Radio. If you think these weren't vulnerable under the existing conditions, then you are grossly out of touch with reality.

For those that are upset with all the changes and restructuring, it appears to the rest of us that you would have been content with no changes for the last few years of your life, as the hobby dwindles, and then if it all folds after your "passing", then so what. That appears to be what the underlying attitude is, and if so, it is about as far removed from the "spirit" of Amateur Radio, as you can get.

Also, if you were of the opinion that the hobby was going to grow under the previous conditions, think again. The world has changed. Interests have changed. The Internet, in a way, is the more practical "ham radio" of today. Available, free-time is scarce, and the vast majority of established hams (20+ years or more in the hobby) are so grossly out of touch with young people today, that there is nothing they could do to bridge the gap, let alone generate new interest. I think many younger hams saw the same problems/options/opportunities that the ARRL/FCC saw, and that was we had to make changes, adjust to the times, or lose it. Plain and simple.

BOTTOM LINE. It doesn't make a hill of beans difference whether anyone likes or dislikes the restructuring. It's here, it's going to stay. Many believe it was a step that will help Amateur Radio survive/move forward for the time being. Other changes will probably follow. I am certain that all older, current, and future hams will be able to still enjoy what Amateur Radio offers. And, if you think you have to do something drastic to express your discontent, go ahead. It will have NO EFFECT on ANYONE, no one will care, no one will listen to you, and if you decide to depart from Amateur Radio (one way or the other),

probably no one will miss you. Why? Because you spend your whole time looking backward. LIFE, and Amateur Radio, are about LOOKING FORWARD.

The best of the best! HAL PCI-4000 digital modem. Sophisticated DSP
processor performs Clover, RTTY, Pactor, Amtor. Works with Express, XPWin,
Writelog, WF1B, XPPCI. Requires 1 full ISA slot but does NOT require an IRQ!
Card is 'A' model, serial number < 600, with latest proms. Trade for radio
or laptop of equal value.

> So what's your point?

You say that a lot when someone has exposed the shortcomings in your postings and you don't have an answer for it. It's the news group equivalent of "oh, yeah," that you used to say on the playground, and maybe still do.

> >The funniest part? They all have his number over there, too.
>
> Yes, and they had Jesus's [sic] number back in the Bible too.

A complete non-sequitir (that means we weren't talking about Jesus). And you sir, are no Jesus.

> >You can get the newsgroup posting out of the idiot, but you can't get
> >the idiot out of newsgroup posting.
> >
>
> Your [sic] one to talk. I've read some of your aggitation [sic] over
> the John Mackey vs Bill Cheek NG's You do your share of the idiot post
> too!

Really? Now if you go back and check you will find that I only posted in a.f.j.m., thus keeping my remarks out of non-concerned ngs. I also asked participants to reconsider responding to certain parties in an attempt to curtail the flame war. I also spoke to the excessive cross-posting. And finally, I wrote a lengthy piece exposing the prevarications of one of the participants. I received several compliments on that piece, and the ng has been virtually silent since then. So which posts were the "idiot" ones you had in mind?

Over here, I offered some help to you in your difficulties with a certain poster. I offered some help to you in your questions about rg stair and ka strom. I offered some help to you in your struggles with your identity. For that I am rewarded with silence. You certainly have a strange way of picking out what posts you're going to respond to.

I'm glad to hear you've read my posts. Now you know who I am and what I am. So, if you want to try and compare bonafides with me, go right ahead. You will be very unhappy with the result. You'll be better off

listening to what I say and learning something.

Now that my FT-1000 is in hand, albeit with a tiny R-4 vertical, listening in is thrilling. Not to speak of talking, a keystroke away with the automatic tuner. In my 50 years, ham radio has never been so easy.

In this positive vain, I heard a few guys talking on 313. One was pouring out his heart about Internet defamation. Because we talk about the subject in this NG, I decided I had something to offer, so I broke in with my call, W4ASX. They handed the platform to me quickly. So far, so good.

I observed that most Internet tiffs won't necessarily yield damages, which cannot be quantified, in court. A fundamental point, not difficult to follow.

The response was incomprehensible. The ham, whose call I'll keep anonymous, was hostile, acting as if I had jammed or was otherwise stirring up trouble. I had all I could do to bow out courteously.

I had been warned that this would happen. Even with a spiritual bend, I came close to being doomed as one of those "unsavory characters" who receive action from Riley. What a set-up!

Bob Sherin, W4ASX
Miami, Florida

Sounds like just another obsolete sorry excuse for ham radio.

You know Burt, you really have to wonder if these folks actually
think this 1930's style messaging is relavant today. It speaks
volumes of just how backwards ham radio is in this age of
Tera-byte communications! I often wonder if we look like a
bunch of "Amish farmers" to the rest of the technological world.

>Welcome to ham radio-set your watch back 40 years

No, try SIXTY(60) Years.

Since I think that Seymour now has a computer and I will not confront him on .313 for obvious reasons, here goes.
Dear Seymour,
Yesterday while doing paperwork and SWLing .313 on my Kenwood R1000, I heard you make a disparaging statement about me. In fact it was a goddamned lie and this is to tell you unless you keep your trap shut about me in an attempt, along with your cronies, to sway Mr. Hollingworth's opinions, I'm going to tear you to pieces on this board. This is my first and last warning so wise up.
I have NOT been on .313 for weeks nor will I return because of these reasons: (1) it's inhabited by schmucks who just MIGHT have some influence with Riley H. who has been led into believing they're not schmucks (2) there is absolutely no sense in staying on a schmuck-ridden frequency while hoping unbraindeads show up.
Now despite your knowing my sentiments, you had the gall to allude to me, AF2Y, as the person who is NOW bothering your pal Queenie and I would expect that either you or one of your idiotic comrades in RF will have by now registered a complaint about me to Riley H. And for all I know, he may believe it since I feel that a .313 conspiracy of schmucks certainly created letter number one from him and may have had an important role in the second too.
Let me set the issue straight Seymour. In 31 years of hamming, never have I ever received an official ONV or NAL for intentionally interfering with anyone. The ONV in Nov.92 had to do with excessive testing while the word INTERFERING was never mentioned. Where did that accusation come from? From two of Herbie's hacks, N4IIA and W4OMC who fed the info to TSRAC (Triple States Radio Amateur Club) who's president published it in his bulletin. Defamation had me go to a lawyer who demanded a retraction from TSRAC after he saw for himself that no mention of interference was on the letter from Kingsville. In the meantime, QST picked up on the lie and published it. Had I known about it THEN, the same demand for a retraction would have been issued but apparently at that time I was not a recipient of that magazine. TSRAC not only retracted but sent me a letter of apology. The President of it also sent stern warning letters to N4IIA and W4OMC telling them to keep their distance from that organization and the case was closed. My letter of explanation to Kingville was accepted also.
Regarding Riley's two letters to which you constantly allude while talking to your cronies, especially to Golf Pro Stevie Wonder MXL from Fort Myers, the first one NEVER cited any instance of intentional interference on my part. It was a warning based on the following: heavy jamming was DFed to North Jersey. The .313 clowns decided that since it was coming from North Jersey, it HAD to be that of AF2Y and told Riley so. Riley in turn e mailed me and although I was angry as hell about the inference, I merely suggested that he come to my location to see for himself that it certainly wasn't me

doing it. Furthermore I gave him the calls of two hams whom I suspected and offered to personally call one but couldn't find the telephone number. I then gave him info on a ham in this locale who could furnish the number and so on and so forth. What happened after that I do not know but I do know that for one reason or another, he held a grudge.
Regarding letter two, never did I interfere with Polly and MXL. In fact when the Memphis Moron was talking to MXL about it, Bob replied, "I never heard AF2Y on the frequency." What does that tell you Seymour? Do you think I'm dumb? Do you think that after getting letter one I'd be dumb enough to put my ticket on the line over POLLY? I was to jeapordize my ticket over this low class redneck fool? Come on, Seymour-you know better than that YET you constantly talk it up on .313, don't you? And you do so after proclaiming time and time again, "I know I shouldn't....I won't..I can't..better I hadn't...BUT YOU STILL DO! And to be honest I'm sick and tired of your sneaky bullspit, you putz and a half. Stop playing Mary Poppins while shoving a shiv into my back.
How fast you forget that I personally called you after your lung operation to wish you a fast recovery. Why did I do it? Was I forced to? I WANTED TO because I was interested in your welfare. You had always come across as a pleasant type of guy for whom I had no animosity and now I discover you were and still are a wolf in sheep's clothing.
I would like to believe that a man your age is able to think for himself instead of being led around by liars and troublemakers but alas I know you're just a gullible follower.
Now Riley has made it clear that he will not tolerate my argumentation on .313 which I RESPECT 100%.The man is perfectly right and I apologized for it. Unfortunately however he seemingly refuses to do anything about those who INSTIGATE which is just as bad, or so I thought. And it turns out that you, Seymour, Mr. Innocent who wants to avoid all trouble, are an instigator. No, I'm not going to send Riley an E mail about it but dammit, this one's for you because if he won't let me defend myself on ham radio then it's going to be on the Internet. If you don't stop trying to create trouble for me with Riley by lying, insinuating and blaming, then you and I are going to have one dandy time on this forum as I deliver and you accept. I hope I've made my point.

When the traffic nets go, so does ham radio. I remember a few years
back while I was at this hi-tech communications site out in the middle
of the Pacific ocean. We had all this hi-tech and very expensive stuff
at our disposal. Which didn't work half the time, and half worked most
of the time.

How was traffic passed between sites? HF radio, voice and CW. Oh well.

>I don't want to defend this guy in any way. But notice the same old
>"we say you are guilty therefore you ARE guilty.

Not so. A Notice of Apparent Liability is just that -- it says
"you APPEAR to be liable for a monetary penalty because...."
This is no different from any other administrative or crininal
charge.

If the accused does not "plead guilty" by paying the penalty,
the burdens of going forward to an agency evidebtiary hearing or
a court trial and proving the offenses charged is always on the
government.

An intermediate step is to allow the accused to tell
his/her side of the story to allow the reviewing official to
mitigate or cancel the penalty before proceeding to trial/hearing.

>Now YOU prove you are not.

See above.

>And, oh yes, we get to confiscate and you try to get it back"

Urban legend.

The FCC does not CONFISCATE equipment.

The US Code allows equipment to be SEIZED by the US Marshal
only when ordered to do so by the U S District Court. In
practice the court will not issue the warrant unless the FCC
proves its case beforehand. The U S Attorney must institute
formal proceedings in court to have the equipment FORFEITED,
and the government must prove that the equipment meets the
requirements of the Code for forfeiture - equipment used in
violation of radio law or equipment that does not have required
type authorizations. Of course, the owner of such equipment
gets a "day in court" by being given the opportunity to tell the
court why the equipment should not be forfeited. It is then up
to the judge to decide whether the FCC has made its charges or
not. The reason that very little seized equipment is released
back to the owners is an indication thst the FCC gets the
accused "cold".

>Where is innocent until PROVEN guilty?
>Doesn't that require a judge of some sort? Where is the old fashioned

>process of accusation, trial, decision, judgement, assigning punishment?

It's all there.....always has been. See above.

Sure, but one of them is superfluous. The built-in tuner is almost certainly coaxial only and has a limited range of impedances it will match. Best use would be to get to the phone part of the band on an antenna cut for CW, for example.

An external tuner will usually cover a wider range of imedances and with a balun will allow the use of open wire feeder and the antennas that require that feedline.

If using the external tuner, just bypass the internal, because the external is transforming a complex impedance to 50 ohms, rendering the internal tuner unneeded.

The internal tuner will tune quicker and easier than the external, however with the external tuner you may have presets labelled that will allow you to rapidly return to a particular antenna/feedline setup whereas the internal tuner has to start from scratch each time. Still generally faster, though.

Actually, neither one is THE best, and many stations have both for different applications. Make sure the external tuner has a bypass feature.

Burt, please don't paint the entire ham canvas with the same brush. In a way
you're right but in a way, Soooooooooo wrong. Years ago I used to belong to a
net called East Cars on 7.255 which I left because I discovered they were
the most conceited dumb s.o.bs to ever hold tickets. A useless conglomerate
of incompetents who did nothing but try to make themselves important for
just $3 in yearly dues. I left mainly because of one incident. Get this. I
think it was in 1975. I had made arrangements for Dayton a year before and
decided to include a side trip to Nashville to visit that great city and
take in Opryland and the Grand Ol' Opry as well. The trip to Tennessee went
off well and then proceeded to drive north to the Dayton hamvention. After
about 3 hours at the Hara Arena for the second straight year, I HAD it,
hopped in the buggy and drove south to Cincinnati to take in an afternoon
Reds game at Riverfront Stadium. On the way I was tuned to 7.255 and asked
if anyone in North Jersey would run a patch to my wife and the service
control said, "Now let's see. I don't have you as a dues paying member so I
can't help you." The jackass was 100% wrong but just the idea of ham service
dependent on a buck was awful. So that's one example of your being correct.
But a few years ago I had an experience on 20 meters which tells me you
generalize too much. I was on 14.310 and heard an SSB MAYDAY. A fellow on a
vessel was in trouble off the Baja peninsula. I went to 14.300 to alert
Intercon and a few of their members came up to .310, got the situation in
hand and saved his life. And so ham radio traffic nets reflect elements in
everday society. Some worthless. Some worthwhile. Some VERY worthwhile.

Source record: 115628

To those friendly hams out there, sorry my allegation (the head thread) stirs conjecture. Tom, KE9RY, with whom I've shared great moments, has no connection. To prevent shaking the status quo (a regulatry no-no these days), I am reluctant to release identity. The episode took place this morning at about 8 AM, EST.

For this predictable reason, I've been beating the drum on Due Process, because it is all to easy for observers to get the wrong impression. Then, as the allegation is relayed around, magically turning fact, it reaches the top, at which time it's acted upon officially--and ratified by a grateful ham community. Meanwhile, the poor, dispensable ham, who should enjoy the assumption of regularity, is thrown on the defensive.

Actually there is no such thing as a antenna tuner. What you have is a
jumper tuner, or for the purist's a impedance transforming device.

AF2Y for all your hollering and tomfoolary, the fact is you have received three letters from the FCC. One for your telephone interference ???? session of tape playing on 14313, and the other two for diliberate inteference to ongoing qsos.

How many time are you going to be allowed to interfere with amateurs before the FCC decides to pull the plug on your "Radio Fun".

The best thing for you to do, is to nstop the qrm and run a law abiding operation . If you are not able to do this, maybe it is time for you to find a new hobby.

Just quit qrming , its as simple as that.

You can post your silliness here with out harm to any one, keep doing it.

>
> It is OBVIOUS, trained operators? Hobby? Try again. It is only a
> hobby in your mind.....

I think you would be hard pressed to prove that ham radio is anything
but
at hobby in court or to any thinking non-ham. If you have an interest
in continuing this hobby, you best hope and pray that everyone continues
to believe it is a hobby. Because if anyone starts to look at it as
a service it would be shut down in a heart beat! Because it doesn't
work
any more! Not as a service.

Hams own about 6.5% of the freqs between 50-2000 Mhz which is where the
real value is. My guess is that is a fair exchange for what WILL BE
added
to the state of art by hams. This is provided that the FCC lets us
advance
the state of the art. If you are one of those who think that your run
of the mill ham can't advance the art, think again. Times are changing,
but hams are also changing. The next advances will be done using a
keyboard
instead of a voltmeter and O-Scope. Hams can still make a difference.

Don't let the ham get stuck in the past, because there is so much future
to it. Code test drags down the hobby. Written test should only be
enough
to make sure the ham knows the rules and won't kill someone using the
radio.
Maybe the test is OK the way it is. It does make sure you are smart
enough
and commited enought to learn to pass it. I also think it helps kept
hams
from abusing the privs. Code does do anything to advance the hobby. No
one has came even close to proving that! But I am sure it has excluded
people
that could have advance the hobby greatly.

Soon to be a Digital Age Extra

Your point is? Just because they were incorrect in 1922 doesn't mean
they will be incorrect now.

This is actually a blessing in disguise Doc.
Your correct in you observations, and with
some luck, Seymoue "Mack" will be soon dead of a
painful brain hemorrhage, or wind up in a
nursing home with 8 tubes plugged into him
and a Foley catheter up his bung. (grin)

Well said Paul. With CORBA and such many of the functions of the
radio is going to be moved to the computer in such a way we well
be able to inprove on the state of art. Just like in the old days.

It wasn't Captain Truth.

It was another rather well-known ham.

Seems that the famous "Mexican Qso" and "Hyena Laugh" and
"Dot-Matrix" printer tapes made an extended
visit on 146 mHz.

There's an ongoing discussion about having guns on a boat. Primarily when entering foreign ports. Some countries take a very dim view of foreign vessels with guns. If you are found to have firearms on the boat, it's "Midnight Express" time...

2656. Spam200: Read My Rewrite on rec.radio.amateur.policy

Spam2000,

Good question. Yes, the crucial component of continued recovery.

Please take note everyone that a drastic rewrite of the subject satire appears on rec.radio.amateur.policy. Like everything I write, polish takes hours and days. If you're interested in the story, please read the rewrite.

>added to the state of art by hams. This is provided that the FCC lets
>us advance the state of the art.

If you find yourself wanting to conduct research in an area that's
prohibited on the ham bands, there's nothing preventing you from
applying for an Experimental License from the FCC.

>Don't let the ham get stuck in the past, because there is so much future
>to it. Code test drags down the hobby.

With that, your argument falls flat, for there are no code tests required
for the real estate you feel has the most value.

>Hams sign a one-sided agreement with the federal government
>that opens them up to administrative procedings thus bypassing
>due process.

Misinformation.

ANY person who does things regulated by the agency is subject
to administrartive proceedings shether they have a license or
not.

Administrstive proceedinhs ARE due process - one is given
notice of the offense and the opportunity to respond and
present evidence in his/her behalf as to why the proposed
penalty should ne mitigated (reduced) oe cancelled. If you
mean "court proceedings", the results of administrative
proceedings can be appealed in the courts if the accused feels
that the Administrative Law Judge did not follow the rules.

>All good reasons not to get a federal license in the first place. It
>is the voluntary license that allows the assault on hearth and
>home with the 'forfeiture' of equipment.

More Misinformation.

Unlicensed operators are subject to sesrch and seizure by court
order (warrant) just as licensed operators are. In fact, the
prima facie case necessary to secure the warrant(s) is a lot
easier to make when the person is unlicensed.

The US Maritime Academy now teaches its cadets methods of piracy evasion.
The South China Sea is ruled by some very vicious and well-organized
pirate groups, who will board a cargo ship in a stealth manner, murder
or send adrift its crew, then steal the ship and sell its cargo. It's
amazing that this is still taking place in this day and age.

I didn't know you could write in polish. Damn, you're one bright dude. In fact I never knew the polish could write polish either. Damn, they're dumb dudes. But all kidding aside Bob, polish, Polish or whatever, don't let posting become laborious and painstaking because the majority on this forum are illiterates anyhow so why break your butt? And let me tell you about the Polish. Say whatever you want(Archie Bunker did a number on them), I never met a Pole on welfare. They are the hardest working people I ever encountered and if the entire world had the Polish work ethic, this would be a much more productive orb in the vast darkness of cyberspace or whatever. You know why so many Polish names end in "ski?" Because they can't spell "tobaggan."

Constitutional feelgood fuzzies be damned, the glitch in the system is
that an accused private individual does not have equal access to the
legal expertise behind his defense as does the gummint in it's
prosecution. It strikes me that an accused perp who makes $30k/annum
and has to pop $10k in legal expenses in his effort to keep his butt
out of a sling is coming from 'way behind in a brawl against an
accuser whose budget next year will be $1.8 Trillion. Give or take.

2685. Ham radio aids victims of pirate attack

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-31 00:00:00 UTC
From: wf3h@ptd.net
Message-ID: <38e3ffaf.183775957@news.ptd.net>
Source record: 115553

Mayday calls to the ham radio Maritime net are not exactly rare, but on Tuesday nite one came in that was unique. I am a net control, but that wasn't my nite on duty...I was monitoring as KH2TD, Jacco, came on freq and stated his family, while sailing off the east coast of Honduras, was attacked by pirates. His 13 yr old son was shot in the abdomen. He was unsuccessful at raising help on the maritime freqs and asked for our help.

The response of the ham community was overwhelming. A division of labor was quickly established. One called the USCG, another brought up a ham physician who gave medical advice. Another made contact with the Honduran navy.

It became apparent help was going to be difficult to get. The incident happened late in the afternoon. The USCG does not operate in that area, and the Honduran navy, when they came up on freq, stated they do not have resources for night time operation.

Hams then called several oil rigs to see if they could assist by helicopter. Unfortunately this was not possible.

Our only option was then to continue to offer morale support, and maintain contact with the Honduran navy.

At daybreak Wednesday the navy launched a vessel with medical personnel. The boy was transported to port in Honduras and flown to a hospital. Latest word is that he lost a kidney and has spinal damage, but is out of danger. Tonite (Thurs), his father finally made landfall on his sailboat, and has a 7 AM (Fri) flite to join his son. Several US hams are attempting to expedite transport to a trauma center in Miami.

Additional info is available on the ARRL website.

I guess ham radio isn't dead or dying after all! I don't think I should
believe
the crap going around about ham radio about it dying anymore.

Let's hope none of us need this type of assistance, and I hope for the best
for Jacco and his son.

Are you maintaining that the only reason people participate in these groups are to threaten and harass one another? That if people weren't allowed to threaten and harass one another they wouldn't post?

What a strange concept! Actually, if the threats and harassment were to end many of us would find the groups more enjoyable.

2690. Heard on 28.085 today (3/30): CB outbanders vs jammers

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-31 00:00:00 UTC
From: toomanyradios@aol.com
Message-ID: <20000330225259.17590.00000442@nso-ch.aol.com>
Source record: 115558

After reading the recent postings regarding unlicensed invaders onto the lower portion of 10-meters, I decided to give it a listen today. Very interesting goings-on, to say the least.

First, during the mid-morning hours, I heard what I presume to be two over-the-road truck drivers on the frequency. They were using AM, no callsigns, talking about trucking activities, etc. Also heard at the same time was a second unidentified station, apparently trying to jam the two truckers. The "jammer" was using what sounded like a tone generator, being continuously turned up and down throughout the audible frequency range to create an annoying sound effect. This continued for well over a half hour.

Later, during the afternoon hours, I heard two different unlicensed operators. These also were presumed to be truck drivers...and again, they were being interferred with by a jammer. This time, the jammer was playing what sounded like a tape loop of Morse code at high speed. Not to be confused with a *real* CW contact, this was no doubt a repeating, pre-recorded tape...and was being transmitted on AM...over and over and over again.

After hearing all of this, I had to double-check and make sure 28.025 wasn't the second harmonic of 14.313 :-)

That's why it's so very important to conduct all dealings within your
life in not just a clean manner, but indeed, squeaky clean. Give no hint
of impropriety, and you'll never have to worry about being falsely
accused of anything. Being a model citizen costs nothing.

2698. A Satire: W4ASX on W4ASX

Newsgroup: rec.radio.amateur.misc
Date: 2000-03-31 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <13281-38E45305-44@storefull-241.iap.bryant.webtv.net>
Source record: 115566

His deep voice reverberating in speakers worldwide, Trist Merman, WA1COD intones: "You're listening to Network NinKnee, hours ahead when minutes will do.

"You're tuned to world news. At week's end NinKnee dispatched a jump team to Russia in another rescue mission, this time to save the country. Our last in January to New Guinea was an unqualified success. NinKnee succeeded in brokering peace with only its microphones and keen understanding of human nature. A stunning achievement.

"And now, the ham of the hour and of every year," Trist says, reading from his script, "probably the most famous ham in the world, the incomparable, unparalleled Len Master."

"Why thank you for those spontaneous words, Trist. Tonight we're going to give you the inside track on Part 97. Forget what the FCC says; in the loop, we have the story right here at world headquarters in Mechanics, Maine.

"My guest tonight calls himself a distinguished talk show host. (Agitated) Golly, I'm the only distinguished talk show host here. I'm the founder of NinKnee, the leader, the pioneer. You can become a member and get a free credit card as well as life insurance at bargain rates.
(Composed again) Let's take a break for our guest. But stay tuned for the honest truth, my views.

"And now here's the Caribbean mouthpiece, celebrated contest-winner, consummate communicator who pushed the frontiers of telephony to the federal courthouse, Blurb Honetree. Welcome to our microphones, Blurb."

"A pleasure to be here; after all it is legal for me to talk with you by telephone," says Blurb convincingly.

Picking up the cue, Trist cuts in, turning off Blurb's mic. input, "Speaking of telephones, you know that I've done the most famous interviews in the world. What I do here makes Barbara Walters' stuff look like childs' play. I saved Mexico City after the horrendous earthquake, have' been toasted in the Maine legislature and proclaimed a hero in their record. I've been received by the KGB in Moscow, have signed a monumental accord with the Young Communist League and--don't forget--the Bib Seron eulogy on our birthday show, 'Cheers from the Kitchen.' (Aside) Bib, I'm still touched. (Serious) I'm the Larry King of ham radio but better."

Blurb (emphatically): "Let me get a word in edgewise!"

"No, wait your turn. When I formed the well respected KneeNee,"--click. Len trails off as Blurb hangs up.

Undaunted, Trist continues, "Thank you for calling, Blurb. (Pause) I understand you had another call. (Circumspect) For my listeners circling the globe, this show can go on unattended, without a guest, without listeners and without the blessing of the FCC."

So much for my fictional account of life before Riley Hollingsworth, Esq. I hope you've enjoyed as many side-splitting laughs as I have, committing these musings to posterity.

The bottom line is, I don't take himself any more seriously than my fictional characters.

Hams sign a one-sided agreement with the federal government
that opens them up to administrative procedings thus bypassing
due process.

All good reasons not to get a federal license in the first place. It
is the voluntary license that allows the assault on hearth and
home with the 'forfeiture' of equipment.

Cute stuff indeed and for anyone who doesn't understand, SATIRE means a device using sarcasm to expose the truth. NinKnee stands for "ninny" or silly. Trist Merman stands for Chris Berman. Len Master does NOT stand for Len Schaier who probabaly had a fit reading it. It means Glenn Baxter. Blurb Honetree stands for Herb Schoenbohm. Get it? Good, now turn to page 2 and we'll teach you all about the letter B.

Dear YLs and OM,

DTC's regular Morse exercises transmitted every Monday at 19:00 h
local time in DL on 3575 +/- 3 kHz are available on the Internet as
well, being in downloadable MIDI-file format.

Currently three speeds are offered for download:

Speed "90" (= 18 wpm): http://www.muenster.de/~dtc/nr16_90.mid

Speed "60" (= 12 wpm): http://www.muenster.de/~dtc/nr16_60.mid

Speed "45" (= 9 wpm): http://www.muenster.de/~dtc/nr16_45.mid

Speed "90" (= 18 wpm): http://www.muenster.de/~dtc/nr15_90.mid

Speed "60" (= 12 wpm): http://www.muenster.de/~dtc/nr15_60.mid

Speed "45" (= 9 wpm): http://www.muenster.de/~dtc/nr15_45.mid

Hoping you'll have some fun decoding either on the air or from the
Internet, you may check out your capabilities in decoding Morse. For
ease of reference the content of the Morse code transmission / file
may be accessed at DTC's web site using

http://www.muenster.org/dtc/cwtext.html

Your opinion and suggestions are welcome: dtc@muenster.org

You take a blurb, a sentence from the New Testament, turn it into a religion
and then have the audacity to not only knock every Christian demonination
who doesn't adhere to it but try to Christianize the Old Testament. Loony
birds are what you are. You try to turn a democracy into a theocracy. Try to
dictate what kids can read in school and what networks can show on the tube
and what Hollywood can show in theaters and demand that a woman surrender
all rights to her own body. DANGEROUS is what you are.

It's pretty common for truckers to do this, I know because I am a
truck driver.

I have been driving for about 3 years. For the first 1 1/2 years I
used the modified "10 meter" radios because of the frequency range and
higher power. I never operated in the 10 meter or 12 meter ham bands
with it, mainly because I didn't have a second antenna or an antenna
tuner. But about that long ago I started looking into getting a ham
license. I did some thinking about what was going on. I didn't like
what I heard on the radio anymore, and I didn't like what cb shops
were doing with equipment. So I decided that any change should start
with me. I opened up the case on my Galaxy and fried it. I didn't
want to sell it to someone else who would only use it, and I didn't
want to use it anymore myself. I started using a stock Cobra 29 cb
from that point on. A month ago, I finally took the test and this
week my Tech silence was granted.

The problems with the modified radios and amplifiers with truck
drivers is one of the easiest to solve. I don't know why the FCC
hasn't done anything about it sooner. I suppose if something like the
bill in congress that allows local law enforcement to enforce FCC regs
on cb'ers is passed, it will make it easier to do. But all that has
to be done is for them to set up shop in a weigh station. They
wouldn't even need monitoring equipment. All they'd have to do is
stand at window level and look into the cab when the truck stops. If
they see non-type accepted equipment, park them and remove it. That
simple. If this was done sporadically in key locations over one or

two years, they could almost wipe the problem out. If they also went after the cb shops, that would put the nail in the coffin. Truckers are a fearful bunch. They hate the DOT and they hate scales. They never want to be scrutinized by any of these guys, for any reason. Add illegal radios to the list of things to be afraid of in a scale, and I guarantee usage will drop quickly.

Tell that to the father who was gunned down in Pasadena, TX when
the swat team accidentally chose the wrong address. Unannounced,
someone broke down his front door. He reached for his shotgun
to defend his family from the unidentified intruder and was mowed
down in a hail of bullets. The police said, Oops, sorry, wrong address.

You have a monopoly on prayer? Like hell. I am a Jew who recited high school morning prayers for my home room for 4 years and it made no difference from what Testament they were derived. Do you actually believe that in Christendom, Catholics, Lutherans, Episcopalians, Presbyterians and so on and so forth place less value on high moral standards than you sanctimonious slobs? Do you believe that non-believers in Christ such as Jews, Moslems, Hindus, Buddhists, Shintoists and so forth and so on lack those same values that you boast about as BELONGING ONLY TO YOUR MOVEMENT? DISPLAYING the Ten Commandments is a big deal? You take credit for such absurdity? If anyone should take credit, it's the Jew since God gave those Commandments to Moses, not Jesus. All the latter did was to emphasize what the Jews had been teaching for thousands of years before he ever arrived. Better you ought to live by them instead of claiming them for yourselves. Religion need not be worn on the sleeve; it belongs in one's heart. You want to take credit for something? How about killing doctors who commit abortions? That's okay with you and yours, right, because you fools think you have been mandated by Jesus to bomb and assassinate. Abortions are not illegal in the U.S.A. BY LAW, but not to YOU and being that you think that you're God's gift to mankind, they must be STOPPED independent of the feelings of the parents or just the mother. Want to take some more credit? How about all these shortwave radio nutty pseudopreachers and militia fools who want to create a revolution here under the guise of "Jesus wants it?" Those armed saboteurs belong to YOUR MOVEMENT not mine or anything else's related in or outside of Christendom. Want another? YOU are the reason why so many well intended persons in this nation are being ripped off by the likes of a Pat Robertson, Jerry Falwell, Oral Roberts, David Smith, Brother Stair and their ilk. CON MEN, all of them. Need another? YOU are the reason why George W. will lose in November, YOU! That's because he caters to your every wish instead of telling it like it is as John McCain did. Remember what I'm writing--through YOUR policies of exclusion, selfishness, revolution, disobedienece and arrognace, you have torn apart the Republican Party and undermined the underpinnings of this great nation which never has and never will accept theocracy dicating to democracy. Born Agains are no better than any other Christian or non-Christian religious denomination in this country and when the day arrrives that you put down your make believe halos and passports to heaven, we'll all be better off. Amen.
